

# Minitar MVA11A

# **VoIP ATA (SIP)**

Quick Installation Guide

#### Installation & Setup

#### LAN Connection

Connect an Ethernet cable from your PC's Ethernet port to the LAN port of the VoIP ATA.

#### WAN Connection

Connect an Ethernet cable from the router to the WAN port of the VoIP ATA.

#### VoIP Connection

Connect the telephone to PHONE port and your PSTN line to LINE port.

# Hardware Installation

This section describes how to connect and configure the device.

#### Step 1.

Connect to DSL/Cable Modem or Broadband Router.

Connect the ATA WAN port directly to the LAN port of these devices.

#### Step 2.

Connect a Phone to the RJ-11 Phone Port.

#### Step 3.

Connect the PSTN line to the RJ-11 Line port.

#### Step 4.

Connect the power adapter to the Router.

Connect the power adapter to the port labeled POWER on the rear panel of router.

#### **Power Adapter Connection**

Connect the power adapter to the power inlet.

#### Configuring VoIP ATA with Web Browser

Open web browser and type http://192.168.3.1 in the browser's address box. This number is the default IP address for this device.

A user name and password prompt will appear. The username is admin and password is admin.
