

Recording Lambing on FarmWorks

From the menu bar select: **Animal Records > Lambing > Lambing** (lamb born alive) and lost (Still born or aborted).

1. Select the date the ewe lambed. Select the dam from the list.
2. If a breeding was recorded the sire's tag information will also be shown.
3. If the lamb is alive select **Lambing (lamb born alive)** or if the lamb died before tagging select **Lamb Lost (Still born or aborted)**. Dead lambs should be recorded too.

Please select the date of birth then select the dam from the grid. If no sire is specified and you wish to record one, it will be added to the dam's flock & tag number) and then enter the lamb details.

Change the date if needed.

 Mothering ability Milk at birth

Lamb
 Vigour at Birth Ease of birth

4. If the lamb is alive enter the tag number you are giving it. Select a date of tagging.
5. Use the drop down menus to select the breed and sex of the lamb.
6. Enter the birth weight of the lamb if known. If not a default weight of 4 Kg is assigned. If you are using imperial pounds (lbs) instead of metric kilogram (Kg) then ignore the Kg symbol beside the weight field.
7. Optional: Select **Lambing Difficulty** from the drop down list or enter values into **Lambing Scores**. For a full explanation of the lambing trait scoring system refer to **Lambing Scores** in the **Procedures** chapter in this user manual.
8. Enter any comment that you wish to make on the lambing and click on **Add Comment**. This comment will then appear in the main details section for the dam.
9. If the lamb was stillborn/aborted or died before tagging, click the **Lamb lost (Still born or aborted)** button and enter details.
10. Click on **OK/Save** to save after entering each lamb. Click on **Cancel/Exit** to exit the screen.
