1. Overview

WPS-Dongle 2 is a must-have device for your meeting room! It turns your existing "wired" projector into a "high-end wireless" projector. With the revolutionary Plug-and-Show wireless projection features, WPS makes every of your presentation and meeting efficient and successful.

- High Performance Wireless Projection

With the revolutionary high performance wireless projection, you can easily share the multimedia on the big monitor with friends without cable hassle.

- Easy installation

Download the software from web management page directly, or make a "Plug & Show" token to project wirelessly right away

- Plug & Show

There is an easy tool to make a Plug & Show USB Token on UI menu. Just link your PC/Laptop to WPS (through WLAN or Ethernet), plug the token into a USB port, and in seconds, your screen will be wireless projected to the connected projector!

- Macintosh(Mac) wireless Projection

WPS-Dongle 2 supports Mac client connected and projected wirelessly. By launching the Mac client software which can be downloaded from the web management page, WPS provide the same experience to Mac user to utilize the wireless presentation feature.

- 4-to-1 Split Screen Projection

With this 4-to-1 split screen feature, up to four PC screens can be projected to one projector in the same time. Thus you can easily do side-by-side comparison from four PC / PDAs to increase meeting productivity!

- Smartphone wireless projection

WPS-Dongle 2 supports MobiShow function for windows mobile 5/6 system. By launching MobiShow utility, MobiShow brings your mobile screen to big screen and which can play photos and PtG files stored in your mobile phone for presentation.

- Change Standby Screen

You can use the application “Screen Image Background Maker” to change the Splash Screen. Design the image with message you would like to present, upload it through web control page, and you could have customized starting page.

- AP Client Mode

You can enable the AP-Client Mode function to let WPS join the existing Access Point through Wi-Fi. This feature provides the flexibility of wireless network deployment in enterprise environment.

- Support PoVGA

Connect WPS-Dongle 2 to a projector supporting PoVGA, the power can be supplied directly from the VGA port without external power adapter.

➤ Features

- Support Windows Win7, Vista, XP.
- Support Macintosh(Mac) version 10.5 and above.
- Plug and Show! No installation required ... just plug in the accompanied token to a USB port, and hassle free presentation can be started in seconds.
- 4-to-1 split screen projection! Turn one projector into four, increase meeting productivity right away.
- Smartphone wireless projection! PC-less stylish presentation becomes possible!
- Provide session security login, wireless WEP/WPA key.
- Support High Performance screen projection
- Changeable Splash Screen image!
- SNMP Manager! To manage the devices easily
- AP-Client Mode! Deploy wireless network in enterprise environment easily
- Support PoVGA.

2. Quick Start

- 1) Please plug WPS-Dongle 2 into projector VGA port, and open projector power to use

- 2) Turn on WPS Dongle 2.

- ◆ When Projector shows the default menu on the screen as below, it

indicates the WPS dongle is ready now.

LOGIN CODE: 1234

Wireless Presentation System

WPS-Dongle 2

Quick Guide

1. Make sure your WLAN is enabled, and connect to Wireless Presentation System.
2. Open your browser, or enter the IP address (refer to below server IP address)
3. Click on "Download", and execute the installation program.
4. Make sure your personal firewall allows WPS software to pass through!
5. Enter the LOGIN CODE to start projection!

Server IP: **192.168.100.10** SSID: **WPS-Dongle**
Resolution: 1024x768 Channel: 1
Version: 1.0.0.0 Security: OFF

PoVGA

- 3) Make sure your PC WLAN is enabled already, and connect your PC with WPS Dongle 2.
- 4) Open your browser and enter the IP address to access the WPS web home page.
 - ◆ The default IP address of WPS is **192.168.100.10** or refers to the IP address shown on the left corner of projector screen.

- 5) Download the client software. Please select the " Win7 / Windows Vista / XP " or "MAC" and execute the installation program.
After installing the program, you will see the WPS shortcut on the PC screen.

- 6) Make sure your personal firewall allows WPS software to pass through.
- 7) Select device that your want to projection

- 8) Enter the **LOGIN CODE** and You can see the login code on the projector screen

9) Click the “Play” button to start projection!

3. Windows Client Utility

3.1 Starting Program

After you download WPS Windows program via web page successfully, then follow below steps to start.

1) Click WPS icon to execute the program.

2) Program start to search for WPS dongle automatically,

3) If WPS dongle founded then “Login Code” dialog dongle will be pop up on the PC screen.

- Searching for WPS dongle

- WPS dongle is founded and enter login code to start.

3.2 Login

- 1) After "Login Code" dialog dongle shown, enter login code to start presentation.
- 2) You can see the login code shown on the projector screen.

3.3 Main User Interface

3.4 Screen Projection

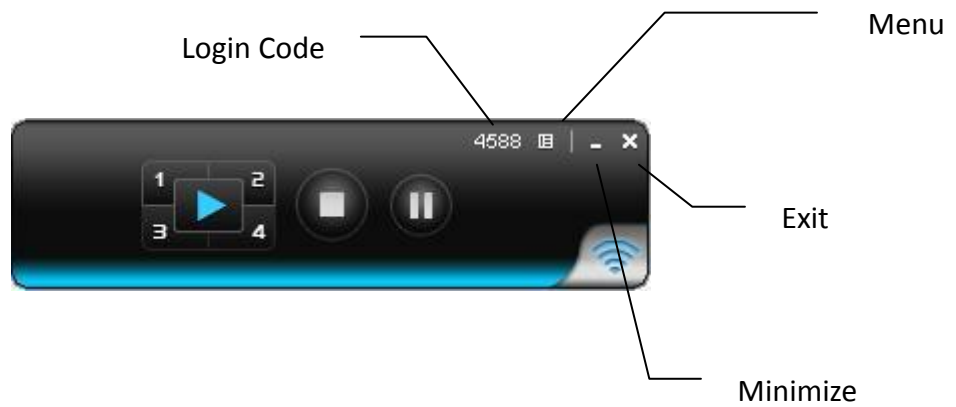

Click the “Play” button for full or split screen, you can project the main screen on to the display immediately, click the “Pause” button, you can freeze you projection screen, click the “Stop” button to stop projecting your screen,

Button	Description
	Full Screen projection
	Project to Split #1
	Project to Split #2
	Project to Split #3

	Project to Split #4
	Stop projecting
	Pause projecting

3.5 Menu Description

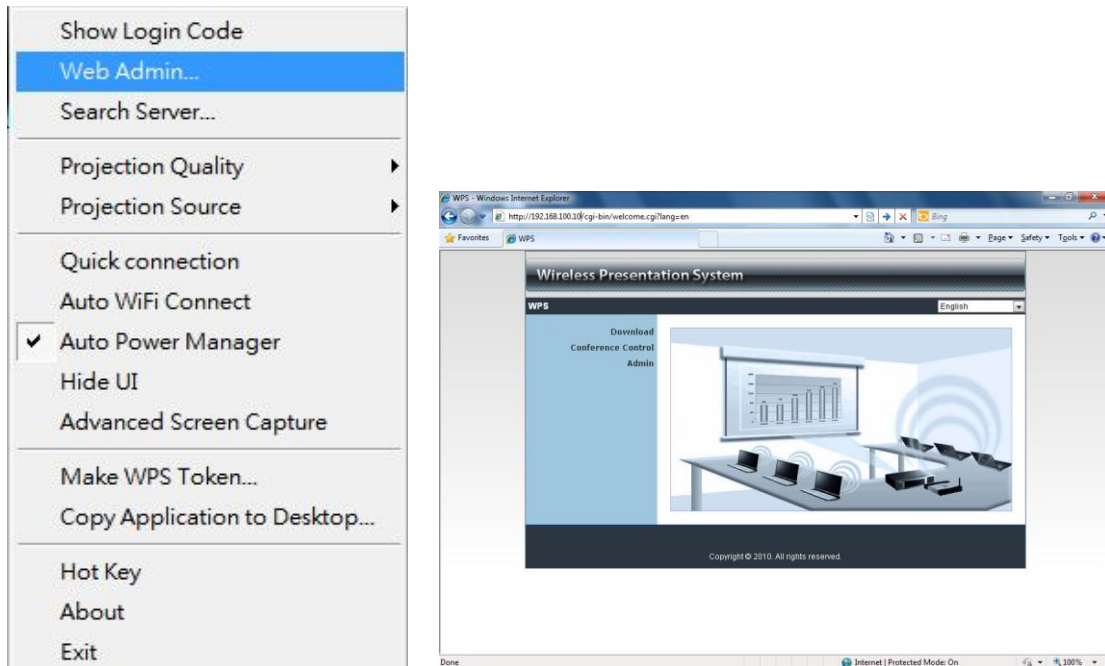

3.5.1 Show Login Code

Click **“Show Login Code”**, it will display the login code on the right-upper of desktop and close it automatically after 10 seconds. You can also click on the area to close this window manually.

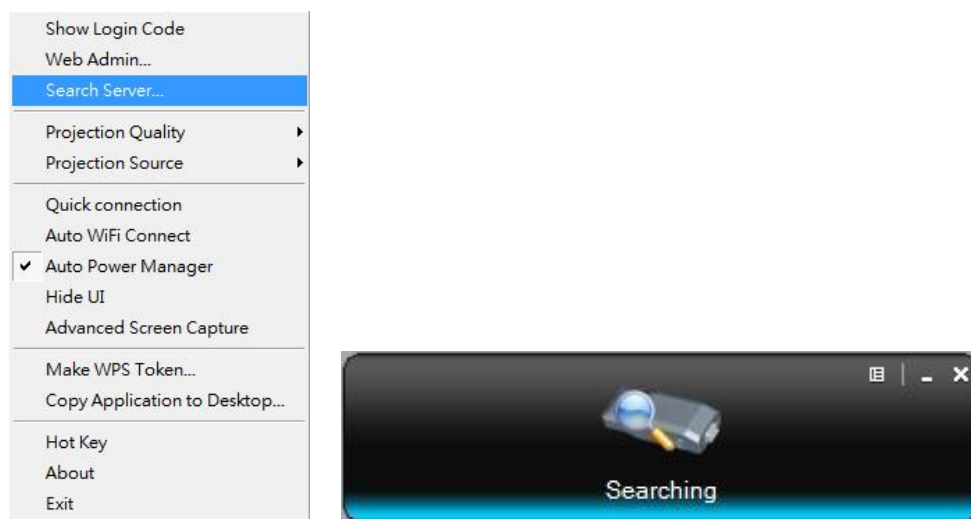

3.5.2 Open Admin Web Page

Click  to open function menu and select **“Web Admin”** management web page. The web page detailed functions will be described on next chapter.

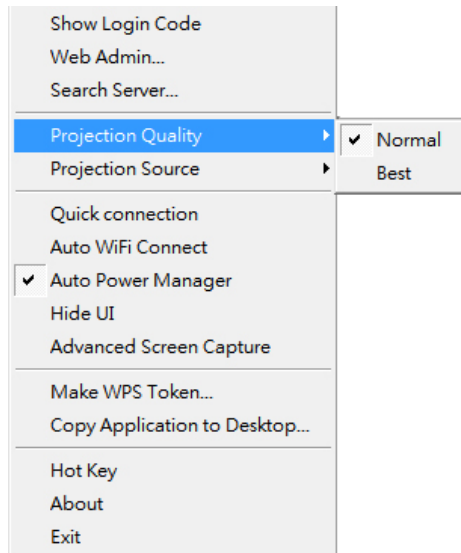

3.5.3 Searching Server

Click **“Search Server”** to re-search the WPS again.

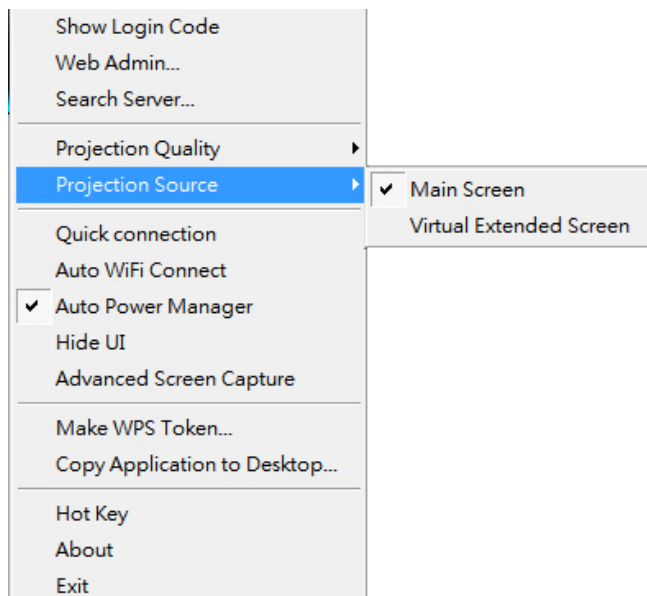

3.5.4 Projection Quality

Click the “**Projection Quality**”, you can select to project the Normal or Best for projection wording quality,

3.5.5 Projection Source

Click the “**Projection Source**”, you can select to project the main screen of desktop or the virtual extended screen.

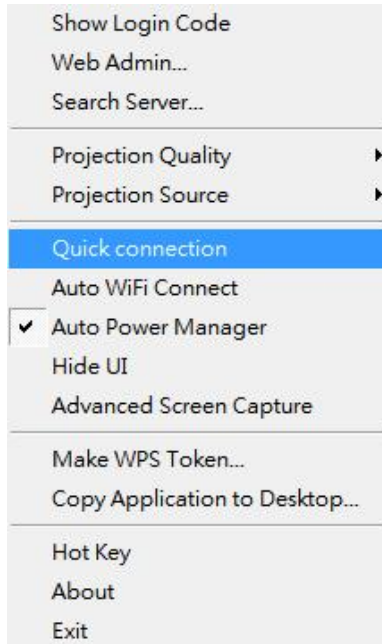

P.S: Virtual Extended Screen option

You need to install “VDD.exe” driver first which is stored in the USB token.

Note: Unsupported Win7 starter.

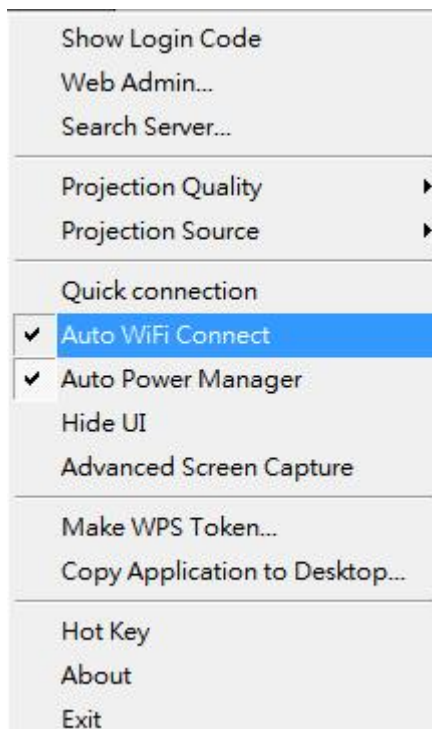

3.5.6 Quick connection

Click **“Quick connection”** to enable connect the last connection directly

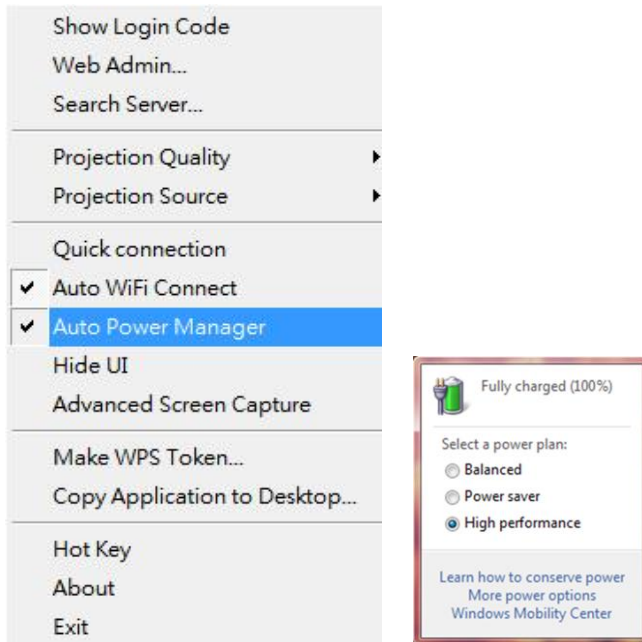

3.5.7 Auto WiFi Connect

Click **“Auto WiFi Connect”** to enable the auto WiFi discovery and connection function for quick wireless set up.

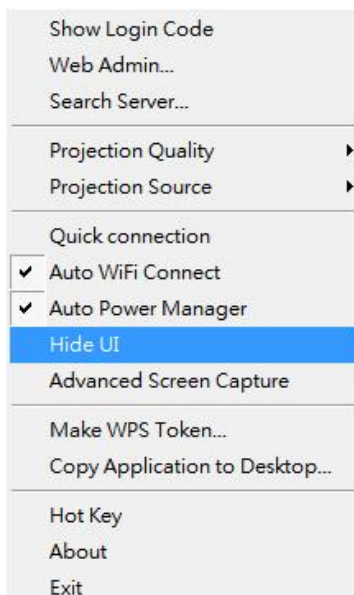

3.5.8 Auto Power Manager

To make the highest projection performance, application will turn the PC's windows power scheme from current settings to "highest performance", however, you can click the "Auto Power Manage" to enable or disable this function and restore you power scheme immediately.

3.5.9 Hide UI

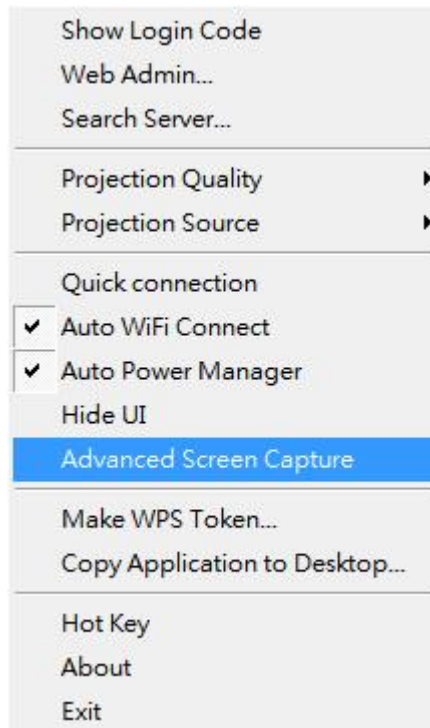

Click the "Hide UI", you can choose to hide or display the application control panel from projection screen.

3.5.10 Advanced Screen Capture

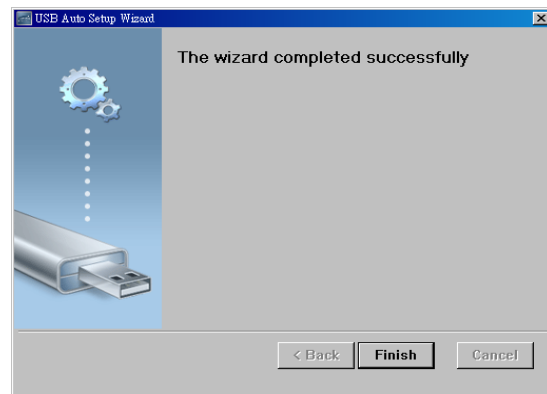

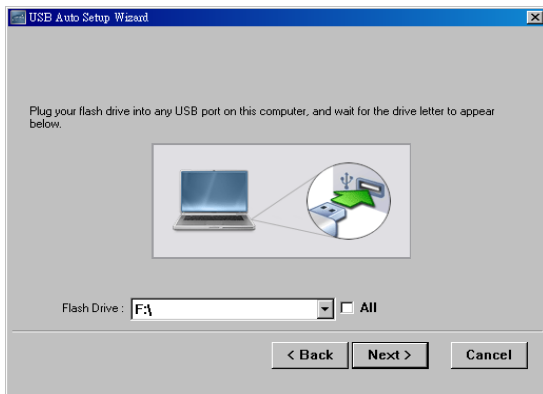

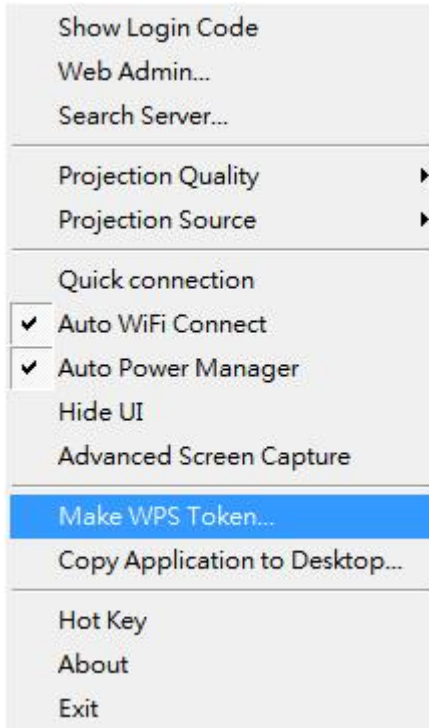

Click the “**Advanced Screen Capture**”, you will be able to see tip windows and other layered windows (include the main UI) on the connected display.

However, the mouse cursor may blink from time to time when you are projecting your PC screen!

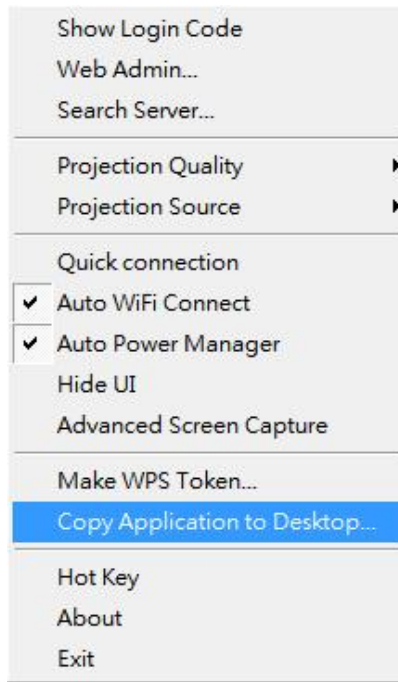

3.5.11 Make WPS Token

Click **“Make WPS Token”** to make a USB WPS Token, you can insert a USB thumb drive and follows the wizard to make the Token.

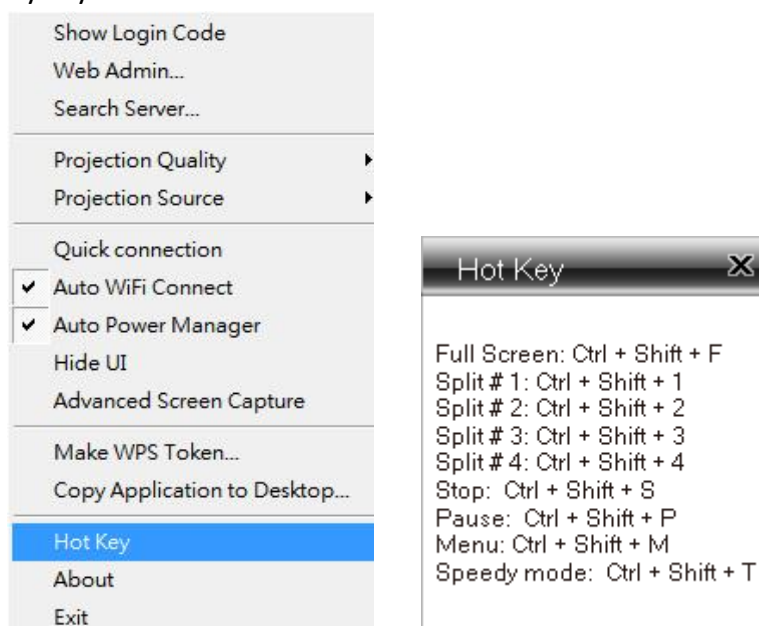

3.5.12 Copy Application to desktop

Click the **“Copy Application to desktop”**, it will copy the application to your desktop immediately even you don't have the system privilege

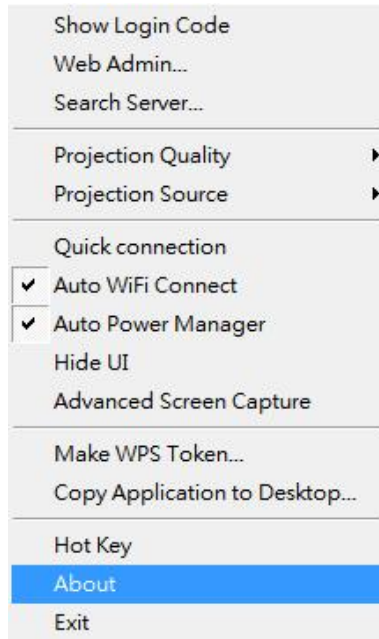

3.5.13 Hot Key

Click **“Hot Key”** to show Hot Key guide. You can use hot key to control the projection by keyboard.

< Auto-Configuration Network Setup >

The default setting of the WPS dongle is DHCP client. When the WPS dongle is connected to a LAN that already has a DHCP server present, the WPS dongle takes an IP address assigned to it by the server. When the WPS dongle is connected to a LAN

that does not have a DHCP server, the WPS dongle becomes the DHCP server in the network.

< IP Setup>

- ◆ You can select “obtain IP address automatically” or “Use the following IP address”
- ◆ IP Address: The default value is 192.168.100.10.
- ◆ Subnet Mask: The default value is 255.255.255.0
- ◆ Default Gateway: The default value is 192.168.100.10
- ◆ DNS Server: The default value is 192.168.100.10

<DHCP Server Setup>

- ◆ You can select “auto(Enable/Disable DHCP Server” or “Disable”)
- ◆ Start IP: The start IP address of DHCP Server.
- ◆ End IP: The end IP address of DHCP Server
- ◆ Subnet Mask: The default value is 255.255.255.0
- ◆ Default Gateway: The default value is 192.168.100.10
- ◆ DNS Server: The default value is 192.168.100.10

< Wireless Setup>

- ◆ Wireless LAN: The default value is “Enable”.
Embedded AP SSID:SSID string ,max. Length is 32 bytes.
- ◆ **Connect to Existing AP:** This is “AP client” mode feature. By this feature you can join others Access Point via wireless.
First, enter the existing AP’s SSID and require security key in “**Existing AP SSID**” and “**Key**”, then reboot your system. After these steps, WPS will connect to this AP by wireless automatically.
Note: The default value of AP client mode is “ Disable”, and LAN function will be disabled during AP client mode.
- ◆ Region: default value is “Worldwide”.
- ◆ SSID Broadcast: The default value is “Enable”
- ◆ Channel: to set fixed channel or Auto. The “Auto” means after power on WPS, it will scan all of wireless channel and select clear one channel automatically.
- ◆ Encryption: you can select “Disable” or one of WEP/WPA/WPA2 64bit or 128bit in ASCII or HEX string.
- ◆ Key: If Encryption is enabled, you have to set key value according to the encryption mode you selected.

<**Apply** >: press button to select this mode.

<**Cancel**>: press button to abort action.

<**Back**>: Back to Operating mode main menu.
