- Feed the safety pin through the opening next to the safety release knob.
- Fold safety pin over and pull back the safety release knob at the same time.
- Feed the safety pin into the opening at the end of the safety release knob and release the knob.
- Pull on the chicken loop to assure a proper reboot.

### LOCK-N-LOAD REBOOT

- Insert the front half of stainless steel oval ring in the Amsteel loop.
- Fold the oval stainless steel ring over the Amsteel loop and secure the end of the stainless steel oval ring into the plastic tubing of the red safety handle.

### WIND RANGES

### IMPORTANT NOTE:

The graph above shows the recommended wind range for the REV. Due to the power characteristics of the REV it can be flown outside of the range noted but is not endorsed by Slingshot. Regardless of your height, weight or skill level Slingshot encourages you to adhere to all safety notes in this user manual.
