13 SEER Condensing Units and Heat Pumps

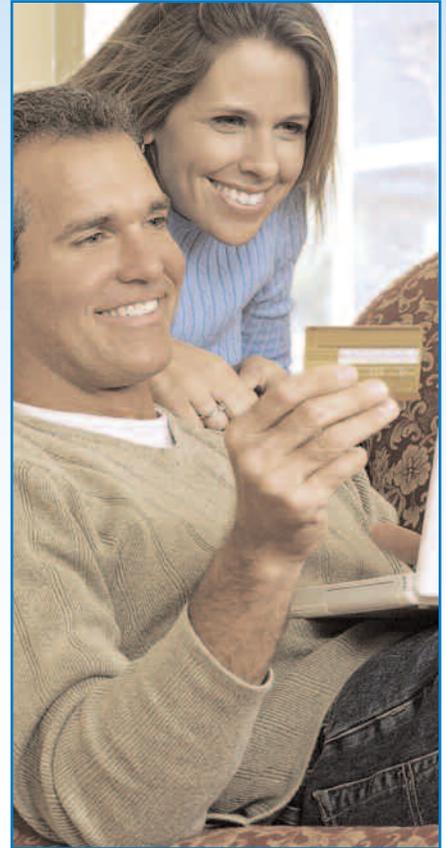

High-Performance, Energy-Efficient Cooling and Heating Systems for Optimal Comfort and Lower Utility Bills

When does comfort become too expensive? Many families are faced with this question when the weather outside turns extremely cold or incredibly hot. Your air conditioning and heating equipment must properly heat and cool your home in extreme and every-day weather conditions; but if the energy costs required to power these units is too high, your family may have to sacrifice comfort for cost savings.

A Fedders 13 SEER Condensing unit is an intelligent investment in a high-quality, high performance system, with cooling and heating capacities from 1-1/2 to 5 tons, that is both energy efficient and affordable.

If your current air conditioner 10 years or older, there is a strong likelihood the unit is operating at a lesser SEER (Seasonal Energy Efficiency Rating) efficiency than indicated on the label; taking money out of your wallet. When you purchase a new Fedders 13 SEER unit, your energy costs can be reduced and you will see savings on your *first* electric bill. In addition to conserving energy, the higher efficiency units also help to reduce harmful pollutants in the environment.

Sound Construction, Maximum Comfort

Ultra-compact 13 SEER units provide the energy-efficient, high-performance cooling and heating that will keep your home and family comfortable for years. Key features include:

- **Long-life refrigeration-grade copper tubing** and aluminum fin coils, with a fully enclosed coil guard that protects the coils from corrosion and damage
- **State-of-the-art compressors**, with a factory-installed liquid line filter dryer that helps protect the compressor from moisture and particles; extending the life of the unit/system and, similarly, your investment
- **Quiet top air discharge**, which provides noise control inside and outside the home and increases the unit's overall comfort factor

- **A G-90 heavy-gauge** galvanized steel exterior cabinet with 1000-hour salt spray, powder-coated finish that protects the internal components from debris and the cabinet from rust and the elements

- **Logical cabinet design** features a formed base with 2" ground clearance to provide an easy fit for a variety of terrains. The easily accessible control box puts the electrical controls within fast reach.

The 13 SEER products are part of a complete Fedders whole-house indoor air solution. All Fedders ducted cooling and heating products can be combined with Trion by Fedders indoor air cleaners or Herrmidifier by Fedders humidifiers as part of a complete air treatment solution for your home.

Fedders Designed Efficiency

Dependable and reliable 13 SEER Fedders products provide you with the satisfaction and security of knowing you made a wise temperature-control investment. In addition to top quality components inside the unit, Fedders houses the system in the most rugged and durable cabinet and an appliance-grade finish designed to weather the elements, avoid rust and retain its appearance for a long time. All Fedders 13 SEER air conditioning and heating products are backed by a limited 5-year warranty on the compressor and a limited 5-year warranty on all parts.

- 1 Powder-coated fan guard
- 2 PSC Direct-drive fan motor
- 3 Fully louvered outer grille to protect coil
- 4 Long life copper tubes with aluminum fin refrigerant coils
- 5 Large wrap-around coil surface
- 6 Factory-installed liquid line dryer
- 7 Formed base pan

Quality Is Paramount

When you purchase a Fedders product for your home, you have a system that has been expertly manufactured and thoroughly tested to meet the company's single, worldwide standard of quality. Quality assurance (QA) programs and quality control (QC) personnel operate at every production facility around the globe. Fedders QC personnel also visit component manufacturers to ensure that the suppliers' manufacturing processes meet Fedders' standards. In addition, by capitalizing on cost savings afforded by its global manufacturing operations, and using the latest,

most modern manufacturing technologies, Fedders is able to produce the highest quality products and offer them to you at competitive prices.

Fedders strives to create air conditioning and heating products that not only deliver a comfortable temperature in your home, but also provide comfort and peace of mind.

Annual Operating Cost Estimates

Why choose a Fedders Condenser?

A leader in indoor air quality solutions, the Fedders line of 13 SEER Remote Condensing or Remote Condensing/Heat Pump units offers customers high quality performance at affordable prices. The products are designed to offer quiet operation with high efficiencies that equate to energy conservation and lower monthly bills.

The 13 SEER products are part of a complete Fedders whole-house indoor air solution. All Fedders ducted cooling and heating products can be combined with Trion by Fedders indoor air cleaners or Hermmidifier humidifiers as part of a complete air treatment solution for your home.

Fedders produces and markets a complete line of residential products including central air systems, media and electronic air cleaners, humidifiers, air handlers, heat pump systems and gas furnaces. The Fedders line also includes window, through-the-wall, ceiling cassette, vertical split and portable room air conditioners, plus PTAC/PTHP, dehumidifiers and appliance-type air purifiers.
