DVR Setup

Please set the connected DVR encode information to make the device suitable for the mobile phone monitor. You can go to the DVR Web or go to the DVR local end to complete the setup. In this user's manual, we introduce how to finish setup at the local end.

Note:

In case the mobile phone monitor adversely affects the regularly monitor, the mobile phone just gets the extra stream (not the main stream) to realize the real-time monitor. So, before the operation, please make sure current DVR supports dual stream function.

Encode

Encode interface is shown as in Figure 3 1.You can refer to the following setup:

- **Resolution:** CIF/QCIF.
- **Frame Rate:** The value ranges from 5 to 10.
- **Bit rate type:** CBR
- **Bit Rate:** 64-256Kb/S

Figure 3-1

You can adjust the setup according to your mobile phone performance and network environment. You can lower the frame rate to guarantee fluent video if the network is not so good.

Account

For mobile phone account, please make sure it is reusable (support multiple users using the same account to login at the same time) and has PTZ control right. See Figure 3 2.

Then, when other uses are monitor properly, you can use mobile phone to monitor and realize PTZ control
operation.

Mobile Phone Software
Software Login

In the mobile phone, from Function to the Download, you can see the software shortcut menu. Now you can see an interface is shown as in Figure 3 3.

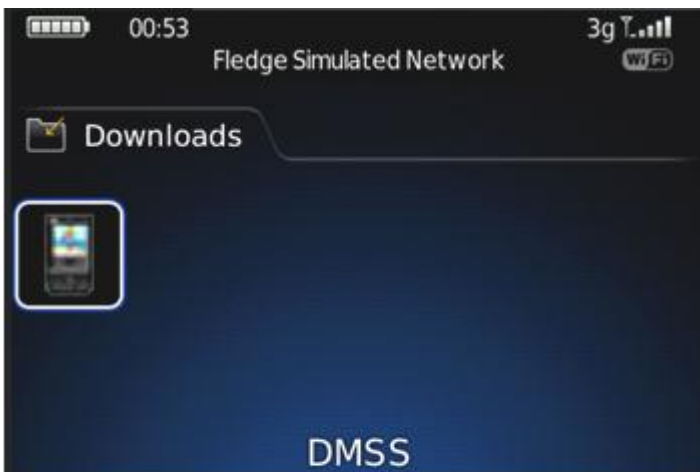

Figure 3-3

Click the ![icon] button; you can see an interface is shown as in Figure 3 4.

2

- **Device IP:** Device IP or domain name.
- **Device port:** Device login port.
- **User name: P**lease input the user name here.
- **Password:** Please input the corresponding password.
- **Network:** Please select the network here. It includes two options: Wi-Fi/Other.

Figure 3-4

Mobile phone monitor software can remember the recent login device information, so that you can login conveniently the next time.

If you cannot login, please check:

- Input information is valid.
- Server is running properly now.
- Network connection is OK (please access a website via browser to make sure you have connected to the Internet.)

Main Interface
after you logged in, the interface is shown as below. See Figure 3 5. Here you can see the channel available.

- **Back:** Click it to exit current interface.
- **Exit:** Exit the monitor software.
