# **USER MANUAL LIGHT PRODUCTS**

**Intellball / MKM / Prophecy / Luxeon / Intelstick**

## **I. User manual**

*Thank you for choosing K8. We recommend reading instructions before using our products to avoid damaging the system and to enjoy its performance.*

### **I. PROGRAMS: PROPHECY, INTELSTICK AND LUXEON**

#### **I. Color combinations:**

#### **2. Programming**

- |                     |                        |
|---------------------|------------------------|
| 1. Demo             | 7. Flash, 2nd color    |
| 2. 1st color        | 8. Flash, 3rd color    |
| 3. 2nd color        | 9. Flash, Multicolor   |
| 4. 3rd color        | 10. Alternative colors |
| 5. Degradé          | 11. Random colors      |
| 6. Flash, 1st color | 12. Stand by           |

- 1) Provides 10 seconds of each effect, giving a continuous sequence.
- 2) This program keeps 1st color constant.
- 3) This program keeps 2nd color constant
- 4) This program keeps constantly the 1st and 2nd color, giving a 3rd color.
- 5) Fade in - Fade out (slow changes)
- 6) Flash, 1st color
- 7) Flash, 2nd color
- 8) Flash, 3rd color
- 9) Flash, Multicolor
- 10) Provides continuous changes between 1st and 2nd color, each 3 seconds.
- 11) Different densities and tonalities. Great visual impact in movement.
- 12) Stand By: This effect permits to rehearse with the material turned off, and to transport it from one place to another, avoiding hits with jack plugged in.

*After 10 seconds using an effect, it will be automatically saved in memory.  
And when you turn on the product, the system will show the same effect again.*

### **3. LMR system**

**LMR system** it is built with last generation LED'S, which are controlled by a microprocessor. This microprocessor allows through a PLUG to select different colors and different light effects perfect to generate the largest range of sequences in juggling.

#### **4. Estimated loading time:**

- **IntelBall (9 effects) / MKM (Monochromatic)**  
Charging periods: 5 to 7 hours approximately  
Glow time: 1 to 3 hours
- **Prophecy / Luxeon / IntelStick (Lithium-Ion battery versions)**  
Charging periods: 12 hours: 80%, 24 hours: 100%  
Glow time: 2 to 3 hours.

**Use the switch plug to choose the desired effect.  
Avoid charging more than 24 hours.**

#### **5. Precautions**

- Keep out of very high or very low temperature
- Keep out of moisture
- Avoid the output plugs off the charger rubbing together while the charger is connected to the socket.
- Avoid blows or falls when the switch plug is connected to the product
- Avoid contact with sand, liquids and chemicals.
- Avoid excess recommended charging time.
- Use only K8 juggling chargers.

**By taking these precautions you will avoid damaging the system and all the components of the products.**

#### **6. Warranty**

K8 warranty lasts 6 months from the purchase date and covers all the manufacturing defects, materials and components, always considering a normal use of the product.

We are working in new versions of this products. This information will be updated as soon as possible. Any doubt or query, please contact us.
