Contraindications

Do not place foam dressings of the V.A.C.Ulta™ Therapy System (including both V.A.C.® Therapy and V.A.C. VeraFlo™ Therapy Dressings) directly in contact with exposed blood vessels, anastomotic sites, organs, or nerves.

V.A.C.® Therapy is contraindicated for patients with:
- Malignancy in the wound
- Untreated osteomyelitis
- Non-enteric and unexplored fistulas
- Necrotic tissue with eschar present (**NOTE:** After debridement of necrotic tissue and complete removal of eschar, V.A.C.® Therapy may be used.)
- Sensitivity to silver (V.A.C. GranuFoam Silver® Dressing only)

NOTE: *Refer to the Warnings and Precautions section of the Safety Information Sheet for additional information including details on potential risks associated with bleeding and infection. For complete information on indications, contraindications, and other safety information please reference the User Manual and Safety Information Sheet.*

V.A.C.Ulta™ Negative Pressure Wound Therapy Unit with V.A.C. VeraFlo™ Therapy

For complete information on indications, contraindications, and other safety information please reference the User Manual and Safety Information Sheet.*

Additional Contraindications Specific to V.A.C. VeraFlo™ Therapy:
- Do not use V.A.C.® Dressings with Octenisept®*, hydrogen peroxide or solutions that are alcohol-based or contain alcohol.
- Do not deliver fluids to the thoracic or abdominal cavity due to the potential risk to alter core body temperature and the potential for fluid retention within the cavity.
- Do not use V.A.C. VeraFlo™ Therapy unless the wound has been thoroughly explored due to the potential for inadvertent instillation of topical wound solutions to adjacent body cavities.
