wiFi

Bluetooth

1 A standard GSM/GPRS/EDGE infrastructure, Wi-Fi, other Bluetooth-enabled devices, separately purchased equipment, and a service contract with a wireless airtime provider may be required for applicable wireless communication. GSM/GPRS/EDGE Wireless Internet access requires separately purchased Internet service contract. Check with service provider for availability and coverage in your area. Not all web content available. GPRS/EDGE may not be available in all networks. GPRS/EDGE data transmission speeds may vary based upon network capabilities and other conditions. Establishment and continuation of a GPRS/EDGE connection depends on network availability, provider support and signal strength.

2 EDGE (Enhanced Data for Global Evolution) is a global standard for wireless wide-area data communication being rapidly deployed by GSM carriers worldwide. Actual download speeds may vary. Coverage is subject to transmission limitations and terrain, system, capacity and other limitations. Not all features and service options are available in all areas.

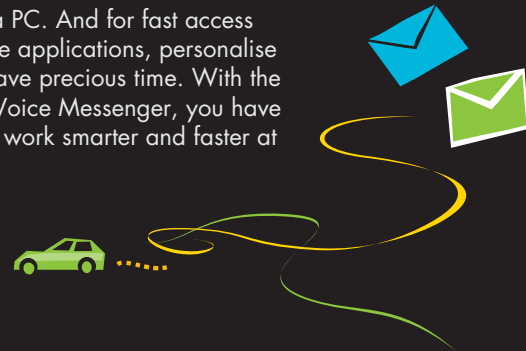

3 Normal GSM Data Calls (CSD) are not basic GSM data services. These services may not be available via all operators, and may require separate subscription. Maximum connection speed is used in defining maximum speed. The GSM Operator may change the speed of connection and reduce time slots at its discretion if the network is congested. These actions may cause lower total data rate than the requested data rate.

4 Talk, standby, and usage times are approximate and depend on the network configuration, the usage pattern of an individual user, and the configuration of the handheld. Use of some internal wireless capabilities and the backlight will significantly decrease battery run time.

## Take work for a walk.

And bring your office to new places. The HP iPAQ 512 Voice Messenger works effortlessly with your e-mail, so you're always in the know. Scan, read, and reply to e-mails on the go. Have e-mail always ready and waiting for you with advanced Push E-mail capabilities. Handle all your Microsoft Office documents with the same ease as you would on a PC. And for fast access to your favourite applications, personalise shortcuts and save precious time. With the HP iPAQ 512 Voice Messenger, you have all you need to work smarter and faster at your fingertips.

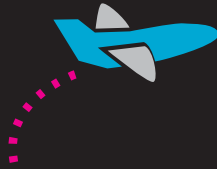

---

## Be heard, loud and clear.

It hears your thoughts. It knows your voice. And it even talks back. Just speak your mind, and the HP iPAQ 512 Voice Messenger with Voice Commander makes calls, composes e-mails<sup>1</sup>, sets appointments, and starts applications on your behalf. Even better, it intuitively understands over 20 speaker-independent commands. So no matter how you say it, the HP iPAQ 512 Voice Messenger gets it.

<sup>1</sup>Voice Command for email is designed to work only with Microsoft Outlook Mobile.

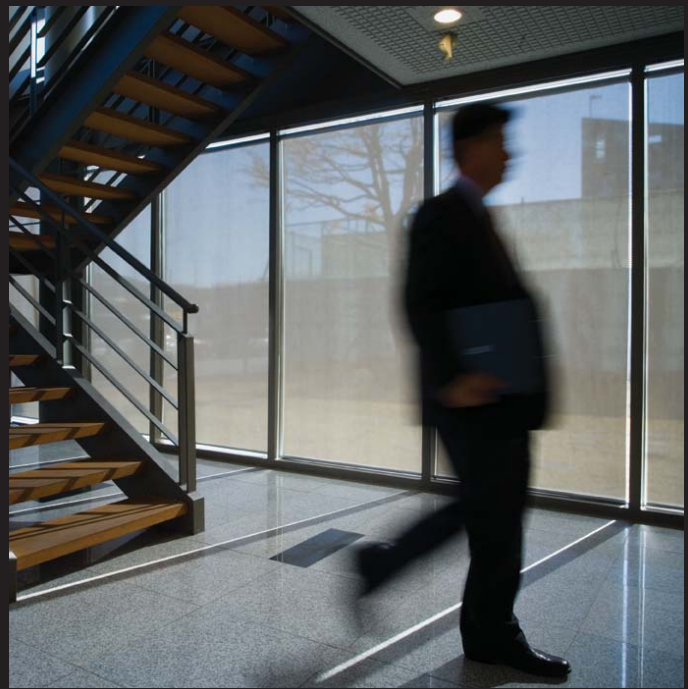

## A connection is made.

The HP iPAQ 512 Voice Messenger connects you to your world seamlessly. It supports Quadband GSM, ensuring that you're always just a phone call away. You can get online and surf at high speed with Wi-Fi wherever work brings you. And speaking of work, with the HP iPAQ 512 Voice Messenger's advanced VoIP IP-PBX<sup>1</sup> capabilities, you can link up to your office's PBX phone system to stay in constant contact with colleagues whenever you're in the office.

<sup>1</sup>VoIP requires an SIP-enabled IP-PBX (Cisco, Avaya, Nortel, Alcatel and others) and a VoIP-enabled WLAN infrastructure. Check with your HP sales representative for more details.

## Talk the talk. For as long as it takes.

With the HP iPAQ 512 Voice Messenger, you'll wish your conversations never have to end. And who could blame you? The HP iPAQ 512 Voice Messenger's crystal clear voice quality makes talking sheer joy, while its enhanced battery life lets you linger from "hello" to "goodbye" for over six hours<sup>2</sup>. When you've got a lot to say, there's clearly no better way to say it than with the HP iPAQ 512 Voice Messenger.

<sup>2</sup>Talk, standby, and usage times are approximate and depend on the network configuration, the usage pattern of an individual user, and the configuration of the handheld. Use of some internal wireless capabilities and the backlight will significantly decrease battery run time.
