Henry Schein introduces the 2012/2013 **Physician Office Lab Supply Guide**. This guide is intended to serve as an overview of our most popular diagnostic testing options and supplies needed at the point of care. Don't see what you are looking for, ask your Sales Consultant. From rapid test kits to large analyzers, from CLIA waived to highly complex, we have POL solutions for all your needs.

If you have questions regarding diagnostic, pharmaceutical, or vaccine items used in your practice, the DxRx Solutions Hotline is here to help! The DxRx Solutions Hotline can provide CPT Code, package inserts, CLIA product status, product storage requirements, and brand-to-generic comparisons. Let us help you today!

New BD Veritor™ System

CLIA-waived for Rapid Detection of Flu A+B

Helping all people
live healthy lives

- **Proven Performance vs PCR** — PCR is currently the highest sensitivity standard available
- **Reproducibility You Can Count On** — Unique Adaptive Read Technology helps reduce false-positive results
- **Results You Can Trust** — Easy-to-read digital display eliminates subjective interpretation
- **Convenient Workflow** — Testing requires minimal hands-on time

Medical technology that captures the trusted answer

CLIA-waived BD Veritor™ System for Rapid Detection of Flu A+B

A rapid chromatographic immunoassay for use with symptomatic patients. This CLIA-waived kit is to be used with the BD Veritor System Reader to test nasal and nasopharyngeal swab samples that are freshly collected, processed and dispensed directly onto an assay test device.

- Proven performance vs. PCR
- Unique Adaptive Read Technology provides reproducibility you can count on
- Easy-to-read digital display eliminates subjective interpretation and delivers the "Trusted Answer"
- Convenient workflow with minimal hands-on time

BinaxNOW® *S. pneumoniae* Urinary Antigen Test

An *in vitro* rapid immunochromatographic assay for the qualitative detection of *S. pneumoniae* antigen in the urine of patients with pneumonia and in the cerebral spinal fluid (CSF) of patients with meningitis. In conjunction with culture and other methods, it is intended to aid in the diagnosis of both pneumococcal pneumonia and pneumococcal meningitis.

- Dependable accuracy
- No results negatively affected by previous antibiotic use
- Self-contained, swab-based device—no tubes or pipettes
- Easy to use: insert urine- or CSF-saturated swab into test card, add reagent, and read results in 15 minutes
- Both built-in and external positive and negative controls ensure test viability
- Accuracy/sensitivity: urine: 86% sensitivity/94% specificity; CSF: 7% sensitivity/99% specificity

CAN REAL-TIME RESULTS LEAD TO BETTER OUTCOMES?

The potential benefits of point-of-care A1C testing

- The ADA recommends that healthcare professionals use A1C point-of-care testing for timely decisions on therapy changes¹
- Giving patients with diabetes on-the-spot feedback on their A1C number may result in as much as a 1% point reduction in their A1C over time²
- A 1% point reduction in A1C may lower the risk of diabetes complications by up to 40%^{3*}

More efficient than the lab

- Results in 5 minutes
- Portable – use in multiple exam rooms
- Small (5µL) blood sample
- Easy to use – minimal training required
- No maintenance

Key features

- Lab accuracy
- National Glycohemoglobin Standardization Program (NGSP) certified
- CLIA waived
- Easy to use – minimal training required
- Reimbursable – bill to CPT code 83037

Bayer's A1CNow+® Multi-Test A1C System

Bayer's A1CNow+® provides you with a fast and easy way to obtain accurate A1C results in your office.

This innovative technology enables you to communicate face-to-face with your patients about their diabetes control.

ORDER NUMBER	DESCRIPTION
DCD0024	A1CNow+® Multi-Test A1C System, 1 kit - 10/box
DCD0021	A1CNow+® Multi-Test A1C System, 1 kit - 20/box

Basic features

- Test time - 5 Seconds
- Memory - 480 results
- Sample size - 0.6µL

Accuracy

- Auto-calibration
- No manual coding
- Automatic Hematocrit correction

Advanced features

- 2 Settings — Basic (L1) and Advanced (L2) modes
- 7-, 14-, and 30-day averages
- 7-day HI and LO summary
- Individual HI and LO ranges
- Pre- and post-meal markers
- post-meal test reminder

Bayer's CONTOUR® Blood Glucose Monitoring System

For fast, accurate results using No Coding™ technology, automatic underfill detection, control marking and temperature correction. PC download option available. For use with CONTOUR® Blood Glucose Test Strips.

ORDER NUMBER	DESCRIPTION
DCD7189	CONTOUR® Blood Glucose Monitoring System, each

* In non-pregnant adults with type 2 diabetes.

BREEZE² Meter

This meter makes testing simple. Its 10-test disc eliminates the struggle with small, individual test strips, and the use of "No Coding" technology ensures easy accuracy every time you test.

- Results in just 5 seconds
- Small sample size
- Large, easy-to-read display
- Ergonomic design is easy to handle
- Single-function buttons for easy handling
- Improved 420-test memory and 1-, 7-, 14-, and 30-day averages

Meter Kit
(795-0077).....ea

Contains: meter, 1-10-strip cartridge, 1 lancing device, 10 lancets & 1 carrying case. BREEZE² was the first meter to receive the "Ease of Use" commendation from the Arthritis Foundation.

BREEZE² Test Strip Disc Cartridges

- Less chance of dropping or losing test strips
 - Simply load and go
- (795-7966).....50/pkg

Contains: 10 strips per cartridge, 5 cartridges per box.

OneTouch® Ultra® 2 Blood Glucose Monitor

- Very small blood sample
- More choices for testing: 3 sites, including finger and arm
- FastDraw™ design automatically draws blood into test strip
- Fastest test time available: just 5 seconds

OneTouch® SureSoft™ Lancing Devices

Single-use lancing devices are electropolished, which results in more blood than an acid-washed needle. This means you can use a smaller gauge needle while still ensuring that a sufficient sample will be drawn for point-of-care testing.

- Electropolished needle means a smaller gauge and more comfort for your patients
- Meets OSHA guidelines: nonreusable, retractable needle
- Distinctive wing design prevents reloading and reusing
- Preset gauge for no guessing, no maneuvering and easy training
- On-demand training through Web and CD-ROM programs

Gentle, 28-ga Needle

(567-0000)200/box

Regular, 21-ga x 2-mm Needle

Glucose 201 Analyzer

The HemoCue Glucose Systems are based on a glucose-dehydrogenase method and consist of a small, dedicated analyzer and a unique, disposable microcuvette. They will produce lab-accurate results for diagnosing or monitoring diabetes, as well as monitoring neonatal blood glucose levels.

- More accurate and 68% higher reimbursement than glucose meters
- FDA-compliant unit when screening and diagnosing
- Analyzer: 0–444 mg/dL (0–24.6 mmol/L)
- Only 5 µL of capillary, venous, or arterial blood is needed
- No inherent limitations related to hematocrit or known drug interferences
- No recalibration needed between cuvette lots
- 2-year warranty

#120706, Analyzer

Chemcard™ Cholesterol Test

- 3-minute whole-blood screening test
 - Color interpretation from 150 mg/dL to 300 mg/dL in increments of 25
 - No instrumentation required
 - Room-temperature storage, not to exceed 86°F (30°C).
- (100-7110)24/box

Chemcard™ Glucose Test

A simple, effective screening test that is used to identify abnormally high fasting plasma glucose (blood sugar) levels which are often a warning sign of diabetes.

- 3-minute whole-blood screening test
- No instrumentation required
- Room temperature storage, not to exceed 86°F (30°C)

#47024, Glucose Test
(844-1247)24/box

The perfect pair for testing diabetic patients.
HbA1c and Microalbumin are both available for point-of-care (POC) testing.

Answers for life.

SIEMENS

A1CNow+® Test

This handheld monitor provides accurate in-office A1c results, allowing physicians to make on-the-spot treatment decisions for diabetes patients.

- CLIA waived
 - In-office testing; no waiting for lab results
 - Results in just 5 minutes
 - Hands-on procedure time is less than 1 minute
 - Simple, 3-step procedure
 - No calibration
 - No refrigeration necessary if used within 4 months
 - No capital equipment required
 - Enables A1c testing in every exam room

CPT® Code: #82044QW†

HemoCue® Albumin 201 System

Can be used for quantitative determination of low levels of albumin in urine for the purpose of screening, diagnosis, monitoring, and supporting clinical evidence in the treatment of microalbuminuria. The system consists of a small, specially designed analyzer and individually packaged microcuvettes containing freeze-dried reagent. The test is performed at the point-of-care, using a microcuvette filled by capillary action. To obtain a quantitative result, fill the microcuvette, place it in the analyzer, and read the result. The system is based on an immunoturbidimetric reaction using antihuman albumin antibodies.

The antigen-antibody complex creates turbidity, which is measured photometrically at 610 nm. The albumin concentration is proportional to the turbidity, and the result is shown on the display in mg/L.

Analyzer Kit with 1 Box of Microcuvettes
(111-5593)ea

Albumin Microcuvettes

Precision Uroflowmetry System by

HENRY SCHEIN®
MEDICAL

What is the Flo-Med 1100 by Henry Schein?

It is a simple, non-invasive diagnostic screening device used to calculate the flow rate of urine over time. This aids in diagnosis of bladder and sphincter function as well as prostate conditions.

- Easy to use (hygienic & convenient)
- Height adjustable
- Battery operated
- Wireless communication to laptop iPad, or other PDA (hardware capable)
- CPT 51741†
- Compact/portable
- One-touch technology
- Easy calibration
- PDF can easily be stored into an EHR

System Requirements:

Windows 7, XP, Vista
Hardwire compatible
with PCL5 Printer

(112-5811)

Flo-Med Precision Uroflowmetry System,
1 Unit

(112-5812)

Flo-Med Cup & Funnel Disposables,
24/Sets

Other accessories such as Laptops
and printers are available separately.

Uri-Check® Plus Test Kits

A semiquantitative dip-slide culture system for the screening and early detection of urinary tract infections. More than 100,000 bacteria per mL indicates infection. 1½" diameter with patient label affixed to vial. Refer to Uri-Check reference chart to help identify bacterial growth present. 3–5-month shelf life. Nonreturnable. Requires Boekel's Micro Incubator #260700 (100-6303).

#3000UC, CLED Agar/EMB Agar
 (224-9604).....10/box

Uri-Check® Test Kits

A semiquantitative dip-slide culture test for the detection of urinary tract infections. Kit includes 1" vials and caps, paddles slightly smaller than 1", and patient labels affixed to the outside of the vial.

#1000UC, CLED Agar/EMB Agar
 (224-7373).....10/box

Uricult Test Kits

A simple, self-contained urine test method for the detection of bacteria that commonly cause urinary tract infections. Uricult urine-culture paddles are capable of detecting bacteriuria concentrations as low as 1000 CFU/mL of urine.

#1000, CLED/EMB
 (120-9110)10/box
 Contains: paddles, patient ID stickers & package insert.

Accutest® Uriscreeen™ Tests

- Rapid urinary-tract infection screen test for bacteriuria and presence of somatic cells in urine
- Detects true infections with high sensitivity and high NPV
- Positive screening result indicates presence of bacteria and/or somatic cells

CLINITEK®

Advantus™ Analyzer

With Bar-Code Reader

For laboratories or practices requiring medium to high throughput (up to 500 tests per hour). Respond to demands for higher productivity and high quality. Streamline your workflow with flexible operation. Immediate start-up. Automatic calibration, network ready, and offers the widest range of test options. Added QC features.

- Easy-to-use color touch-screen
- Ability to consolidate microscopy results onto one patient record
- QC lockout available or automatic prompting if regimen is not followed

- Testing flexibility with simple, one-touch switching between different strip configurations
 - Three sieve functions—confirmatory and microscopic—to flag abnormal results for quick review
 - Convenient data retrieval for up to 500 patients by patient ID
 - 200 control results
 - Streamlined operation with immediate start-up
 - Improve efficiency with nonpacing processing
 - Improve accuracy with automatic calibration for every strip
 - Continued productivity boost with throughput of 7 seconds per sample
 - Minimize errors with simple, bar-code identification of sample, color, and clarity values
 - Flexibility in reporting options, on-screen display, printout and/or uploading to laboratory information system
- (108-6007)ea

When **quality** is at the **core** of
every decision you make...

Trust Hemocult ICT—the only
Immunochemical fecal occult blood test clinically tested
over an extended duration and proven to work. Our dry-slide process
has provided excellent proven results for over 40 years.

Excellent 14-day stability—developed with dry-slide
technology, which increases stability of the
sample—allowing for multiple-day collection
and necessary transit/development time.

Higher sensitivity and specificity—clinically proven
to have a relative sensitivity of 100% and
apparent specificity of 99.1%.

No drug or dietary restrictions—Hemocult ICT is specific
to intact human hemoglobin—eliminating interactions
from red meat, Vitamin C and other factors that lead
to false positives.

The right choice—meeting the American Cancer
Society and the U.S. Task Force for Colorectal Cancer
(CRC) Foundation recommendation of multiple-day
testing for CRC.

For information on developing a colorectal cancer screening program in your office,

Offer your patients a colorectal cancer (CRC) screening test they may actually use.

Trust the brush and help boost patient compliance with InSure[®] FIT[™]

The InSure FIT Fecal Immunochemical Test with its unique water-based Blue Brush collection method makes it easier to screen for CRC. No fecal handling or test card smears required; instead, InSure FIT uses a gentle brushing of the stool in water. The 2 tests/one card format follows American Cancer Society recommendations for CRC screening along with high sensitivity, no dietary or medicinal restrictions and a patient-friendly collection method for improved patient compliance.

Please visit **DiagnosisCAST.com** and click on ColonCancerWRAP for information on new advances in colon cancer screening (CME credits available).

For more information, please visit www.insuretest.com.

Manufactured by Enterix Inc., Edison, NJ 08837 USA, a Quest Diagnostics Company. ENTSA9013 08/2012

Colorectal Cancer Screening
That's Easier to Live With

InSure® FIT™ Fecal Immunochemical Test (FIT)

Test provides high sensitivity and ease of use with a simple, water-based collection method designed to be more patient-friendly. The patented brush sampling replaces unpleasant fecal collection or smearing. No dietary or medicinal restrictions, enhanced specificity and sensitivity for more productive colonoscopies. The InSure® FIT™ is based on the immunochemical detection of human hemoglobin (Hb) as an indicator of blood in the stool. The assay uses a monoclonal antibody to capture Hb on a test strip during test development. Since globin does not survive passage through the upper gastrointestinal (GI) tract, the presence of globin in the stool indicates bleeding in the colon or rectum. Clinical studies have demonstrated high sensitivity and specificity of the InSure® FIT™ test in colorectal cancer screening.

- 87% sensitivity for colorectal cancer*
- 98% specificity*
- 66% increase in patient compliance vs. a guaiac-based fecal occult blood test (gFOBT) was found in one study*
- No handling/smearing of dry, solid fecal materials*

CPT® Code: 82274QW† Screening G0328QW†

#90030, Combo Kit 25/25 (450-0009).....ea

Contains: 25 test strips, 1–9-mL bottle of run buffer & 25 patient collection kits.

Alere™ hCG Combo Cassette Test (20/10 mIU/mL)

The hCG Combo Cassette test provides superior performance for the detection of human chorionic gonadotropin (hCG), a hormone produced during pregnancy.

- Cut-off level: 20 mIU/mL in urine; 10 mIU/mL in serum
- Sensitivity: > 99%; Specificity: > 99%
- Single-step test provides positive results in as little as 3 minutes for urine and 5 minutes for serum
- CLIA-waived (for urine only)
- CPT® Code: Urine hCG 81025QW†; Serum hCG 84703† (Combo tests are classified as moderate when testing serum samples.)

#92215, hCG Combo Cassette Test

(512-0014)40/box

Alere™ hCG Cassette Test (25mIU/mL)

A one-step test for the early detection of human chorionic gonadotropin (hCG), a hormone produced during pregnancy. The test uses a patented, innovative technology to provide highly sensitive and specific results for pregnancy.

- Cut-off level: 25 mIU/mL
- Sensitivity: > 99%; Specificity: > 99%
- Single-step test provides positive results in as little as 3 minutes
- CLIA-waived, easy-to-use lateral flow urine test
- Shelf life: 24 months from date of manufacture
- CPT® Code: 80125QW†

#92217, hCG Cassette Test

(512-0013)40/box

Alere™ hCG Dipstick Test

The Alere™ hCG Dipstick test provides qualitative determination of human chorionic gonadotropin (hCG) in urine for early detection of pregnancy. A simple procedure provides easy-to-read results in 3 minutes at a detection level of 25 mIU/mL.

- Sensitivity: > 99%; Specificity: > 99%
- Cut-off level: 25 mIU/mL
- Single-step test provides positive results in as little as 3 minutes
- CLIA-waived, easy-to-use lateral flow test
- Shelf life: 24 months from date of manufacture
- CPT® code: 81025QW†

#92211, hCG Dipstick Test

(512-0012)50/box

ICON® 25 Hcg Pregnancy Test

A one-step, rapid, combination serum/urine test designed for the early detection of pregnancy.

- 25 mIU/mL sensitivity, >99% specificity
- 3-minute results for urine, 5-minute results for serum
- Requires just 3 drops of specimen
- CLIA waived for urine

#43025A
(254-2726)25/box

QuickVue® One-Step hCG Urine Test

- Results in 3 minutes or less
- 25 mIU/mL sensitivity
- 99% sensitivity, specificity, and accuracy
- Easy to use
- Built-in controls for CLIA-waived compliance
- CLIA waived (urine only)

#20109
(227-6481)25/box

BD Affirm™ VPIII Microbial Identification System

The Problem:

Mixed vaginal infections.

One of every four vaginal infections are caused by two or more organisms: *Candida* species, *Gardnerella vaginalis* or *Trichomonas vaginalis*.

Failure to diagnose these common causes of vaginitis can carry significant risk for your patients. Trichomoniasis and bacterial vaginosis (BV) are associated with increased risk of HIV infection, delivering preterm, low birth weight babies and, if untreated, PID.^{1,2}

The Solution:

1 molecular test that detects & differentiates 3 organisms.

The BD Affirm™ VPIII system quickly identifies and differentiates three pathogens from one single test. The Affirm VPIII technology provides RNA accuracy to enable targeted therapies.

- Results in < 45 minutes
- Enables proper therapy, the first visit
- Unaffected by difficult specimens: menses, sperm or creams from self medication.³

Learn more about Affirm VPIII testing in your laboratory, call 800.553.3470.

¹ Trichomoniasis, CDC, Sex. STD: Fact Sheets Sept 2009
² Bacterial Vaginosis, CDC, The STD: Fact Sheets Sept 2009

- Measures heterophile antibodies in whole blood, serum and plasma
- Uses best technology of bovine derivatives, which eliminate cross reactivity
- Room temperature or refrigerated storage
- Two internal controls exist to avoid additional cost and ensure good laboratory practice
- Only 25 µL blood needed

Mono Test Kit

(112-5547)20/box

Contains: 20 test devices, 1 developer solution, 1 negative control, 1 positive control, 40 sample transfer pipettes (20 for serum/plasma & 20 for whole blood), 1 procedure card & 1 package insert.

CPT® Codes: 86308QW† (Whole Blood) / 86308† (Serum/Plasma)

NO AGE RESTRICTIONS!

QUIDEL®
CORPORATION

QuickVue® Infectious Mononucleosis Test Kit

- IgM-specific test
- Results in 5 minutes
- Easy to read +/- test result
- 99% sensitivity and 99% specificity
- CLIA waived for whole blood
- Flexible specimen-collection options

#20121

(227-0024)20/box

Contains: 20 test cassettes, 1 developer, 1 of ea control (negative & positive), 20 sample pipettes & 20 capillary tubes.

CPT® Codes: Whole blood: 86308QW†; Serum: 86308†

ICON® Mono Test Kit

Approved for testing on all ages. Combines fingerstick whole-blood convenience with EIA membrane technology for fast, accurate results. Uses direct solid-phase immunoassay technology for early qualitative detection of IM heterophile antibodies in whole blood, serum, or plasma. Serum/plasma is moderately complex.

- Whole-blood-test waived
- 99.9% relative sensitivity and 98.8% relative specificity of serum/plasma
- 98.3% relative specificity of whole-blood assay

(111-7123)30/box

Contains: 30 test cassettes, 1 developer solution, 1 of each control (negative & positive), 1 bulb & capillary tubes.

CPT® Code: 86308†

Acceava® Mono Cassette

The high-performance mononucleosis diagnostic test for whole-blood, serum, or plasma samples.

- CLIA waived for whole-blood procedure only
- FDA cleared with no age limits
- Positive results in 8 minutes
- Superior sensitivity at 99.9% for earlier IM detection
- Specificity of 98.8%
- External positive and negative controls provided with your kit—no additional purchase is necessary

#92407

(512-0004)25/pkg

osom

OSOM® Mono Test

Simple in-office test for the detection of mononucleosis.

- Easy to use
- Two-color results in 5 minutes
- Includes 2 additional tests for external QC testing
- 100% sensitivity, 96% specificity
- Clinical studies included children 4 and up
- CLIA waived for whole blood

Laboratory confirmation has never been easier.

iLab™ confirmation kits bring the laboratory right to you... anytime, anywhere. iLab™ is a prepaid self contained laboratory confirmation kit for your presumptive positive urine or oral fluid point of care test devices. iLab™ kits contain everything you need to ship your specimen to our laboratory, and include detailed instructions on how to log onto our website to track your test and print laboratory reports.

Smart. Whether your needs include servicing Occupational Health, Corrections, Probation, Physician Office Labs, Clinical and Therapeutic Monitoring, or CLIA Waived or Moderate Complexity testing we have a solution for you.

Connected. We offer full laboratory services including presumptive positive confirmations and a broader range of drugs and configurations to service the needs of all of your accounts.

Empowering. Our new ParaPrescriber Solutions Group and our Employer Services teams will work with you to offer a full service solution to your accounts.

NEW!

iScreen® OFD–Cotinine

The iScreen® OFD–Cotinine device is a rapid, oral fluid screening test that can be performed any time without the use of an instrument. The test detects elevated levels of cotinine (nicotine metabolite) in oral fluid for accurate determination of smoking status.

- Accurately screen for cotinine (primary metabolite of nicotine)
- Detects up to 1-2 days after nicotine use
- Qualitative detection of cotinine in oral fluids at a cutoff of 30 ng/mL
- Simple collection and testing procedure
- Results in as little as 10 minutes
- Integrated internal procedural control

#I-DCT-B702, Nicotine Test (395-0149)25/box

**HENRY SCHEIN®
ONESTEP+ H. PYLORI CASSETTE TEST**

- Whole blood, serum, or plasma
- CLIA waived for whole blood
- Simplified
- Results in 10 minutes or less
- Allows for rapid treatment decisions
- Controls are included

Complete Kit
(900-4071)20/box

Contains: 20 pouched test devices with disposable sample droppers; disposable, heparinized capillary tubes & dispensing bulb; 1 of each control: (positive & negative); 1 sample buffer; 1 procedure card & 1 package insert.

CPT® Code: H. pylori: 86318QW†

OSOM® H. pylori Test

For use with whole blood, serum, or plasma.

- Easy to use: single-reagent procedure fits easily into any practice or lab
- Fast: results in 10 minutes or less
- Easy to read: 1 pink line indicates a negative result; 2 pink lines indicates a positive
- Small sample size: test only requires 10 µL of serum or plasma; 25 µL of whole blood
- Accurate: 95.9% sensitivity
- Room-temperature storage

#175, Test
(309-0040)25/box

Control Kit
(309-0074)ea

NEW DIMENSIONS IN DIAGNOSTICS

Triage® Cardio Profiler Panel

Measurement of 4 cardiovascular markers: troponin, CR-MB, myoglobin, BNP. Results in approximately 15 minutes. Results read by Triage MeterPro™ meter.

#97100, Panel
(706-7343)25/box

BIOSITE

NEW DIMENSIONS IN DIAGNOSTICS

Triage® MeterPro™ Meter

High-performance, comprehensive cardiovascular and drugs-of-abuse testing in the laboratory or at the point of care (POC). Designed to provide diagnostic results quickly and easily. Quantitative diagnostic panel results are displayed and printed in easy-to-read numbers and highlighted when the result is above the cutoff. Qualitative diagnostic panel results are displayed as positive (POS) or negative (NEG), eliminating the need for interpretation of lines that often hamper qualitative diagnostics.

- 16 immunoassays available
- Results in about 15 minutes
- Whole blood, plasma, or urine
- Customizable test panels
- Onsite training and implementation support
- Results printed, displayed, and interfaceable
- Full connectivity support

NEW DIMENSIONS IN DIAGNOSTICS

Triage® D-dimer Test

Rapid, quantitative immunoassay to aid in the assessment and evaluation of patients suspected of having disseminated intravascular coagulation (DIC) and thromboembolic events, including pulmonary embolism (PE) and deep-vein thrombosis (DVT).

- Performed on Triage® meters
- Provides rapid, quantitative results in approximately 15 minutes
- Utilizes highly sensitive fluorescence immunoassay technology
- Utilizes the 3B6 D-dimer antibody, which demonstrates high clinical specificity for PE and DVT

Piccolo® Point-of-Care Chemistry Analyzer Accessories

The first broad-menu clinical chemistry analyzer designed for near-patient testing. *Basic Panel* contains BUN, Ca, Cl⁻, CRE, GLU, K⁺, Na⁺, and tCO₂.

Comprehensive Panel contains ALB, ALP, ALT, AST, BUN, Ca, Cl⁻, CRE, GLU, K⁺, Na⁺, TBIL, tCO₂, and TP. *Lipid Panel* contains CHOL, CHOL/HDL (calculated), HDL, LDL (calculated), TRIG, and VLDL (calculated).

- General chemistry, liver, electrolyte, BMP, CMP, lipid, renal, and hepatic panels available
- No daily controls, calibrators, or maintenance
- Intelligent Quality Control (iQCT) verifies correct performance
- No special training required
- 0.1cc whole blood, serum, or plasma
- Single-use reagent discs
- Compact and portable
- Built-in QC and calibration
- Lipid panel is CLIA waived
- Whole blood, serum, or plasma
- Less than 2 minutes hands-on
- Results in under 13 minutes

#100-0000, Accessory Kit
(106-6368)ea

Contains: 1–0.1cc Minipette, 1–96-pack of disposable Minipette tips, 1 operator's manual, training CD, 1 power cord, 1 power supply, 10 lithium-heparin tubes, 1 screwdriver & 2–12-packs of results cards.

i-STAT® 1 Handheld System

Includes these important features:

- Easy to use: Cartridges are self-contained and the system is simple to learn and operate
- Lab-accurate results: Advanced biosensor technology and real-time quality assurance provide extremely accurate testing
- Small sample size: Just a few drops of blood per cartridge
- Ready when you need it: Test results in as little as 2 minutes

CoaguChek XS[®] System PT/INR

Monitoring Solution

The next generation in point-of-care prothrombin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that healthcare professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single test chamber.

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device

- Small sample size (10 μ L) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- Onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed

3-Box Starter Kit

(108-1861)ea
Contains: XS Analyzer, 3 boxes of CoaguChek XS PT strips (144 total) & CoaguChek Lancets.

INRatio2[®] Monitor

Allows you to obtain a prothrombin time (PT) and international normalized ratio (INR) result using 1 drop of blood from a fingerstick.

- CLIA waived
- Easy to use
- Single-button operation
- 1-step auto turn-on with strip insertion
- Larger LCD screen and easy-to-read digits
- Small, 1-drop (15 μ L), sample size
- Wider test-strip area for easier sample application
- Test results in under 1 minute
- Test strips do not require refrigeration
- 2-channel, on-board quality control runs on every test
- No need for external liquid quality control or extra strips
- Test strips are individually wrapped and stored at room temperature

#INR2QS1 Quick Start #1

(111-3840)ea

BD™ Vacutainer®
Stretch Latex-Free
Tourniquet

The ideal product for those looking to eliminate latex from their healthcare environment. Won't cause an allergic reaction in latex-sensitive patients or employees. Convenient packaging allows for easy, one-at-a-time dispensing that facilitates a single-use policy that will reduce danger of cross contamination between patients and healthcare workers.

#367203
(270-3884)25/box

BD™ Vacutainer® Eclipse™ Blood-Collection Needles

Thin Wall, 1 1/4"

Safety-engineered, multisample needle offers a simple, effective way to collect blood while it reduces the possibility of needlestick injuries. It features a patented shielding that allows for one-handed activation to cover needle immediately upon withdrawal from vein and confirm proper activation with an audible click. New needles with preattached holders are ready to use with no assembly required.

#368607, 21 ga (987-6956)	48/box
#368651, with Preattached Holder, 22 ga (987-6134)	100/case
#368650, with Preattached Holder, 21 ga (987-5021)	100/case

BD™ Microtainer® Contact-Activated Lancets

Designed with a positive patient experience in mind. The contact activation method facilitates a consistent puncture depth and minimizes the likelihood of having to repeat the puncture. It covers only a small area at the contact point, resulting in improved visibility of the puncture site for the clinician and greater accuracy of lancet positioning when performing the puncture. Its innovative ergonomic design allows for a more comfortable grip. The lancet automatically retracts into the device, which prevents the lancet from being reused. In addition, the lot number is laser-etched on each lancet for easier tracking.

#366592, Low Blood Flow (Single Drop), Purple, 30-ga x 1.5-mm-D Needle (106-5174)	200/box

Making Blood Collection Safe, Precise, Simple

Capiject® Safety Lancets

High quality, single-use lancets offer the form, fit and function you've come to rely on.

- Never see or handle the sharp
- One-step activation
- No special staging required
- Color-coded sizes

Surshield® Safety Blood Collection Sets

Help shield your staff against accidental needlesticks with Surshield.

- Simple, one-handed activation
- Audible click for confirmation that needle is securely locked
- Available in 21G and 23G in 7" and 12" tubing, and 25G with 12" tubing.

- Extra-wide, built-in collection lip for enhanced specimen flow
- Single-piece, tapered design for easy collection and handling
- Color-coded fill lines and caps for volume accuracy and easy identification
- Lot number and expiration date printed on each tube for easy identification
- Silicone-coated anticoagulant tubes designed to reduce clotting
- Olefin-based gel for clean separations
- Tube nests in cap, allowing tube to stand alone
- Certified for lead testing
- Latex-free

UNICO® Tube-Cubes®

Available in 3 configurations to accommodate practically all of your needs. Each cube measures 2 $\frac{5}{8}$ "H x 2 $\frac{7}{8}$ "W x 2 $\frac{7}{8}$ "D. The 9-place version holds 8-mm to 16-mm/10-mL to 15-mL tubes. The 4-place version holds 26-mm to 30-mm/50-mL tubes. The single place version holds 66-mm cups, alcohol dispensers, small flasks, and more.

- Invert and pour: tubes will stay in place
- Great for phlebotomy trays
- Organize and store samples in refrigerator or freezer

#54900, 9 Place, for 8-mm–16-mm Tubes (112-4212).....4/pkg

#54400, 4 Place, for 26mm–30-mm Tubes (112-4210).....4/pkg

#54100, Single Place, for Up to 66-mm Tubes

(112-4214).....4/pkg

UNICO® Tube Rack

Starting with a single 50-place T-Rack, you can attach as many racks as space allows. These patented racks attach together quickly and easily with their unique built-in T-connector, which allows the flexibility to attach as many racks as needed.

- Each rack holds up to 50 tubes of varying sizes in two 25-hole sections
- Top shelf has cross-referencing alphanumeric designation in order to track exact location of specific tubes in rack
- Attach additional T-Racks together; make a single large rack as big as needed
- Made of durable, autoclavable polypropylene; will not break or become brittle in low-temperature refrigerators
- Easy to clean and disinfect
- Arrives disassembled and can be snapped together in seconds
- Dimensions: 8 $\frac{3}{4}$ " x 3 $\frac{3}{4}$ " x 5 $\frac{1}{4}$ "

#54500, 50 Place (Expandable)

UNICO[®] PowerSpin™ FX Centrifuge

Features a 6-place angled rotor designed for 2–10-mL tubes (maximum tube size up to 16 mm x 110 mm) and a fixed speed of 3400 rpm, generating 1350 RCF (g) for superior specimen separation. Set the 0–30-minute timer to desired run length.

- Maintenance-free, brushless motors run quietly at a fixed speed of 3400 rpm, emitting only 58dB, all with a low temperature rise
- Suction-cup rubber feet hold unit firmly in place while virtually eliminating vibration
- Lid features a gasket to reduce aerosol emissions, a window for strobe speed checks, and a safety interlock switch that cuts power to motor if lid is raised
- Accessories available on request: 8-place rotor and pediatric tube adapters
- 1-year manufacturer's warranty
- Dimensions: 10.2" x 11.8" x 7.9"
- Weight: 15 lb
- 115 V/60 Hz

#C806, Fixed Speed, 6 Place
(715-5981)ea

UNICO[®] PowerSpin™ LX Centrifuge

Spin blood, urine, fecal materials, or semen at the best speed for each type of specimen with this powerful, variable-speed, 6-place centrifuge. Maintenance-free, brushless motor runs quietly at a fixed speed up to 4000 rpm, emitting only 58dB, all with low-temperature rise. Suction-cup rubber feet hold unit firmly in place and virtually eliminate vibration. Lid features a gasket to reduced aerosol emission, a window for strobe speed check, and a safety interlock switch that cuts power to the motor if lid is raised. Angled rotor accepts 2–10-mL tubes (maximum tube size 16 mm x 110 mm). Accessories available upon request: 8-place rotor and pediatric tube adapters.

- Speed range: 300–4000 rpm, generating up to 1850 RCF (g)
- 30-minute timer
- 1-year warranty
- Dimensions: 10.2" x 11.8" x 7.9"
- Weight: 15 lb
- 115 V/60 Hz

UNICO[®]

Micro-Hematocrit Centrifuge

This powerful centrifuge, with all-metal housing, spins up to 24 microhematocrit tubes at 12,000 rpm. Tubes are held in place with a screw-down metal lid and replaceable rubber gasket/ring. The 15-minute mechanical timer has a bell tone to signal a completed run, while the electronic brake can stop the unit on demand. Metal lid features a safety-lid latch that cuts engine power if lid is lifted. Unit comes complete with a metal hematocrit reader tray. 1-year warranty.

UNICO[®]

Vortex Mini Mixer

This economical vortex mixer is rugged and sturdy for the most demanding applications. Dual-mode switch

lets you vortex continuously or intermittently using the touch mode: simply press your tube to the soft rubber mixing cup. Features speed control to adjust the vortexing velocity to your requirements.

- Powerful and quiet
- Variable speed up to 3000 rpm
- Switch from Auto to Touch mode
- Power On LED indicator
- 1-year limited warranty

Histosette® I Tissue Processing/Embedding Cassette

Disposable plastic cassettes hold tissue specimens during the embedding process, as well as in a storage file. Molded from a special high-density polymer, these cassettes keep specimens safely submerged in liquid and are totally resistant to the chemical action of histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. Just snap apart and conveniently lock the lid into the base of the cassette. Cassettes can be opened or closed as often as necessary and always relock securely without danger of specimen loss. Large labeling areas are located on three sides of the cassette. Anterior writing area at a 45° angle. The more acute angle makes cassettes more suitable to be used with some models of cassette-labeling instruments.

Cassettes 1500/case

Histosette® I Tissue Processing/Embedding Cassettes

Disposable plastic cassettes hold tissue specimens during the embedding process, as well as in a storage file. Molded from a special high density polymer, these cassettes keep specimens safely submerged in liquid and are totally resistant to the chemical action of histological solvents. The efficient flow-through slots maximize fluid exchange and ensure proper drainage. The one-piece integral lid eliminates the need for separate steel lids. Just snap apart and conveniently lock the lid into the base of the cassette. They can be opened or closed as often as necessary and they always relock securely without danger of specimen loss. Large labeling areas are located on three sides of the cassette for your convenience. Anterior writing area at a 30° angle. Not suitable for automated printers.

Cassettes 1500/case

Micromesh™ Biopsy Processing/Embedding Cassettes

This version of the Micromesh™ offers 1676 square openings (0.38mm), allowing for a greatly improved fluid exchange without having to use biopsy pads. Large anterior and posterior slots in both cassette and cover ensure that the Micromesh™ biopsy cassette will sink rapidly. A large square compartment measuring 27mm is perfect even for needle biopsies. The cover does not protrude above the cassette, a great space-saving feature allowing more cassettes to be stacked in automatic labeling machines and tissue processors.

Embedding Cassette

Disposable plastic tissue cassettes are suitable for holding and identifying tissue samples in processing, embedding, and sectioning procedures. The cassettes fit securely in microtome chuck adapters. They are molded from a high density polymer that is totally resistant to the chemical action of histological solvents. These cassettes are designed to accept standard metal lids and will keep specimens in complete safety during processing. The slanted writing surface accepts markings easily, permitting sample identification throughout all stages of embedding and long afterwards when in archives.

Biopsy Foam Pads

Used to hold biopsies in place and prevent them from being lost during processing. Specially formulated foam is always verified for consistency throughout to achieve optimum solvent flow. Biopsy samples are sandwiched between two foam pads and placed either in tissue capsules or cassettes with metal or plastic lids. Resists temperatures from -40°C to 121°C. For use with cassettes.

30.2 mm x 25.4 mm x 2 mm

(120-6138)1000/case

Simport

Disposable Base Molds

Disposable base molds offer ease and convenience of operation. They are inexpensive enough to be discarded after use, yet strong enough to be reused. Specially formulated plastic material provides excellent thermal exchange. Smooth interior finish and rounded corners facilitate specimen removal. Available in the same variety of sizes as metal molds and can be used with the same styles or types of cassettes and embedding rings.

SlideFolder™ Microscope Slide Holder

The SlideFolder™ will hold up to 20 standard microscope slides 75 mm x 25 mm (3" x 1") and is made of 2 parts: a base holding the slides horizontally, offering numbered spaces for easy identification, and transparent doors that can either cover the slides or be swung behind the SlideFolder™ for space-saving purposes. The 2 transparent hinged covers offer a full view of each slide without having to remove it from its position in the SlideFolder™, and allow easy reading of ID labels with or without an optical bar-code reader. All units are stackable and take minimal space on laboratory tables or shelves.

StainTray™ Slide Staining System

The StainTray™ has a black base made of tough ABS plastic that can withstand a wide range of chemicals (avoid chlorinated hydrocarbons). It will accept up to 20 slides on four plastic rails covered with a polymer strip to hold slides perfectly even if tray is held at an angle. When humidity is needed, wells between rails will hold up to one mL of water securely without splashing. Middle wells will hold up to 2 mL each. Rails are raised not only to avoid water touching the slides but to make them more easily retrievable. The base will also hold excess stain solution dripping from the slides. Four rubber feet ensure greater base stability. Units are stackable for space-saving purposes.

EasyDip™ Slide Staining Rack

Rack will hold up to 12 microscope slides with dimensions such as 75 mm x 25 mm, (3" x 1") and even 76 mm x 26 mm and with a thickness of 1.0 mm to 1.2 mm. The slides fit into individual slots for free passage and rapid drainage of staining fluids. Since they are placed vertically in the rack and not horizontally, their writing area will not be stained by the fluid, allowing their removal without the use of forceps. The lid completely covers the EasyDip™ Slide Staining Jar to minimize spill and evaporation. A handle is permanently attached to the rack for easy insertion and removal of slides without the user's fingers touching the solution.

#M905-12DGY, Dark Gray

(115-1897)6/case

Simport

EasyDip™ Slide Staining System

The system has two components: a square staining jar and a 12-position vertical slide rack. Made of resistant acetel plastic, the staining jar will not break like most glass jars do. It will resist most staining agents, including alcohol and xylene (but not phenol, iodine or ferric chloride). The wide stable base offers greater stability, while the inside is recessed, allowing for a smaller reagent volume of only 80 mL. Easy to clean and no metals to corrode. Ideal for special stains, frozen sections and special processes.

The Henry Schein LabTeam is a highly trained group of Clinical Laboratory Specialists offering expert lab consultation and analysis to assist your practice in advancing patient care, maximizing revenues, and cost containment.

❖ **A broad portfolio of the leading laboratory systems available in the market, offering you the best solution for your individual practice needs.**

As a distributor of a wide selection of the leading Laboratory Systems, a Henry Schein Clinical Laboratory Specialist offers you the best solution for your practice from the industry instead of just one brand.

❖ **Financial analysis for capital purchases of laboratory equipment providing select recommendations and advantageous acquisition programs.**

A Henry Schein Clinical Lab Specialist will evaluate your current testing volumes to provide you a financial analysis to maximize your Laboratory solutions. In addition, Henry Schein Financial Services offers financial solutions to help you acquire the system your practice needs.

❖ **Testing and volume analysis to maximize your lab efficiency.**

Our Clinical Lab Specialists can provide laboratory design and planning assistance to help you maximize your lab testing and revenues.

❖ **Professional consultation for CLIA certification.**

The Henry Schein Lab Team can provide access to Laboratory consultants to help your in office achieve CLIA certification and OSHA compliance.

Laboratory Connectivity

Henry Schein's Clinical Laboratory Specialists will help you connect all of your Laboratory Equipment to a Laboratory Information System (LIS) to help you:

- ❖ Consolidate lab reports
- ❖ Archive and trend patients
- ❖ Store QC
- ❖ Seamlessly integrate to a third-party reference lab
- ❖ Access the results via the Web

The LIS can be connected to the EHR to simplify patient management, capture billings, and update patients' records.
