i-mobile IQ II

USER MANUAL

Welcome

Thank you for purchasing this product.

For your cellular phone works properly, please follow the instructions in this manual. To prevent any possible incidents or malfunctions, please follow all safety warnings.

Screen displays and illustrations in this user's manual are designed to help you operate this phone to its optimum performance

Contents

Introducing Android One

i-mobile IQ II is an Android One smartphone. It runs Android Lollipop and, unlike other phones, gets updated to the new version of Android soon after it is released.
*That means you get the latest features,better performance, beautiful design, and built-in security on a smartphone that's been tested by Google.
Android One phones have Google apps built in and access to over a million more apps, games, movies, and books on the Google Play Store

*Receives updates for up to 2 years after July 2015

Your phone

the important keys & connectors

Getting started

let's get you up and running

Assemble & charge

SIM card in

Make sure that the clipped corner of the SIM card is facing the correct direction and the metallic contacts are facing the correct direction. Slide the SIM card into the card slot until it stops.

Charge up

Ensure the battery is inserted in the handset. To charge the battery, plug in the charger connector at your phone (USB interface) and then plug the other end into an AC power socket.

The battery symbol indicates the charging status. While charging, the charge indicators will scroll. When all the scroll bars are steady, the battery is fully charged. Disconnect the charger from the phone. Disconnect the charger from the AC power socket.

Note:

If the battery is powerless, the battery icon will reappear after a few minutes of charging.

Touch screen & keys

Touch tips

Here are some tips on how to navigate around your phone.

Touch

To choose an icon or option, touch it.

Touch & hold

Open special functions or additional options.

Drag

To scroll through a list or move slowly, drag across the touch screen. Try it: on the Home screen, touch **Contact** icon to enter contacts list, you can drag contacts list up or down to scroll list.

Slide

To slide by moving your finger up or down on the touch screen quickly. Scroll through a list or move quickly, slide across the touch screen (drag quickly and release).

Double-touch

Touch quickly twice to zoom. For example, double-touch a picture in Photos to zoom.

Zooming tips

When looking at webpages or photos, place two fingers on the touch screen at once and pinch them together to zoom

Note:
Use the zoom function when you view photos, or when you browsing the web.

Rotate the screen

On some screens, the orientation of the screen rotates with the phone as you turn it from upright to its slide and back again. You can turn this feature on and off.

Key tips

Power/Lock key

- When powering off status, press and hold to turn on the phone;
- When powering on status, press and hold to enter phone options (Power off);
- To save your battery, prevent accidental touches or when you want to wipe smudges off your touch screen, put the touch screen to sleep by pressing Power/Lock key;
- To wake up the touch screen, just press Power/Lock key again, and then drag up the lock icon on the screen to unlock according to the clue on the screen.

Chrome

Use your web browser to view and navigate web pages, add pages as bookmarks You can open several windows at the same time and switch among them easily.

Connect to networks and devices

Your phone can connect to a variety of networks and devices, such as Wi-Fi, Bluetooth. You can also transfer files to/from your PC through the data cable.

Determine the Network You Are Using

1. Touch Launcher icon, and from Application menu, touch System settings.
2. Touch More > Cellular networks > Access point names.

The name of the wireless service provider you are
currently registered with is selected in the list.

Edit or Create New Access Points

If you and your wireless service provider determine that you
need to change the settings of your current access
point name (APN) or to create a new one, you must obtain
the APN and detailed settings from your provider.

1. Touch Launcher icon, and from Application menu, touch
   System settings.
2. Touch More. > Cellular networks > Access point names.
3. Touch an existing APN to edit it, or touch ⊕ . Enter
   the APN settings that you obtained from your wireless
   service provider.
4. When you finished, press More and then Save.
5. If you created a new APN, touch it in the APNs screen to
   start using it.

Wi-Fi Networks

Wi-Fi is a wireless networking technology that can provide
internet access at distance of up to 20 meters. To use
Wi-Fi on your phone, you access a wireless access point,
or "hotspot". Some hotspots are open and you can simply
connect to them. Others are hidden or implement other
security features, so you must configure your phone so it

can connect to them.

● **Connect to Wi-Fi Network**

1. Touch Launcher icon, and from Application menu, touch
   Settings.
2. Touch Wi-Fi.
3. Check Wi-Fi to turn it on. The phone scans for available
   Wi-Fi networks and displays the names of those it finds.
   Secured networks are indicated with a Lock icon.
4. Touch a network to connect to it

If the network is secured, you are prompted to enter a
password or other credentials (Ask your network
administratorfor details)

● **Receive Notifications**

By default, when Wi-Fi is on, you receive notifications in
the status bar when your phone detects an open Wi-Fi
network.

1. Turn on Wi-Fi, if it's not already on.
2. In the Wi-Fi list screen, touch More to open Advanced

options, check Network notification. You can uncheck this option to stop receiving notifications.

Bluetooth

Bluetooth is a short-range wireless communications technology that devices can use to exchange information over a distance of about 10 meters.

● **Turn Bluetooth On/Off**

1. Touch Launcher icon, and from Application menu, touch Settings.
2. Touch Bluetooth.
3. Check or uncheck Bluetooth to turn it on or off.

● **Pair With Bluetooth Devices**

You must pair your phone with a device before you can connect to it. Once you pair your phone with a device, they stay paired unless you unpair them.

1. Touch Launcher icon, and from Application menu, touch Settings.
2. Touch Bluetooth.
3. If Bluetooth is not turned on, check Bluetooth to turn it on. Your phone scans for and displays the IDs of all available Bluetooth devices in range.
4. If the device you want to pair with is not in the list, touch More select Refresh.

5. Touch the ID of the desired device in the list to pair it.

Connect to a computer via USB

You can connect your phone to a computer with a USB cable to transfer music, pictures, and other files between your phone's storage and the computer.

You cannot share your phone's data connection andPhone Memory via USB cable at the same time. If you are using USB tethering, you must turn that off first.

The connection to USB interfaces has to be limited to USB 2.0 version or higher. The connection to so called power USB is prohibited.

Working with Secure Certificates

If your organization's VPN or Wi-Fi Network relies on secure certificates, you must obtain the certificates and store them in your phone's secure credential storage, before you can configure access to those VPN or Wi-Fi networks on your phone.

If your network administrate instructs you to download the certificates from a website, you are prompted to set a password for the credential storage when you download the certificates.

Accessing Password

The cell phone and SIM card use several accessing passwords. These passwords help to prevent the cell phone from being embezzled.
You can use the function options in the security settings of settings menu to change accessing password (except for PUK and PUK2).

PIN Code

PIN code (Personal Identification Number) can prevent the SIM card from being embezzled. The PIN code is provided along with the SIM card. If the PIN code checking is activated, it is necessary to input the PIN code when the cell phone powers on every time.
If a wrong PIN code has been input for 3 times straight, it is needed to input the PUK code, then input a new PIN code and input it again for confirmation.

PIN2 Code

Some SIM cards may provide PIN2 code, while PIN2 code needs to be used in some functions like Call Cost. These functions can be used only if the SIM card supports them.

If a wrong PIN2 code has been input for 3 times straight, it is needed to input the PUK2 code, then input a new PIN2 code and input it again for confirmation.

PUK Code

PUK code (Personal Unlock Key) is used to change locked PIN code. PUK code is provided along with the SIM card. If not provided, please contact your local service provider for PUK code.

- If wrong PUK code has been input for 10 times straight, the SIM card can not be used any more. Please contact your service provider for a new SIM card.
- PUK code can not be changed. If the PUK code is lost, please contact your service provider.

PUK2 Code

PUK2 code is provided along with some SIM cards for changing locked PIN2 code

- If wrong PUK2 code has been input for 10 times straight, the SIM card can not be used any more. Please contact your service provider for a new SIM card.
- The PUK2 code can not be changed. If it is lost, please contact your service provider.

Fail to dial out	Please check if you press the dial key after dialing. Please check if calling is forbidden because of defaulting. Please check if the SIM is valid. Please check if the call barring is set. Please check if the fixed dial function is set.
Callers can not contact you	Please check if the mobile phone is on and connected with the network. Please check if the Call barring or call divert is activated. Please check if the SIM card is valid.
Fail to charge	Poor contact. Please check if the plug is connected well. Please confirm if the environment temperature is within the range of 0ºC ~40ºC while charging. The battery or charger is damaged. You need to replace it.

FAQ	Cause and Solution
Fail to set some functions	Wrong operation. The network provider does not support the function, or you have not applied for it.

📄 **Note**

If the instruction above can not help you solve problems, please record, Mobile phone model and serial number,Specific content of warranty, Clear statement of problems,Then contact your local dealer or an i-mobile authorized service center in your area.

Specific Absorption Rate (SAR) information

Your phone has been designed to comply with applicable safety requirements for exposure to radio waves. These requirements are based on scientific organizations through periodic and thorough evaluation of scientific studies. These guidelines include safety margins

designed to assure the safety of all persons, regardless of age and health.

- The radio wave exposure guidelines employ a unit of measurement known as the Specific Absorption Rate, or SAR. Tests for SAR are conducted by using standardized method with the phone transmitting at its highest certified power level in all used frequency bands.
- This phone is designed to meet the relevant guidelines for exposure to radio waves.
- The SAR limit recommended by the international Commission on Non-Ionizing Radiation Protection (ICNIRP), which is 2 W/kg averaged over ten (10) grams of tissue.
- The SAR for this model is as following:

SAR data information for residents in countries/ regions that have adopted the SAR limit recommended by the Institute of Electrical and Electronics Engineers (IEEE), which is 1.6 W/kg averaged over one (1) gram of tissue.

Battery Informations

Type	Capacity
Li-Polymer	2500 mAh

- The battery life depends on many factors, including the SIM card, network conditions, settings, usage and envioerement.
- Making calls, turning on the backlight and music player will consume more battery power.
- The standby time is shorter when the network is not available than in the standard status.
  For power saving, the backlight turns off automatically if your phone stands idle for an assigned time.
  The performance of battery varies with the charging status, temperature, local radio wave and backlight status.
