General Safety Information

This manual contains important information about the assembly, operation and maintenance of this water heater. General safety information is presented in these first few pages and is also located throughout the manual. Particular attention should be paid to information accompanied by the safety alert symbol “**⚠ DANGER**”, “**⚠ WARNING**”, “**⚠ CAUTION**”.

Keep this manual for future reference and to educate new users of this product. This manual should be read in conjunction with the labeling on the product.

Safety precautions are essential when any mechanical or propane fueled equipment is involved. These precautions are necessary when using, storing, and servicing. Using this equipment with the respect and caution demanded will reduce the possibilities of personal injury or property damage.

The symbols shown below are used throughout this manual. Always heed these precautions, as they are essential when using any mechanical or propane fueled equipment.

⚠ DANGER

DANGER indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

⚠ WARNING

WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

⚠ CAUTION

CAUTION indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate personal injury, or property damage.

FOR YOUR SAFETY

If you smell gas:

- 1. Do not attempt to light appliance.**
- 2. Extinguish any open flame.**
- 3. Disconnect from fuel supply.**

General Safety Information *cont.*

FOR YOUR SAFETY

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.

CALIFORNIA PROPOSITION 65:

WARNING: This fuel, and byproducts of combustion of this fuel, contain chemicals known to the state of California to cause cancer, birth defects, or other reproductive harm.

⚠ DANGER

• CARBON MONOXIDE HAZARD

- This appliance can produce carbon monoxide which has no odor.**
- Using it in an enclosed space can kill you.**
- Never use this appliance in an enclosed space such as a camper, tent, car or home.**

⚠ DANGER

• EXPLOSION - FIRE HAZARD

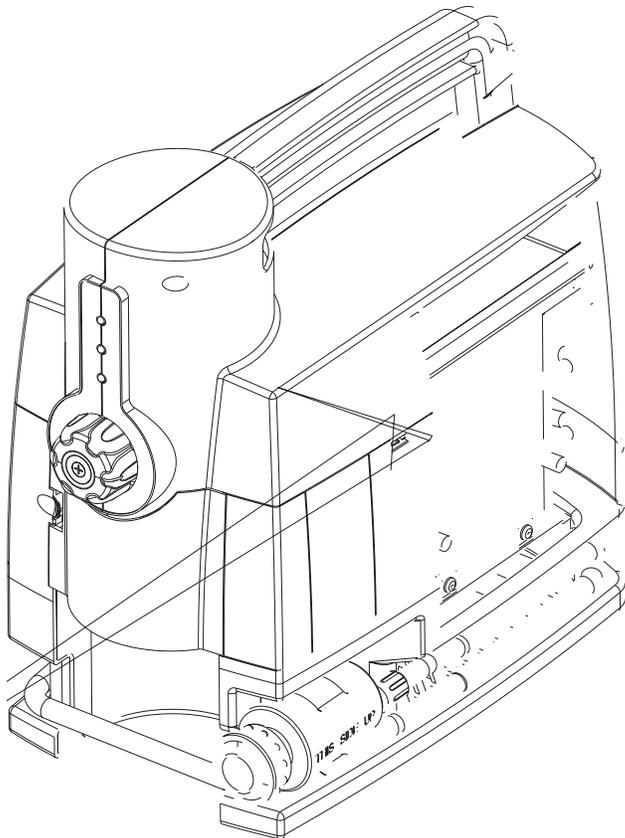

- Never store propane near high heat, open flames, pilot lights, direct sunlight, other ignition sources or where temperatures exceed 120 degrees F (49°C).**
- Propane is heavier than air and can accumulate in low places. If you smell gas, leave the area immediately.**
- Never install or remove propane tank while heater is operating, near flame, pilot lights, other ignition sources or while heater is hot to touch.**
- During operation, this product can be a source of ignition. Never use the heater in spaces that contain or may contain volatile or air-borne combustibles, or products such as gasoline, solvents, paint thinner, dust particles or unknown chemicals. Minimum clearances from combustible materials: 12 inches from the sides & 48 inches from the top.**
- Provide adequate clearances around air openings into the product.**

⚠ DANGER

Failure to comply with the precautions and instructions provided with this product can result in death, serious bodily injury and property loss or damage from hazards of fire, explosion, burn, asphyxiation, and/or carbon monoxide poisoning.

Only persons who can understand and follow the instructions should use or service this product.

If you need assistance or information such as an instruction manual or labels, contact the Coleman Co., Inc.

Before You Go

Preparing **Hot Water on Demand™** for initial use.

- **Unpack** your new water heater from the carton and make sure that all of the parts are included. If you find that one of the components is missing, please contact Coleman for a replacement. 1-800-835-3278 or TDD 1-316-832-8707.

To Set Up

• Installation of propane cylinder in **Hot Water on Demand™**.

- Use standard propane cylinders made for camping products.
- Do **not** use 14.1oz cylinders normally used for hand torches.
- Do **not** use MAPP gas cylinders or any other fuel except propane.
- Make sure the control knob is turned "OFF".
- Push in on the propane access door latch that is located on the left side of the door and swing door to opened position.

Open the Propane Access Door.

- Remove cap from propane cylinder but do not discard.
- While holding the propane cylinder upright, attach it to the REGULATOR located inside the door by turning clockwise. Be careful not to cross-thread, hand tighten only.

⚠ WARNING

- If using refillable propane cylinder, the LP-gas cylinder(s) must be constructed and marked in accordance with the specifications for LP-gas cylinders of the U.S. Department of Transportation or *Transport Canada, CAN/CSA B339*. Use only Coleman® accessories or parts. During heater set-up, check all hoses and fittings for leaks using soapy water. Never use a flame. Always keep refillable cylinders outdoors, never inside house, camper or tent.

Remove propane cap.

Install the propane cylinder.

• Check for Propane Leaks

⚠ WARNING

- Perform leak test outdoors.
- Extinguish all open flames.
- NEVER leak test when smoking.
- Do not use **Hot Water on Demand™** until connection has been leak tested and does not leak.

- Make 2 to 3 oz. of leak check solution (one part liquid dishwashing detergent and three parts water).
- Apply several drops of solution at the connection between the propane cylinder and the regulator. (Fig. 2)
- Bubbles indicate a leak.
- Check that the connection is not cross-threaded and that it is tight.
- Perform another leak check. If there is still a leak, remove the cylinder and contact Coleman for services or repair.

Fig. 2

• Close Front Propane Access Door

• Rotate Faucet outward from the stored position and place a water collection basin under faucet.

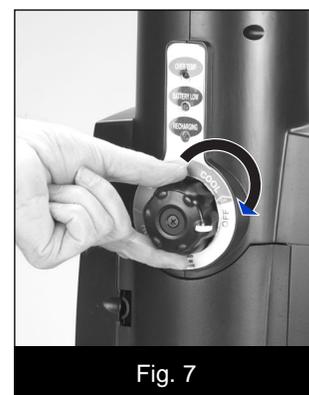

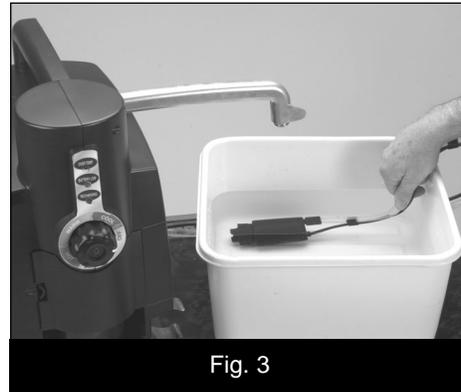

Use and Operation

- **Clean before first use.** It is strongly recommended that you clean the heater prior to using for the first time. Follow these simple steps before you leave home, and then clean at least once a year or when the hose becomes discolored with a white calcium build up.

Cleaning instructions:

1. In a clean container mix two-gallons of water with 12 oz. of calcium, lime, and rust remover (available at the cleaner section of hardware, general merchandise and food stores).
2. Place the pump in the container with the water/solution. The label "This Side Up" on pump should be facing up. (Fig. 3)
3. Position the container with the water/solution so that it is placed under the faucet.
4. Push and turn the control knob and position the knob at the "warm" setting. (Fig. 4)
5. Circulate the water/solution through the water heater for 2 minutes, then turn off heater by turning the knob clockwise to the "off" position. (Fig. 5)
6. Dispose of the cleaning solution in a sink or other drain, do not dump on the ground.
7. Fill container with 2 1/2 gallons of clean water.
8. Place the pump in the container with the water.
9. Position the water heater so the container with the water is placed under the faucet.
10. Turn the heater on by pushing and turning the control knob and position to the "cool" setting. (Fig. 6)
11. Circulate the clean water through the water heater for 2 minutes, then turn the knob clockwise to turn the heater off. (Fig. 7)
12. Repeat steps 6-11 with another batch of clean water.

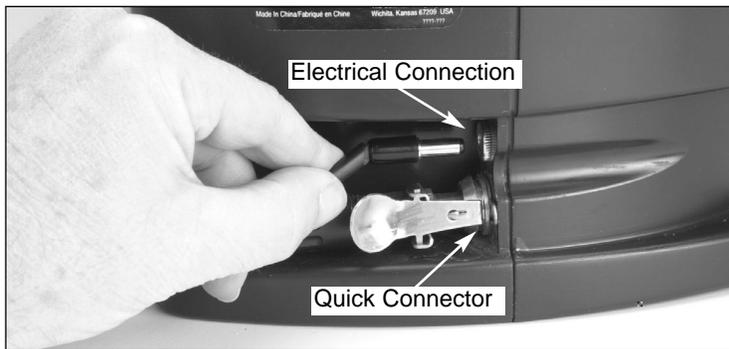

Follow these simple steps for using **Hot Water on Demand™** Complete Set-Up steps on previous pages.

⚠ CAUTION

Be cautious before plunging your hands into a basin of water by testing the temperature first.

NOTE: Check electrical and quick connector before using **Hot Water on Demand™**.

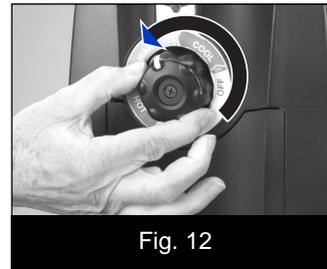

For Unheated Water

- Rotate the faucet outward (Fig. 8).
- Push and turn the control knob counterclockwise and position the knob at the “cool” setting (Fig. 9).
- You can release the knob while unheated water is pumping.
- Turn the knob clockwise to turn the water heater “off” (Fig. 10).
- The resulting output water temperature will be the same temperature as your source water.
- **Hot Water on Demand™** will not cool water to a temperature lower than your source water in the cool setting.

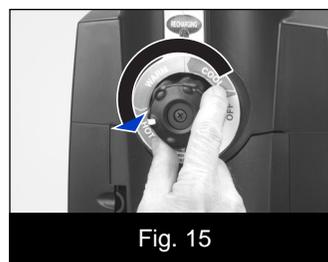

For Warm Water

- Rotate the faucet outward (Fig. 11).
- Push and turn the control knob counterclockwise and position the knob at the “warm” setting that is comfortable for you (Fig. 12).
- You can release the knob while warm water is pumping.
- Turn the knob clockwise to turn the water heater “off” (Fig. 13).
- The resulting output water temperature is dependent on the temperature of your source water.
- **Hot Water on Demand™** will maintain a constant temperature once you select the setting.
- **Hot Water on Demand™** will not increase the water temperature more than 55° over the temperature of the source water in the warm setting.

For Hotter Water

- Rotate the faucet outward (Fig. 14).
- Push and turn the control knob counterclockwise.
- To reach the hottest water temperature, the knob must be held counterclockwise with one hand all the way to the “hot” setting (Fig. 15).
- When the water has reached your desired temperature, place your cup or mug underneath the faucet.
- When you release the knob, the water heater will automatically reset to warm or you can turn the knob clockwise to turn the water heater “off” (Fig. 16).
- **Hot Water on Demand™** will not increase the water temperature more than 100° over the temperature of the source water in the “Hot” setting.

Helpful Hints

- Due to the integrated mechanical and electrical over-temperature shut-off devices, **Hot Water on Demand™** will not produce water that continuously exceeds 160°F. The burner will simply cycle off while the water keeps flowing for your convenience. The burner will cycle back on when internal water temperatures reach about 120°F.
- **Hot Water on Demand™** is ideal for many outdoor cleaning tasks. Coleman supports the Leave No Trace Principles that encourage minimal impact to the environment while camping. You'll find that less soap is necessary with warm water than with cool or cold water, so use small amounts of biodegradable soap. Please dispose of your gray water responsibly. Wash yourself or dishes 200 feet away from streams or lakes to avoid soap run-off finding its way to a natural water source. Contact your campground or park to learn about their specific gray water disposal policy.
- **Hot Water on Demand™** will typically make 40 gallons of warm or hot water on one full battery charge and a 16.4 oz. cylinder of propane. Make sure to pack sufficient fuel for the duration of your outing.
- To customize and enhance the use of your **Hot Water on Demand™**, Coleman offers several accessories. Check your local retailer or order directly from Coleman at 1-800-835-3278 or www.coleman.com.
- Continuous operation of water heater at warm setting for 20 minutes may cause the propane cylinder to freeze up. Let the cylinder thaw or replace with a fresh propane cylinder.

Storage

- **Remove propane cylinder** from heater after use and before transporting or storing **Hot Water on Demand™**. If using a bulk tank, disconnect the hose from the bulk tank before transporting or storing. Always store propane outdoors.
- **Drain water** from hoses before storing.
- **Recharge** the battery before storing.
- **For long term storage**, clean and dry **Hot Water on Demand™** and store indoors in a clean and dry location.
- Coleman's padded carry case is ideal for storing and transporting **Hot Water on Demand™**.

Maintenance

- **Clean water heater** at least once a year or whenever a white build up appears in the hose. Refer to Cleaning Instructions on page 6 of this manual.
- **Charge battery** immediately after each outing to reach optimum performance.
- **Replacing battery** - Use only a 6-volt, 4 AmpHr rechargeable lead acid battery. Remove the screw from the cover on the right side of your water heater and remove the cover. Pull the battery out from storage compartment and remove the leads from the battery terminals. Place the connectors on the battery terminals making sure to put the red terminal on the red or "+" battery terminal and the black connector on the black or "-" battery terminal. Replacement batteries are available to order from Coleman.

Troubleshooting Guide

| Symptom | Problem | Solution |
|---|---------------------------------|---|
| Yellow battery Low Light on during operation | Battery voltage low | Charge battery |
| | Battery defective | Replace battery (refer to maintenance section for instructions) |
| Burner will not light | Propane cylinder empty | Replace cylinder |
| | Propane cylinder frosted | Replace cylinder and reuse after thawing |
| | Electronic circuit defective | Send to Coleman Service Center |
| Low or no water flow (less than 1 gallon per minute) | Battery lead disconnected | Remove battery cover & reinstall lead |
| | Pump is not positioned properly | Rotate pump so "THIS SIDE UP" is facing upward |
| | Water container out of water | Fill water container |
| | Pump screen clogged | Remove and clean screen |
| | Hose bent or kinked | Straighten hose |
| | Pump unplugged | Make sure the black wire is plugged into back of heater |
| | Water bubble in hose | Drain hose completely |
| Water leak at pump to container | Fitting cross-threaded | Remove pump and reconnect to water container |
| Hose turns white or discolors inside | Calcium buildup | Clean heater (refer to page 6 for cleaning instructions) |
| Water leaking from inside heater | Defective seal or break | Send to authorized Coleman Service Center |

Service

- Repairs to gas passages, electrical circuitry and associated components should be done only by Coleman or an authorized service person.
- Owner repair and service should be limited and performed only to the following:
 - Cleaning
 - Propane cylinder leak checks and cylinder replacement
 - Battery replacement
 - Pump & pump hose replacement
 - Repair to doors: battery compartment door & battery charger compartment door.
- For Coleman authorized service, call 1-800-835-3278 – TDD 316-832-8707.

10 Year Limited Warranty

The Coleman Company, Inc. ("Coleman") warrants that for a period of ten years from the date of purchase, this product will be free from defects in material and workmanship. Coleman, at its option, will repair or replace this product or any component of the product found to be defective during the warranty period. Replacement will be made with a new or remanufactured product or component. If the product is no longer available, replacement may be made with a similar product of equal or greater value. This is your exclusive warranty.

This warranty is valid for the original retail purchaser from the date of initial retail purchase and is not transferable. Keep the original sales receipt. Proof of purchase is required to obtain warranty performance. Coleman dealers, service centers or retail stores selling Coleman products do not have the right to alter, modify or in any way change the terms and conditions of this warranty.

This warranty does not cover normal wear of parts, including chips, scratches, abrasions, discoloration or fading from extended exposure to sunlight or damage resulting from any of the following: negligent use or misuse of the product, use on improper voltage or current, use of non-Coleman accessories or parts, use contrary to the operating instructions or failure to follow maintenance instructions, commercial for-profit or non-profit instructional or rental applications, disassembly, repair or alteration by anyone other than Coleman or an authorized service center. Further, the warranty does not cover Acts of God, such as fire, flood, hurricanes and tornadoes.

COLEMAN SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES CAUSED BY THE BREACH OF ANY EXPRESS OR IMPLIED WARRANTY. EXCEPT TO THE EXTENT PROHIBITED BY APPLICABLE LAW, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS LIMITED IN DURATION TO THE DURATION OF THE ABOVE WARRANTY. SOME STATES, PROVINCES OR JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATIONS OR EXCLUSION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE OR PROVINCE TO PROVINCE.

How to obtain warranty service

Take the product to an authorized Coleman service center. You can find the nearest authorized service center by calling 1-800-835-3278 or TDD 1-316-832-8707 in United States or 1-800-387-6161 in Canada. If a service center is not conveniently located, attach a tag to the product that includes your name, address, daytime telephone number and description of the problem. Include a copy of the original sales receipt. Carefully package the product and send either by UPS or Parcel Post INSURED with shipping and insurance prepaid to:

For products purchased in the United States:

The Coleman Company, Inc.
3600 N. Hydraulic
Wichita, Kansas 67219
1-800-835-3278

For products purchased in Canada:

Sunbeam Corporation (Canada) Limited
5975 Falbourne Street
Mississauga, Ontario
Canada L5R 3V8
1-800-387-6161

Do not mail products with fuel in tanks or with disposable propane cylinders.

DO NOT RETURN THIS PRODUCT TO PLACE OF PURCHASE.

If you have any questions about this warranty please contact Coleman.

Hot Water On Demand™ Accessories

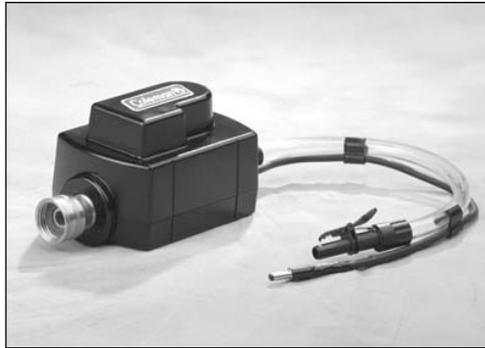

Spray Adapter

48" long hose easily attaches to faucet of **Hot Water on Demand™** with Quick-connect fitting. Handled spray head is ideal for a light shower.

Not Included

(#2300-512)

Water Hose Adapter

Regulates water pressure from input hose up to 100 PSI. Simply attach to **Hot Water on Demand™** for a continuous water supply.

Not Included

(#2300-511)

5 gallon Water Container

Collapses for compact storage when not filled with water – handled carrier includes spigot to dispense water. Threaded opening is sized to screw securely to pump of **Hot Water on Demand™** for a sealed connection.

(#809B605T)

Padded Carry Bag

Sized to carry the **Hot Water on Demand™**. Adjustable shoulder strap or barrel handles, includes two zippered side pockets perfect for carrying two 16.4 oz. propane cylinders or other accessories. Includes a PVC raincover that can be used to protect heater from the elements.

Not Included

(#2300-200)

5 ft. Pressure Hose & Adapter

Adapts **Hot Water on Demand™** to refillable bulk propane tanks. Also works with other Coleman appliances.

Not Included

(#5470-7931)
