## 1 About this document

This document is about the features and functionality of JSGCL Web Trading Terminal through which a user can place orders and view current market stats in real time. It intends to guide the user of the application about all views and windows available so that he/she can use it effectively. The document discusses different types of views available in the application as well as different customisation options to customize these views according to user preferences.

### **1.1 Document Composition**

The document contains different sections that explain different menu groups of the application. Starting from Margin Report, it explains View, Order and Symbol search menu options. Different customisation options available for views are also explained.

## 1.2 Audience

As this document is all about the features and usage of JSGCL Web Trading Terminal, it is intended for all users of JSGCL Web Trading Terminal.

## 2 Introduction

JSGCL Web Trading Terminal is an online trading application that offers the ability to buy and sell shares and view real time stock information. Web Based Trading System gives user the ability to trade in real time only using his browser. It provides the user with the functionalities like placement of orders, cancellation of orders, viewing his order status, transactions history, margin position and custody positions.

Live market rates are updated in real-time and does not requires user to refresh the page.

## **3 GETTING STARTED**

JSGCL Web Trading Terminal is accessed from your browser. Simply you need to OPEN a browser and type the URL – <u>www.jsglobalonline.com</u> in the browser URL field and press ENTER.

### 3.1 Login

#### 3.1.1 Login Window

Each application user is provided with a unique user name and password. Each user has a particular user type that determines the level of access a user has to the application. There are two types of users:

Client also has full access to all of the views but can place orders on behalf of him/her only.

**Subscriber** has limited access to the application. Order related views and functionality is not available for this type of user while all other views are available.

For application login,

Enter user ID in the User Name field.

Enter password in the **Password** field.

Press the ENTER key or click **SUBMIT** button.

Figure 4: Main Application Window

#### 3.2.1 Real Time Market Watch

Real Time Market Watch shows current buy and sell market positions for each symbol. Each row shows current market statistics for a particular symbol in a particular market. Real Time Market Watch is a power full view, which updates the best market and symbol statistics itself. There is no need to click or push any button or link to get the update. User can simply input required symbols in the Symbol box and it automatically gets its current buy and sells position. It saves the last Symbol list which user enters in the Symbol box and shows them when the user visits the site again.

### 3.3 Reports:

#### 3.3.1 Margin Report

Margin Report shows a client's current margin position. First table shows cash balance, custody balance and available margin balance. Second table shows utilized margin balances in different categories (COT, Future, Provisional, and Pending Orders) and also total margin utilized up till now. Third table shows the exposure allowed to the client depending on his/her current margin position and available margin percentage. Detail table shows the detail of client's custody and day trades.

#### 3.3.8 Password Change

This option is used if user wants to change his/her password. Password can be changed at any time while using the application and after successful change new password becomes effective immediately.

To change password,

Enter old password in the **Old Password** field.

Enter new password in the **New Password** field.

Retype new password again in the **Confirm Password** field.

Press the ENTER key or click **OK** button.

New Password and Confirm Password fields are matched and old password is also verified. New password becomes effective immediately if password has been changed successfully otherwise an appropriate error message is returned.
