Starting work with VPN Unlimited

VPN Unlimited - the easiest way to ensure your privacy in the Internet.

To start work with the VPN Unlimited you must register using a valid email. You don't need to confirm and activate your registration, but this email will be used in case you forget your password to VPN Unlimited, so, please, use a real active email.

Input your email and password, then tap Registration button.

In the opened window re-enter your password and tap Sign Up.

You are good to go!

In the next chapter you will find out how to set up a VPN connection in a few steps!

Setting up your VPN

VPN Unlimited sets up almost instantly!

After registration you will see the main window of VPN Unlimited. If you don't use any VPN at the moment, the app will notify you that VPN is currently turned off and suggest autosetup.

Tap OK to start the autosetup process. Note that you must have an active Internet connection to download the configuration file to your device.

The configuration file will be downloaded from the official VPN Unlimited web site and the Settings window will open.

Tap Install button to install the profile of VPN Unlimited to your device.
