

# GORDIUS Little Giant

## the ultimate in MIDI control

We are proud to present to you the GORDIUS Little Giant (LG2) foot controller

This extremely versatile and customizable controller is designed to solve any possible MIDI control challenge. The most complex setup can be controlled by this very compact floorboard. Its size and type of switches also enable use as desktop controller in a studio environment.

The unique high contrast graphical OLED display offers unprecedented possibilities, like displaying setlists with customizable font size or providing a user friendly menu based setup.

The floorboard combines many functionalities in one device: it's not only a foot controller, but can also serve as a USB-MIDI interface for your PC or MAC, as a full 2x2 MIDI merge box, as MIDI monitoring tool, ...

Although impossible to list all features on 1 sheet, here's a small overview of some important specifications:

- 1000 banks of 10 up to 64 switches !
- Up to 1000 songs, organized in numerous setlists
- Each preset can send an unlimited combination of different MIDI messages (PC, CC, SysEx, Note, ...) on multiple channels
- Dynamic memory management allows for a huge number of MIDI messages per preset, with up to 4000 presets available !
- Direct connection for 4 expression pedals, mono or dual foot-switches, support for up to 8 expression pedals through connected slave controller(s).
- Freely downloadable editor, both for PC and for MAC OSX

For more details on the extended feature set of the GORDIUS products, feel free to download the user manual from the GORDIUS website : <http://www.gordius.be>
