How to register SpeedDial+

The trial version of the software is limited to 10 days. During 10 days you can test the application with full features. After 10 days you will not be able to launch the application unless registered.

The full version of the software is obtained by a license code provided upon purchase. The license code is based on the unique IMEI provided and the application can be used exclusively on the device it is licensed for. The license cannot be retrieved and applied to other devices.

How to install SpeedDial+

Please transfer the .SIS file to your mobile phone via Bluetooth, IRDA or Cable. After that follow the installation instructions on the mobile screen. You may install this software either on your phone memory or your MMC.

Working with SpeedDial+

How to start

SpeedDial+ application can be opened in following ways (depending on the phone):

- Clicking on the Menu button → SpeedDial+
- Clicking on the Menu button → My Own/Programs → SpeedDial+

General information

SpeedDial+ application allow to create number button combinations with the help of which you can easily open any application, make a phone call or send SMS to a desired recipient using a single key combination. You may create as many combinations as your phone allows. The number of these combinations is unlimited.

support@symbianguru.com

At the first application start you will be prompted to turn the Autostart option On. This means that application will be started every time the phone starts, so you will not have to start it manually each time. You will be able to change this option when choosing the Setting button.

Opening the application for the first time you can see the main screen with the “no data” text on it.

To start using the application you have to click left soft key Options of the main screen. Having done this you will see the list of items, containing those for creating new shortcut combination, Settings and Help.

support@symbianguru.com

New combination

To create a new combination you have to click left soft key Options → New.

To get the newly-created combination you have to fill in the following fields:

- **Short Number** (enter the number combination which will be used to do the predefined action)
- **Type** (select the appropriate type for the new combination from the list)

The application supports the following shortcut types:

- *Shortcut to an application* (launches the selected application)
- *Shortcut to a document like Word, Sheet etc.* (launches directly selected file)
- *Shortcut for an entry from the contact database* - Phone number (directly calls the selected contact)
- *Shortcut for an entry from the contact database* - SMS (directly opens the SMS editor with the selected contact)
- *Shortcut for an entry from the contact database* - MMS (directly opens the MMS editor with the selected contact)
- *Shortcut for an entry from the contact database* - Email (directly opens the Email editor with the selected contact)
- *Shortcut for an entry from the contact database* (directly opens the selected contact in the built-in Contact database)
- *Shortcut for an internet website* (directly opens the built-in internet browser with the pre-defined http address)
- *Shortcut for Bluetooth status change* (changes BT to the status selected)

support@symbianguru.com

- **Application /File/BT status/number:** this field has different names according to your selection in the previous field. Here you can select what file/application/number should be opened on shortcut entering.

Note: shortcut combinations are composed of more than 1 number key as this can duplicate the speed dial numbers. In order to launch the software or to send the SMS message you need to enter the number combination and press Dial button.

- **Display name** (to enter your unique name of the new number combination. If you do not enter the name, the default name will be taken, you can change it any time later.)

After having created at least one new shortcut combination you can see it on the main screen of the application; the main screen will have the following view:

Choosing the left soft key of the main screen you can perform following actions:

- Edit (to change already existing fields in the combination records)
- New (to create new combination)
- Delete (to remove the current combination record)
- Delete all (to remove all combination records)
- Register (to enter registration code)
- Buy (to purchase the SpeedDial+ application online)
- Settings (to adjust all the software settings)
- Help (contains all necessary information for navigation across the application)
- About (contains brief information about the developer)
- Exit (exits the application)

Edit combination

Here you can change already existing fields in the already created number combinations.

Delete combination

Using this item you can remove any current number combinations from the list of available.

Application in action

SpeedDial+ application is available for the full range of applications, phone settings, web pages and contact actions. This software helps you to make your work with mobile phone quick and effective.

SpeedDial Plus can be used anywhere in the mobile phone.

If you want to launch the application, send the SMS or MMS message, send e-mail or change the Bluetooth status you should enter the appropriate number combination and press the Dial button. All you need is to create the speed dial number combinations for the most high frequency programs or high-usage tools. You can easily launch the message editor with frequently used recipient with the number inside. This software save your time and makes your work with mobile phone much more pleasant.

SpeedDial+ Settings

You can access Settings of SpeedDial+ clicking left soft key Options → Settings:
