1. Introduction

Some difficulties are encountered when using applications such as Tabs, MGP et cetera. Occasionally some of such incidents are not able to be resolved on phone and may require Service Desk staff to gain access to the user interface.

Remote Assistance provides a secured and more useful way to get such support and makes it easier and less costly for corporate Service Desk to provide support to users interactively and at times simultaneously.

With Remote Assistance, you can give access to the Service Desk staff to view your desktop to see what the problem actually is. You can then further grant the Service Desk staff access to control your desktop and resolve the incidents. After the resolution of the incidents you can then deny the Service Desk staff access to view your desktop.

2. Summary

This guide is written to help all users to know how to send a Remote Assistance Invitation to the IT Service Desk Personnel (Helpdesk staff) when a malfunction of IT service occurs in the usage of your computer.

It may be necessary to save this guide for the future.

3. Details

Below outlines how an Invitation can be sent. If your Microsoft Outlook is configured and is working well, you could send invitation by mail. On the other hand you could also send the invitation as a file. Follow through to see guideline on each of the approach.

3.1 How do you send an invitation for Service Desk Person to remotely assist you?

Below is a step-by-step procedure on how to use this feature to remotely send an invitation.

a) Go to Help and Support (Click on Start > Help and Support) See below:

b) Select the ASK option :(see picture below)

d) A new message box appears as shown below for you to type the Service Desk staff's email address

e) The connection password screen pops up. Communicate this password to your helper:

3.4 To save invitation as a file, click on Save Invitation as a file

🚱 🗳 Windows Remote Assistance	×
How do you want to invite someone to help you?	
With Remote Assistance, you can invite someone you trust to connect to your computer and help you with a computer problem. <u>How does this work?</u>	
Use e-mail to send an invitation If your e-mail program is not configured yet, choosing this option will start the configuration process.	
Save this invitation as a file If you use web-based e-mail, choose this option.	
Ca	ncel

e) Click on **Browse** to locate a place to save the file and specify password you wish to use. [See below diagram]

🖧 Windows Remote Assistance
Save the invitation as a file
After you save the invitation file, send it to your helper, either as an e-mail attachment or by saving it to a disk, a removable drive, or a network folder.
You must give this password to the person you are inviting, either in person or by phone. Your helper will use it to connect to your computer.
Enter a path and file name:
D:\Desktop\Invitation.msrcincident Browse
Password (at least 6 characters):
Confirm the password:
Important: For Remote Assistance to work, it has to communicate through your firewall. How can I tell if Remote Assistance can communicate through my firewall?
Finish Cancel

f) Communicate the saved location and the password of the invitation to the Service Desk staff.

g) On clicking the saved invitation file, a popup screen appears as shown below

Click Yes to accept the invitation as shown below

Click Yes to share control of your Desktop

3.5 Using the Remote Assistance Chat Function

The picture below shows you how you could use the chat facility to chat with the Service Desk Personnel instead of the Notepad.

- a) Type your message in the Text Area
- b) Press Enter to send message

c) To disconnect click on the area circled red.

4 Comments and conclusion

For any difficulties, Service Desk Personnel can be reached on Extension 1681 for assistance.
