

User Manual

Evolio Hi-Speed 4.3

IMPORTANT

Satellite signals are required for this product to function in Navigation Mode. There may be occasions within your home or building when the signal strength is limited and Navigation Mode may not be possible. This is quite normal for products of this type. If you experience difficulty in receiving a signal in your car you may need to use the external antenna (optional). You can check the number of satellite signals that the unit is receiving and the strength of those signals by viewing the GPS Receiver page; see "GPS Receiver" on page 8.

Safety

The Global Positioning System (GPS) is a satellite based system that provides location and timing information around the globe. GPS is operated and controlled under the sole responsibility of the Government of the United States of America, who are responsible for its availability and accuracy.

Using Your navigation in the Car

When using while driving it is essential that you drive with

due care and attention. Never modify the settings or program your navigation while driving. Only look at the map when it is safe to do so. Only follow the instructions when the road regulations allow you to do so.

When mounting the device in your car make sure that it does not obscure your view or impede the operation of any driving controls.

Battery

Your navigation uses a Li-ion battery. Do not use it in humid, wet or corrosive environments. Do not operate or store your device in high temperatures (>60 C) or in direct sun light. Do not store in a microwave or pressurized container. Do not pierce or break the battery casing.

Failure to follow these cautions will invalidate the warranty and may cause the battery to leak acid, become hot, explode or ignite and cause injury or damage.

Failure to follow these cautions will invalidate the warranty and may cause the battery to leak acid, become hot,

explode or ignite and cause injury or damage.

If you come into contact with leaked battery acid wash thoroughly and seek medical attention.

The Li-ion battery contained in this unit must be recycled

DECLARATION OF CONFORMITY

SC TELEVOICE GRUP SRL

**39, Grigore Cobalcesc Street, District 1, Bucharest
Romania**

Product identity :

- Type : GPS
- Trade reference : DJ50

declare under our sole responsibility that the product described upper to which this declaration relates is in conformity with the essential requirements and other relevant requirements of the R&TTE Directive (1999/5/EC) and safety toy directive (2009/48/EC).

The product is in conformity with the following standards and/or other normative documents:

HEALTH & SAFETY :EN60950-1

EMC : EN301489-1 EN301489-19

SPECTRUM : EN300487

And declare that all RTTE tests required were made.

Laboratory identity :

- Nom :MTI
- Procédure suivie : Annexe II

Disposal of old electrical appliances

The European directive 2002/96/EC on Waste Electrical and Electronic Equipment (WEEE), requires that old household electrical appliances must not be disposed of in the normal unsorted municipal waste stream. Old appliances must be collected separately in order to optimize the recovery and recycling of the materials they contain, and reduce the impact on human health and the environment.

The crossed out “wheeled bin” symbol on the product reminds you of your obligation, that when you dispose of the appliance, it must be separately collected.

Consumers should contact their local authority or retailer for information concerning the correct disposal of their old appliance.
