

24 Port Nway Gigabit Ethernet Web Smart Switch

User's Manual

Web Smart Switch

□. Features Overview

- Supports real-time status (link, speed, duplex) of each port
- Supports port setting for enable or disable operation (the 1st port can't be disabled)
- Supports port setting for N-Way or force mode operation
- Supports Broadcast Storm Protection
- Supports Port-bases VLAN
- Supports priority queues for QoS

□. Configure

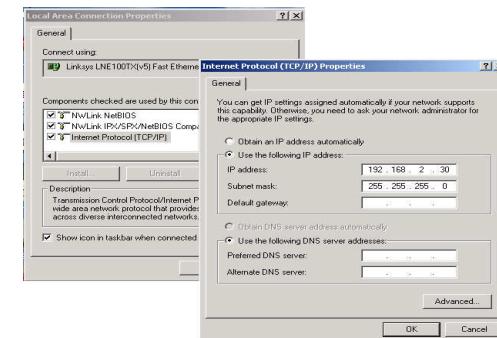

Please follow the steps to configure this Web Smart switch.

Step 1:

Use a twisted pair cable to connect this switch to your PC.

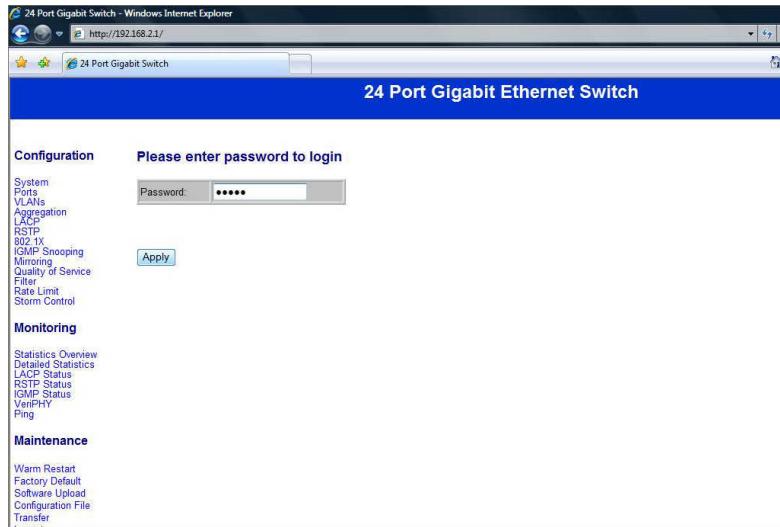

Step 2:

Set your PC's IP to 192.168.2.xx.

Step 3:

Open the browser (like IE...) and go to http:// 192.168.2.1
You will see the login screen as below:

Please key in the password to pass the authentication.

Password: admin

After the authentication procedure, the switch can be used now.

Step 4:

On the home page, select the configuration by clicking the icon as below:

- Configuration
- Monitoring
- Maintenance
- Logout

Configuration: System Configuration

The screenshot shows a "24 Port Gigabit Switch - Windows Internet Explorer" window with the URL "http://192.168.2.1/". The title bar says "24 Port Gigabit Switch". The main content area is titled "24 Port Gigabit Ethernet Switch". It has two main sections: "Configuration" and "System Configuration".
Configuration:

- System
- Ports
- VLANs
- Aggregation
- LACP
- RSTP
- 802.1X
- IGMP Snooping
- Monitoring
- Quality of Service
- Filter
- Rate Limit
- Storm Control

System Configuration:

System	MAC Address	00-03-ce-07-06-f0
Ports	S/W Version	Luton24.2.34d
VLANs	H/W Version	1.0
Aggregation	Temperature	0 °C
LACP	Active IP Address	192.168.2.1
RSTP	Active Subnet Mask	255.255.255.0
802.1X	Active Gateway	192.168.2.254
IGMP Snooping	DHCP Server	0.0.0.0
Monitoring	Lease Time Left	0 secs
Quality of Service		
Filter		
Rate Limit		
Storm Control		

Monitoring:

- Statistics Overview
- Detailed Statistics
- LACP Status
- RSTP Status
- IGMP Status
- VeriPHY
- Ping

Maintenance:

- Warm Restart
- Factory Default
- Software Upload
- Configuration File
- Transfer

DHCP Enabled	<input type="checkbox"/>
Fallback IP Address	192.168.2.1
Fallback Subnet Mask	255.255.255.0
Fallback Gateway	192.168.2.254
Management VLAN	1
Name	
Password	

It shows system status, such as: MAC address, system firmware version and so on.

You can change the user name, the password and IP address, and click "Apply" to confirm the new change.

Afterwards, you can reset the switch by turning off and turning on it to take the new user name, the password and IP address effectively.

Configuration: Port Configuration

The screenshot shows the 'Port Configuration' section of the switch's web interface. It includes a checkbox for 'Enable Jumbo Frames' and a dropdown for 'PERFECT_REACH/Power Saving Mode'. Below is a table of port configurations:

Port	Link	Mode	Flow Control
1	Down	Auto Speed	<input type="checkbox"/>
2	Down	Auto Speed	<input type="checkbox"/>
3	1000FDX	Auto Speed	<input type="checkbox"/>
4	Down	Auto Speed	<input type="checkbox"/>
5	Down	Auto Speed	<input type="checkbox"/>
6	Down	Auto Speed	<input type="checkbox"/>
7	Down	Auto Speed	<input type="checkbox"/>
8	Down	Auto Speed	<input type="checkbox"/>
9	Down	Auto Speed	<input type="checkbox"/>

You can enable or disable Jumbo Frames by clicking the checking box.

Select the “Port no.” which you want to configure the mode below,

- Auto speed
- enable/disable the port
- 10M/100M/1000M
- full/half-duplex
- enable/disable flow control

Configuration: VLAN Configuration

The screenshot shows the 'VLAN Configuration' section of the switch's web interface. It includes a 'VLAN ID' input field and an 'Add' button. Below is a 'VLAN Configuration List' table:

Port	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16
1	<input checked="" type="radio"/>															

There are 16 VLAN groups.

Select and add a group into “VLAN ID” and then click the port number which you want to put into the selected VLAN group.

Configuration: Aggregation/Trunk Configuration

Group	Port	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
Normal		<input checked="" type="radio"/>																							
Group 1		<input type="radio"/>	<input type="radio"/>																						
Group 2		<input type="radio"/>	<input type="radio"/>																						
Group 3		<input type="radio"/>	<input type="radio"/>																						
Group 4		<input type="radio"/>	<input type="radio"/>																						
Group 5		<input type="radio"/>	<input type="radio"/>																						
Group 6		<input type="radio"/>	<input type="radio"/>																						
Group 7		<input type="radio"/>	<input type="radio"/>																						
Group 8		<input type="radio"/>	<input type="radio"/>																						

Set up port trunk groups and then click the port number you want to include into the same group.

There are eight groups to choose and the maximum for one group is 24 ports.

Configuration: LACP Port configuration

Port	Protocol Enabled	Key Value
1	<input checked="" type="checkbox"/>	auto
2	<input checked="" type="checkbox"/>	auto
3	<input checked="" type="checkbox"/>	auto
4	<input checked="" type="checkbox"/>	auto
5	<input checked="" type="checkbox"/>	auto
6	<input checked="" type="checkbox"/>	auto
7	<input checked="" type="checkbox"/>	auto
8	<input checked="" type="checkbox"/>	auto
9	<input checked="" type="checkbox"/>	auto
10	<input checked="" type="checkbox"/>	auto
11	<input checked="" type="checkbox"/>	auto
12	<input checked="" type="checkbox"/>	auto
13	<input checked="" type="checkbox"/>	auto
14	<input checked="" type="checkbox"/>	auto
15	<input checked="" type="checkbox"/>	auto

Select the port number which you want to enable/disable its protocol.

Configuration: RSTP Configuration

RSTP System Configuration

System Priority	32768
Hello Time	2
Max Age	20
Forward Delay	15
Force version	Normal

RSTP Port Configuration

Port	Protocol Enabled	Edge	Path Cost
1	<input type="checkbox"/>	<input checked="" type="checkbox"/>	auto
2	<input type="checkbox"/>	<input checked="" type="checkbox"/>	auto
3	<input type="checkbox"/>	<input checked="" type="checkbox"/>	auto
4	<input type="checkbox"/>	<input checked="" type="checkbox"/>	auto
5	<input type="checkbox"/>	<input checked="" type="checkbox"/>	auto
6	<input type="checkbox"/>	<input checked="" type="checkbox"/>	auto

Select the port number which you want to enable/disable its protocol.

Configuration: 802.1x Configuration

802.1X Configuration

Mode:	Disabled
RADIUS IP	0.0.0
RADIUS UDP Port	1812
RADIUS Secret	[REDACTED]

Monitoring

Port	Admin State	Port State	Re-authenticate	Force Reinitialize	Statistics
1	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
2	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
3	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
4	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
5	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
6	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
7	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
8	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
9	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
10	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>
11	Force Authorized	802.1X Disabled	<input type="button" value="Re-authenticate"/>	<input type="button" value="Force Reinitialize"/>	<input type="button" value="Statistics"/>

Select the “Port no.” which you want to configure the mode below,

- Auto
- Force Authorized
- Force Unauthorized

Configuration: IGMP Configuration

The screenshot shows the 'IGMP Configuration' section of the switch's web-based management interface. It includes a table for enabling IGMP on specific ports (1-24) and checkboxes for 'Unregistered IPMC Flooding enabled' and 'IGMP Snooping Enabled'. The left sidebar lists various configuration categories like System, Ports, VLANs, Aggregation, LACP, RSTP, 802.1X, IGMP Snooping, Mirroring, Quality of Service, Filter, Rate Limit, and Storm Control.

VLAN ID	IGMP Snooping Enabled	IGMP Querying Enabled
1	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

You can enable or disable IGMP by clicking the checking box.

Select the “Port no.” which you want to configure the mode.

Configuration: Port Mirror configuration

The screenshot shows the 'Mirroring Configuration' section of the switch's web-based management interface. It displays a table where each port (1-24) has a checkbox for selecting it as a 'Mirror Source'. The left sidebar lists various configuration categories.

Port	Mirror Source
1	<input type="checkbox"/>
2	<input type="checkbox"/>
3	<input type="checkbox"/>
4	<input type="checkbox"/>
5	<input type="checkbox"/>
6	<input type="checkbox"/>
7	<input type="checkbox"/>
8	<input type="checkbox"/>
9	<input type="checkbox"/>
10	<input type="checkbox"/>
11	<input type="checkbox"/>
12	<input type="checkbox"/>
13	<input type="checkbox"/>
14	<input type="checkbox"/>
15	<input type="checkbox"/>
16	<input type="checkbox"/>
17	<input type="checkbox"/>

Port Mirroring is for mirror the traffic from Source port to Destination port.

Select the Destination port from port 1 to port 24, and then select the Source port by clicking the checking box of each port.

Configuration: QoS Configuration

The screenshot shows the 'QoS Configuration' section of the switch's configuration interface. It includes a dropdown menu for 'QoS Mode' with options: 'QoS Disabled', '802.1p', and 'DSCH'. Below the dropdown are 'APPLY' and 'CANCEL' buttons. On the left sidebar, there are sections for 'System', 'Ports', 'L2/L3', 'Aggregation', 'LACP', 'RSTP', '802.1X', 'IGMP Snooping', 'Mirroring', 'Quality of Service', 'Filter', 'Rate Limit', 'Storm Control', 'Monitoring', 'Statistics Overview', 'Detailed Statistics', 'LACP Status', 'RSTP Status', 'IGMP Status', 'VenPHY', and 'Ping'. A 'Maintenance' section at the bottom contains links for 'Warm Restart', 'Factory Default', 'Software Upload', 'Configuration File Transfer', and 'Firmware Upgrade'.

You can enable or disable QoS by clicking the checking box. If you enable QoS, you can select the class of service for each port.

Configuration: Filter Configuration

The screenshot shows the 'Filter Configuration' section of the switch's configuration interface. It displays a table with columns for 'Port', 'Mode', 'Source IP Filter', 'IP Mask', and 'DHCP Server Allowed'. The table has 13 rows, each corresponding to a port from 1 to 13. The 'Mode' column for all ports is set to 'Disabled'. The 'Source IP Filter' and 'IP Mask' columns are empty. The 'DHCP Server Allowed' column contains checked checkboxes for ports 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, and 13. On the left sidebar, there are sections for 'System', 'Ports', 'L2/L3', 'Aggregation', 'LACP', 'RSTP', '802.1X', 'IGMP Snooping', 'Mirroring', 'Quality of Service', 'Filter', 'Rate Limit', 'Storm Control', 'Monitoring', 'Statistics Overview', 'Detailed Statistics', 'LACP Status', 'RSTP Status', 'IGMP Status', 'VenPHY', and 'Ping'. A 'Maintenance' section at the bottom contains links for 'Warm Restart', 'Factory Default', 'Software Upload', 'Configuration File Transfer', and 'Firmware Upgrade'.

Select the "Port no." which you want to configure the mode to enable/disable filtering IP address.

Configuration: Rate Limit Configuration

Port	Policer	Shaper
1	No Limit	No Limit
2	No Limit	No Limit
3	No Limit	No Limit
4	No Limit	No Limit
5	No Limit	No Limit
6	No Limit	No Limit
7	No Limit	No Limit
8	No Limit	No Limit
9	No Limit	No Limit
10	No Limit	No Limit
11	No Limit	No Limit
12	No Limit	No Limit
13	No Limit	No Limit
14	No Limit	No Limit
15	No Limit	No Limit
16	No Limit	No Limit

Select the “Port no.” which you want to configure the mode of the speed.

Configuration: Storm Control configuration

Storm Control	Number of frames per second
ICMP Rate	No Limit
Learn Frames Rate	No Limit
Broadcast Rate	No Limit
Multicast Rate	No Limit
Flooded unicast Rate	No Limit

You can set up storm control by configuring the modes.

Monitoring: Statistics Overview for All Ports

The screenshot shows a table titled "Statistics Overview for all ports" with columns: Port, Tx Bytes, Tx Frames, Rx Bytes, Rx Frames, Tx Errors, and Rx Errors. The table contains data for 24 ports, with Port 4 having the highest Tx Bytes (98880) and Rx Bytes (63304). Other ports show 0 for most metrics.

Port	Tx Bytes	Tx Frames	Rx Bytes	Rx Frames	Tx Errors	Rx Errors
1	0	0	0	0	0	0
2	0	0	0	0	0	0
3	0	0	0	0	0	0
4	98880	207	63304	539	0	0
5	0	0	0	0	0	0
6	0	0	0	0	0	0
7	0	0	0	0	0	0
8	0	0	0	0	0	0
9	0	0	0	0	0	0
10	0	0	0	0	0	0
11	0	0	0	0	0	0
12	0	0	0	0	0	0
13	0	0	0	0	0	0
14	0	0	0	0	0	0
15	0	0	0	0	0	0
16	0	0	0	0	0	0

You can read statistics for all ports.

Monitoring: Detailed Statistics

The screenshot shows detailed statistics for Port 1 across various categories: Receive Total, Transmit Total, Receive Size Counters, and Transmit Size Counters. The table includes metrics like Rx Packets, Tx Packets, Rx Octets, Tx Octets, and Rx Broadcast.

Receive Total		Transmit Total	
Rx Packets	0	Tx Packets	0
Rx Octets	0	Tx Octets	0
Rx High Priority Packets	-	Tx High Priority Packets	-
Rx Low Priority Packets	-	Tx Low Priority Packets	-
Rx Broadcast	-	Tx Broadcast	-
Rx Multicast	-	Tx Multicast	-
Rx Broad- and Multicast	0	Tx Broad- and Multicast	0
Rx Error Packets	0	Tx Error Packets	0

Receive Size Counters		Transmit Size Counters	
Rx 64 Bytes	-	Tx 64 Bytes	-
Rx 65-127 Bytes	-	Tx 65-127 Bytes	-
Rx 128-255 Bytes	-	Tx 128-255 Bytes	-
Rx 256-511 Bytes	-	Tx 256-511 Bytes	-

You can have detailed statistics of each port by clicking the port number.

Monitoring: LACP Status

LACP Aggregation Overview

Group/Port	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24
Normal	Red	Green	Red																					

Legend

- Down
- Port link down
- Blocked
- Port Blocked by RSTP. Number is Partner port number if other switch has LACP enabled
- Learning
- Port Learning by RSTP
- Forwarding
- Port link up and forwarding frames
- Forwarding
- Port link up and forwarding by RSTP. Number is Partner port number if other switch has LACP enabled

You can read LACP status for LACP ports.

Monitoring: RSTP Status

RSTP VLAN Bridge Overview

VLAN Id	Bridge Id	Hello Time	Max Age	Fwd Delay	Topology	Root Id
1	32769-00-00-cc-07-06-f1	2	20	15	Steady	This switch is Root!

RSTP Port Status

Port/Group	Vlan Id	Path Cost	Edge Port	P2p Port	Protocol	Port State
Port 1						Non-STP
Port 2						Non-STP
Port 3						Non-STP
Port 4						Non-STP
Port 5						Non-STP
Port 6						Non-STP
Port 7						Non-STP
Port 8						Non-STP
Port 9						Non-STP
Port 10						Non-STP

Configuration

Pair	Length [m]	Status
A	-	-
B	-	-
C	-	-
D	-	-

Maintenance

- Warm Restart
- Factory Default
- Software Upload
- Configuration File Transfer

You can read VeriPHY cable status for all ports which you want to check by clicking the port number and the mode.

Monitoring: Ping Parameters

The screenshot shows the 'Ping Parameters' configuration page. It includes fields for Target IP address (0.0.0.0), Count (1), and Time Out (in secs) (1). Below this is a table titled 'Ping Results' with columns for Target IP address, Status, Received replies, Request timeouts, and Average Response Time (in ms). A 'Refresh' button is at the bottom.

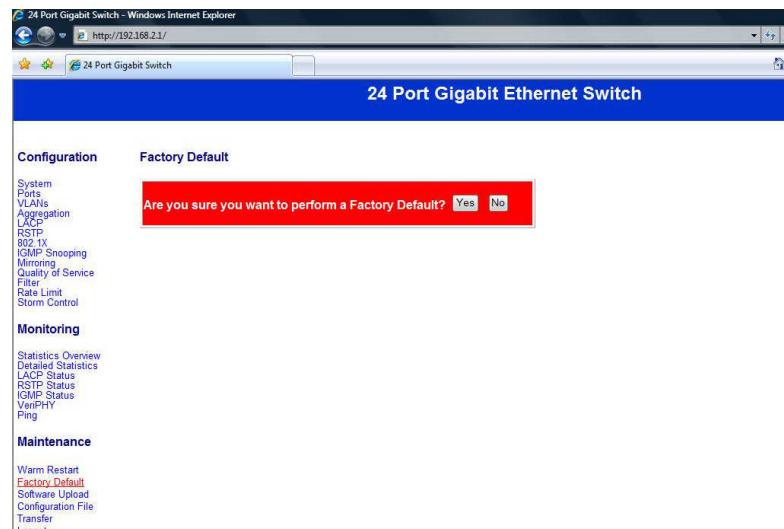

You can set target IP address by setting the mode which you want.

Monitoring: Warm Restart

The screenshot shows the 'Warm Restart' configuration page. A red box highlights a confirmation dialog: 'Are you sure you want to perform a Warm Restart? Yes No'. Below the dialog are sections for System, Monitoring, and Maintenance.

You can select yes/no to do the warm restart, and then the new settings will change according to your selection.

Maintenance: Factory Default

You can select yes/no to perform a Factory Default, and then the new settings will change according to your selection.

Maintenance: Software Upload

Follow the instruction on the screen to upload the new software.

Maintenance: Configuration Upload

Follow the instruction on the screen to upload and download the configuration.

Logout

When you forgot your IP or password, please use the reset button for the factory default setting?

Please take the following steps to reset the Web Smart Switch back to the original default:

Step 1:

Turn on the Web Smart Switch

Step 2:

Press and hold the reset button continuously for 15 seconds and release the reset button.

Step 3:

The switch will reboot for 20 seconds and the configuration of switch will back to the default setting.

A modal dialog box with a blue border. Inside, the text 'Please enter password to login' is centered at the top. Below it is a form field labeled 'Password:' with a corresponding input box. At the bottom right of the dialog is a 'Apply' button.

Key in the password to pass the authentication; the user password is "admin".

IP: 192.168.2.1
Password: admin
