

**ADEMCO****USER'S MANUAL****No. 4201 RPM  
PROGRAMMER****INTRODUCTION:**

The Ademco No. 4201 RPM Programmer is a handheld device, used to program addresses and response modes (fast/slow)\* for Remote Point Modules (RPMs) that do not utilize a DIP switch. Programming is accomplished by keypad entries, which are displayed on an LCD display window. The No. 4201 can also be used to troubleshoot faulty RPMs, even those with a DIP switch, by displaying the RPM's unique address. Multiple addresses indicates a fault.

The No. 4201 is powered by three 9VDC alkaline type batteries, located in the battery compartment below the keypad. The No. 4201 indicates low battery voltage by displaying the message "LOW BATTERY" on the display window. Batteries should be replaced at that time.

\*Note: Not all RPMs have this option. Refer to the RPM Installation Instructions for details.

## OPERATION:

The No. 4201 is connected to the polling loop terminals of the RPM to be programmed by a supplied interface cable which has a phono plug and two alligator clips.

**NOTE: The RPM must be disconnected from its polling loop, and only one RPM can be programmed or verified at a time with the No. 4201.**

The No. 4201 is activated by pressing the **POWER(\*)** key, and will automatically shut off 60 seconds after the last time a key is pressed. The software version number will be displayed for 1 second upon power-up, after which the word "On" will be displayed. Keypad entries are accomplished by momentarily depressing the appropriate key(s). Each key must be completely released before the next key is pressed. Note that the No. 4201's LCD display operates best at room temperature. If the unit has been exposed to cold temperatures (ex. stored in trunk of car), allow it to warm up for 15 minutes at room temperature before operating.

## KEYPAD FUNCTIONS:

RPM addresses are programmed by first entering a number from 1-255 (leading zeroes not required), then pressing **FUNC.(#) + PROG(3)**. Additional keypad functions are activated by first pressing the **FUNC.(#)** key, followed by pressing the appropriate labeled key for the desired function. The No. 4201 keypad functions are:

**FUNC.(#) + DISP.(1):** This function displays the current address of an RPM, and is used to identify unknown RPM addresses, or to verify address programming.

**FUNC.(#) + PROG.(3):** This function transfers the previously entered address and response mode data to the RPM. Refer to the **PROGRAMMING AN RPM** section for specific programming details.

**FUNC.(#) + FAST(4):** This function sets the fast response\* time for the RPM.

**FUNC.(#) + SLOW(6):** This function sets the slow response\* time for the RPM.

**FUNC.(#) + CLEAR(7):** This function clears the display window for key entry changes, and resets the No. 4201 for programming the next RPM. Displays "On".

**FUNC.(#) + TEST(9):** This function activates the test function (currently inactive).

## **PROGRAMMING AN RPM:**

1. **Connect the interface cable** by plugging the phono plug into the faceplate jack, and connect the alligator clips to the RPM polling loop terminals (Red to "+" / Black to "-").
2. **Activate the No. 4201 by pressing the POWER(\*) key.** (Automatically shuts off)
3. **Programming key entry format is as follows:**

**[ADDRESS] + [(#) + FAST(4) or SLOW(6) if available] + [(#) + PROG.(3)]**

Where ADDRESS = numerical keys corresponding to RPM's address (1-255).

Omit the FAST/SLOW entry if not available for RPM (it is ignored if programmed).

When entry is completed, the word "PASS" and the entered address will alternately flash 4 times, indicating successful programming. If the word "FAIL" appears, it indicates a possibly faulty RPM. Repeat the programming procedure. If "FAIL" still appears, the RPM must be repaired or replaced.

To change an entry, press **FUNC.(#) + CLEAR(7)**.

4. **Disconnect the cable clips from the RPM,** and repeat procedure for each RPM to be programmed.

## VERIFYING AN RPM'S ADDRESS:

To verify the address of an RPM, or display an RPM's unknown address, connect the cable as described in step 1 above, then press **FUNC.(#) + DISP.(1)**. The flashing symbol "**\_**" indicates an address search is in progress. The current address of the RPM will then flash 4 times. If more than one address flashes, it indicates that the RPM is defective and must be repaired or replaced. Note that the verification feature can be used on any type of RPM, including those with DIP switches, and verifies addresses only, not FAST/SLOW response.

## ERROR MESSAGES:

The following error messages may be displayed:

- OPEn:** The No. 4201 is not connected to the RPM, possibly indicative of a broken cable.
- SHOr:** The two alligator clips are shorted together, or their polarity is reversed. The No. 4201 will automatically shut off after flashing this message 5 times.
- Err1:** The RPM being programmed has a DIP switch; can't be programmed with the No. 4201.
- Err2:** The address entered is 0 or greater than 255.
- FAIL:** Programming was unsuccessful, indicating a possibly faulty RPM, which should be repaired or replaced.

## **BATTERY REPLACEMENT:**

Replace the batteries when "LOW BATTERY" message is displayed:

1. Remove the 2 battery compartment cover screws, and remove cover.
2. Unplug the old batteries from the battery clips, and replace with fresh 9 volt alkaline type batteries. Place batteries in the compartment, keeping the terminal clips to the left side of the compartment.
3. Replace the battery compartment cover, securing it with the 2 screws.

## **SPECIFICATIONS:**

Dimensions: 7-5/8" x 4" x 2-1/4"

Power: Three 9 volt alkaline type batteries

Operating Temperature: 32°F to 120°F (0°C to 50°C)

Storage Temperature: -4°F to 140°F (-20°C to 60°C)

## ADEMCO LIMITED WARRANTY

Alarm Device Manufacturing Company, a Division of Pittway Corporation ("Seller"), 165 Eileen Way, Syosset, New York 11791, warrants its security equipment (the "product") to be free from defects in materials and workmanship for one year from date of original purchase, under normal use and service. Seller's obligation is limited to repairing or replacing, at its option, free of charge for parts, labor, or transportation, any part proven to be defective in materials or workmanship under normal use and service. Seller shall have no obligation under this warranty or otherwise if the product is altered or improperly repaired or serviced by anyone other than the Seller. In case of defect, contact the security professional who installed and maintains your security system or the Seller for product repair.

This one year limited Warranty is in lieu of all other express warranties, obligations or liabilities. THERE ARE NO EXPRESS WARRANTIES WHICH EXTEND BEYOND THE FACE HEREOF. ALL IMPLIED WARRANTIES, OBLIGATIONS OR LIABILITIES MADE BY SELLER IN CONNECTION WITH THIS PRODUCT, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, OR FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, ARE LIMITED IN DURATION TO A PERIOD OF ONE YEAR FROM THE DATE OF ORIGINAL PURCHASE. ANY ACTION FOR BREACH OF ANY WARRANTY, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY, MUST BE BROUGHT WITHIN 18 MONTHS FROM DATE OF ORIGINAL PURCHASE. IN NO CASE SHALL SELLER BE LIABLE TO ANYONE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR BREACH OF THIS OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED, OR UPON ANY

(continued on next page):

OTHER BASIS OF LIABILITY WHATSOEVER, EVEN IF THE LOSS OR DAMAGE IS CAUSED BY THE SELLER'S OWN NEGLIGENCE OR FAULT. Some states do not allow limitation on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Seller does not represent that the product may not be compromised or circumvented; that the product will prevent any personal injury or property loss by burglary, robbery, fire or otherwise; or that the product will in all cases provide adequate warning or protection. Buyer understands that a properly installed and maintained alarm may only reduce the risk of a burglary, robbery or fire without warning, but it is not insurance or a guarantee that such will not occur or that there will be no personal injury or property loss as a result. CONSEQUENTLY, SELLER SHALL HAVE NO LIABILITY FOR ANY PERSONAL INJURY, PROPERTY DAMAGE OR OTHER LOSS BASED ON A CLAIM THE PRODUCT FAILED TO GIVE WARNING. However, if Seller is held liable, whether directly or indirectly, for any loss or damage arising under this Limited Warranty or otherwise, regardless of cause or origin, Seller's maximum liability shall not in any case exceed the purchase price of the product, which shall be the complete and exclusive remedy against Seller. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. No increase or alteration, written or verbal, to this warranty is authorized.
