User's Manual

Solar Garden Light (with metal holders) is a green and environment-friendly product. The light is powered by solar energy through solar panel, and built-in one piece of AA Ni-Cd rechargeable battery. The solar panel converts sunlight into electric energy and then charges the battery during day. A light sensor turns on the light automatically at night.

The light shall be installed in a place where the best sunlight can be located and the surface of the solar panel shall be placed in the best direction in order to accept the maximum sunlight. The light source is super bright LED with 4500mcd luminous intensity which can work up to 8-10 hours at night after a full sunnyday charging. The lifetime of the light is over 1 year.

DIAGRAM AND INTRODUCTION

The light is weather-proof and contains the parts as shown in diagram a:

INSTALLATION INSTRUCTION

Please carefully read the manual and then install the SS26 solar garden light accordingly.

- (1) Remove carefully the main body and metal holders from inner box;
- (2) Install the metal holders and fix the holders on ground tightly;
- (3) Move the power switch from 'off' to 'on' position;
- (4) Hang the lamp on the hook of the metal holder.

PRECAUTIONS

- (1) Do not touch the surface of the top of the solar light;
- (2) You can check the operation of the light by simply covering the upper surface of the solar panel completely to activate the light sensor,
- (3) Remember that the light is designed to work when it is dark. If there's high ambient lighting nearby, then the LED light may be very dim or not turned on at all;
- (4) Although the battery has been charged by the manufacturer, the electric level will have been probably dropped when you receive it. Please charge it for a full day to realize maximum performance.

REPLACING THE BATTERY

If the light stops working after being used for a long time, maybe the battery is beyond its lifespan. You can take off the light and loosen the battery lid, then change one piece of new rechargeable battery. (battery specification: 1.2V 60mAh Ni-Cd battery).

REMARK

The lifetime of LED is over 100,000 hours. You never need to change it.
