TSA Padlocks

BBP830-TSA

BBP830-TSA21105

BBP830-TSA21152

In the United States the Transportation Security Administration (TSA) requires access to luggage without the passenger being present; to allow travelers to lock their luggage they have accepted certain locks which they can open and relock.

Every lock with the Travel Sentry identifying mark (red diamond) is accepted by the TSA and may be opened by the TSA using their master keys.

WHY YOU SHOULD USE GRAPHITE TO CARE FOR YOUR LOCKS

Your customers will complain of sticky locks!

Always advise them to use the correct product to fix the problem. It is common to resort to using vegetable oil, sewing machine oil, WD40 or similar products, but these provide an ideal attractant for dust particles and dirt which results in a build-up. Instead always use Graphite powder which is greaseless.

Graphite powder is supplied in a small container with a pointed nozzle - making it easy to fit into the keyhole

Insert the tip of the tube or the end of the nozzle into the key slot of the lock.

Squeeze the tube or container one or two times. Don't use it excessively - a little graphite goes a long way.

See page 136 for more information

INVEST IN YOUR FUTURE SELL A CISA PERSONALISED KEYWAY

IS A CISA TRADEMARK (LIM)

IS A CISA TRADEMARK (MLA)

IS A CISA TRADEMARK & PATENTED SYSTEM

IS A HIGH PRECISION REVERSIBLE DIMPLED SYSTEM

IS A PATENTED HIGH PRECISION REVERSIBLE DIMPLED KEY SYSTEM

CISA has introduced a range of personalised keyways in order to give the discerning locksmith an opportunity to invest in his business. The system is identified by the symbol G on the key head, followed by a code eg. G96. The personalised keyway is normally registered to a locksmith for an area of about 10km radius.

The Advantages for the Locksmith are:

Return business - customers must return for any key duplication to the registered user which brings long term future business that could otherwise go to the local keybar.

Add-on Business - when a KA or MK system is sold it follows that all additions must be referred to the participating locksmith.

Up selling - the personalised keyways introduce the user to the concept of key security presenting opportunities to sell high security personalised systems such as "SP" thus increasing value of sales and increased financial benefits for the locksmith

In response to the growing need to resist the latest developments in illegal lock opening CISA now offer Cylinders **BKP** (BUMP KEY RESISTENT) SP ASTRAL AP3 euro profile cylinders are all provided as standard with bump key resistant pins. C2000 and Asix euro profile cylinders can be supplied **BKP** upon request.

ASSA ABLOY

880 series exit hardware

UNION Architectural Hardware introduces an innovative and contemporary range of exit hardware, exclusively designed to suit higher specification new build and replacement markets.

The UNION 880 Series combines quality engineering and high performance with contemporary aesthetics. The range boasts maximum versatility, comprising of both 'touch bar' and 'push bar' variants for single and double doors.

The new range offers a lighter, smoother and quieter alternative to the traditional bolting action. For single doors there is a choice of either a single point latch variant, or 2/3 point locking using upper and lower Pullman latches. For double doors, a choice of 3 and 5 point locking is available.

Guaranteed for 10 years, the UNION 880 Series is CE marked to BS EN 1125* and fire tested to BS EN 1634 on both timber and metal doors.

ASSA ABLOY

TS71

With the TS 71, DORMA has developed a door closer that rounds off its ClassicLine series perfectly. The ease and speed with which it can be fixed, the fact that its spring strength can be so easily adapted to the door size and its competitive price should make the TS 71 the ideal choice for your application.

CODE	DESCRIPTION
TS71	Door widths up to 1100mm - For single-leaf doors

TS73

Specially designed for internal or external doors, including fire doors, the DORMA TS 73 is a universal solution for doors of differing designs and styles. The flat and compact format of the TS 73 means that there are practically no problems with installation; and tried and trusted quality is your assurance of reliability.

CODE	DESCRIPTION
TS73	For internal or external doors of widths of 1100mm - weight of 80kg or less.

TS77

Designed for internal doors the DORMA TS 77 is the perfect solution for light weight doors. This door closer can be used on wooden or metal doors. With its adjustable sweep and latching speed as well as selectable closing force this door closer is perfect for domestic use.

CODE	DESCRIPTION
TS77VISI	Dorma Doorcloser Light Duty max door width 1100mm max weight 60kg
TS77BOX	Dorma Doorcloser Light Duty Boxed max door width 1.1m max weight 60kg

TS83

Decades of experience have gone into the development of the DORMA TS 83 door closer. The result is user convenience coupled with outstanding versatility. It can be adjusted to suit almost all types of door.

The DORMA TS 83 can even be supplied with additional anti-corrosion protection for exposed applications or aggressive conditions.

CODE	DESCRIPTION
TS83	Door widths up to 1400 mm / 1600 mm - For single- and double-leaf doors

TS90

Basic slide channel door closer with cam-action technology.

The DORMA TS 90 Impulse combines technical superiority with outstanding value, and unites advanced design with convenient functionality - all on the basis of its heart-shaped cam. Available with hold-open and cushioned limit stay options.

CODE	DESCRIPTION
TS90	Door widths up to 1100 mm - For single-leaf doors

NEW

Digital Door Locks

The ultimate test of any technology is how seamlessly it fits into everyday life.

Yale's range of digital Door Locks has been created to do just that. With advanced technology the Gateman not only boasts an alarm, but also has multiple modes of access, from Biometrics access, RF cards to a pin code (*match model to suit your preference*).

The outcome of this intelligence in design is sleek, elegant and highly secure products.

Proof that true style is a result of sophistications.

All locks are SABS approved and are supplied with two keys.

Yale mortice locks are available in 2,3,4,5 lever combinations as well as Euro profile cylinder variants. Mortice locks are graded according to the recommended application eg. A 2 lever lock offers a basic level of security and is recommended for use on internal doors only.

The level of security is determined by the number of key differs and the number of levers provides more resistance to picking.

52763-57-20	Cisa 3 Lever Sash Lock Stainless Steel

CISA® CYLINDER SASH LOCKS

Robust construction for high level durability and security

Black powder coated case gives exceptional corrosion resistance

Reversible Latch

Rebate Kits Available: 52ORB

Separate forend plate in stainless steel or brass to conceal all fixings and 5200 Series adjustment screw

Robust construction for high level durability and security

Twist reversible latch without dismantling the lockcase to allow on-site handling

35° follower action for firm positive opening action and with strong follower spring suitable for heavy duty lever furniture

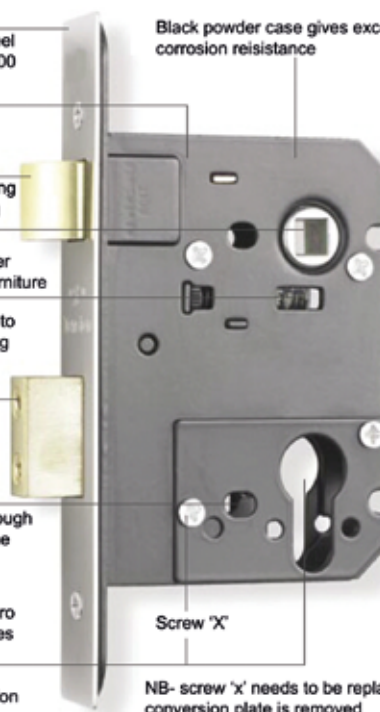

Patented 5200 Series spring adjuster to fine tune the strength without removing the lockcase

Single throw bolt with hardened steel rotating pins to protect the bolt for sawing

The case is pierced to accept bolt through furniture fixings at 38mm centres at the follower and the cylinder position

Dual cylinder capability suitable for euro profile or oval profile cylinders. Supplied as standard with conversion plate for euro profile cylinder applications. For oval cylinders simply remove conversion plate

Black powder case gives exceptional corrosion resistance

Screw 'X'

NB- screw 'x' needs to be replaced after conversion plate is removed

**10 YEAR
WARRANTY**

WHY YOU SHOULD USE GRAPHITE TO CARE FOR YOUR LOCKS

Your customers will complain of sticky locks!

Always advise them to use the correct product to fix the problem. It is common to resort to using vegetable oil, sewing machine oil, WD40 or similar products, but these provide an ideal attractant for dust particles and dirt which results in a build-up. Instead always use Graphite powder which is greaseless.

Graphite powder is supplied in a small container with a pointed nozzle - making it easy to fit into the keyhole

Insert the tip of the tube or the end of the nozzle into the key slot of the lock.

Squeeze the tube or container one or two times. Don't use it excessively - a little graphite goes a long way.

See page 136 for more information

What is the difference between fail safe and fail secure?

Locking devices can be either "fail safe" or "fail secure".
A fail-secure locking device remains locked when power is lost.
Fail-safe locking devices are unlocked when de-energized.

ACCESS CONTROL - ET ROLLING CODE

THE MOST SECURE TRANSMITTER IN AFRICA

The ET-Blu Mix transmitter range has the ability to transmit the new enhanced and more secure ("©G&C Electronics CC T/A E.T. Systems 2010") or old rolling code format .
This makes the product backward compatible to the existing ET Blue rolling code range of receivers.

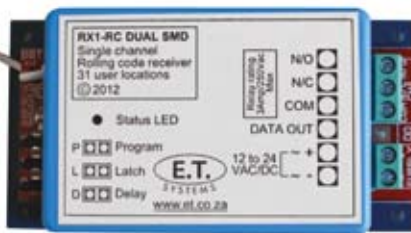

The ET-Blu Mix range of transmitters is fully compatible with the ET500 Plus, ET1000 and Umpetha sliding gate motors, 90 Blue and Axis swing gate motors, DC Blue Digital and ET Roll-Up garage door motors, 1 channel, 3 channel and our 999 user RXCONDO rolling code receivers.

CODE	DESCRIPTION
ET728	Single Channel Rolling Code Receiver 434MHz
ETRX3	Remote Receiver ET Rolling Code 3 Channel 434MHz
ETRXC	Remote Receiver ET Rolling Code 999 condominium 434MHz

The ET high power repeater assists in increasing transmission range capability of the ET high powered transmitters, standard ET Blue and ET Blue-mix transmitters.

They can operate the following over a long distance: farm gates, farm pumps, complex/business parks, gates, alarm and panic systems, lights/security lights, electric fence energizers etc.

8 repeaters can cover a total transmitting distance of 7.2km in line-of-sight with no RF interference.

CODE	DESCRIPTION
ET1397	ET 3 Channel, high powered, enhanced rolling code, weatherproof transmitter. 434MHz
ET1400	ET High powered, enhanced rolling code, weatherproof repeater. 434MHz
ET731	ET Single channel, enhanced rolling code, weatherproof receiver. 434MHz

ACCESS CONTROL - ET ROLLING CODE

The ET Blu-Mix 403.55MHz transmitters incorporate the latest technology available, setting new standards in transmitter transmission security.

The ET Blu-Mix 403.55MHz range of transmitters has the ability to transmit the new enhanced rolling code format (©) or the old rolling code format. The transmitter offers the user the flexibility to select the transmission code format they want to use. The product was produced to offer a solution to problem sites that experience interference on 433.92MHz resulting in poor range of any transmitters operating on this frequency.

The "ET Dual rolling code 403.55MHz receiver" works in conjunction with ET Blu-Mix © 403.55MHz rolling code transmitters.
Operating frequency 403.55MHz

CODE	DESCRIPTION

ACCESS CONTROL

ET 500 PLUS SLIDING GATE MOTOR SERIES

DOMESTIC / 12V

COMPLEX / ACDC

Fully compatible with ET Blue receivers, transmitters and accessories

On-board rolling-code receiver - 25 full opening, 6 pedestrian opening

ET500 12V - Battery driven, designed for domestic applications (<100 operations in 24hrs)

ET500 ACDC - Runs off permanent supply torroidal power pack with an AC fail switch over circuit to the battery backup. (100% duty cycle, true battery backup)

Maximum Gate Weight: 500kg
Maximum Gate Length: 9m

Kit Includes:

4m Track
2 x 4 Button ET Blue Mix rolling code remotes
Backup Battery
Theft deterrent bracket

CODE	DESCRIPTION
ET503	Green Sliding Gate Motor Kit on Plate - 12V mag limit
ET504	Green Sliding Gate Motor Kit Plug In - 12V mag limit
ET506	Red Sliding Gate Motor Kit ACDC

ET 1000 SLIDING GATE MOTOR SERIES

Features:

- Powerful 370w motor
- Maximum 1000kg gate weight
- 220V ac Industrial motor
- Start up thrust up to 40kg
- 60% duty cycle
- Easy "one touch" programming
- Auto Reverse on collision
- Auto Close selection
- Onboard 31 user receiver
- Adjustable load setting

CODE	DESCRIPTION
ET00974-000	ET 220V AC Industrial motor kit - excludes remotes

UMPETHA SLIDING GATE MOTOR - IDEAL FOR DOMESTIC USE

Fully compatible with ET Blue receivers, transmitters and accessories

Features - End User:

Silent operation
Improved safety functions
Cost Effective

Features - Installer:

Efficient 24 volt design
easy programming and setup
improved safety beam
Audible fault finding
End user remote programming

220 V AC for built-in transformer model - optional extra power supply
29V AC 1Amp plug-in transformer model.

Gate speed: 16m/min @ maximum rated gate resistance

On-board rolling-code receiver - 25 full opening, 6 pedestrian opening

Auto close function - programmable up to 4 minutes.

CODE	DESCRIPTION
ET1163	Umpetha Sliding Gate Motor Kit 24V DC

ACCESS CONTROL

ET AXIS ROTARY SWING GATE MOTOR

Designed to automate domestic swing gates up to 2.5m per leaf.

Features:

- 220V AC (29V AC low voltage option available) -
- Runs off permanent supply toroidal power pack with an AC fail switch over circuit to the battery backup.
- Drive arm speed 180° in +/- 15 seconds
- Anti-crushing safety sensing - incorporates the new anti-jamming feature and multiple collision shut down
- Max gate mass 250kg
- On-board rolling-code receiver - 25 full opening, 6 pedestrian opening

CODE	DESCRIPTION
------	-------------

ETI301	Axis double swing gate motor kit pedestal mount
--------	---

Also available in wall and plate mount

ET 90 BLUE SWING GATE OPERATOR

Features:

- Built in limit switches
- Automate up to a 2,5m gate leaf per motor.
- Can operate balanced gate leaves of up to 250kg mass.
- Anti-jamming gate feature in case of gaterunning into an obstruction
- On-board rolling-code receiver - 25 full opening, 6 pedestrian opening
- Motor rotational speed - 1500RPM
- Up to 30 operations per day
- Screw rod maximum travel - 300mm
- Magnetic limit switch

CODE	DESCRIPTION

ET-01089	Garage Motor Sectional Blue Digital 3.7m Kit 24V Battery

ET ROLL UP GARAGE DOOR OPERATOR

Fully compatible with ET Blue receivers, transmitters and accessories

Features:

- 24VDC Motor
- Powerful 80W motor
- Low battery indication
- Mains fail warning beeps
- Fast speed and soft start
- 2 channel onboard rolling code Rx
- Additional transmitters can be added
- Additional transmitters can be added
- Quick and easy to fit
- Separate control housing box
- Can be used without batteries
- Auto close selection
- Left or right hand fitment
- Safety beam input

CODE	DESCRIPTION

SMART GUARD™
SMART GUARD™
 air

Standalone keypad for cost-effective keyless access control.

The SmartGUARD keypad has been designed to provide all the power and functionality required for high-security keyless access control. It is fully weatherproof and manufactured using the latest in high-tech engineering polymers to be a robust, durable and affordable product.

- Up to 1000 unique 1 to 10 digit codes
- Selectively add and delete user codes
- Memory backup facility
- Weatherproof
- Anti-hack feature - prevents access through vandalism.

POLOphone™

The POLOphone system can be expanded to include five components as follows:

- Up to two entry panels
- Each entry panel fitted with one or two call buttons
- Each call button rings a group of phones
Up to two groups
- Up to three phones per group
- Intercommunication between the groups of phones

Operating Voltage:	12-14V DC (14V DC of powering handset) supplied from gate motor DC supply* or separate 14V DC supply
Current Draw:	Quiescent - 150mA (+/- 60mA for 1:1 system) Maximum - 200mA
Speech Volume:	Adjustable at each entry panel and handset.
Wiring:	2 Common wires polarized for speech, call and lock release.
Ring tone:	Electronic while button is depressed with separate tones when calling from each entry panel in a system or between groups of handsets

ACCESS CONTROL

SENTRY

METX1-B1

METX3-B3

These are standard dip-switch type remote controls that feature up to 4096 unique codes in the binary transmission, in either one or three button option. These transmitters are configurable to operate as standard remote controls or in "split code" mode of operation for townhouse complexes where a given transmitter may be used to control multiple devices such as gates and garage doors, alarm systems and the like.

These transmitters also feature a split-code mode which is very useful for use in townhouse complexes where a common code may be set for the gate but still allowing the owner or tenant to have up to two user-unique buttons to control the individual garage doors.

CODE	DESCRIPTION
METX1-B1	Remote Sentry Binary 1 button
METX3-B3	Remote Sentry French 3 button

SENTRY

The SENTRY Learning transmitter is a product offered in 1 and 3 button variants, each capable of learning an existing transmitter's code into its internal memory.

These are transmitters that do not have the customary dipswitch, but feature an internal receiver that allows the user to "clone" the button of an existing transmitter.

CODE	DESCRIPTION
METX1-L1	Remote Sentry Learning 1 button Grey 403 MHz
METX3-L3	Remote Sentry Learning 3 button Grey 403 MHz
METX4-L	Remote Sentry Learning 3 button Blue 403 MHz

SENTRY

METX1-F1

METX1-F3

The SENTRY Binary One and Three are two variants of French transmitter operating in the 403MHz range

These are French Code remote controls that generate a unique encrypted transmission with each keypress, in either one or three button option. The internal dipswitch is used as a basis for the transmitted rolling code.

CODE	DESCRIPTION
METX1-F1	Remote Sentry 1 button Black and Red 403 MHz
METX3-F3	Remote Sentry 3 button Black and Red 403 MHz

SENTRY

METX1-C1

METX3-C3

METX4-CH

These are standard encrypted remote controls that generate unique encrypted transmissions with each keypress, in either one, three or four button option.

Employing secure KEELOQ encryption, they provide the ultimate level of security- they are exceptionally resistant to code grabbing. The encryption is also sufficiently large to render an attack very time consuming (8 years). Each transmitter is unique and contains a unique serial number that is never duplicated.

CODE	DESCRIPTION
METX1-C1	Remote Sentry 1 Button Rolling Code 433 MHz
METX3-C3	Remote Sentry 3 Button Rolling Code 433 MHz
METX4-CH	Remote Sentry 4 Button Rolling Code 433 MHz

ACCESS CONTROL

CODE	DESCRIPTION
METX4-LIS	Remote Sentry 4 Button 433.92MHz blue
METX4-D	Remote Sentry Learning Dual 4 Button green

Sentry Receivers:

Sentry Products has designed a variety of reception patterns within its line of receivers to ensure that within a given area there will be no compromise of security.

CODE	DESCRIPTION
MERXI-L1	Sentry Receiver One Channel Code Learning Receiver - Learns Binary, Trinary, French codes
MERXI-B1	Sentry Receiver One Channel Dipswitch Binary Receiver 404 MHz Black
MERXI-C1	Sentry Receiver Rolling Code 434 MHz Blue
MERXI-C1/S	Sentry Receiver Rolling Super Code 434 MHz

SENTRY Long Range Transmitter (1 channel)
SENTRY Long Range One Channel Transmitter is a high power code hopping transmitter that is suitable for industrial

and domestic applications, where an exceptionally long range is required.

The typical uses include long range operation in large estates, or in areas where normal wireless products perform poorly due to clutter and/or interfering objects/structures. This product is also compatible with all SENTRY code hopping receivers.

SENTRY Long Range Receiver (1 channel)

The Sentry Long Range Receiver is compatible with the long range transmitters. It uses Keeloq encryption for secure operation.

The SENTRY Infra-Red Beam System is a short-range modulated infra-red beam suitable for most general security and gate automation applications

The product consists of a matching transmitter and receiver pair with a maximum working distance of 15 metres. The product is ideally suited for use as a safety beam for swing and sliding gate installations.

The product uses a modulated beam to reduce the risk of false signals when used as a perimeter beam for alarm system applications and is simple to install and align. This product is suitable for outdoor use provided certain conditions are met with respect to sealing cable entry points.

CODE	DESCRIPTION
MEGB-15M	SENTRY Infrared Beams 15m
METX-T2	SENTRY Long Range Transmitter - 403Mhz/433Mhz
MERX-T2	SENTRY Long Range Receiver - 403Mhz/433Mhz

MEGSM01

SENTRY GSM Communicator

The GSM Communicator provides a stable and versatile platform for customers wishing to add remote switching and monitoring functionality to a wide variety of applications. The GSM Communicator supports both SMS and GPRS communication options and offers multiple input, as well as output peripherals. The device may be used as a stand-alone unit that interfaces to one, or many cell phones. Alternatively, the Sentry GSM Communicator may be used in conjunction with the Sentry GPRS server infrastructure, offering a full remote management solution that is robust, as well as cost-effective. The device contains a unique "virtual wallet" feature that allows credits to be loaded onto the device. When an input pulse is detected, the unit determines if credit is available. If so, the pulse is reproduced on an output port and a credit is deducted. Technical specifications:

- 2 Inputs • 2 Relay Outputs • 1 Digital Output • Dual SIMStore Upto 100 numbers
- Missed Call Function • User Friendly PC Software

BALLS - are used for raking and are available in different patterns

DIAMONDS - are used for picking or raking. They are especially effective on locks with wafer tumblers

EXTRACTOR - are used to retrieve broken keys or other matter from inside the lock.

HOOKS - are used for actual picking 1 chamber at a time (as opposed to raking) They are particularly useful when the lengths of the bottom pins are significantly different

RAKES - are used for raking (manipulating pins in all of the chambers at the same time)

LOCKSMITH TOOLS

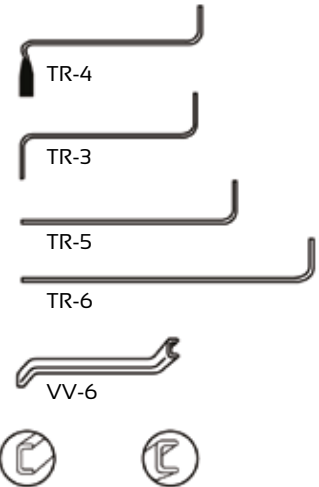

LIGHT TENSION

MEDIUM TENSION

RIGID TENSION

Proper tension is the key to picking and raking locks. Whether your tool of choice is a hook, diamond, ball or rake the lock will not open without just the right amount of tension applied to the cylinder.. HPC manufacture a wide variety of tension tools.

LOCKSMITH TOOLS

Souber Tools

The DBB Morticer, manufactured by Souber Tools, produces a perfect lock recess every time. It is a genuine 5 minute morticer which is acclaimed by locksmiths and builders alike. For anyone who regularly fits mortice locks it will prove invaluable - an accurate, speedy and professional tool that will save time and money.

- Simple and Easy to use
- Suitable for Wooden Doors
- Cutters for Aluminium Doors Available
- Quick change cutter feature
- Cuts Lock Forend as well as Lock Body
- Supplied complete with comprehensive instructions
- Complete with plastic carrying case

CODE	DESCRIPTION
DBBI	Souber Tools Morticer with 3 Cutter

Souber Tools

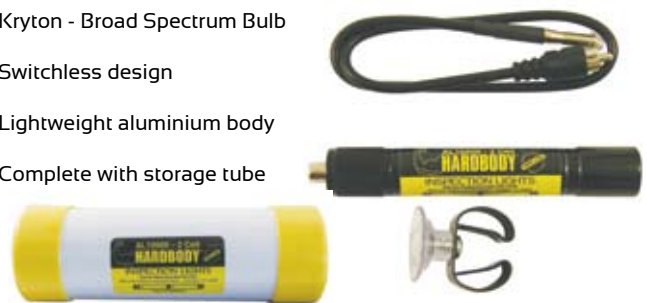

- Capable of drilling out many locks
- Made of high grade tempered steel
- Does not destroy pins
- Enables decoding of key combination

CODE	DESCRIPTION
TLCI	Tubular Lock Cutter

Souber Tools

- Krypton - Broad Spectrum Bulb
- Switchless design
- Lightweight aluminium body
- Complete with storage tube

CODE	DESCRIPTION
AL10500	Car Opening Light 2AA Cell Hardbody

HPL GRAPHITE GUN

- Fine dry lubricant - sprays in any direction.
- Refillable Rubber Holder
- Spill-Proof
- Clog-Proof
- Leak-Proof

CODE	DESCRIPTION
HGG	Graphite Powder LockLubricant

"JUST-A-PUFF" is a special dry lubricant developed for cylinders and padlocks.

Does not attract dust and dirt like traditional lubricants that would clog up the sensitive pins and springs inside.

LIR-HU64
READER

These picks are used to find the code of the key from the lock, and then cut a key. This is called DECODING the lock. The process requires a tool finding every wafer in the lock and determining the size of the wafer. This is what a LISHI DECODER does.

30.034.H30

KEY CUTTING MACHINES

BI-992

3-AXIS COMPUTERIZED MILLING MACHINE

The VERSA is the fastest 3-Axis Milling Machine available.

- Automatic callibration with key counter.
- Stand-alone with database and codes - computer required.
- Cuts keys to code or copy sample key.
- Engraving can be done on the head of the key
- Cutter specific or general cutter can be used for drilling/dimple keys.
- Complete with 4 jaws - Optional jaws available.
- Interface with Instacode

BI-996

COMPUTERIZED CAR & LATCH MACHINE

The DEZMO is the fastest latch and car code electronic machine available.

- Has a high workload rating
- High Speed High Resolution Camera on machine to accurately copy and decode keys to original specification or as per sample.
- 4-sided jaw with quick release and turn lever - no more swarf in your fingers.
- Auto-feeder option.
- Driven by Instacode onboard data base - communicates with Instacode
- 1 GIG memory - largest stand alone data base in the world.
- Carbide Wierda Cutter for high speed cutting and longer life of cutter

ELECTRONIC MORTICE MACHINE

The Sigma is an Electronic Mortice Machine - when perfection and accuracy are demanded

- Has a high resolution camera and a database of keys and codes so keys can be copied or cut by code.
- Stand-alone machine - no other computer is necessary
- Standard with mortice and double bitted jaw.
- Keys cut without removing or rotating keys in the jaw.
- Communicates with Instacode Base Program - no interface required.
- Machine can cut non conductive key material eg. Zamak
- Optional Jaws available: Ford Tibbe, Abloy, Abus, Chubb RKS and Kromer

KEY CUTTING MACHINES

2-AXIS COMPUTERIZED MILLING MACHINE

BI-994

- Best 2-Axis Milling Machine available.
- Supplied complete with 4 jaws to clamp all auto-laser/milled keys.
- Full database of all keys cut to code as well as decode and copy.
- Keys can be cut by bitting when stripping lock.
- This stand alone machine includes software and all cutting data.
- Can retain customer details as well as keys cut.
- Communicates with Instacode Base program - no interface required.
- Often purchased together with the Manual Milling/Drilling Machine

G Jaw optional to cut EDGE cut keys

H Jaw optional to cut TIBBE keys

BI-106

- One of the best Latch Machines available
It is incredibly accurate, comfortable and easy to use.
- New Easy Jaw Rotate Mechanism - No more swarf in your fingers - grooves milled away at the base of jaw to allow the swarf to fall away from the jaw.
- 4-Sided Jaw.
- Replaceable Tracer Point - quick and easy to replace.
- Key Gauge Protection - Carriage cannot move forward until the key gauge is in the down position.
- Machine automatically starts running when carriage is moved forward.

BI-206

- This is the heaviest Mortice Machine in its class - with linear guides as well as dampers to allow for extremely accurate key cutting.
- Cuts Mortice keys with sideways, bullet wards, double bitted keys and flat steel keys.
- Key Turret can be moved from left to right allowing you to cut Bullet and Sideward Keys without removing the key from the jaw.
- Fixed position locator on Cutter Turret to accurately align keys with the centre axis of the cutter.
- Cutter Guard on main cutter as well as the warding cutter.

KEY CUTTING MACHINES

NINJA

Ninja is the first and only compact, high precision key cutting machine for single-sided and double-sided flat keys, with code cutting, duplication and decoding functions.

Ninja is controlled through a light, portable console, designed to be placed either on top of the machine, on the work bench or on the wall. It has a stand-alone mode, used to run the basic duplication functions at an unparalleled speed, guaranteeing maximum precision and reliability, without need of a console or PC connection.

Its next generation software includes several very useful functions, including the management of multiple users, the saving of the cut keys, the importing of customised data, communications via Instacode and Promaster, an on board user manual and the possibility of downloading the updates from the net.

FALCON

FALCON is a code key cutting machine for special Tibbe-type keys for Ford and Jaguar vehicles, and for high security keys such as Abus and Abloy.

This machine can cut a key on both sides without having to remove the key from the jaw, thanks to an integrated adaptor that makes it possible to rotate the key by 360°.

The machine complies with all the newest safety standards: it has a safety feature that engages when the cutter is started and moves the carriage forwards, an independent switch to move the brush and a strong Plexiglas barrier.

FALCON is the only mechanical key cutting machine for special keys that combines ease of use and strength, thanks to the design of its base and to the reliable accessories, that guarantee the perfect stability of the key during the cutting phase, thus guaranteeing a perfect execution. Moreover, the innovative Easy Fit system makes it possible for the operator to secure the key without special tools.

PUNTO

The Punto machine is easy to use and precise, and is therefore the ideal tool to cut dimple and laser keys. It is reliable and ergonomic and has all the characteristics and the elements that are necessary to guarantee an excellent performance.

- Integrated LED light
- Vertical suspensions for dimple keys
- Manual locking of all mobile parts
- Possibility of use with additional jaws
- Carriages mounted on ball bushings
- Automatic check of the start and stop of the milling cutter
- Engine and wiring are protected by a relay against accidental voltage overloads

KEY CUTTING MACHINES

JMA® CAPRI

New Machine for Milling and Drilling

Cutting force indicator

Tilting jaws with degree of tilt index

Spring aided system for lazer keys

Tool holder and quick tool change system

Accurate height adjustment by means of light indicator

Patented double clamping area can tilt from 0° to 90°

JMA® DAKAR EXPRESS

Dakar Express - Milling and Drilling Machine.
Excellent value European Milling machine.
Extremely accurate with keyless chucks quick release system.
LED quick calibration indicators.
Spring loaded tracer point for dimple type keys.
Damper springs on jaw bed.
Carriage and head can be locked in any position.
This machine is often purchased together with BI-994.

JMA® TITAN

Semi-Automatic duplicating flat / latch keys for cylinders and automobile locks

JMA® MULTIMARK

MULTIMARK ENGRAVING MACHINE

The Multimark machine is useful for personalizing keys, cylinders or other metallic surfaces with texts, images and logos as desired.

KEY CUTTING MACHINES

GLadaid

GL-303

Best entry level Milling/Drilling machine
Turret can be locked at any height
Micrometer adjustments on tracer
Springloaded tracer to locate and hold sample key
to enable easy and accurate duplication of key
Tracer can be locked when used for milling
Synchronised tilting jaws 0 - 45°
Tibbe and Tubular attachments available
Complete with full range of cutters - largest range
of cutters out of the box

GLadaid
GL-888A

Dual Keycutting Machine

Multi-functional key duplicator equipped with 2
different cutters (latch & mortice)

Latch Cutter GL8811 76 x 6 x
Mortice GL8823 70 x 1.15 x 25.4

Used only in extremely low volume applications.

Budget Price

GLadaid
GL-888C

Dual Keycutting Machine

Multi-functional key duplicator equipped with 2
different cutters (latch & mortice)

Latch Cutter GL8811 76 x 6 x
Mortice GL8823 70 x 1.15 x 25.4

Used only in extremely low volume applications.

Budget Price

RST KEY MACHINES

- Fast and Reliable Mortice Machine
- Is known for its accuracy and ease of operation.
- Side and Bullet Warding easily cut.

TM-1011

KEY CUTTING MACHINES

RST KEY MACHINES

- Mortice Machine for mortice, double bitted keys and flat steel keys
- Side and Bullet Warding
- X and Y axis controlled with 1 lever
- Radius cutting facility on key
- Excellent Value for money machine

TM1019

RST KEY MACHINES

TM1014

- Ford Tibbe Machine
- Keys cut to code
- Extremely accurate
- Does not copy from a worn sample but to original specification

102X

- Latch and Car keys Duplicated
- Reliable and Accurate
- Sintered Metal Jaw
- Entry level Budget Key Machine

HPC

The Mini Speedex® is a lightweight, industrial-grade duplicator, and is one of the most accurate small key machines on the market. Its size and weight make it ideal for use in small or mobile lockshops. The 4-way jaws hold a large variety of different key blanks, including double-sided automotive keys. The expansive carriage range accommodates large-bow keys. The Mini Speedex® is equipped with a W1-grade tool steel cutter specifically designed for the high rpm motor. The machine comes with the HPC Softie® de-burring brush. The durable construction and bronze bearings combine for a long lasting machine.

KEY CUTTING MACHINES

HPC

Original Blitz 1200CMB240V

The Original Code Machine complete with 150 Cards and 2 Cutters - Best selling code machine in the world
Easy to use and extremely accurate machine

OPTIONAL

TIBBE-CMB

With the Tibbe Key Adapter kit you can cut both 6-space and 8-space Tibbe Keys - these keys are used by some Ford and Jaguar cars.

HPC

CodeMax 1200MAX240V

The CodeMax is the original computerized code machine - based on the standard Blitz machine

This standalone machine cuts most car & cylinder keys to code and can be linked to a PC with instacode or HPC CodeSource

The cutter pivots automatically to cut high security angle keys such as Medeco

Double sided jaw

Micrometer function

Complete with 5 cutters

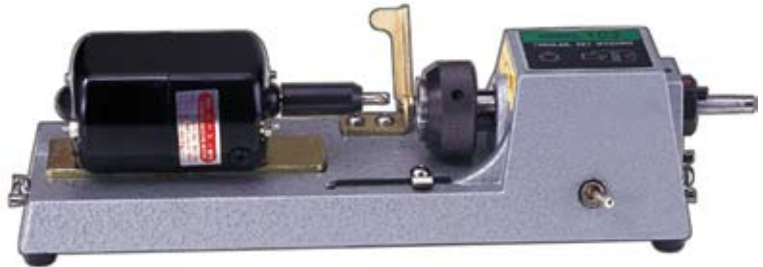

Easy to use LCD screen

Optional attachments available

KEY CUTTING MACHINES

ELLIS 103

- Tubular key duplicating machine
- 220V
- Clamp will hold keys between 7.5 and 7.8mm
- Supplied with user and setting instructions

ELLIS 007AW

- 12V DC latch machine
- Low volume machine
- Excellent for service vehicles
- Fully portable machine

GL-FORD

- Quality made attachment
- For originating Ford Tibbe keys
- For all makes of Milling Machines
- Complete with cutters and guides
- 360° key rotation in attachment
- Key is cut to code, ensuring a smooth operating key

TRANSPONDER

ADVANCED DIAGNOSTICS

AD100Pro

AD100Pro

Transponder origination when no key is present or keys are lost.

Transponder Key Programming

Remote Programming

Pincode Extraction, Fault Clearing

ECU Coding

Transponder Key Erasing

Updates via Web

2 Software Version loaded on machine

- use either Standard or Beta

Purchase only selected software as required

Large LCD screen

MVP-Pro

MVP-PRO

Extremely low initial capital outlay - the unit comes fully loaded with all software from Advanced Diagnostics.

It works like the AD100Pro except the user only pays per use with tokens purchased over the internet.

AD100Pro TRUCK

AD100Pro Truck

The AD100Pro Truck will be capable of programming keys for both 12v and 24v immobiliser systems on trucks when no keys are present or keys are lost.

Large LCD touch screen/versatile keypad for easy navigation/selection, colour coded dongles that configures the tester thus minimising the variety of cables required, and a USB interface for fast software downloads.

TRANSPONDER

ADVANCED DIAGNOSTICS

ADA105

The smart card security system consists of a calculator and smart card. The smart card is required for each vehicle manufacturer after the system has been selected from the main vehicle menu. The tester will display a CHALLENGE code, to continue, the user must enter this code on the smartcard calculator. A corresponding RESPONSE code is then displayed on the smartcard calculator, which must be entered back into the tester. Providing the CHALLENGE/RESPONSE codes correspond, access to continue will be granted. After each RESPONSE code is given the smart card's uses count on the smart card will be reduced by one.

ADVANCED DIAGNOSTICS

AD35

FREQUENCY TESTER

Checks whether customer remote key is working and transmitting correctly.

On certain vehicles switching the ignition on - will indicate a frequency sent & received.

Checks & displays the exact frequency transmitted.

Prevents wasting time trying to make keys to faulty system

Supplied complete with leather pouch

ADVANCED DIAGNOSTICS

ADC116

OBD TESTER

The quickest way to check that the OBD Port is supplying 12 V

Checks for good ground

Checks if Pin 7 on VW / VAG is connected to an aftermarket radio correctly (incorrect wiring of aftermarket radio can damage your AD100Pro / MVP-PRO)

AD900Pro

Professional Transponder Duplicating Machine

- Copies all copiable transponders including Texas 4C and 4D
- Random Code Generation
- Unlocks Megamos Crypto 48
- Transponder pin Code Reading
- 50 Different EPROM programs available
- Regular updates via Web
- Internet connection required for certain operations
- Can be used in conjunction with CodeX (see below)
- Can copy JMA Keyline and Silca Transponder keys

Options

KCP-FL	Fully loaded with all software and options for the locksmith that does not want to turn any business away
KCP-PR	Loaded with all cloning generating software as well as pin code Calculators
KCP-CL	Loaded with all Cloning Software to copy only including Texas TPX1 and TPX2

CODEX-EEPROM

Decrypt Solution

- Full Kit - a redesigned kit that locksmiths need to extract pin codes, read a wide range of eeproms and micro processors
- Option of programming cable which uses the new "Micro-hook" technology which allows the use to simply clip a number of hooks onto the relevant processor legs for faster reading and programming
- Can read a wide range of vehicles
- Includes DVD

TRS-5000 EVO

THE SIMPLEST AND MOST ADVANCED WAY TO CLONE KEYS

THE MOST ADVANCED, INTEGRATED TECHNOLOGY MADE SIMPLE. CLONE 85% OF VEHICLE KEYS ON THE MARKET WITH THE NEW AND EASY TO USE TRS-5000 EVO

Clones variations of the primary transponder brands, Philips ® and Texas ®, including fixed and crypto codes, can be cloned to TPX1, TPX2 and TPX4 cloning transponders. Thanks to the technology developed exclusively by JMA the TRs-5000 EVO is capable of cloning another transponder key without the need for electronic heads or batteries, utilising the same technology as original transponders, and without a computer or internet connection.

Software updating has never been simpler thanks to new PC software that allows the TRs-5000 Evo and PC updates to be downloaded and installed in a simple and automated manner. The simplicity of the machines usability is based on just two buttons (READ & COPY) for the recognition and cloning of transponder keys, displaying detailed information on the transponder type, in addition to the steps to follow for cloning in a clear and easy fashion. It can operate as a stand-alone device or connected to a computer through USB to utilise some additional features.

TRANSPONDER

K2 KEYLINE

884 DECRYPTOR ultra

Latest Remote Cloning Technology

A cloning device designed to expand infinite capabilities such as cloning RK60, the first clonable remote control transponder key.

Clone remote controls for: Alpha Romeo, Cadillac, Fiat, Lancia, Nissan, Renault. Opel, Peugeot, Citroen and many others to follow.

Read and copy in Stand-alone:

All fixed code transponders

Texas[®] crypto

Texas[®] crypto 3 (only on some ECU)

Phillips[®] crypto II, PH20 (ID46)

Phillips[®] crypto I, PH10 (ID4W) VAG-Ford

Phillips[®] crypto I, PH1D (ID45) Peugeot

Identification function: All fixed and crypto code transponders

Cloning all fixed code transponders (TK5-TK24)

Cloning all Texas[®] Crypto Transponders (TK40)

Cloning all Phillips[®] Crypto 2nd Generation Transponders (TK60)

Special function menu for advanced use together with diagnostic tool:

- Unlocking the original Megamos crypto for programming it with the diagnostics tool.
- Unlocking Phillips Crypto I for Chrysler for programming with the diagnostics tool.
- Generation of specific fixed code transponder on empty chip.
- Manual writing of fixed code transponder on an empty chip.

Stand alone Read and copy • Phillips[®] Crypto I PH1B (ID41) Nissan

• Phillips[®] Crypto I PH1C (ID42) VAG

Cigarette lighter adaptor to operate directly on the vehicle with the TK60

RK60 Key Head

For remote cloning.
Fully compatible with all
Keyline
horse shoe blades.

TK100 Key Head

Universal Transponder Head.
Used for all Transponders
ie. TK25, TK40, TK50, TK60
Fully compatible with all Keyline
horse shoe blades.

WH SOFTWARE

THE TOTAL LOCKSMITH MANAGEMENT TOOL

InstaCode is considered the leading Key Data Software throughout the world. With over 3 billion key codes, and new codes added daily, InstaCode is a vital tool for any professional locksmith.

Compared to code books or any other code package, Instacode is a quick, easy to use program.

A graphical layout displaying space & depth information, flat widths, angles, card number and other relevant key cutting information makes InstaCode easier to use than many alternatives.

WH-BASE

Instacode Base Program

- Print cards for HPC machine
- Print out entire code series
- Regular updates via internet
- Optional add-on packages
- Finds missing cuts if wafers are not in lock and will provide a cutting tree
- Communicates with most electronic machines eg. Silca Unocode, Quattrocode, Triax (with add on module) HPC Blue Shark Codemax, JMA Procode, Keyline 994, Versa & 993 and others

WH-AUTO

Instacode Automotive Add-on Module

- Optional add-on to Instacode Base Program
- Provides detailed information on ASP replacement locks
- Provides detailed opening information and diagrams of ASP locks
- Transponder information as well as position of diagnostic plugs etc.

WH-MIKEY

Instacode Masterkey Add-on Module

- Optional add on to Instacode Base Program, allowing locksmiths to design simple masterkeying projects

WH-POCK

Instacode Pocket Software - Add-on or Standalone

- Optional add or standalone package, which can be loaded on a PDA or mobile phone which runs on Microsoft Mobile. Full database of codes in your pocket

WH-TRIAX

Instacode Interface Program

- Interface Software to allow seamless intergration with Silca Triax milling machine

WH-PROMAST

Promaster Proffesional Masterkeying Program

- Professional masterkeying program with full range of reports.
- Please follow the link from our website for detailed information @ www.bblocks.co.za

OUR NAME IS OUR STRENGTH-INSIST ON GENUINE TRI-CIRCLE LOCKS

We are The only Chinese lock manufacturer to be awarded the Chinese Gold Medal of Excellence. Tri-Circle technical center was approved as a National Level R&D Center in 2009

An ISO9001 Company

- A Additionally hardened shackle—Anti-cutting
- B Double shackle latches—Anti-pulling
- C Larger Body—Stronger lock
- D More pin Levels and Combinations—Difficult to pick
- E 3 Unique multiple grooved keys—Less keyed alike
- F Solid Brass cylinder, with rim and anti-picking device—Difficult to pick.

TRI-CIRCLE
Since 1930
