

# Pre-Leadership Conference 2013

## Presenters

- Mason Vosburgh, KSDE Early Childhood Special Education Title Services Data Manager  
([mvosburgh@ksde.org](mailto:mvosburgh@ksde.org))
- Tiffany Smith, KSDE Early Childhood Special Education Title Services 619 Coordinator  
([tsmith@ksde.org](mailto:tsmith@ksde.org))
- Tim Berens, KSDE TASN GSTAD Project Grant Coordinator  
([tberens@keystonelearning.org](mailto:tberens@keystonelearning.org))

# Leadership Conference 2013

## MIS Session

### Agenda of Topics

- Help with KIDS Records
- Directory Updates
- Report Guidance
- K – Time Tips
- Other Tips
- Data Dictionary
- On the Horizon Changes
- K\_S Application Upgrade

## Parochial School KIDS Records by USD

- When a private school won't cooperate and send the public school building as the funding or attendance school on a KIDS Collection record, we offer the following as a solution to your local KIDS administrator
- Public school should send a KIDS **ASGT** record type
- Put the private school building as the AYP,
- USD building as the funding,
- The appropriate attendance building,
- Report all remaining required KIDS data, but:
- Leave the Student ID (KIDS) number blank.

The USD will get back from the system a list of students with near matches. The USD then selects the correct student and the association is then made.

3

## KIDS Records

- To report a student on an IEP, there has to be an association of the student to the organization. This association is made in the KIDS Collection system.
  - What does it look like?

Student ID	Last Name	First Name	Middle Name	Generation	Gender	Birth Date	Grade Level	District	Acct School	School Year
8182756073	Frazier	Brandon	M.		Male	06/06/2008	Kindergarten	D0101	0111	2014
1731549164	Frazier	Brandi	M.		Female	06/06/2008	Kindergarten	D0101	0111	2014
8182756073	Fraser	Brandon			Male	08/06/2006	Kindergarten	D0101	0111	2014

- » Association is made with the ID, district / buildings and School Year
- » Items is orange populate the student record in KAN\_Service

4

## KIDS Records

- What does no record submitted it look like?
  - You see no data in the rows under each column

### Student History

Record Type	Accountability School ID	Residence District ID	Last Name	First Name	Middle Name	Generation Code	Gender	Date of Birth	Grade Level	Local Student ID
-------------	--------------------------	-----------------------	-----------	------------	-------------	-----------------	--------	---------------	-------------	------------------

Where do you find these records?

In KIDS Collection system – student history – by school year.

5

## Directory Updates

- Directory is open for data entry
- If Coop or Interlocal level programs have class schedules and session, the local director of SPED has permissions to update these sessions
- New directory field
  - Contact e-mail for student record exchanges

### KIDS Student Transfer Email Contacts:

Email Contact # 1:

Email Contact # 2:

Student Record Exchange Email Contact:

6

## Directory Updates

- Foundations for School Success
- New organization (E0) in the directory with new buildings used for assigning KIDS ID numbers for preschoolers.
  - These programs will be set up by operators of private or community based preschool programs
  - They will enter all required directory data for their program
  - They may enter schedule information
  - They will mark which USD they are bounded by

7

## Directory Updates / Data Entry

- What if a Foundations student is on an IEP?
    - Minimal ramifications, standard reporting requirements apply
    - A KIDS collection record is required to associate the student to the USD. List USD district central office as the funding school.
    - If the Foundations program is in a school building, use the school building as location of services.
    - If the Foundations program is in a private or community based preschool, use the local private or community based preschool in the directory as location of services.
- » Clerks will report all other MIS data is a similar way as any other preschooler on an IEP.

8

## Reports Tips

- KAN\_Service delivers reports in PDF or Excel formats
- Reports are found on the navigation pane

- Indicator, Projected and Final Reports

Service Line Report - Services, Provider by Se  
December 1st - projected  
End of Year - projected  
Indicator 11  
Indicator 12  
Indicator 13  
Indicator 5 - projected  
Indicator 6 - projected  
Indicator 7 - projected  
Indicator 9 - projected  
OSEP Table 4 Exit Report - projected  
Full Session Report  
OSEP Child Count Summary - projected  
OSEP Education Environments - projected  
OSEP Placements - projected  
NPE Contract Report Summary  
Gifted - Summary Report - projected  
Final Reports

9

## Reports Tips

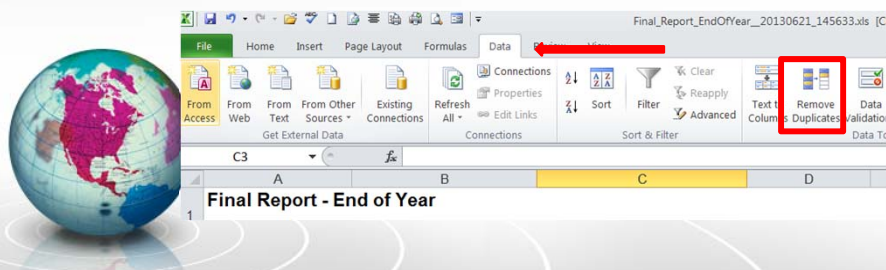

- Sorting and filtering
  - Excel files have default safety features the prevent accidental corruption of the spreadsheet data
  - A protected view banner
- Recommendation
  - Disable these defaults before sorting and filtering
    - Enable editing first, unwrap text and remove merge and center

10

## Reports Tips

- Excel
  - Many clerks create reports that contain duplicate student records (depending on how the data was entered).
- Recommendation
  - Use the Remove Duplicate tool found on the “Data” tab

11

## Reports

- Excel Concern
  - Several clerks have expressed that their Excel skills are not as good as they should be or in some cases have no Excel skills at all
- Recommendation
  - Have your clerk take an Excel class to come up to speed.
    - Most high schools have classes that focus on Microsoft products such as Excel.
    - » Excel could be given as a day long in-service for your clerks

12

$$(43598 + 22712) / 514103 = 12.89\%$$

14

## K – Time Stuff

- Remember collecting participation in K-time programs put students age 3-5 in a better LRE category
- Several MIS clerks have never reported any K time participation.
- Several MIS clerks have never set up their MIS to account for K – time even if the student participates.
  - » Question for directors, why?

15

## K – Time Questions

- Do I need to report every minutes of participation in regular early childhood programs without support as k – time, is the more the better?
- The OSEP benchmark is 10 hours a week – 600 minutes
  - If child participation is less than 10 hours, yes it helps to report up to 10 hours per week
- Some kindergarteners have little IEP support, is it better to report all time outside of special education as K time.

- » Once over 10 hours you are in the good category, additional time keeps the same category. To avoid doing the math on a daily basis, a short cut can be made.
- » For example Student X does not get support 2 days a week. The school day is 390 minutes. Listing K time for 390 minutes, 2 days a week gets you in the good category with 780 minutes.

16

## K – Time Questions

- If I use a short cut, will it cause a verification?
  - Yes, only if the service time and + K – Time exceed the daily session
- How do I know if the students are in the good category or not?
  - Each student record that counts on December 1 has a 2 letter “OSEP Environment” code on student profile and in the Dec.1 final report
  - T = Total minutes in regular early childhood program is  $\geq 10$  hrs.
  - U = < 10 hours
  - M = Majority  $\geq 50\%$  of IEP services occur regular early childhood program
  - L = Less < 50% of IEP services occur regular early childhood program

» Possible Combinations:

- » TM TL
- » UM UL

Table 1 (12/1):	Yes	OSEP Race/Ethnicity:	S
Table 4 (exit):	No	OSEP Disability:	VI
Table 5 (discipline):	No	OSEP Environment (12/1):	TM

17

## K – Time Questions

- What if there is no participation at all in Regular early childhood programs?
  - Then the student will fall in another “OSEP Environment” depending on the service locations reported.
    - SP = Separate class
    - SS = Separate School
    - HO = Home
    - PL = Service provider location

Table 1 (12/1):	Yes	OSEP Race/Ethnicity:	S
Table 4 (exit):	No	OSEP Disability:	VI
Table 5 (discipline):	No	OSEP Environment (12/1):	TM

18

## Data Reporting Tips

- Private / Parochial school calendars
- Be sure to discover the real calendar local Private / Parochial schools follow.
- They may not be the same as the local USD
- This directly effects several indicators, including LRE, child find etc.
  - Wrong calendars can have a negative effect on these Indicators

19

## Data Reporting Tips

- Recommendations
- Check your preliminary December 1 report.
- Use Excel to find anomalies, you may find
  - 5 year old students in 4<sup>th</sup> grade
  - Kindergarten students in preschool classrooms only
    - Why, clerks are not changing location of service when student transitions to Kindergarten

20

## Verification Clarification

- Verifications apply to a school year
- December 1 and June verifications are combined
- Recommendation
  - Only re-enter a student record if the data has changed.
    - Why?
  - New imports remove resolved verifications and result in the same error to be corrected again

» Track exports and imports in local IEP programs to avoid re-importing a record with no data changes.

21

## Importing Clarification

- Each record has an internal ID number (X211P82)
- Records may be imported to:
  - fix verifications
  - Update IEP services, etc.
- The act of importing removes the original record and replaces with the new.
  - The original record counted on December 1. Table 1 = Yes

» New imports of the same student does not say Table 1 = Yes

» Why?

» Because the record that counted (X211P82) was deleted upon import. The student (by name) is listed on the 12-1 report by the prior record.

22

## Importing Issues

- Duplicate records can be created if the new imports have a different responsible building.
  - How to prevent duplicate records
    - Change the responsible building to the new building in the existing record prior to import.
      - Match is made, New record replaces original record
    - Delete the original student profile for the school year prior to import. New record becomes the only record.

23

## Data Dictionary Stuff

- New terminology
  - Term AYP school has changed - New term
    - Accountability School
    - Accountability School ID (building number)
      - Used as the “Responsible school” in K\_S
  - Term “Extracted” is used to better describe how KSDE gets LEA data for the federal 618 submissions.
    - » Additional data is not required to be submitted to KSDE outside of KAN\_Service for the OSEP reporting requirements.

24

## Data Dictionary Stuff

- Reporting Standard Added
  - Keep the data as current and up to date as possible
    - Monthly updates at a minimum
- Constraints were added to the file specifications to clarify what fields are required, optional, or conditional
- Re-Evaluation Completion Date – clarification added

25

## Data Dictionary Stuff

- How to create data files is addressed in terms of the collection for the school year, not as 2 points in time.
- Clarification to the K- Time setting added to address the 10 hour / 600 minute per week participation.

26

## Data Dictionary Stuff

### New Basis of Exit Status

Code "S" – services cease due to suspension or expulsion

What students can use this code?

Gifted only, - Eligibility / funding code 4

When can the code be used?

When a gifted only student is subject to a suspension or expulsion and services are no longer provided.

Are there additional exiting requirements?

No, the same rules for reporting exits apply. Exit date and service end date are equal, mark gap in service when student returns, etc.

27

## On the Horizon Changes

- Consolidation of reporting all pullout locations to a single setting code of "G"

- Ramification – remove the "F" code

- Why?

- Inconsistencies, many clerks report preschool pull out of "F" for students grades KG and higher
- A 5 year old and a 6 year sit side by side, 1 is "F", 1 is "G"
- Simplify the begin year set up for the MIS clerks
  - » Effect on LRE calculation - none

28

## On the Horizon Changes

- Extension of the December 1 collection window
  - OSEP is proposing a later due date in April
  - This may mean an extension of the finalization of data by the LEA from February 28
- How will this work?
  - KSDE will run the preliminary child count for LEA review in January
  - KSDE will run the final report and lock the data in the last week of March

29

## K\_S Application Upgrade Summer 2014

- Improvements to sync with KIDS functions
- Removed 54 verifications, fixed logic for 11
- Improvements to IEP and Evaluation due date reports
  - MIS clerk request, target dates are now optional
- Improvements to year to year data rollover
- Added navigation buttons on student records
  - For easier movement between pages

30

## K\_S Application Upgrade Summer 2014

- Removed calculation process from verification routine to speed up process. Run calculations is a now a separate process.
- Improvements to Indicator 12
- Report document added to assist with resolving overlapping students
- Improvements to roster reports

» Additional data fields added to Final OSEP reports.

31

## Indicator 20

- Please remind your MIS clerks
  - Attaching confidential student information to e-mail is in violation of KSDE security policy.
    - Doing so can result in a loss of point on Indicator 20.
  - Reporting program locations such as the K Time day care building for participation time in elementary school buildings (for example), may be considered inaccurate reporting and resulting in a loss of Indicator 20 points.

32

## IDEA Indicator 12 Early Childhood “Transition Referral System”

Pre-Leadership Conference MIS Presentation  
July 24, 2013  
Tiffany J. Smith  
KSDE Early Childhood Special Education Title Services (ECSETS)  
tsmith@ksde.org

## Why More?

- Need for further accountability with specific referral dates and reconciliation “real-time” rather than annually
- Part C is required to notify both LEA and SEA of all referrals, including dates and results of referral
- Ensure referral is made to the accurate district where the child resides, as required by law

7/24/2013 Pre-Leadership Conference 2

## Accessing New Kansas IDEA EC Transition Referral System

- Identify and designate staff who will be responsible to updated transition referral system with KDHE.
- Send information to Beccy Strohm [bstrohm@ksde.org](mailto:bstrohm@ksde.org) and include: position title, first and last name, USD #'s, Special Education Coop (if appropriate), phone number and email address.
- KSDE will notify KDHE those school personnel who will have access and staff will set up account with password information.

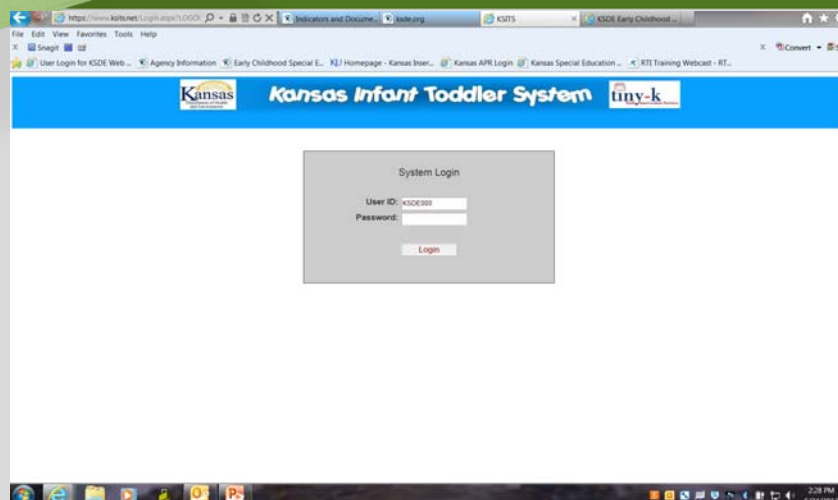

7/24/2013

Pre-Leadership Conference

3

## Transition Referral System

The screenshot shows a web browser window with the URL [https://www.ksde.org/Login.aspx?LOGON\\_ID=1](https://www.ksde.org/Login.aspx?LOGON_ID=1). The page features a blue header with the Kansas logo, "Kansas Infant Toddler System", and "tiny-k". Below the header is a "System Login" box with fields for "User ID" (containing "KSCES01") and "Password", and a "Login" button. The browser's address bar and taskbar are visible at the bottom.

LEA - SEA Referral Reconciliation System

Referral System | Reports | User Manual

The LEA/SEA Referral Reconciliation System was developed to create an easy, efficient method for locating and reconciling discrepancies found in child records during the Part C to Part B transition process. The purpose of this system is to prevent multiple State IDs (KIDS IDs) from being assigned to the same child, and to ensure that the information being transferred is accurate.

**Part B User Manual**

**System Access**

The system may be accessed by logging into the KSITS web system at <https://www.ksits.net>. Upon login, Part B (KSDE) users will be automatically directed to the LEA-SEA Referral System.

**Main Screen**

The main screen of the system contains two tabs, Referral System and Reports. The Referral System tab is selected by default when the system is first opened. In this tab there are two list boxes and 4 buttons used for selecting the districts to open. The list box on the left shows the school districts available for the user to select. The list box on the right shows the currently selected districts to be opened.

To select a district to open, first select it from the list on the left, then press the "Include Selected >" button. You will now see the selected district in the list on the right. To select all districts, press the "Include All >>" button. You will now see ALL districts in the list on the right. Use the "< Remove Selected" and "<< Remove All" buttons to remove them from the list of districts to open.

Once you have selected the districts you wish to open, press the "Open" button to open the Referral System for the selected districts.

**Referral System**

Once you have selected the district(s), the Referral System will be opened. The Referral System contains 4 tabs: Open Cases, All Cases, Reconciled, and...

From: Tiffany Smith

Re: Accessing New Kansas IDEA Early Childhood Transition Referral System for State Performance Plan (SPP) Indicator 12

States must *have in place policies and procedures to ensure a smooth transition for toddlers receiving early intervention services under Part C to preschool or other appropriate services, or exiting the program for infants and toddlers with disabilities.* (Part C regulation §303.209(a)(1)(i) and (ii)). To meet this regulation, the Office of Special Education Programs requires transition referral data reported from KDHE Part C Infant-Toddler Programs and KSDE Part B 619 be mutually agreed and approved by both agencies. In addition, the recent promulgation of regulations for IDEA Part C includes a requirement that the SEA be *notified of all referrals to the appropriate district* (§303.209(b)). To improve the accuracy of data reported by both KDHE and KSDE, a new reporting method outlined in this memo is being established to meet these regulatory requirements and assist the state in the goal of promoting collaborative, timely, and effective transition practices for children transitioning from Part C to Part B early childhood special education services.

A real-time web-based application for the collection of early childhood transition referral data has been created and will be referred to as the “Transition Referral System.” The Transition Referral System will contain specific referral dates for children transitioning from Part C *tiny-k* programs to LEA’s and/or Special Education Cooperatives. The data provided by the local *tiny-k* programs for this system will include all elements of a required referral (child’s name, parent(s) name(s), address, and contact information). Districts will mark each referral as either accepted (the child resides in their district) or rejected (the child does not reside in their district), and be able to print out or save listings of accepted or rejected referrals.

*Tiny-k* programs will be instructed to continue their current practice of contacting the district by phone or email for referrals. The electronic reporting element is an addition to assist with monitoring and will also ensure the referral to the appropriate responsible LEA and SEA. The Transition Referral System will allow for confirmation of the accuracy of referral dates reported by both *tiny-k* and local Part B programs and will assist with the verification of required timelines for compliance. Processes established in connection with the reporting will assist local *tiny-k* programs, LEAs and the SEA in resolving any rejected referrals in a timely manner. Please note the new Transition Referral System does NOT eliminate the current data collection by KSDE for Indicator 12. KSDE will also continue the current process to capture other required data elements for the Part B indicator 12 collection.

Tiffany Smith

## Early Childhood, Special Education, and Title Services

120 SE 10<sup>th</sup> Avenue, Topeka, Kansas 66612-1182 ★ Toll Free 800-203-9462 ★ [www.ksde.org](http://www.ksde.org)

Early Childhood Services: Phone 785-296-6602 ★ FAX 785-296-6715

Special Education Services: Phone 785-291-3097 ★ FAX 785-296-6715

Title Services: Phone 785-296-3069 ★ FAX 785-296-5867

Access to the Transition Referral System requires prior approval from KSDE and password authentication for entry. This ensures personally-identifiable data in the system is secure and confidential. To enter data and accept referrals from local *tiny-k* programs, districts must designate staff members who they would like to have access to the system.

Please use the attached excel sheet to identify responsible staff by position title, first and last name, USD number(s), Special Education Coop (if appropriate), phone number, and email address and send to Becky Strohm at [bstrohm@ksde.org](mailto:bstrohm@ksde.org) by June 30, 2013. These individuals will have access to the early childhood Transition Referral System when it becomes operational (on or before August 1, 2013). You will also need to update your list with KSDE as you identify new staff who need to have access to the system and as staff leave or change.

Further information and a User's Manual for the new Transition Referral System will be made available at the leadership conference in July. Also, please keep your superintendent(s) informed of this process so they will be aware of the information being collected by KSDE.

For further clarification or questions, please contact Tiffany Smith at [tsmith@ksde.org](mailto:tsmith@ksde.org) or 785-296-1944

Thank you for your assistance.

The LEA/SEA Referral Reconciliation System was developed to create an easy, efficient method for locating and reconciling discrepancies found in child records during the Part C to Part B transition process. The purpose of this system is to prevent multiple State IDs (KIDS IDs) from being assigned to the same child, and to ensure that the information being transferred is accurate.

## **Part B User Manual**

### **System Access**

The system may be accessed by logging into the KSITS web system at <https://www.ksits.net>. Upon login, Part B (KSDE) users will be automatically directed to the LEA-SEA Referral System.

### **Main Screen**

The main screen of the system contains two tabs, Referral System and Reports. The Referral System tab is selected by default when the system is first opened. In this tab there are two list boxes and 4 buttons used for selecting the districts to open. The list box on the left shows the school districts available for the user to select. The list box on the right shows the currently selected districts to be opened.

To select a district to open, first select it from the list on the left, then press the "Include Selected >" button. You will now see the selected district in the list on the right. To select all districts, press the "Include All >>" button. You will now see ALL districts in the list on the right. Use the "< Remove Selected" and "<< Remove All" buttons to remove them from the list of districts to open.

Once you have selected the districts you wish to open, press the "Open" button to open the Referral System for the selected districts.

### **Referral System**

Once you have selected the district(s), the Referral System will be opened. The Referral System contains 4 tabs- Open Cases, All Cases, Accepted, and Rejected.

The Open Cases tab is selected by default when the system is opened. The grid is filled with cases which have been referred to Part B and have not yet been accepted or rejected by your agency.

Cases may be accepted, rejected as unknown, or rejected for other reason by marking the checkbox for each case and then pressing the appropriate button at the top of the screen. All cases may be selected by marking the checkbox at the top of the grid.

Cases Rejected for Other reason require a reason to be selected. When this option is selected, a screen will appear with a list of the cases selected and a drop down list to select the reason for rejecting.

Use the tabs to view all cases, only cases which have been accepted, or cases that have been rejected. When viewing these tabs, an additional option to reopen cases is available.

The Return to Lookup button will close the Referral System and return the user to the main screen.

**Reports**

The Reports tab on the main screen allows users to run reports by district and within a specified date range. Users may select to run the report for All cases, Open cases, Accepted cases, or Rejected cases. Districts are selected in the same manner as mentioned for the referral system. Reports will only show cases for the districts shown in the list box on the right.

Once the districts have been selected, choose the desired report from the drop down list, then enter the date range the report should include referrals for. Press the Run Report button to create the report. The report will then open in a new window for viewing and may be downloaded as a PDF, XLS, HTML, or RTF file for future use or printing.

## Individual District Reports

- Expanded Report:
  - Performance on all indicators regardless of district size
  - Level of Determination
  - Rewards and Enforcements

Current Year Level of Determination: Meets Requirements  
 Substantial Compliance Met for Fiscal Management and Indicator 48, 9, 10, 11, 12, 13, 15 and 20  
 Previous Year Level of Determination: Meets Requirements

FFY 2011 Rewards & Enforcements:

- Written notification to Special Education Directors, Superintendents, Local Board.
- LEA may use condensed format for TIP application.
- SEA provides leadership stipends for participation in professional development.
- Official Recognition Banner for Websites.
- District may use 50% MOE reduction.

KSDE is pleased to provide the "Meets Requirements" website banner in recognition of the dedication and commitment demonstrated by achieving this highest level of determination. Please share this banner with the district tech person for posting and proudly display on the district's website until the next round of LODs is announced. The banner is available in three different sizes. Click on each of the links below to download one of the three Meets Requirements banners. Select the size that best fits your website.
