

Printable columns:

Character spacing	Maximum printed characters
10 cpi	80
10 cpi condensed	137
12 cpi	96
12 cpi condensed	160

**Input buffer:** 8 KB / 1 KB  
(DIP switch selectable)

Character fonts:

Family Number	Font Name	Sizes Available (Characters Per Inch)
0	Roman	10, 12, 15, proportional
1	Sans Serif	10, 12, 15, proportional
2	Courier	10, 12, 15
3	Prestige	10, 12, 15
4	Script	10, 12, 15
5	OCR-B	10
5	OCR-A	10
7	Orator	10
8	Orator-S	10
	Draft	10, 12, 15

## The Cut Sheet Feeder

The option cut sheet feeder (C806122) makes it possible to handle single-sheet paper more easily and more efficiently. Up to 150 sheets of standard bond paper can be fed automatically into the printer without reloading.

## Printer Specifications

**Main Board Type: SAMA-X**

**Print method:** 24-pin impact dot matrix

**Print speed:**

Quality	Characters per inch	Characters/second/line
Draft	10	150
	12	180
LO	10	50
	12	60

**Printing direction:** Bidirectional logic-seeking for text printing. Unidirectional for graphics (can also be switched to bidirectional by using the proper software command when DIP switch 2-6 is on).

**Line spacing:** 1/6 inch or programmable in increments of 1/360th of an inch

**Paper feed speed:**  
(continuous feed)  
Single sheet: 2.2 inches per sec  
(100 ms/line)  
Continuous: 2.2 inches per sec  
(100 ms/line)

OCR-A and Orator-S must be selected using escape sequences.

**Characters:** 96 standard ASCII character set (including italic characters)  
15 international character sets  
Epson Extended Graphics character set

**Paper**

**Paper width:**  
Single sheet 7.2 to 10.1 inches  
(182 to 257 mm)  
Continuous 4 to 10 inches  
(101 to 254 mm)  
Envelope 6.5 or 9.5 inches  
(166 or 240 mm)  
Labels 2 1/2 x 15/16 inches  
(continuous only) (minimum)  
(63.5 x 23.8 mm)

**Paper Length:** Single sheet 7.2 to 14.3 inches  
(182 to 364 mm)

# NEW LQ-510 DOT-MATRIX PRINTER

Printable area: Single sheet

Continuous paper

0.51 inches (13 mm) or more (both sides) when the 4 to 9.5 inch (101 mm to 242 mm) width paper is used.  
0.98 inches (25 mm) or more (both sides) when the 10 inch (254 mm) width paper is used.

Envelope

**Note:** Envelope printing is only available at normal temperature. Load the envelope with its long side horizontal.

**Paper weight:** Single Sheet 14 lb to 24 lb  
Continuous 14 lb to 22 lb  
Multi-part forms 12 lb to 15 lb per sheet.  
Envelope Maximum number sheets = 3

**Paper thickness:** Single Sheet 0.0025 to 0.0055 inches (0.065 to 0.14 mm)  
Continuous 0.0025 to 0.01 inches (0.065 to 0.25 mm)  
Envelope 0.0063 to 0.0197 inches (0.16 to 0.52 mm)  
Label 0.01 inches (Maximum 0.28 mm) (with backing)

**Copy Capacity:** Up to 3 sheets including the original.  
Total thickness must not exceed 0.01 inches (0.25 mm).

**Note:** Label printing is available only at normal temperature

## Mechanical

**Paper feeding methods:** Friction  
Push tractor  
Cut sheet feeder (optional)  
Pull tractor (optional)

## Ribbon:

Cartridge ribbon, available in black: #7753

**Life expectancy of ribbon:** #7753: 2,000,000 characters (in Letter Quality characters, at 48 dots/character)

**MCBF:** For all components excluding print head: 3,000,000 lines

**MTBF:** 4000 power on hours (duty 25%)

**Print head life:** 200,000,000 strokes/wire

**Dimensions and weight:** (excluding knobs and paper guides)  
Height: 5.51 inches (139.9 mm)  
Width: 16.46 inches (418.0 mm)  
Depth: 13.66 inches (347.0 mm)  
Weight: 13 lbs (6 kg approx.)

## Electrical

**Voltage:** 120 VAC  $\pm 10\%$

**Power consumption:** 100 watts maximum

**Frequency:** 50  $\pm 0.5$  Hz, 60  $\pm 0.5$  Hz

**Insulation resistance:** 10 Mohms between AC power line and chassis

**Dielectric strength (between AC line and chassis):** Can withstand 1.25 kV rms applied for one minute

## Environment

**Temperature:** Operation: 40°F to 95°F (5°C to 35°C)  
Storage: -22°F to 140°F (-30°C to 60°C)

**Humidity:** Operation: 10% to 80% (noncondensing)  
Storage: 5% to 85% (noncondensing)

**Shock:** Operation: Up to 1 G within 1 ms  
Storage: Up to 2 G within 1 ms

**Vibration:** Operation: Up to 0.25 G at up to 55 Hz  
Storage: Up to 0.50 G at up to 55 Hz

**Operation angle:** Less than 15° (without cut sheet feeder)  
0° (with cut sheet feeder)

## Interfaces

### Interface Timing

The figure below shows the timing for the parallel interface.

### Compatible Interfaces

The following is a list of Epson interfaces that are compatible with your LQ-510 printer.

Interface number	Name
#8143	New Serial Interface
#8148	Intelligent serial interface
16165	Intelligent IEEE-466 interface
#8172	32 KB buffered parallel interface

## Printing Enabled/Disabled Signals and Control Conditions

The table below shows the relationship between printing being enabled or disabled, the on line/off line status, and the receipt of the data on/off control characters, DC1 or DC3.

ON LINE (Indicator on)	SLCT IN	DC1/DC3 (Data on/off control)	ERROR	BUSY	ACKNLG	Printing (Disabled/enabled)
on line	Low (J1 Interface)	DC1/DC3 (no effect)	High	High/Low	Pulsed ea. char.	Enabled (normal cond.)
on line	High	DC1 Recv'd	High	High/Low	Pulsed ea. char.	Enabled
on line	High	DC3 Recv'd	High	High/Low	Pulsed ea. char.	Disabled*
on line	High/Low (no effect)	DC1/DC3 (no effect)	Low	High	Not generated	Disabled

- While printing is disabled, character data is being received and acknowledged so that the printer can look for another DC1 character, which would allow it to resume printing.

## Setting the DIP Switches

DIP switch 1

SW	Description	ON	Off	Page
1-1	International character set	See table 1		3-20
1-2				
1-3

## The Control Panel

### Lights

### MULTI-PART (orange)

On when the paper thickness lever is set to position 4 or higher. When this light is blinking, the micro-adjustment function can be used.

### POWER (green)

On when the POWER switch is on and power is supplied.

### READY (green)

On when the printer is ready to accept input data. Flickers during printing.

### PAPER OUT (red)

On when the printer is out of paper or when continuous paper is in the standby position.

### ON LINE (green)

On when the printer is on line and ready to accept data.

### Selectype

### FONT

Press this button to select a font. The two orange indicator lights show the selected font. See Selecting Typestyles later in this chapter.

### CONDENSED

This button is used to turn the condensed mode on and off. The orange Indicator light is on when the printer is in the condensed mode. In the condensed mode, all characters are printed at approximately 60 percent of their normal width

# NEW LQ-510 DOT-MATRIX PRINTER

## Buttons

### ON LINE

This button controls the printer's on line and off line status. Press this button to put the printer on line or to take it off line. When the printer is on line, the ON LINE light is on and the printer can receive and print data from the computer.

### FORM FEED

When the printer is off line, press this button to elect a single sheet of paper or to advance continuous paper to the top of the next page.

### LINE FEED

When the printer is off line, press this button to advance the paper one line, or hold it down to advance the paper continuously.

### LOAD/EJECT

This button is used to feed paper to the loading position or to eject paper that is already loaded. Paper is ejected forward if the paper release lever is set to the single-sheet position and backward (out of the paper path) if the release lever is set to the continuous paper position.

## Other control panel features

The control panel of your printer also gives you access to several special functions.

### Self test:

Both a draft and Letter Quality self test function are built into the printer. The self test printout lets you check the current DIP switch settings and operating status of the printer. You can start the printer's self test by holding down the LINE FEED button or the FORM FEED button while turning on the printer. See the section on the self test in Chapter 1 for more information.

### Micro-adjustment:

By pressing the FORM FEED button immediately after loading paper or when using short tear-off, you can make fine adjustments to the loading and short tear-off positions. These positions can only be adjusted while the MULTI-PART light is blinking. See the sections on adjusting the loading position and using the short tear-off function later in this chapter.

### Data dump:

By holding down both the LINE FEED and FORM FEED buttons while you switch on the printer, you turn on the data dump mode. This feature allows advanced users to locate the source of communications problems between the computer and printer.

## Installation/Support Tips

### Software

The type of printer installed on your system must be identified for each software package. This is usually done through a setup menu. If this printer is not listed in your program, look in the printer User's Manual for the next-best model selection.

### DIP Switch Settings

The default settings will usually work for most applications, but they should be checked before using the printer. This will avoid unexpected results.

### Cut-Sheet Feeder/ Single-Sheet Operation

The page length will have to be adjusted (shortened) to 61 lines per page if your software does not properly support cut-sheet paper. There will be lines from the first page printed at the top of the second page if the page length is not set correctly.
