

**Short  
Floor-to-Vent  
Heights**

**Small Jacket  
Diameters**

**Greater  
Installation  
Flexibility**

## Available in 60, 75 and 100 Gallon Tank-Type Model

► 50,000 BTU/Hr. thru 80,000 BTU/Hr.

Rheem-Ruud gas commercial water heaters are specifically designed to fill the need wherever medium quantities of hot water are required. Typical applications include small restaurants, apartments and small office buildings.

### Construction Features:

- **Space saving design** – short heights and small jacket diameters result in greater installation flexibility.
- **Long life tank design** – proprietary steel formulation with a unique coat of high temperature porcelain enamel to maximize corrosion resistance resulting in a superior tank design. Dual magnesium anode rods are installed for longer tank life.
- **Foam insulation** – rigid foam insulation provides superior insulating qualities, improves efficiency and reduces operating costs. Our patented process of injecting foam into the insulating cavity adds additional durability and dent resistance to the heater jacket.
- **Automatic controls** – control system is designed to shut off gas if the pilot flame is extinguished. Relighting is a safe, easy procedure. Thermostat settings to 160°F. A built-in gas pressure regulator assures even gas flow.
- **Temperature and pressure relief valve** – AGA/ASME rated and factory installed.
- **Full port, full flow brass drain valve**

### Certifications and Ratings:

- **Efficiency** – these models have been tested according to DOE test procedures, and meet or exceed the thermal efficiency and standby loss requirements of current ASHRAE standards (Part of the Federally mandated Energy Policy Act (EPact)). Also exceeds energy efficiency codes of all states including California Energy Commission (CEC).
- **Safety and construction** – these products are design certified by CSA Laboratories: a) For operation at 160°F. b) To meet all safety and construction requirements of ANSI Z21.10.1/ANSI Z21.10.3. c) As an automatic storage water heater. d) For operation of combustible floors and alcove installations. e) For combination water heating and space heating applications. All models are North Carolina and Massachusetts Code compliant. Certified for a 150 PSI Maximum Working Pressure.

<b>RECOVERY CAPACITIES</b> Recovery in U.S. Gallons/Hr. (GPH) at various temperature rises

**Recommended Specifications:**

Water heater(s) shall be model \_\_\_\_\_, manufactured by RHEEM-RUUD, having gas input of \_\_\_\_\_ Btu/hr. and a recovery rate of \_\_\_\_\_ GPH at a 100°F temperature rise. Water heater(s) shall have a storage capacity of \_\_\_\_\_ gallons. Water heater(s) shall have the AGA seal of certification and be factory equipped with an AGA/ASME rated temperature and pressure relief valve. Tank(s) shall have a coating of high temperature porcelain enamel and furnished with a magnesium anode rod rigidly supported and a full port, full flow brass drain valve. Water heater(s) shall meet or exceed the energy factor requirements of ASHRAE. Tanks shall have a working pressure rating of 150 psi, and shall be completely factory assembled, including a pressure regulator properly adjusted for operation on \_\_\_\_\_ gas. Controls will be arranged for safety shutoff in event of pilot failure. Complete unit shall be insulated with rigid polyurethane foam insulation. Water heater(s) shall be covered by a three year limited warranty against tank leaks.

**Limited Warranty:**

This product features a three year limited warranty against tank leaks. Please refer to Commercial Warranty Information brochure for complete warranty information.

**COMMERCIAL WATER HEATERS**

In keeping with its policy of continuous progress and product improvement, Rheem-Ruud reserves the right to make changes without notice.
