Safety information

1. Read and understand the safety information.
2. Due to the built-in battery, please switch off the unit when it is not in use.
3. Please use the correct charger for this unit in order to avoid any damage to the unit.
4. Keep away from any rain, moisture or any other areas where water may be present.
5. Keep away from high temperature areas.
6. Avoid dropping or damage to the unit. Do not place heavy objects on top of the unit.
7. Do not bring your speakers in contact with any sharp object as this may cause scratches and damage.

8. Clean the units with a dry cloth only
9. Do not clean the unit while it is being charged. Always disconnect the charger before cleaning.
10. Do not use abrasive cleaners to clean the speaker
11. Do not block any ventilation openings
12. Under any circumstances, never try to repair the unit by yourself. This will void the warranty. For any technical issue, please contact Sytech Service Center.
13. In order to maintain the battery life of the unit, please recharge the speaker at least once every two months.

How to operate

When pairing for the first time, at first it is essential to pair the two speakers to each other. Once this step has been completed, pair any of the two speakers to the bluetooth device.

1) Turn on both of the speakers at the same time. The bluetooth indicator will blink and you will hear a sound. Press and hold the Play/Pause button on both the speakers. When you hear another sound it means that the two speakers are paired automatically. The indicator will now turn steady.

Attention: when you pair the two speakers, please make sure the bluetooth function on other devices are not switched on in order to avoid interference.

2) Press and hold the Play/Pause button on any of the two speakers and a sound will be heard which indicates they are ready to pair. Turn on the bluetooth function on the device you wish to pair and then search for the bluetooth SY-XS28BT in the list, click it to pair it. When you hear the sound again and the the indicator light is steady, it means they are paired. The speaker which is paired with the music device is the left channel and the other is right channel.

If you want to use them as two individual bluetooth speakers, Press and hold the Play/Pause button on any one of the speakers and pair it with music devices whilst the other speaker is turned off.

Pairing after first use:

Turn on the speakers at the same time , and since they have already been paired previously they will pair automatically once switched on.

Turn on the bluetooth function on the music device, find the name in the list and click it to connect the music device to the SY-XS28.

How to charge:

When any of the speakers' volume turns low, it means the the battery is running out and it needs to be charged. Please make sure both the speakers are fully charged at the same time.

Insert the charging cable into the Mini USB port, and connect it to the USB port in the computer. The power indicator will be red when it is charging. It will turn off when the speakers are fully charged.

Troubleshooting

- 1) When using for the first time, only one speaker is working.
Please turn off both the speakers and turn them on at the same time in order to establish a successful connection between both of them. Follow the steps mentioned previously in this user manual on how to pair the speakers. Once the connection has been established, please proceed to pair it with the external music device.
- 2) When using after the first time, if the speakers did not connect automatically, please switch one of them off and turn it on after 1 minute.
Another option would be to turn off both the speakers and turn them on at the same time.
- 3) The volume of the sound is very low
Please charge the two speakers fully.
- 4) If a password is required upon pairing your music device to the speakers, please insert the code "0000"
