Switching On/Off Your Device

Press and hold the Power Key for three seconds to switch the device

When you turn the device on, the signal icon is lit.

Charging Your Device

electrical outlet.

- Charge at least 5 hours to ensure a full initial charge.
- Charging is only possible within a temperature range of 0°C to 45°C
- . Connect the Mini USB end of the AC wall charger to the Mini USB port on the device

2. Plug the other end of the AC wall charger into the appropriate

Working Mode

Your device supports three working modes. For the client, we only use PC or laptop as the example in this document.

USB Mode: Connect to the device with the USB cable.

Wi-Fi Mode: Connect to the device via Wi-Fi.

Mixed Mode: Connect to the device with the above two connection

If you want to connect to the Internet by using Wi-Fi mode, make sure that the client supports the Wi-Fi function.

The following picture is the application example. All of the client devices can surf on the Internet at the same time.

tablishing a Connection Between Your Device and the Clier

Via USB Cable

- Connect your device and the client with the USB cable. 2. Power on your device.
- 3. Follow the system prompts to complete the software installation:
- If the system does not launch installation automatically, you can run the installation program in path of My Computer > Mobile Hotspot
- The driver of your device will be installed at the same time.
- 4. After the installation, the system will create a shortcut icon on your desktop and a Mobile Hotspot program group in the Start > Programs menu. The connection between your device and the client will be established successfully a moment later.

- 1. Power on your device directly. It will take 1~2 minutes to initialize. and then Wi-Fi LED is blinking.
- 2. Use your normal Wi-Fi application on the client to search the available wireless network.

You need to check your Wireless Network Connection. Set the client to obtain an IP address automatically in the Internet protocol (TCP/IP) properties, an the client will get an IP address like "192.168.0.100".

3. Select the SSID of your device, and then click

- To protect your device from illegal use, there will be a pop-up. window to require the password. Please check the label on the battery compartment of your device to gain the SSID and preset password informatio
- You can change the password on Settings > Wi-Fi Settings > Security > WPA Key, please remember the password you set.
- 4. Wait a moment, the connection between your device and the client will be established successfully.

Accessing the Internet

- Switch on the device.
- 2 Establish a connection between your device and the client
- After successfully establishing the connection, access the Internet in the Always On. Manual or On Demand mode. The default mode is Always On

You can browse the WebGUI Configuration page and click WAN onnection to set the WAN connection mode.

Accessing the WebGUI Configuration Page

- Make sure the connection between your device and the client is
- 2. Launch the internet browser and enter http://192.168.0.1 or http:// ufi.home in the address bar, or double click the Mobile Hotpot icon on the desktop directly.

It is recommended that you use IE (7.0 or later). Firefox (3.0 or later). Opera (10.0 or later), Safari (4.0 or later) or Chrome (5.0 or later)

3. The login page appears as follows:

View the information of WAN, WLAN and Device, Input the casesensitive default password "admin", and then click Login to access the WebGUI Configuration page.

- Do not put anything on the top of your device. Do not lay devices to overlap each other when using.
- The device takes 1~2 minutes to initialize, and attach to the

PIN Code Verification
