## 1.0 INTRODUCTION

## 1.1 CMMS Definition

Computerized Maintenance Management System (CMMS) is a maintenance management and information system that gives us all the tools that we need to resolves issues that confront maintenance and facilities managers every day.

## 1.2 Why CMMS?

- To help maintenance group / employee perform their jobs more effectively and delivery of information to maintenance engineers, technical supervisors, technicians and managers.
- The data in CMMS can serve as evidence that proper safety maintenance has been performed.

### 1.3 How to access AMPM CMMS?

The CMMS can be accessed via this address:

http://cmms.ampmsb.com.my

ISSUE DATE: 22 June 2009	Page 4 of 63	CMMS MANUAL

## 1.4 AMPM CMMS – Flow Chart

			STANDARD OPERATING PROCED	URE
Advanced Maintenance Precision Management	HANDLI	ING	CUSTOMER SERVICE REQUEST INCIDENTS / ENQUIRIES	/ COMPLAINT /
Process Flow		Des	cription of Task / Process Owner	Remark
Receive Request/ Complaint Data Input to CMMS -WR & provide customer with WR No.		1. 2.	CCR received service request/ complaints from customers/ users. CCR to log in the request/ complaint details into the Work Request (WR) Screen with the following information - Date & Time - Received By, - Customer Name, Department, Location, Contact No.	Refer Work Request System (CMMS)
Valid WR ? End		3.	<ul> <li>Description of request/ complaint</li> <li>Zone Supv. (ICT, BMM, SSHE) to dispatch nearest technician to site for WR verification. Technician has to comply with Standard Response Time.</li> <li>Upon confirmation by technician, proceed to Step 4, otherwise, action ends here and the WR is cancelled with remarks.</li> </ul>	Supervisor to issue WR at their forward base for customer acknowledgement upon response by technician
Conversion of WR to WO		4.	After verification at site with valid complaint, Zone Supv. must convert the verification at site with valid	CMMS generate Work Orderform.
Job Planning by Supv No		5. 6.	the valid WR to WO in CMMS and inform CMMS Operators on the Response Time. Zone Supv. to log in the Asset Information into the Work Order (WO) Zone Supv/ Tech to plan and assess the situation (labor & material planning) Zone Supv. to decide whether is here	CMMS Operators to key in the response time informed by Zone Supv in the system.
Immediate Action? Yes Perform Task	uipment Prepare purce	7.	Zone Supv to decide whether job can be completed immediately or to be planned/scheduled properly. IE job can be performed immediately, proceed to Step 7. IE job requires detail plan/ schedule, tag the equipment as "Broken" or "Under Repair". Prepare the necessary resources (Tools, equipment, manpower, spares etc.) before proceeding to Step 7.	Respond to be treated according to Corrective Maintenance Work procedure Refer "Broken/ Under Repair" Tag.
	]	8.	Technician to perform the task according to the requirements.	Work details in Work Order
No Customer Satisty?		9.	Technician to obtain customer/ user acknowledgement upon completing the task. I <u>F</u> customer not satisfied, repeat Step 7.	Customer verification on Work Order
Yes			<u>IF</u> customer satisfied, Tech to submit Work Order to Zone Supv for verification.	
Verify Work Order		10.	Supv to verify the work order form and submit to CMMS Operator to close the WO.	Supervisor verify WO
Close Work Order WO Filing		11. 12.	CMMS Operator to update (key in) the Work Order information into the WO Screen and close the WO. CMMS Operator to file closed WO hardcopy according to the filing requirements.	WO details keyed into CMMS Refer filing procedure.

## 2.0 How to Login to AMPM CMMS?

omputerized Maintena	nce Management Systen
Jsername :	Loria
Password :	Login

- Users are required to key-in their username and password to login the system.
- If users insert the wrong username or password, a login failure message appears 'Invalid Username and/or Password. Please Login'

Computerized Maintena	nce Management System

- Received Date/Time • : Set default to system date and time
- Request Status : System default status to 'OPEN'
- Problem Description : Describe details of problem from requestor
- Work Type •
  - Choose 1 out of 9 work types from the list given (set by administrator)
  - ί. Corrective
    - Work Order generated for any request or complaint by Resident User
  - ii. Preventive =
    - Work Order generated by Preventive Module
  - iii. Breakdown
    - Work Order generated for any request which involves major problem on system or equipment or machinery =
  - Request iv.
    - Work Order generated for any request which does not involve with maintenance work

#### **USER MANUAL DOCUMENT**

- v. Pro-active =
   Work Order generated for any request by employee which involves defect item (Self Finding)
- vi. Null =
   Work Order is NOT generated and Work request will be closed
   vii. Emergency =
  - Work Order generated for any request / incident which involves life threatening situation
- viii. Event = Work Order generated for any request which involves any event
- ix. Warranty
   Management =
   Work Order generated for any request which involves an asset under the 2 years Defect Liability Period (DLP)
- x. Out of Scope =
   Work Order generated for any requested task those are not in our scope of work

#### Work Priority

Choose 1 out of 3 work priorities from the list given (set by administrator)

- i. Normal
- ii. Urgent
- iii. Emergency

#### Warranty DLP

Choose 'YES'/'NO'/'NA' pursue the request, which ever under Warranty DLP or not

#### Requester Information

There are 3 types of requester

- i. PUBLIC
- ii. EMPLOYEE
- iii. RESIDENT

III. KESIDENI	
Requester ID/Name	: Select from the list
Agency	: This field will automatically populate if a
	requestor is selected

- A unique 'Asset No. must be defined and 'Asset Description' (Mandatory Field)
- Brand : Brand of the assets
- Location : Choose from the list
- **Department** : Choose from the list
- Asset Category : Different types of assets are grouped together under an asset category. This enables easy management of asset data and retrieval

#### **USER MANUAL DOCUMENT**

#### Authorized Employee

Authorized Employee is an employee which has been given the rights and accountabilities for that particular asset

- Contractor
- :

:

:

Choose from the list. This data is set in the supplier (Master Module)

#### • There are 5 asset status :

- 1. Active
- 2. In-active
- 3. Disposed
- 4. In-Storage

(The current asset status describes which operational state the asset is in)

- There are 2 type of Criticality
  - 1. Normal
  - 2. Critical

(Defines the criticality depending on the usage of the equipment)

#### • Warranty / Contract :

- 1. Contract
- 2. None
- 3. Warranty (Warranty Asset)

### • Warranty Expiry Date :

Choose from the date table

#### Notes To Technician :

This field is used to describe additional important information pertaining to the asset. User is allowed to update this field from the work order

#### • Warranty / Contract Notes :

This field is used to describe warranty/contract notes information to the asset

#### Asset Notes

This field is used to describe additional information pertaining to the asset

#### **USER MANUAL DOCUMENT**

- Manufacturer : Enter the manufacturer of the asset in this field
- Model Number : Enter the model number of the asset which can be obtained from the warranty card or on the asset nameplate

:

Serial Number

Enter the serial number of the asset which can be obtained from the warranty card or on the asset nameplate

• Supplier, Purchase Price, Date Commissioned, Estimated Life, Current Value and Date Disposed are the additional information required during definition Assets details

## 6.5 Work Order Historical

## 8.0 **PREVENTIVE MAINTENANCE**

- Preventive Maintenance (PM) is regular work with a primary focus, which is to prevent something from going wrong.
- PM is a template in which you use to generate work orders.
- PM specifies the task that defines the work to be performed and the frequency to which it is performed.

## 8.1 Preventive Icon

Advanced Maintenaace Precision Management	Home	Work Request	Work Order	Asset	Material	Preventive	Reports	Location	Master	Employee	Administration	Log Out

View, create, mod	ity and uplo	oad task list fo	r use in PM s	cnedules		,	aco	cording to sp	ecified timef	frame	,	

#### **Basic Steps for Starting PM's**

- Generate the PM Tasks for Individual assets/equipment.
- Click button PM Group Registered the PM Group for allows you to include two or more assets into a single PM Schedule.
- Finalize frequencies of each task

**Note :** Tasks and frequencies should be based on manufacturer recommendations or know " best practice"

- Click button PM Schedule Schedule the PM activities manually first using a spreadsheet. Confirm that the tasks are spread equally.
- Click button PM Generate Generate PM Work Orders for the activities.
