JOFRACAL CALIBRATION SOFTWARE

Compatible with 2010 software release

JOFRACAL calibration software ensures easy calibration of RTD's, thermocouples, transmitters, thermowithes, pressure gauges and pressure switches. JOFRACAL can be used with JOFRA DPC-500, HPC600, HPC500, HPC502 and IPI pressure calibrators, all JOFRA temperature calibrators, as well as JOFRA AMC910, ASC300 multi signal calibrator and ASM-800 signal multi scanner. When used with JOFRA ASM-800 signal multi scanner, JOFRACAL can perform a simultaneous semiautomatic calibration of up to 24 pressure and/or temperature devices under test in any combination.

JOFRACAL software controls the complete calibration procedure, stores the results and provides a calibration audit trail through hard-copy certificates. All calibration data are stored for each sensor to monitor drift and optimize recalibration intervals. A scheduler feature allows planning of future calibrations.

The JOFRACAL temperature calibration software may be downloaded free of charge from our website.
