## 3 Charge Battery

1. Connect the **AC Power Cord** to the **Power Adapter**.
2. Connect the **Power Adapter** to the computer **Power Input**.
3. Plug the **Power Cable** into a **Wall Outlet**.

### IMPORTANT:

The battery must be charged for at least **six hours** before first use. The battery charge indicator will become green when the battery is fully charged. Keep the power cable away from young children.

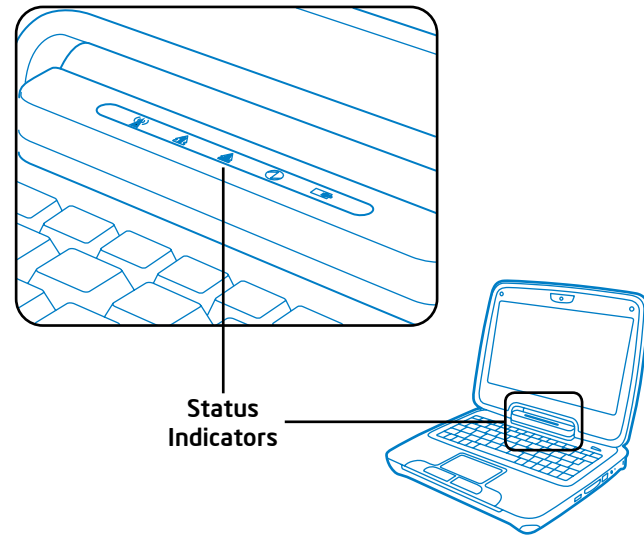

## 4 System/Power Status Indicators

The row of icons located above the keyboard light up with different colors to indicate the system and power status of your classmate PC.

### Icon System/power indication

	<b>Green light:</b> Wireless local area network (WLAN) module is active.
	<b>Green light:</b> Numeric keypad is activated.
	<b>Green light:</b> Caps lock is activated.
	<b>Green light:</b> The battery is charged. <b>Orange light:</b> The battery is being charged. <b>Blinking orange light:</b> Battery power is low. <b>Alternating green and orange light</b> (when the AC adapter is plugged in): The system has stopped charging the battery because the battery pack temperature is too high.
	<b>Green light:</b> The system is on.

## 5 Start The Computer

Press and hold the **Power Button** for three seconds or until the screen turns on.

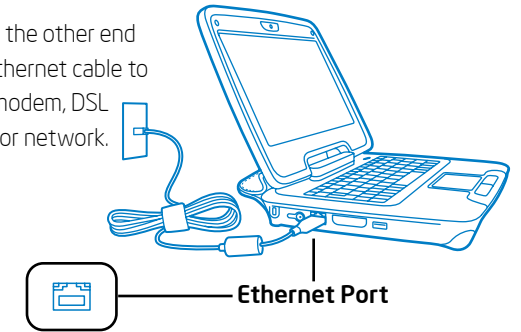

If the screen does not turn on, check the power connection and strength of the battery. Refer to the user's manual for troubleshooting tips.

## 6 Set Up A Connection

### Set Up a Wired Connection

1. Connect an **Ethernet Cable** to your classmate PC.
2. Connect the other end of the Ethernet cable to a cable modem, DSL modem, or network.

### Set Up a Wireless Connection

1. Verify the WLAN module is active (the wireless icon light will be green). If it is not, press the **Fn** key and the **F1** key simultaneously.
2. Click **Start**.
3. Click **Control Panel**.
4. Double-click the **Wireless** icon.
5. Follow the instructions on screen.
