# SIEMENS

## Freestanding Cookers and Microwave Ovens 2001/2002

Your dealer will give you reliable advice and is always available after you have made a purchase.

## Intelligent technology for your home

Siemens domestic appliances have been synonymous with quality, innovative technology and contemporary styling for over 150 years. Our name would not be Siemens, if our models did not meet the challenges of the new millennium by coming up with a wealth of new and highly innovative ideas.

The cooker is the heart of any kitchen. Even more important is that the external appearance of the cooker blends with the rest of the kitchen. Clear design and modest appearance are the essential features of Siemens free-standing cookers. This characteristic is emphasised by the oven door made of glass or mirrored glass. Whether classic white or stainless steel - Siemens free-standing cookers will match every kitchen.

### Gas Cookers

All over the world, gas is the most popular heating and cooking energy. Cooking with gas today is more modern and fashionable than ever before. Professional cooks all over the world prefer this heating source, due to its fast heating power, its perfect regulation and finally its magical flame. Siemens has many years of experience in gas cookers and offers a wide range to meet every requirement.

As a Siemens philosophy, all cookers are equipped with an oven safety system to make the use of gas absolutely safe.

The Siemens cookers are naturally equipped with an oven-thermostat to achieve correct temperatures and are tested in our development department with various recipes to achieve results that satisfy stringent gourmet requirements.

**Siemens - Designed for your family**

4 Features

8 Gas Cookers 90 cm, 60 cm

10 Gas Cookers 60 cm

11 Electric Cookers 60 cm

12 Microwave Ovens

14 Technical Data

## Astounding technology, stunning design: free-standing cookers from Siemens

Free-standing gas cookers offer the following **heating methods** depending on the features: **Top/bottom heating** is the classic heating method for almost all dishes- from little cakes to huge pizzas.

The **grill** is indispensable for browning or for grilling fish and meat. And the **rotisserie** can be used to cook crispy poultry or a lean roast on the automatically rotating spit. Free-standing gas cookers are available with either a **gas or electric grill**.

**Free-standing gas cookers** offer the following features:

**Thermostatic control** enables rapid response temperature control across a wide range. Instead of selecting a setting you can **select the temperature in degrees**. Every Siemens free-standing gas cooker features a **thermoelectric safety pilot** which automatically switches off the gas supply should the flame go out.

And don't forget the following details: The light in the gas oven allows you to keep a constant eye on the food which is being baked, roasted, grilled- and if you are distracted, the **mechanical timer** will warn you in time.

If you love cooking with gas but still want the advantages of an electric oven, Siemens offer numerous free-standing cookers which combine a gas hob with an electric oven.

Depending on the features, different types of **heating methods** are available. The **top/bottom heating** is ideal for succulent roasts, tasty bread, light sponge cakes and delicious biscuits. The **rotisserie** with its automatic rotating spit ensures that food is evenly browned.

The new burner system from Siemens makes cooking so easy and fascinating. With its various burner powers it features all demands on modern cooking, from high power settings for boiling and frying to low power simmering. And every single burner has a wide range of adjustable power levels to regulate precise heat for varied temperature levels.

Additionally the concealed burners are so easy to clean and to fit together, especially as it has only 2 parts.

Small details makes it so ingenious. For instance, the ignition sparks are integrated and sheltered, and are easy to clean.

Changing nozzles from natural to liquid gas is just a minute's work - without any further activities. (models HG 13.. / HM 13)

## Oven interior full of professional features

With the new 60 cm Siemens cookers you buy maximum space available. In the big size cavity of nearly 70l all features for professional cooking are available. It wouldn't be Siemens, if the major focus wasn't set on professional cooking results.

Our cookers are tested in many cycles and with various recipes to meet the requirements of even heat distribution on sensitive dishes.

Remember, you first eat with your eyes...

### Oven Ignition

The gas ovens are ignited by just 1 knob - simple and safe. (HG 13..)

### Oven Safety

As a philosophy of Siemens, all oven cavities are secured by a safety system that switches off the gas in any case of unplanned flame extinguishing.

### Interior Illumination

An oven light makes the results visible at any time.

### Rotisserie

This feature is ideal for grilling chicken or meat with even roasting results. Just as outdoor grilling.

### Grill

Either an electro or a gas grill provides the full feeling and result of grilling.

### Minute Minder

Just set the required cooking time and the timer with a 60 min. scale and a buzzer signal will remind you that it's time to enjoy your meal.

### Minute Minder with Stop function

Not only a signal will show that the cooking time is expired, also the electro oven will automatically shut off. (models HM 13..)

**New continuous pan supports**

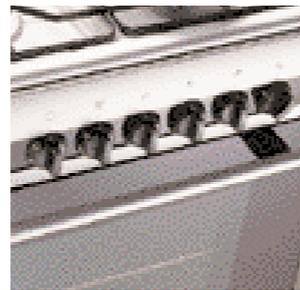

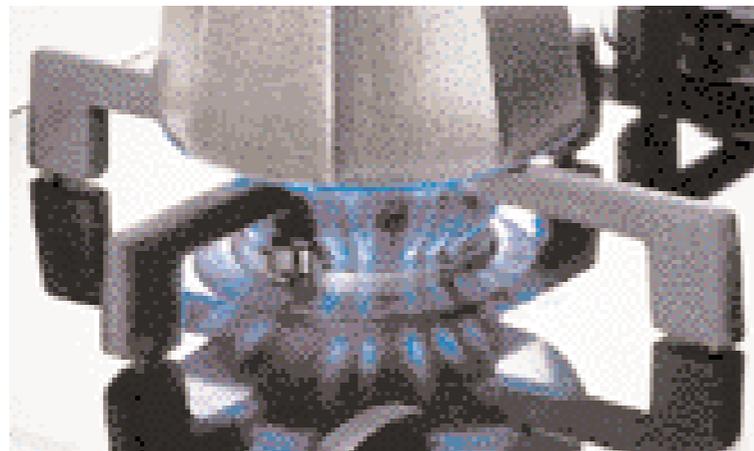

Siemens cookers make you cook like a professional. With the unique pan supports that enable pots and pans to be easily moved from one burner to the other. This flexibility is supported by various pan support arms that avoid pots to topple - modern, safe and professional cooking. (models HG 13.. / HM 13..)

**Siemens cooker design always has been a special taste**

With the new 60 cm cookers from Siemens cooking now is also a visual pleasure. The new stainless steel cookers with their combination of stainless steel and black colour and a handle with the typical Siemens design is not only

unique and stylish but is also easy and safe to use; quality that you can touch and feel.

Moreover, Siemens cookers contribute to modern kitchen designs by their elegant front doors that cover all side panels and with a soft dish compartment. A tasteful play with colours and shapes. (models HG 13.. / HM 13..)

**Easy Ignition System**

Siemens new models come with a special feature that makes cooking so convenient. Just press and turn the knob and the burner is ignited. Simple, safe and convenient with only 1 Hand. And uniquely - the cavity of the Siemens cookers is ignited also by just 1 knob; safe and easy. (models HG 13.. / HM 13..)

**Safety System**

Some Siemens models come with safety system on all burners that switches off the gas automatically in case of unwanted flame. Safe and comfortable.

**High-gloss enamel**

The interior of the accessories have a layer of extremely smooth high-gloss enamel. Aggressive cleaning agents are no longer necessary, and cleaning your oven is easier than before.

**Safety, without any ifs and buts**

The one-hand operated spark ignition starts automatically when the cooker is switched on. If the flame goes out for any reason, the thermocouples immediately ensure that no gas escapes into the room. Each burner is

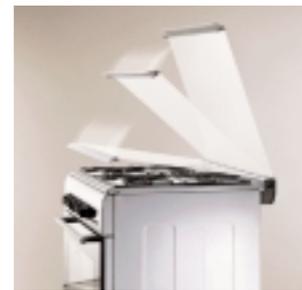

**Siemens - cleaning is just simple**

Siemens ovens are featured with a special enamel coating that makes cleaning easier. The cavities are with soft corners that can be easily reached and cleaned.

**Steel hob**

Siemens cooking hobs come with exceptional styling - you can feel and touch them. Everything is accessible and easy to clean.

**Glass-cover lid with safety**

A modern tempered glass lid covers the cooker to protect it from kitchen dust. The glass lid is easy to clean and has a safety mechanism to stop falling. Some models are also equipped with a sheltering metal frame.

**Height adjustable feet**

To fit perfectly in every kitchen Siemens cookers are equipped with high adjustable feet. Professionally designed for stylish kitchens, some 90 cm cookers have valuable stainless steel feet.

provided with its own safety pilot and gas supply controller. Our gas cookers can be used with natural gas and liquid gas.

**Grill**

The grilling heat intensity can be regulated to suit the type of food you are preparing. This guarantees juicy steaks and crispy crusts on casseroles.

**Top and bottom heat**

The classic oven heating for cakes and roasts.

**The easy-to-clean oven system**

You'll never clean an oven again. Our new easy-to-clean system guarantees that. These ovens consist of:

- 1 High-gloss enamel
- 1 High-gloss enamel accessories
- 1 Smooth or
- 1 Easy-to-clean oven walls

This new system makes cleaning your oven easy.

**Environment-friendly production methods- recyclable components, less pollution**

Our production methods are designed to protect the environment as well as our resources. The various cooker components, for example, are marked so that they can be sorted out and recycled at a future date. Major investments ensure that our production processes keep below the legally specified emission limits.
