

Maths skills improve with practice!

Features:

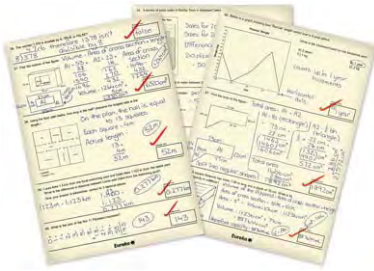

- Covers the entire year's maths syllabus.
- Generates 1000's of practice exam questions.
- Detailed step-by-step worked solutions.
- Automatically saves and graphically displays exam results.
- Stays up-to-date with **Eureka's FREE Live Update.**

Eureka's Practice Exam Creator will help to test and reinforce the lessons taught in class by generating 1000's of customised practice tests for:

- Topic tests;
- Half yearly exams;
- Semester tests; or
- Final year exams

Students can compare and identify mistakes by following detailed step-by-step solutions helping to improve performance.

Winner Best Primary Education Resource - 2008 **Awards**

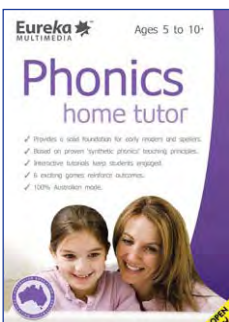

Spelling Tutor is a highly effective program designed to help students increase spelling ability through interactive drill and practise methods.

Spelling lists can be created and assigned by parents and teachers or automatically generated by the program. An option is also available to create spelling lists containing any problem words encountered for future revision.

Learning is enhanced through highly interactive games designed to reinforce lessons, track progress and help identify problem words.

Spelling Home Tutor Features:

- Contains 1000's of pre-recorded spelling words and sentences.
- Ability to add and record new words and sentences.
- Ability to create custom word lists to follow school spelling lists.
- Ability to create flash cards and printed spelling lists for written practise and revision.
- Identifies problem words from past attempts and creates problem word lists.
- 10 highly interactive games to track progress and reinforce outcomes.
- Ability to download free topic lists via the Internet.

Finalist Best Primary Education Resource - 2009 **Awards**

Eureka's Phonics Home Tutor is designed to engage learners at any level. Audio visual teaching is enhanced by regular questions prompting student interaction and a variety of games to reinforce the letter-sound relationships taught in each lesson in a fun and engaging way.

Complex spelling rules and never-ending exceptions can confuse even educated adults. Spoken English has over 40 identifiable basic sounds and each of these sounds has one or more ways that it can be spelt.

Learning these sounds and their corresponding letter relationships helps to provide the fundamental building blocks needed to become a competent reader and speller.

Understanding these concepts helps build a 'bridge' between spoken and written English. This is the process of learning phonics - a vital part of any English reading program.

Eureka's Phonics Home Tutor uses the *Synthetic Phonics* teaching approach due to its overwhelming success in long-term classroom case studies.

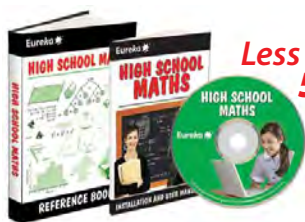

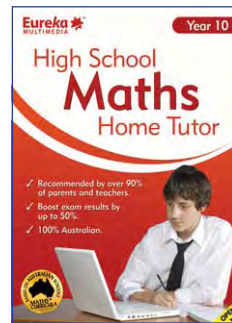

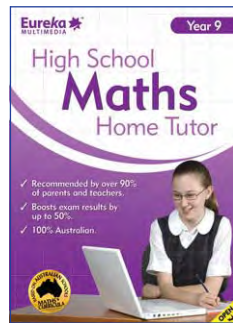

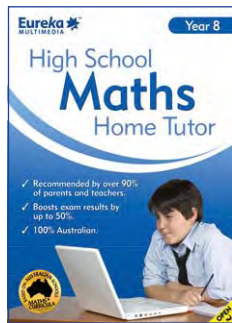

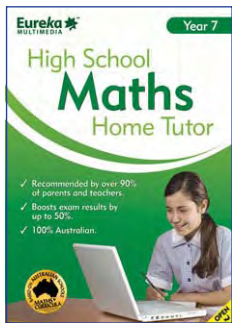

Synthetic Phonics teaches letter-sound relationships and the encoding of sounds in words to provide a system that empowers children (and older learners) to 'decode' familiar, unfamiliar and difficult words.

Eureka's Phonics Home Tutor is the ideal tool to support readers and spellers with home or school learning.

- ✓ Recommended by over **90%** of parents and teachers.
- ✓ Improves maths results by up to **50%**
- ✓ Complete and comprehensive.

Features:

- Fully interactive animated **'Talking Tutor'** with pause and rewind controls;
- **Millions** of randomly generated syllabus style practice questions;
- Detailed **step-by-step** worked solutions;
- Covers the entire year's **syllabus**;
- Automatic storing and **graphical display** of test results;
- Free updates using **Eureka's Live Updater**;
- Full colour reference book (over **200 pages**); and
- Full colour **48-page** user manual.

Talking Tutor is like having a personal tutor explaining every single step of the lesson!

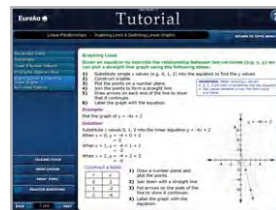

This feature visually animates and verbally demonstrates each mathematical concept taught.

If you miss a point, just rewind and play again.

Students can select a topic to simulate a topic exam or a number of topics to simulate an end of term, half yearly, or yearly test.

Exams can be completed on-screen or in printed form. All questions generated are completely random.

Each lesson is fully printable and displayed in detailed and in an easy-to-understand fashion.

Examples shown are clear and concise, and where appropriate, each example is illustrated using a detailed step-by-step working process.

A handy indicator for students to track their progress and identify the topic areas where they are weak and strong.

Students can revise any problem topic area to improve results.

Here's what some customers are saying:

My daughter was struggling to understand the concept of algebra. She received 30% in her first school test in this subject and came home extremely worried because she had no idea on how to do it.

I purchased your product the very next day and she worked through the sums on the tutorial side for three to four nights and then started practising exam questions and each exam she undertook her results were improving each time.

Two weeks later she had another test on algebra at school and received 83%.

Melissa K. Cows

Using your product for 2 months has helped my daughter improve her test results by 40%. Many thanks.

Dennis V. Kings Langley

For the first time in a maths test our child got an A-. Before she only achieved C+ at best.

Katrina M. Briar Hill

I am a school teacher who is recommending this program.

Angelo K. Dianella

It's excellent. I have recommended it to friends.

Rob B. Frenchs Forest

In my son's maths class he was having problems with chance and data, we revised this topic with your program and he got 100 percent in that class test!

Tracey S. Kenmore

It WORKS!!!!!! Thank you.

Joy D. Harrington Park

We have only had the product for one month, but he said it helped him understand concepts better than in the classroom.

Janine C. Bendigo

I had said many times to many people, it has been a God send! I don't take the time to complete surveys, but your service to the community is exceptional.

Cheryl H. Narellan Vale

It is great for us as we cannot always have contact with a private tutor and be able to afford it.

Karyn N. Kinglake West

It is value for money and [we] will recommend it to friends.

Lucie C. South Grafton

Casual Games are very engaging yet easy-to-play games designed to exercise your brain and make you think.

With so much stress in our daily lives, we all need time to sit back and relax - time to distract ourselves from the hustle and bustle of modern life. The big difference with casual games is that you don't need to be a 'hard-core gamer' to enjoy them, and if you only have a few minutes a day to play - perfect!

Play as much or as little as you wish, but be warned, once you pick them up, you will not want to put them down!

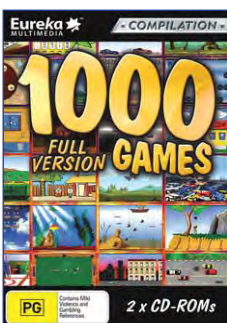

Includes:

- Over 1000 mah-jongg games;
- 101 card & board style games;
- Over 5000 brain teasers;
- 101 puzzle & logic type games;
- Over 1000 Jigsaw Puzzles; and
- Over 20 000 mind bending word puzzle variations.

Mental Maths Booster helps strengthen everyday mental arithmetic skills.

Getting some kids to practise maths skills can be a challenge, but experience has shown when maths is presented in a fun and entertaining way, performance increases.

How does Eureka's Mental Maths Booster work?

Each student enters their name and age and is assigned to the appropriate school grade, but this can be manually changed if required.

Topics are automatically selected and questions are randomly generated, or parents can select specific topics relevant to each child's needs.

Each topic includes an **Information button** to display topic contents and learning outcomes.

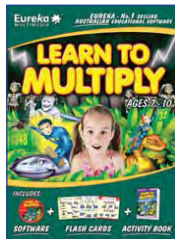

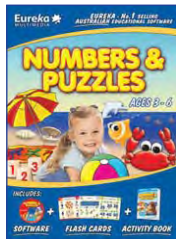

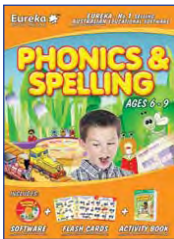

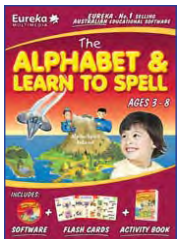

The bonus **Print Quiz** (and answer sheet) feature allows students to complete a written timed test.

Features 12 exciting 3D games!

Eureka's Mental Maths Booster features 12 multi-level games.

At various stages in each game, kids are presented with problems that need to be answered correctly in the allocated time. The more correct answers, the more the player can progress.

Quiz results are stored and tracked allowing individual topics to be reviewed at any time, highlighting any areas of weakness.

- 40 double-sided graded interactive flash cards containing over 160 multiple choice type questions.
- A carefully graded 40-page activity book to further reinforce the lessons taught in the software.

The Alphabet & Learn to Spell

Developed in conjunction with the Australian & New Zealand school curricula guidelines, **The Alphabet & Learn to Spell** is an action-packed and highly interactive adventure that will capture the imaginations of 3 - 8 year olds. Children will have an enormous amount of fun learning the alphabet and how to spell as they face the challenges of Alpha Spell Island.

Phonics & Spelling

Using highly interactive and effective lesson plans developed in conjunction with the Australian & New Zealand school curricula guidelines, **Phonics & Spelling** teaches emergent readers letter-sound relationships by exposing them to phonic rules and generalisations through a range of fun facts and game activities.

Numbers & Puzzles

Developed in conjunction with the Australian & New Zealand school curricula guidelines, **Numbers & Puzzles** is a highly interactive underwater adventure where young minds will have fun exploring and learning all about early number concepts. Lively games and puzzles captivate and teach counting, sorting, matching, patterning, and much more.

Learn to Multiply

Developed in conjunction with the Australian & New Zealand school curricula guidelines, **Learn to Multiply**, is set in a 3D environment, and is a highly effective, innovative and entertaining way for children to learn their times tables. Each table is taught with fun and interactive game play through 12 worlds with 3 levels of difficulty.

Unleash your creative side as you craft, cook, compile and design with this inspiring collection. You can also preserve your family's precious memories for generations to come.

Eureka's Scrapbook Deluxe

Create and print unique albums to preserve your family's precious memories for the generations to come. Add clip-art, text, embellishments and of course photos to your scrapbook pages.

Eureka's Family Tree Creator

This easy-to-use, yet very powerful program is ideal for not only building your family tree, but can also be used to store and display information about family members, past and present, and the key events in their lives.

Cross Stitch Made Simple

Create your own cross-stitch charts using your own photos, drawings and designs. Using colour charts from top thread manufacturers, the program is able to import popular image file formats and will even work out how much thread you will need.

3D Dream Home Designer

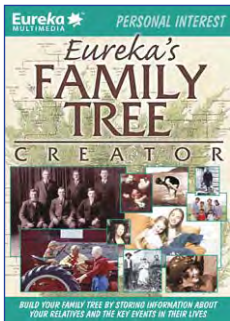

Plan, design and even walk through a 3D visualisation of your dream home or renovation. All measurements are metric, and a collection of over 3 000 items and textures are included.

Eureka's Card Maker Deluxe

Tired of searching for cards that truly express how you feel? Stop your search right here because **Eureka's Card Maker** lets you create the perfect card every time! Personalise greetings for birthdays, weddings, anniversaries and more.

Eureka's World Cuisine

Surprise your family and friends as you cook up an international feast with a little help from **Eureka's World Cuisine!** An interactive recipe book with over 25 000 recipes from all corners of the globe. **Eureka's World Cuisine** has something for every taste.

I.Q. or *Intelligence Quotient* is a general assessment of your ability to think and reason. Your **I.Q.** score is actually an indication of how you compare in this ability with the majority of people in your age group.

In **IQ Builder** there are over 600 carefully selected questions that allow you to practise and familiarise yourself with the types of questions that will be asked in the final **MENSA** style test. Each test allows 45 minutes to answer 60 questions. A graphical analysis is displayed at the end of each test to indicate performance in each question group and to provide explanations for any incorrect answers.

DV Case

Windows® Only

Product Code: DV 0466
Barcode: 9 317728 01046 6

Tired of spending hours with coloured pencils and graph paper? Now you have access to hundreds of thread colours, which are matched to shades from major manufacturers.

Can't draw? Not a problem. Let our incredibly easy-to-use Import option come to your aid. Use your scanner or digital camera to save a picture to disk, or pick up a piece of clip art from the CD or the Internet, then load it into the program. In seconds, you will have a totally unique cross-stitch design.

DV Case

Over **4000 Works of Literature** is an interactive CD ROM containing over 4000 complete novels, plays, poetry, short stories, sacred texts, essays and much more by great authors from all over the world.

Browse, increase screen font size, add bookmarks, copy and paste sections of text to your notepad, save previously read books, print sections of text or complete novels, and search by author, category, or keyword.

Use **Over 4000 Works of Literature** as a fast and valuable reference guide, or as an easy way to enjoy the world's most loved classics all for the cost of one paperback!

Eureka's Everyday Words and Phrases uses a collection of carefully selected words and contextual phrases designed to assist non-native English speakers to communicate in everyday language in Australia and New Zealand.

Vocabulary lists are shown using real-life scenarios to demonstrate each word's meaning in an everyday context.

Listening activities help to test and reinforce both words and phrases.

Games provide further support for the keyword lessons, by providing a fun and entertaining way for you to practise.

The recording feature allows you to analyse your spoken words by comparing your pronunciation with the pre-recorded words in the program.

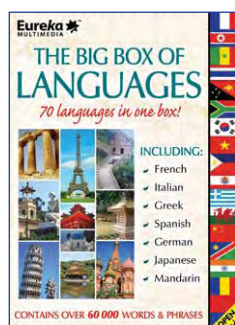

Topics Covered

- The Clock, Time of Day and Daily Activities
- Days, Months, Celebrations and Dates
- Greetings and Everyday Places
- Filling in Forms
- Coins, Notes, Weights and Measurements
- Family
- Inside and Outside the House
- Clothes and Colours
- Food and Drink
- The Body
- Doctors and Hospitals

There are dozens of reasons for learning a language. Some people primarily want to quickly and efficiently learn the key phrases needed to travel successfully in another country, while others are looking for the first steps towards real language fluency.

Eureka's **The Big Box of Languages** is able to perform a double duty. First, it's specifically designed to make you travel-savvy in the language as rapidly as possible.

Second, the material presented in this full-featured learning system is uniquely rich and highly effective.

Features:

- Comprehensive grammar references complete with alphabet overview;
- Interactive dialogue and conversational practice;
- Advanced speech analysis with a listen and speak feature; and
- 70 languages, each with 7 fun and interactive games.
