Car DVD "King Viper" - 7 Inch Touch Screen, Detachable Panel, GPS, DVB-T (1DIN)

Product code: CVGX-C95-2GEN

All hail the new king! The King Viper Car DVD player has everything needed to turn your car into a headturning chick magnet on wheels. It's a compact single DIN indash car DVD with a theft-proof detachable control panel, a stunning 7 inch touchscreen that can be tilted back and forth and even...swiveled from left to right, runs today's hottest GPS maps, receives free over the air DVB-T, has steering wheel control and lots lots more!

The One-DIN Wonder: Since the beginning of car dvd history, the 1-DIN (50 mm

high) form factor has commanded greater attention than 2-DIN (100 mm high) models from car enthusiasts. The reason for this is simple. When you're customizing your ride for maximum effect and efficiency, in car real estate is at a premium. If you can save space, you do it. If you can save space and get all this at such a great wholesale price, then you hit add to cart right away!

In many ways, The King Viper represents cutting edge vanguard design. Aside from the detachable anti-theft face plate, it's also the first of its kind to offer a left and right swivel touchscreen. This has always been the number one complaint from 1-DIN car dvd consumers. The fact you could only tilt the motorized retractable screen display back and forth was an issue because it ignored the needs of front seat passengers. Until now! The King Viper allows horizontal adjustment of the entire touchscreen panel so you can drive in peace and your passenger can watch in comfort!

Entertainment Extravaganza: You've done well for yourself, so why shouldn't you live well. Have a nice house. Have a nice wife. Have a great car that subscribes to the theory that choice is good especially when it comes to entertainment options. The King Viper brings to you a region free disk player that can play CDs, VCDs, and DVDs from any country, AM/FM radio, an awesome media player that effortlessly plays the following audio and video file formats: AAC, MP3, WMA DAT, AVI (DIVX3 codec), AVI (DIVX5 codec), DIVX5, MPEG 1/2, VOB, AVI (XVID codec), MP4 (XVID codec), plus it will scan the air and display free DVB-T channels to offer you the latest movies, TV shows, news, and sports. If that weren't enough the CVGX-C95 King Viper allows connection of your iPod or MP4 player for even more choice!

Powerful Features: Now before you ask, yes The King Viper is a top of the line GPS unit. Let the computer voice guide you on your way to meet with a new client or...a new lover. But there's more. The King Viper comes with a 800 by 480 pixel resolution touchscreen, steering wheel control, 3D flash interface, picture in picture display, dual zone functionality, Bluetooth, and much much more.

At a Glance...

- 7 inch touchscreen
- Tilttable screen (back and forth)
- Swiveling screen (left and right)
