"number one in brand loyalty eight years in a row"

CUSTOMER LOYALTY ENGAGEMENT 2009 WINNER

Samsung mobile phones have been rated number one in brand loyalty by consumers eight years in a row, according to Brand Keys, a leading independent authority on brand loyalty.

Differentiator:
Unique, Compact Flip Design

- The Samsung Gloss™ has a unique, square clamshell design with a large, 2.3" 262K color TFT internal display, and a 1" 65K color external display.

- Full QWERTY keyboard with letters arranged like a computer keyboard and numbers arranged like a keypad.

- Each of the four points of the Navigation key acts as a shortcut for Bluetooth®, Music, **easy**edge℠, and messages.

TIP: CHANGING TEXT ENTRY MODES
Pressing the FN key on the QWERTY keyboard enables the user to easily change between numeric (123) and lower case alpha (abc) text entry modes. Pressing the shift key toggles alpha entry between mixed case (Abc), upper case (ABC), and lower case (abc). Capitalization remains selected until the user presses the shift key a second time.

WHY SAMSUNG?

SAMSUNG

ABOUT SAMSUNG TELECOMMUNICATIONS AMERICA

Samsung Telecommunications America, LLC, a Dallas-based subsidiary of Samsung Electronics Co., Ltd., researches, develops and markets wireless handsets and telecommunications products throughout North America and is currently #1 in mobile phone sales in the U.S. For more information, please visit www.samsungwireless.com.

ABOUT SAMSUNG ELECTRONICS COMPANY

Samsung Electronics Co., Ltd. is a global leader in semiconductor, telecommunication, digital media and digital convergence technologies with 2007 consolidated sales of US$105 billion. Employing approximately 150,000 people in 134 offices in 62 countries, the company consists of two main business units: Digital Media & Communications and Device Solution. Recognized as one of the fastest growing global brands, Samsung Electronics is a leading producer of digital TVs, memory chips, mobile phones and TFT-LCDs. For more information, please visit www.samsung.com.

HOW TO'S

CUSTOMIZING THE SHORTCUT KEYS

To customize the navigation keys from the Idle screen:
1. Press **Menu > Settings**.
2. Select **Phone Settings**.
3. Select **Shortcut Key**.
4. Choose the key to be customized — up, down, or left — and press **OK**.
5. Highlight the function desired from the list: Bluetooth®, Music Player, Messages, My Images, My Ringtones, My Sounds, Inbox, Tools, Calculator, Tip Calculator, Converter, Calendar, Alarm Clock, or Stop Watch – and press **OK**.
6. The screen will display a message indicating that the shortcut preference has been set. Repeat the process to customize the other two navigation keys.

Note: Right key "**easy**edge℠" is not customizable.

USING THE MUSIC PLAYER

From the **Idle Screen**, press the **Menu/OK** key, select **Multimedia**, and then choose **Music Player**.

Note: Before launching the music player, you must install a microSD™ memory card containing music files in your phone.

DISPLAYING TEXT MESSAGES AUTOMATICALLY

To set text messages to automatically show on the phone display as soon as they arrive:
1. From the **Idle screen**, press the **Msg soft key > Msg Settings**.
2. Select **Text Message**.
3. Select **Auto View** and press **OK**.
4. Use the navigation key to highlight **On** and press **OK**.

You can also set picture message to be automatically shown. To do this, follow the same proces, except select **Picture Message** instead of Text Message in step 2.

CHANGING TEXT ENTRY MODES

- Pressing the **FN** key on the QWERTY keyboard enables you to change between numeric (123) and lower-case alpha (abc) text entry modes easily.
- Pressing the **Shift** key toggles alpha entry between mixed case (Abc), upper-case (ABC), and lower-case (abc). Capitlization remains selected until the user presses the **Shift** key a second time.

PAIRING WITH ANOTHER DEVICE USING BLUETOOTH®

1. In standby mode, press the **Menu/OK** key and then select the **Bluetooth®** menu.
2. Select **Registered List > Add New Device**; if Bluetooth is off, you are prompted to "Turn Bluetooth on?"; press the **Yes** soft key.
3. Place the device you are connecting to in discoverable mode and select **Menu/OK** key.
4. Press the **Menu/OK** key and names of available devices will appear in the display; highlight the desired device, and press **Pair**.
5. Create a passkey or PIN for the selected device, press **Menu/OK** key.

FORMATTING A MEMORY CARD

Formatting a microSD™ memory card erases all data currently on the card and creates multimedia directories compatible with your phone.

Caution: Repeated formatting of a memory card shortens its service life.

To format a memory card, do the following:
1. At the **Settings** sub-menu, select **Memory Info > Card Memory > Format Card**. You are prompted to confirm formatting of the memory card.
2. To format the memory card, press the **Yes** soft key.
