

Item Number: HDH-4000C

Drive Proof Car Camera (Touch Screen)

Images:

Product Overview:

When you want all the bells and whistles in a car camera the Drive Proof HDH-4000C had it all! Front and rear view Full HD recording and a touch screen all in one little device.

Record video easily from the front and rear of the vehicle with the Drive Proof HDH-4000C Car Camera. The forward facing camera is integrated into the LCD touch screen display. The rear camera is an external wired camera that simply needs to be connected to the LCD monitor.

Equipped with LCD Touch Screen allowing you to view live video footage as well playback saved video files right at the scene. Change some of the basic settings directly on the device. Toggle between viewing one video or dual view split screen. Indicators such as voltage are displayed directly on the device.

Using motion activation set the camera to the motion activation mode to conserve memory when the vehicle is stationary for extended periods of time. Motion activation is particularly effective for those looking to use the car camera to capture acts of vandalism.
