

Firmware Update Manual

MODELS: POCKETBOOK U7, POCKETBOOK U7 PLUS

Official firmware updates for the Device are published on the official PocketBook website (www.pocketbook-int.com/us). Installation of official firmware updates is recommended, as they contain fixes and additions improving the efficiency of the Device.

Official firmware updates do not influence the warranty conditions.

The warranty does not cover software installed from sources other than the official PocketBook website.

You can update firmware in several ways.

ATTENTION! Please, make sure the Device is fully charged before updating the firmware to avoid discharge during update process! This may cause severe damage of the Device's software.

AUTOMATIC UPDATE

Your Device should be connected to the Internet for this update variant.

1. Enter *Settings > About device > System updates* section
2. If you'd like the Device to check for updates automatically, check *Enable or disable autoupdate* checkbox
3. To check for updates immediately, press *Check for the new firmware now*.

If firmware updates are available, the Device will automatically download and install them.

Sometimes a complete set of several programs is stored in one pbi package. To install them after firmware update, please, accept an offer of the pbi package installation wizard (if it appears automatically) or launch the installation file *PBSystem.pbi2* from the 'File Manager' (see more detailed about pbi packages in the 'User Manual PocketBook').

MANUAL UPDATE

Variant 1

1. Download to your PC firmware version you'd like to install (www.pocketbook-int.com/us/support/pocketbook-surfpad)

2. Connect your Device to PC and copy firmware file (.upkg extension) to the internal storage or external microSD-card
3. Go to *Settings > About device > System updates* section
4. Select *SD card*. In the list appeared select the firmware version to install and press **OK**.

Variant 2

1. Download to your PC firmware version you'd like to install
2. Connect your Device to PC and copy firmware file (.upkg extension) to an **external microSD-card**

ATTENTION! In this variant you can install firmware from external card **only**!

3. If the Device is on, turn it off by continuous power button press and selecting the corresponding choice in switch off menu
4. Press and hold **Volume +** button and switch the Device on by pressing power button
5. *Android system recovery* menu will appear (Android logo). Now you can release **Volume +** button
6. Select *apply update from sdcard* using **Volume +/-** hardware keys and press **On/Off** key to confirm choice
7. Select the firmware file by **Volume +/-** buttons and press **On/Off** button to confirm.
8. The Device will perform all the necessary update action and will reboot.

NOTE To exit *Android system recovery*, select *reboot system now*.

Variant 3

1. Download to your PC firmware version you'd like to install
2. Connect your Device to PC and copy firmware file (.upkg extension) to an **external microSD-card**

ATTENTION! In this variant you can install firmware from external card **only**!

3. Go to *Settings > Backup & reset > Recovery Mode* section.
4. The Device will reboot and Firmware update will continue according to the **Variant 2** scenario, starting from **5th item**.
