Product Features

10. **NFC:** Near Field Communication, a quick bluetooth pairing technology is paired through a non-contact sensor. NFC can help make pairing of your bluetooth mobile phone easier.

Switch on the NFC function on the mobile phone, and then put the back of the phone near the NFC icon of the speaker to scan. For the first connection, you will see a prompt to accept the device.

You can also quickly disconnect in the same manner, by placing the back of the phone near the NFC icon.

Note: your phone must support NFC for this function.

11. **Bluetooth re-pairing:** When bluetooth is out of connection range, and bluetooth is disconnected, you can re-establish the connection through the following two methods:

1 Restart the speaker, it will connect to the last paired phone automatically.

2 Through bluetooth search on the phone, find Rocket and select it to connect again.
