Kinetix Motion Control	An introduction to Kinetix® Integrated Motion, workflow for using this selection guide, and information on additional resources for product selection and specifications.	5
Product Features Comparison	Product comparison tables for rotary motion, linear motors, linear actuators, and servo drives.	17
Kinetix 6200 Modular Servo Drives	Modular, multi-axis, Integrated Motion over sercos-interface drive family. Drive system includes Bulletin 2094 power modules and features safe-speed or safe torque-off control modules. Compatible with Kinetix 6000M integrated drive-motor (IDM) system. Multi-axis, Integrated Motion over sercos-interface IDM family includes IDM power interface module (IPIM) and up to 16 IDM units on single daisy chain. Features safe-off control.	25
Kinetix 6500 Modular Servo Drives	Modular, multi-axis, Integrated Motion over EtherNet/IP network drive family. Drive system includes Bulletin 2094 power modules and features safe-speed or safe torque-off control modules.	
Kinetix 6000 Multi-axis Servo Drives	Multi-axis, Integrated Motion over sercos interface drive family includes IAM (converter) modules and AM (inverter) modules and features safe-off control. Compatible with Kinetix 6000M integrated drive-motor (IDM) system. Multi-axis, Integrated Motion over sercos-interface IDM family includes IDM power interface module (IPIM) and up to 16 IDM units on single daisy chain. Features safe-off control.	45
Kinetix 300 EtherNet/IP Indexing Servo Drives	Single-axis, EtherNet/IP network, indexing drive family and Bulletin 2097 drive accessories.	
Kinetix 350 Single-axis EtherNet/IP Servo Drives	Single-axis, Integrated Motion over EtherNet/IP network drive family and Bulletin 2097 drive accessories.	73
Kinetix 3 Component Servo Drives	Single-axis, indexing component drive family and Bulletin 2071 drive accessories.	

Rockwell Automation offers additional products and options that are not covered in this selection guide. For additional product information, see the documentation links provided on the front cover, the selection suite summary on [page 3](#), and the links in [Additional Resources](#) on [page 16](#), and located throughout this selection guide.

Kinetix motion control products not included in this selection guide, but supported with product specifications, selection examples, and system performance curves include the following:

- Kinetix 2000 Multi-axis Servo Drives
- Kinetix 7000 High Power Servo Drives
- Ultra3000 Digital Servo Drives

For assistance and validation in making final product selections, consider using the Integrated Architecture™ Builder tool, which is available at <http://www.rockwellautomation.com/en/e-tools/configuration.html>

Additional product options are available through Encompass™, our third-party product referencing program. For more information about the Encompass program, see <http://www.rockwellautomation.com/encompass>.

Kinetix Motion Control Selection Suite

Each publication in the suite is designed to meet a specific need. Use this selection guide to help make initial decisions for the motion control products best suited for your system requirements. This publication provides an overview of Kinetix servo drives, motors, actuators, and motion accessories. Refer to the information below to find the publications that provide detailed product specifications, system examples, cable combinations, and performance curves for your motion control system.

Do You Need Product Specifications?

These technical data publications provide dimensions, certifications, and electrical, environmental, and weight specifications.

Kinetix Rotary Motion Specifications Technical Data, publication GMC-TD001

- MP-Series (Bulletin MPL, MPM, MPF, and MPS) Servo Motors
- Kinetix 6000M (Bulletin MDF) Integrated Drive-Motor Systems
- RDD-Series Direct Drive Servo Motors
- HPK-Series Asynchronous Servo Motors
- TL-Series Servo Motors

Kinetix Linear Motion Specifications Technical Data, publication GMC-TD002

- MP-Series (Bulletin MPAS and MPMA) Linear Stages
- MP-Series (Bulletin MPAR and TLAR) Electric Cylinders
- MP-Series (Bulletin MPAI) Heavy Duty Electric Cylinders
- LDC-Series Iron Core Linear Motors
- LDL-Series Ironless Linear Motors

Kinetix Servo Drives Specifications Technical Data, publication GMC-TD003

- Kinetix 6200 and Kinetix 6500 Modular Servo Drives
- Kinetix 6000 Multi-axis Servo Drives
- Kinetix 300 and Kinetix 350 EtherNet/IP Servo Drives
- Kinetix 3 Component Servo Drives
- Kinetix 2000 Multi-axis Servo Drives
- Kinetix 7000 High Power Servo Drives
- Ultra3000 Digital Servo Drives

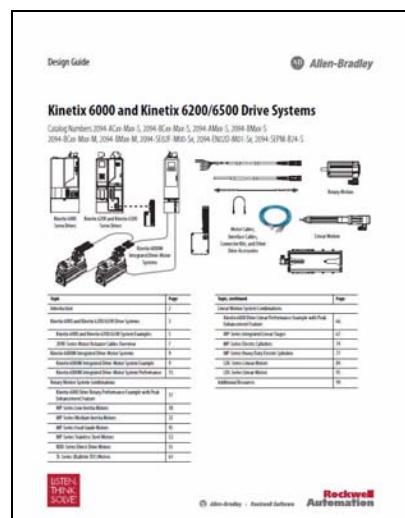

Kinetix Motion Accessories Specifications Technical Data, publication GMC-TD004

- Motor and interface cables
- Drive and motor/actuator cable combinations
- Connector kits and breakout components
- Power components

Do You Need System-focused Catalog Numbers, Examples, and Performance Curves?

System design guide publications help you select the required (drive specific) drive module, power accessory, connector kit, motor cable, and interface cable catalog numbers for your drive and motor/actuator motion control system. Included are system performance specifications and torque/speed curves (rotary motion) and force/velocity curves (linear motion).

Drive Family System Design Guide Publications

- Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication [GMC-RM003](#)
 - Includes Kinetix 6000M Integrated Drive-Motor Systems
- Kinetix 300/350 Drive Systems Design Guide, publication [GMC-RM004](#)
- Kinetix 3 Drive Systems Design Guide, publication [GMC-RM005](#)
- Kinetix 2000 Drive Systems Design Guide, publication [GMC-RM006](#)
- Kinetix 7000 Drive Systems Design Guide, publication [GMC-RM007](#)
- Ultra3000 Drive Systems Design Guide, publication [GMC-RM008](#)

What's Inside Each Publication

- Determine What You Need (catalog numbers)
 - Drive components
 - Required accessories
 - Optional accessories
- Drive System Examples
- Motor/actuator cable combinations
- Drive and motor/actuator performance data
- Rotary and linear performance curves

Notes:

Kinetix Integrated Motion

The Kinetix Integrated Motion offerings are part of the Rockwell Automation® Integrated Architecture system. The Integrated Architecture system brings together a wide range of high-performance products that are integrated into RSLogix™ 5000 software for simplified and enhanced machine design, operation, and maintenance.

Integrated Motion on the EtherNet/IP network uses CIP Motion and CIP Sync technology from ODVA, all built on the Common Industrial Protocol (CIP). Global standards help ensure consistency and interoperability. The standard, unmodified Ethernet network allows you to effectively manage real-time control and information flow for improved plant-wide optimization, more informed decision-making and better business performance. Time synchronization of drives, I/O, and other EtherNet/IP compliant devices provides the performance to help solve the most challenging applications.

Integrated Motion on sercos (serial real-time communications system) is a controller/drive interface using noise-immune, fiber-optic cables. A single fiber-optic ring serves as the sole interface between control and drive. It replaces costly command and feedback wiring, reducing both installation time and wiring costs. Advanced diagnostics and process reporting is provided via the sercos interface.

With Kinetix Integrated Motion, you'll benefit from the seamless integration of Allen-Bradley® Logix controllers (ControlLogix® and CompactLogix™), high-performance networks (EtherNet/IP and sercos), and a broad range of Allen-Bradley AC and servo drives, linear and rotary motors, and linear actuator options. RSLogix 5000 software offers an extensive set of advanced motion tools for programming, configuration, commissioning, diagnostics, and maintenance support. Catalog number driven configuration makes motion system commissioning fast and simple, and an extensive library of motion instructions provide the right functionality for any application.

Kinetix Integrated Motion offers a variety of servo drive, motor, and actuator families for single-axis and multi-axis applications. These systems offer the following:

- Servo drive power ranges from 50 W...149 kW
 - Kinetix 350 single-axis EtherNet/IP servo drive family
 - Kinetix 6000 and Kinetix 6200 (sercos interface) and Kinetix 6500 (EtherNet/IP network) multi-axis servo drive families
 - Kinetix 6000M integrated drive-motor systems
- Choice of sercos interface or EtherNet/IP networks
- Wide range of rotary motors, rotary direct drive motors, linear motors, and linear actuators/stages.
 - Motors offer continuous torque as low as 0.10 N·m (0.85 lb·in) and up to 955 N·m (8452 lb·in)
 - Linear actuators offer peak forces of up to 14,679 N (3300 lb)
- Smart Motor Technology provides automatic motor identification for fast, easy configuration and commissioning
- Use of a single software package, RSLogix 5000, for complete support of drive configuration, programming, commissioning, diagnostics, and maintenance
- Powerful online motion tools including real-time data trending, graphical PCAM and TCAM profile editor, auto and manual drive tuning, and advanced drive diagnostics
- Automatic Device Replacement (ADR) plug-and-run drive/motor/actuator support
- Motion Analyzer software for comprehensive motion-application sizing and analysis, optimization, selection, and validation of your Kinetix motion control system

Connected Components Platform

Part of the Rockwell Automation Machine Solutions offering, Connected Components is a preferred control solution for machine builders who provide stand-alone machines at low cost. Connected Components provides just enough control to meet machine and end-user requirements while helping to improve operating efficiencies. Engineering and application tool sets allow easy design and installation with preferred interoperability of the broad range of component-class products.

The Kinetix 3 component servo drive provides a motion control solution for machine builders producing low-cost equipment at high volumes. The component servo drive can apply the appropriate level of control for the application without the added complexity. Systems can include serial commands from MicroLogix™ or Micro800™ controllers, or discrete wiring directly to the sensor or controller with TL-Series™ low-inertia motors.

What's New?

The new Kinetix motion control products include the following.

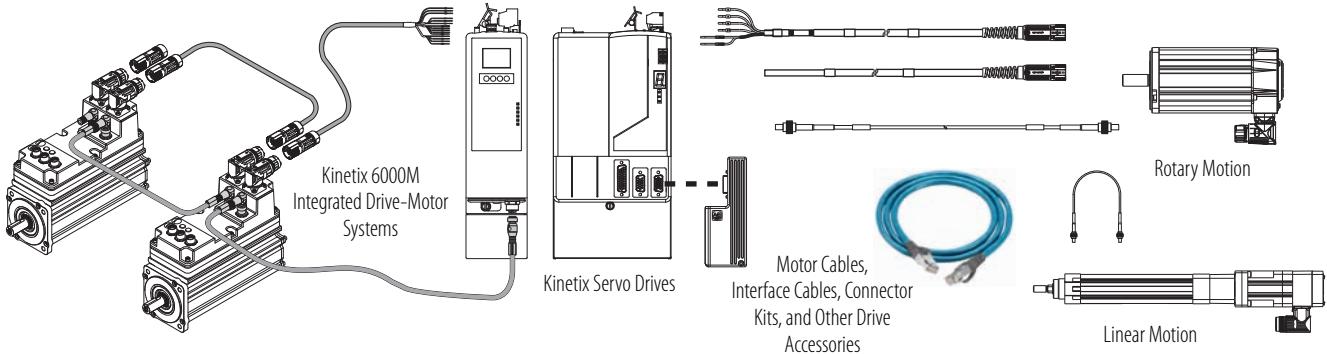

Motion Control Products	Description	Refer to
 Kinetix 6000M Integrated Drive-Motor System	<p>The Kinetix 6000M Integrated Drive-Motor system combines the reliable high-performance MP-Series™ food-grade servo motor and Kinetix 6000 servo drive technologies into a single, compact package that provides significant space savings and machine control system simplification. The Kinetix 6000M Integrated Drive-Motor (IDM) units are available in three different torque ratings with optional holding brakes.</p> <ul style="list-style-type: none"> The Kinetix 6000M system is designed to integrate seamlessly with the popular 400V-class Kinetix 6000 and Kinetix 6200 multi-axis servo drive systems. The Kinetix 6000M Power Interface Module (IPIM) mounts directly to a Bulletin 2094 power rail in the enclosure and connects to the IDM units. The Kinetix 6000M Integrated Drive-Motor units feature mounting flanges and shaft dimensions that are identical to MP-Series food-grade motors of the same frame size, making it easy to upgrade to Integrated Drive-Motor technology. Hybrid and network cables connect the Kinetix 6000M IPIM module and daisy-chain to as many as 16 Kinetix 6000M integrated drive-motor (IDM) units SIL2/PLd safe torque-off functionality is included with the Kinetix 6000M system using standard Kinetix 6000 safe-off headers and cables. 	<ul style="list-style-type: none"> Page 10 for an overview of the Kinetix 6000M integrated drive-motor (IDM) system. These documents contain additional information concerning the Kinetix 6000M integrated drive-motor system.

Resource	Description
Kinetix Rotary Motion Specifications, publication GMC-TD001	Product specifications for the Kinetix 6000M (Bulletin MDF) integrated drive-motor system.
Kinetix Motion Accessories Specifications, publication GMC-TD004	Product specifications for Bulletin 2090 hybrid and network cables and other IDM system accessory items.
Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication GMC-RM003	System design guide to determine and select the required (drive specific) drive modules, power accessories, connector kits, and cable catalog numbers for your Kinetix 6000 or Kinetix 6200 drive system including the Kinetix 6000M IDM system. Also included are system performance specifications and torque/speed curves.
Kinetix 6000M Integrated Drive-Motor System User Manual, publication 2094-UM003	Information on wiring, configuring, and troubleshooting your Kinetix 6000M integrated drive-motor (IDM) system.

Select a Kinetix Motion Control System

Typical motion control systems require selections from several categories of Allen-Bradley motion control products.

Use Motion Analyzer Software

Motion Analyzer software is a comprehensive sizing tool used for analysis, optimization, selection, and validation of your Kinetix Motion Control system. Given any drive and compatible motor/actuator, Motion Analyzer software provides you with the data to determine the optimum drive and motor/actuator combination for your application.

You can also use Motion Analyzer software to build your bill of materials and receive an itemized list of system components with catalog numbers and product descriptions.

Motion Analyzer Software Features

Motion Analyzer software facilitates the machine design and investigation process by making it fast, simple, and accurate. Motion Analyzer software offers a fact-based decision path and design optimization approach that enables machine builders to:

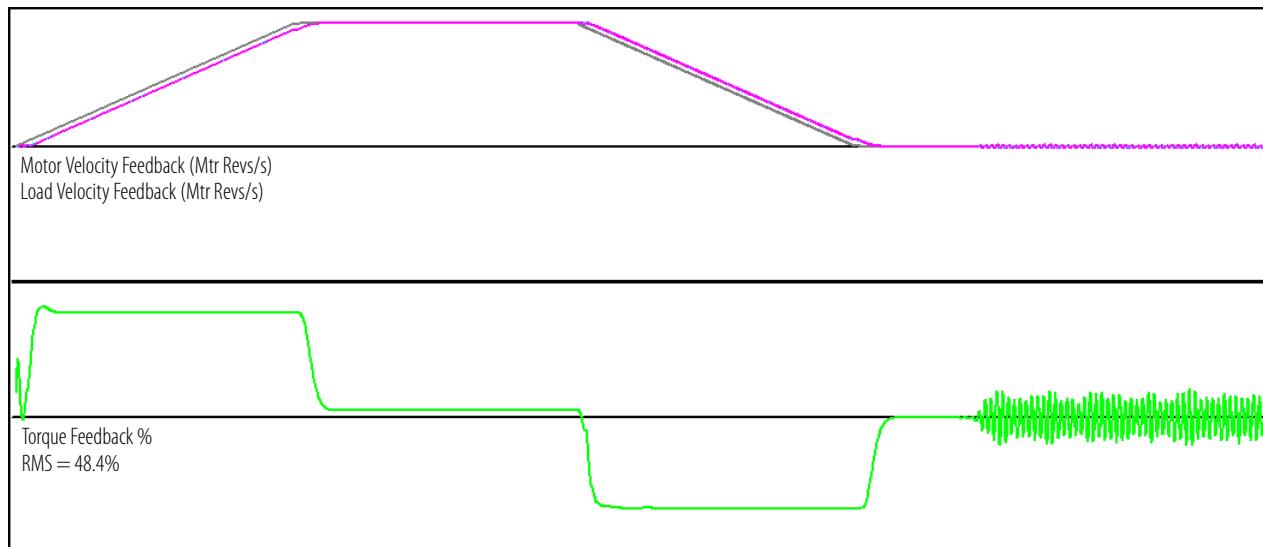

- reduce motion system design risk.
- reduce time from machine design to shipment.
- optimize motion control system cost and size.
- enhance machine performance and reliability.
- create a bill of materials.

Motion Analyzer software includes the full range of Kinetix Motion Control products and features.

MP-Series Electric Cylinders - deliver off-the-shelf linear motion without the need to search through catalogs looking for suitable ballscrews, timing belts, pulleys, and bearings. No mechanical data to enter, just input load information and move profile. Output even includes an L_{10} life estimate.

Tuning simulation - is a tool to help predict how your machine will perform under real-world conditions. Emulates tuning an axis in RSLogix 5000 software (including Auto-tune) and then simulates the behavior of the load, motor, and drive. Factors-in the mechanical compliance or backlash to give a realistic simulation.

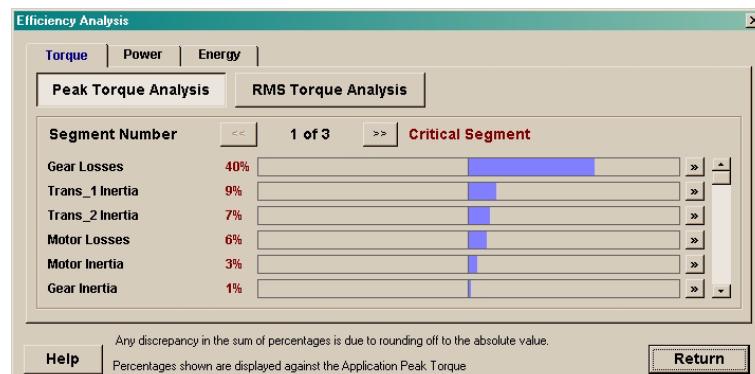

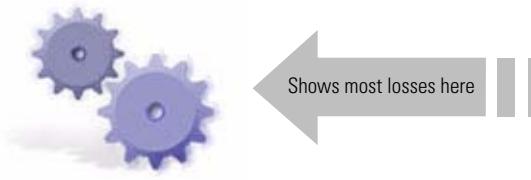

Variable mains supply analysis - is especially useful for machine builders exporting machines overseas.

Application Requirements		Reset All
• Supply Type	<input checked="" type="checkbox"/> AC1ph <input type="checkbox"/> AC3ph <input type="checkbox"/> DC	
• Voltage Type	<input checked="" type="radio"/> Single <input type="radio"/> Range	
• Nominal Voltage	230	
• Tolerance (%)	(-) 10 (+) 10	

Motor thermal performance prediction - takes into account the motor ambient temperature to verify performance in extreme-heat conditions.

Application Requirements		Reset All
• Maximum Speed (rpm)	2.8648	
• Continuous Torque (N·m)	0.0001	
• Peak Torque (N·m)	0.0001	
• Ambient Temperature	50	°C
• Altitude	1000	m

Efficiency analysis - provides an understanding of where the torque produced by the motor is consumed.

Motion Analyzer software also helps generate a bill of materials (BOM). With its rule-based approach, selecting the right drive, motor, cables, I/O connectors, and other accessory items is fast and error free.

You can have a system specified as a BOM or have selections based on the results of motor/actuator and drive sizing calculated by Motion Analyzer software.

Once finished, you can printout the BOM or export the BOM file to Microsoft Word or Excel application files.

Step 4: Axis Module

	Part Number	System Continuous Torque (Nm)	System Peak Torque (Nm)	Rated Speed (mm/sec)
<input type="radio"/>	2094-BC01-M01	2.1	8.2	5000
<input checked="" type="radio"/>	2094-BC01-MP5	2.1	4.3	5000

Select a Rotary Motion Family

<p>MP-Series Servo Motors</p> <ul style="list-style-type: none"> • 200V and 400V-class motors • Shaft-end threaded holes • Multi-turn and single-turn high-resolution absolute position encoders 	<p>MP-Series (Bulletin MPF) food-grade motors with improved sealing techniques for food environments.</p> <ul style="list-style-type: none"> • Combined characteristics of MP-Series low-inertia motors and features specifically designed for food and beverage applications • Epoxy coated • IP66/IP67 shaft seal (standard) and environmentally sealed connectors • 1.6...19.4 N·m (14...172 lb·in) continuous stall torque
<p>MP-Series (Bulletin MPL) low-inertia motors offer a reduced motor size while delivering significantly higher torque to meet the demanding requirements of high performance motion system.</p> <ul style="list-style-type: none"> • High-energy, rare-earth magnets • IP66 with optional shaft seal and environmentally sealed connectors • 0.26...163 N·m (2.3...1440 lb·in) continuous stall torque 	<p>MP-Series (Bulletin MPM) medium-inertia motors for higher inertia applications.</p> <ul style="list-style-type: none"> • Multiple winding speed options • High-energy, rare-earth magnets • IP67 with optional shaft seal and environmentally sealed connectors • 2.18...62.8 N·m (19.3...556 lb·in) continuous stall torque
<p>MP-Series (Bulletin MPS) stainless-steel motors for high-pressure washdown environments.</p> <ul style="list-style-type: none"> • Specifically designed for hygienic environments for use with high-pressure, highly caustic washdown applications • Smooth passivated 300-series stainless-steel cylindrical exterior • Certified and listed to NSF/ANSI Standard 169 • Cable extensions, 3 m (9.8 ft) • IP66/IP67 shaft seal (standard) and environmentally sealed connectors • 3.6...21.5 N·m (32...190 lb·in) continuous stall torque 	
<p>Kinetix 6000M Integrated Drive-Motor Systems</p> <p>Kinetix 6000M Integrated Drive-Motor systems combine the reliable high-performance MP-Series food-grade servo motor and Kinetix 6000 servo drive technologies into a single, compact package.</p> <ul style="list-style-type: none"> • USDA compliant food-grade paint, IP66 shaft seal, and same environmentally sealed connectors as the MP-Series food-grade motors • Standard MP-Series flange and shaft dimensions (of the same frame size) for easy upgrades • Hybrid and network cables connect to as many as 16 Kinetix 6000M integrated drive-motor units • 460V windings • 3.0...7.5 N·m (26.5...64.2 lb·in) continuous stall torque • Multi-turn high-resolution absolute position encoders 	
<p>RDD-Series™ Direct Drive Servo Motors</p> <p>Bulletin RDB direct-drive motors provide direct coupling to the load, eliminating mechanical transmission devices and improving system performance and efficiency.</p> <ul style="list-style-type: none"> • Direct coupling to the load • Bearingless housed configuration • 460V windings, multiple winding speed options • IP65 with use of environmentally sealed connectors • 32.7...426 N·m (289...3770 lb·in) continuous stall torque • Multi-turn and single-turn high-resolution Heidenhain EnDat 2.2 encoders 	
<p>TL-Series Servo Motors</p> <p>Bulletin TL and TLY high-performance servo motors combine compact size with high-torque density to provide substantial power in a small footprint.</p> <ul style="list-style-type: none"> • Compact size, high-torque density, high-energy (rare-earth) magnets • 230V windings in metric and NEMA frame sizes • IP65 with optional shaft seal • 0.086...5.42 N·m (0.76...48 lb·in) continuous stall torque • Multi-turn (battery-backed) high-resolution absolute position or incremental encoder options 	

To compare features across motor families, refer to Rotary Servo Motors on [page 17](#). Refer to the Kinetix Rotary Motion Technical Data, publication [GMC-TD001](#), for product specifications.

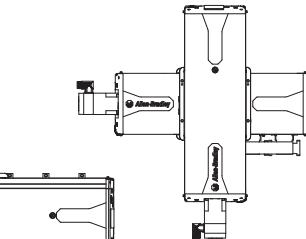

Select a Linear Motion Family

MP-Series Integrated Linear Stages

Bulletin MPAS integrated linear stages extend the performance and reliability of MP-Series servo motors technology to ballscrew and direct-drive linear slide-type actuators.

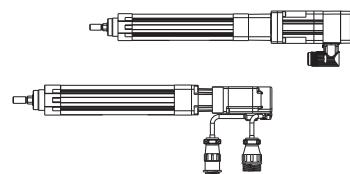

Bulletin MPMA integrated multi-axis linear stages extend the Allen-Bradley actuator portfolio into predefined and pre-assembled multi-axis configurations to suit a variety of manufacturing needs.

- 200/230V and 400/460V operation (200/230V only for 150 mm direct-drive frame size)
- High-energy, (rare-earth) magnets
- Carriage and base mounting design allows 200 and 250 mm frame sizes to be stacked
- IP30 rating with unique, long life strip seal system
- 83...521 N (19...117 lb) continuous stall force

MP-Series and TL-Series Electric Cylinders

With Bulletin MPAR and TLAR electric cylinders, your applications will experience flexible servo motor control ideal for solutions requiring forces to be built up quickly and positions that need to be approached accurately. Available in three ISO 15552 pneumatic-class frame sizes (32, 40, and 63 mm), these durable, quiet, and energy efficient non-rotating stainless steel piston rod actuators are an excellent upgrade for pneumatic systems.

MP-Series Heavy Duty Electric Cylinders

Bulletin MPAI heavy-duty electric cylinders are compact, lightweight, high-force actuators that serve as a cost-effective alternative to fluid power solutions.

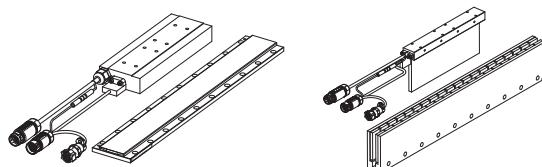

- 200/230V and 400/460V operation
- State of the art design features ballscrew and roller screw construction driven by MP-Series (Bulletin MPL) motors
- Fully assembled and ready to mount cylinders contribute to reductions in mechanical design engineering, wiring, and commissioning time
- Available in standard (front-face and front-trunnion) mount and food-grade paint (front-face and rear-clevis) mount configurations
- IP67 rating with the use of environmentally sealed (Bulletin 2090) cable connectors
- Available in 64, 83, 110, and 144 mm frame sizes with 706...13,122 N (159...2950 lb) continuous stall force

LDC-Series Iron Core and LDL-Series Ironless Linear Motors

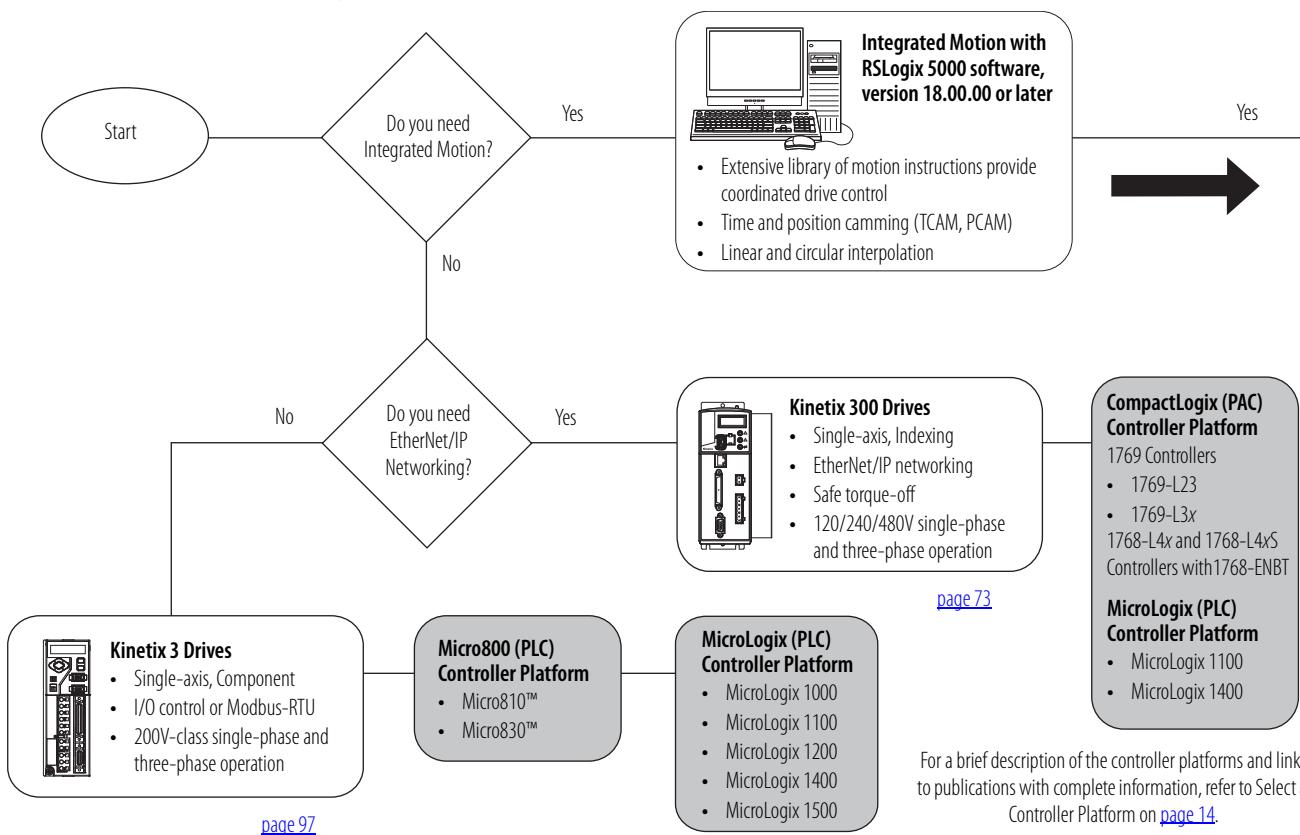

LDC-Series™ and LDL-Series™ linear motors technology provides cost-effective options to help you improve machine throughput while reducing maintenance and downtime.

- 200/400V and 460V AC operation (LDC-Series)
- 230V AC operation (LDL-Series)
- Cogging torque <5% of the continuous force (LDC-Series)
- Non-cogging technology for smooth motion (LDL-Series)
- Speed capabilities to 10 m/s (32.8 ft/s) to increase machine productivity
- IP65 rating and RoHS compliant
- 74...2882 N (17...648 lb) continuous stall force (LDC-Series)
- 63...596 N (14...134 lb) continuous stall force (LDL-Series)

To compare features across linear motor families, refer to Linear Servo Motors on [page 20](#). To compare features across linear actuator families, refer to Linear Actuators on [page 21](#). Refer to the Kinetix Linear Motion Technical Data, publication [GMC-TD002](#), for product specifications.

Programmable Automation Controllers

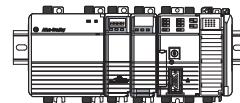

ControlLogix Controller Platform

The ControlLogix programmable automation controller (PAC) is a modular system capable of handling your most intensive applications. Modules are inserted into slots on the ControlLogix chassis.

- ControlLogix chassis
- Integrated motion on the EtherNet/IP network
- Integrated safety controllers
- Integrated motion on sercos interface
- Indexing on the EtherNet/IP network

CompactLogix Controller Platform

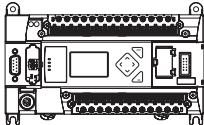

The CompactLogix programmable automation controller (PAC) is a modular system that provides cost-effective control for smaller applications. Modules snap together side-by-side on a DIN rail.

- CompactLogix DIN rail
- Integrated motion on the EtherNet/IP network
- Integrated safety controllers
- Integrated motion on sercos interface
- Indexing on the EtherNet/IP network

Programmable Logic Controllers

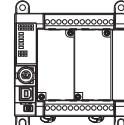

MicroLogix Controller Platform

The MicroLogix programmable logic controllers (PLC) with Modbus-RTU or PTO signals provide simple PLC-based motion solutions.

- Indexing on the EtherNet/IP network
- Pulse train output (PTO)

Micro800 Controller Platform

The Micro800 programmable logic controllers (PLC) with I/O control or Modbus-RTU signals provide simple PLC-based motion solutions with the Kinetix 3 component servo drive.

- Indexing on the EtherNet/IP network
- Pulse train output (PTO)

For more information on controller platforms and the interface/network modules required for motion control applications, refer to the publications listed in the table below.

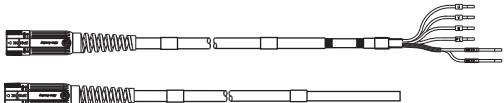

Controller Platform	Resource
ControlLogix	ControlLogix Selection Guide, publication 1756-SG001
EtherNet/IP communication modules	1756 ControlLogix Communication Modules Specifications, publication 1756-TD003
Sercos interface modules	1756 ControlLogix Integrated Motion Modules Specifications, publication 1756-TD004
Analog servo modules	
CompactLogix	CompactLogix Selection Guide, publication 1769-SG001
Sercos interface modules	1768 CompactLogix Integrated Motion Module Specifications, publication 1768-TD001
MicroLogix	MicroLogix Programmable Controllers Selection Guide, publication 1761-SG001
Micro800	Micro800 Programmable Controllers Selection Guide, publication 2080-SG001

For more information on technical publications available for Integrated Architecture products, refer to the Integrated Architecture Recommended Literature Reference Manual, publication [IASIMP-RM001](#).

Select Servo Drive Accessories

Motor and Interface Cables

- Motor power and feedback cables for your motor/actuator
- Interface cables for sercos and Ethernet communication modules
- Interface cables for I/O control and cascading safe-off signals from drive-to-drive

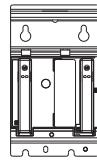

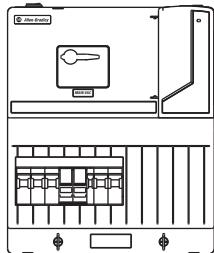

Connector Kits and Breakout Components

- Connector kits for motor feedback, I/O, and safety signals
- Breakout components for motor feedback and I/O signals
- Safe-off components for cascading safe-off signals from drive-to-drive

Power Components

- Bulletin 2094 power rail, shunt module, or slot-filler module for Kinetix 6000, Kinetix 6200, Kinetix 6500 drives
- Bulletin 2094 line interface modules, designed to replace many of the common input power devices required for your servo drive system
- Bulletin 2090 AC line filters
- Bulletin 2090 and 1394 external shunt modules

For more information on accessories, refer to Motion Control Accessories Technical Data, publication [GMC-TD004](#).

Verify System Combinations and Accessory Items

Each of these publications focus on a drive family and provide the drive accessory catalog numbers required for a typical system. Included are tables and examples listing the required motor/actuator cables, interface cables, and connector kits required for a system. Also included are performance specification tables and torque/speed curves (rotary motion) and force/velocity curves (linear motion) for the optimum drive/motor or drive/actuator combination. Use the drive systems publication and the Motion Accessories publication to complete your bill of materials.

Kinetix 6200 and Kinetix 6500 Modular Servo Drives

These multi-axis safe-speed servo drives help increase productivity and protect personnel with embedded safety features. Modular design and control provides ease of maintenance and greater flexibility as the drive easily transitions from safe torque-off to safe speed.

The Kinetix 6500 servo drives provide Integrated Motion capability over the EtherNet/IP network by using CIP Motion and CIP Sync technology from ODVA, all built on the Common Industrial Protocol (CIP).

The Kinetix 6200 servo drives provide Integrated Motion capability through sercos interface and compatibility with Kinetix 6000 drives, letting you migrate to the enhanced features exactly when and where you need them.

Kinetix 6200 and Kinetix 6500 Servo Drive Features

- Multi-axis modular design for communication and safety options
 - Integrated Motion on the EtherNet/IP network (Kinetix 6500 control modules)
 - Integrated Motion on sercos interface (Kinetix 6200 control modules)
 - Bulletin 2094 IAM/AM power modules
- TÜV certified, SIL CL3, PLe, category 4 safety performance
 - Safe speed monitoring control
 - Safe torque-off control
- 324...528V AC three-phase (400V-class input) to IAM/AM power modules
 - 1.8...22 kW continuous output power (inverter)
 - 2.8...34.6 A rms continuous output current (inverter)
- RSLogix 5000 software for programming (ladder logic, structured text, and sequential function charts)
- Kinetix Integrated Motion with ControlLogix or CompactLogix controllers
- High-resolution absolute, multi-turn and single-turn encoder feedback, feedback-only auxiliary axis

To compare drive features across drive families, refer to Servo Drives beginning on [page 23](#).

Kinetix 6200 and Kinetix 6500 Servo Drive Components

Kinetix 6200 and Kinetix 6500 modular servo drive systems consist of these required components:

- One integrated axis power module (IAM or leader IAM)
- Up to seven axis power modules (AM)
- Up to eight control modules, (sercos interface or EtherNet/IP network)
- One power rail
- One to eight rotary motors, linear motors, or linear actuators
- One to eight motor power and feedback cables
- Low-profile connector kits (required for flying-lead cables)
- Two to nine sercos fiber-optic cables (Kinetix 6200 control modules only)
- Ethernet cables for Logix controller (Kinetix 6500 control modules only)
- Ethernet cables for programming the safety configuration (Kinetix 6200 and Kinetix 6500 control modules)

Kinetix 6200 and Kinetix 6500 systems may also include one or more IAM power modules used as a follower IAM (and associated axis modules, power rails, motors, cables, and connector kits as required for the application).

Kinetix 6000M integrated drive-motor (IDM) systems are an option with Kinetix 6200 servo drives

- One Kinetix 6000M IDM power interface module (IPIM) per IDM system
- As many as 4 IPIM modules on the Bulletin 2094 power rail
- As many as 16 integrated drive-motor (IDM) units connect to each IPIM module

These components are also optional:

- One Kinetix 6000 shunt module, 2094-BSP2 with optional Bulletin 1394 external passive shunt module
- 2094-PRF slot-filler modules
- Bulletin 2094 line interface module (LIM)
- Bulletin 2090 resistive brake module (RBM)
- 2090-XXLF AC line filters (required for CE)

For detailed Kinetix 6200 and Kinetix 6500 drives system requirements, refer to the Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication [GMC-RM003](#).

Kinetix 6200 and Kinetix 6500 Servo Drive Selection

Drive Module	Drive Cat. No.	Continuous Output Ratings	
		Converter (A _{DC})	Inverter (A, 0-pk)
Integrated Axis Module (IAM) power module, 400V-class	2094-BC01-MP5-M	6 kW, 9 A	1.8 kW, 4.0 A
	2094-BC01-M01-M	6 kW, 9 A	3.9 kW, 8.6 A
	2094-BC02-M02-M	15 kW, 23 A	6.6 kW, 14.6 A

	2094-BC07-M05-M	45 kW, 68 A	22.0 kW, 49 A
Axis Module (AM) power module, 400V-class	2094-BMP5-M	N/A	1.8 kW, 4.0 A
	2094-BM01-M		3.9 kW, 8.6 A
	2094-BM02-M		6.6 kW, 14.6 A
	2094-BM03-M		13.5 kW, 30 A
	2094-BM05-M		22.0 kW, 49 A
Kinetix 6200 control module (sercos)	2094-SE02F-M00-S0, Safe torque-off		
	2094-SE02F-M00-S1, Safe speed monitoring		
Kinetix 6500 control module (EtherNet/IP)	2094-EN02D-M01-S0, Safe Torque-off		
	2094-EN02D-M01-S1, Safe speed monitoring		
2094 power rail	2094-PRSx	Available for 1, 2, 3, 4, 5, 7, and 8-axis systems	
2094 IDM power interface module	2094-SEPM-B24-S	400V-class, 24 A rms, 15 kW, sercos, supports up to 16 integrated drive-motor units	
2094 shunt module	2094-BSP2	200/400V-class, 200 W shunt module (mounts on power rail)	
2094 slot-filler module	2094-PRF	200/400V-class, covers unused slots on power rail	

For Kinetix 6200 and Kinetix 6500 drive module specifications not included in this publication, refer to the Kinetix Servo Drives Specifications Technical Data, publication [GMC-TD003](#).

Kinetix 6000 Drive Component Compatibility

The 2094-BCxx-Mxx-M and 2094-BMxx-M power modules contain the same power structure as the 2094-BCxx-Mxx-S and 2094-BMxx-S drives. Because of this, the 2094-BSP2 shunt module, 2094-PRF slot-filler module, and 2094-PRSx power rails are all supported by both drive families.

In addition, 2094-BMxx-M AM power modules with sercos interface are supported on power rails with a 2094-BCxx-Mxx-S IAM module. Conversely, 2094-BMxx-S AM drives are supported on power rails with a 2094-BCxx-Mxx-M IAM power module with sercos interface.

IMPORTANT Kinetix 6500 EtherNet/IP control modules (catalog numbers 2094-EN02D-M01-Sx) are not compatible with IAM/AM modules on the same Bulletin 2094 power rail where sercos interface is used.

IAM/AM Module Compatibility

IAM Module	Control Module	2094-xMxx-S Kinetix 6000 AM Module	2094-BMxx-M AM Power Modules	
			2094-SE02F-M00-Sx Kinetix 6200 Control Module	2094-EN02D-M01-Sx Kinetix 6500 Control Module
2094-xCxx-Mxx-S	N/A			
2094-BCxx-Mxx-M (IAM power module)	2094-SE02F-M00-Sx sercos interface	Fully compatible	Fully compatible	Not compatible
	2094-EN02D-M01-Sx EtherNet/IP network	Not compatible	Not compatible	Fully compatible

For more information on the Kinetix 6000 IAM and AM modules, catalog numbers 2094-xCxx-Mxx-S and 2094-xMxx-S, refer to Kinetix 6000 Multi-axis Servo Drives on [page 45](#).

Kinetix 6000M Integrated Drive-Motor System Compatibility

Bulletin 2094 power rails with Kinetix 6000 (series B) or Kinetix 6200 drives are compatible with Kinetix 6000M integrated drive-motor (IDM) systems. The integrated drive-motor power interface module (IPIM) mounts to the power rail and connects to as many as 16 IDM units.

IMPORTANT Kinetix 6500 EtherNet/IP control modules (catalog numbers 2094-EN02D-M01-Sx) are not compatible with Kinetix 6000M integrated drive-motor systems.

IAM Module Compatibility

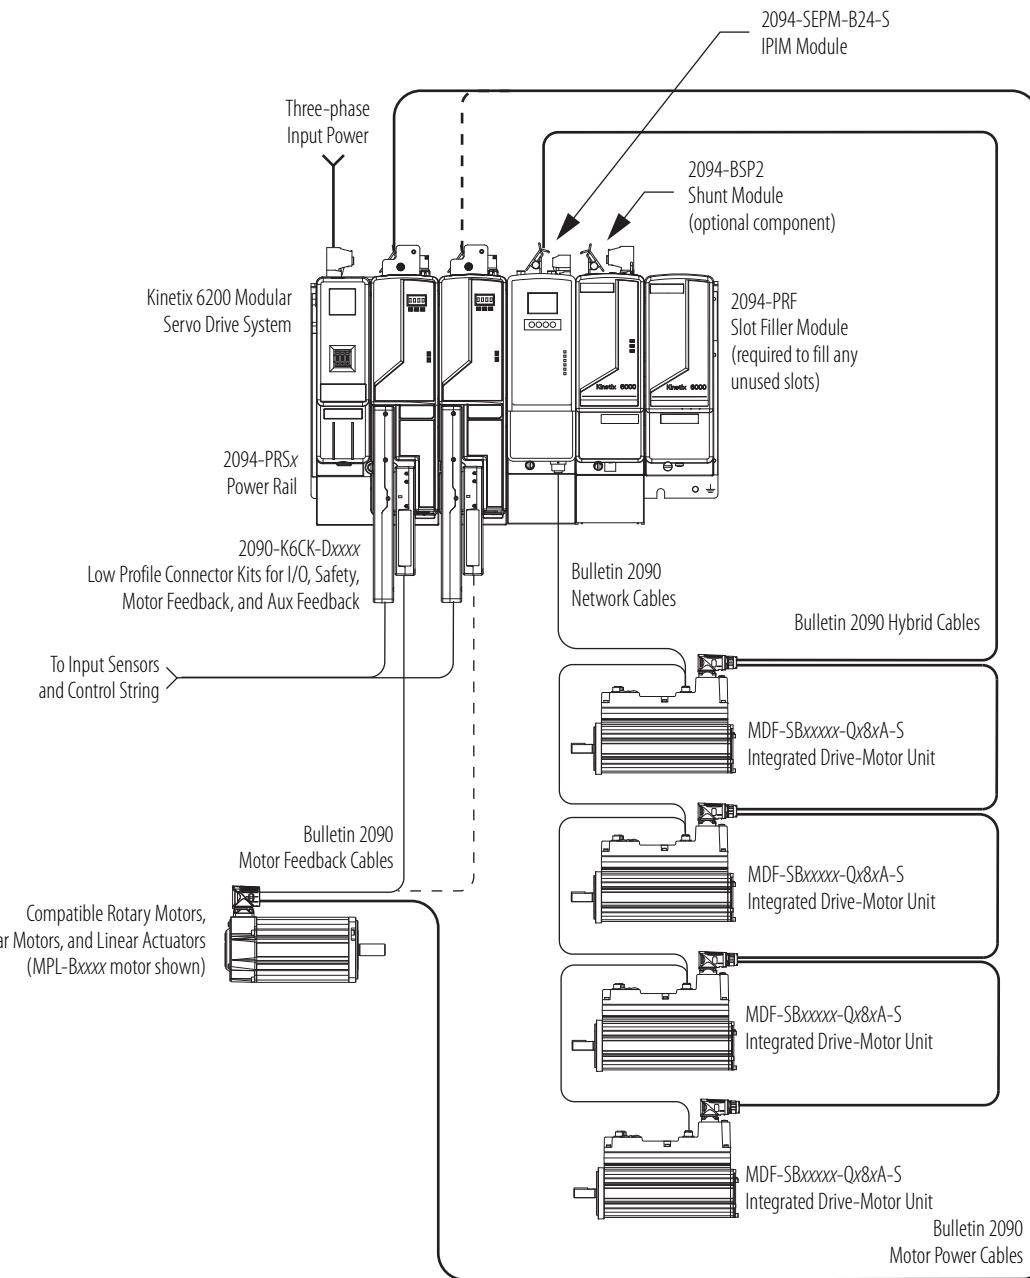

IAM Module	Control Module	2094-SEPM-B24-S IDM Power Interface Module (IPIM)
2094-BCxx-Mxx-S (series B)	N/A	
2094-BCxx-Mxx-M (IAM power module)	2094-SE02F-M00-Sx sercos interface	Fully compatible
	2094-EN02D-M01-Sx EtherNet/IP network	Not compatible

For more information on the Kinetix 6000M integrated drive-motor systems, refer to Typical Kinetix 6000M Integrated Drive-Motor Configuration on [page 29](#).

Typical Kinetix 6000M Integrated Drive-Motor Configuration

This configuration illustrates the use of Kinetix 6200 servo drives with the Kinetix 6000M integrated drive-motor (IDM) system. The IDM power interface module (IPIM) is included in the fiber-optic sercos ring configuration along with the axis modules. Refer to Typical Communication Configurations on [page 33](#) for examples.

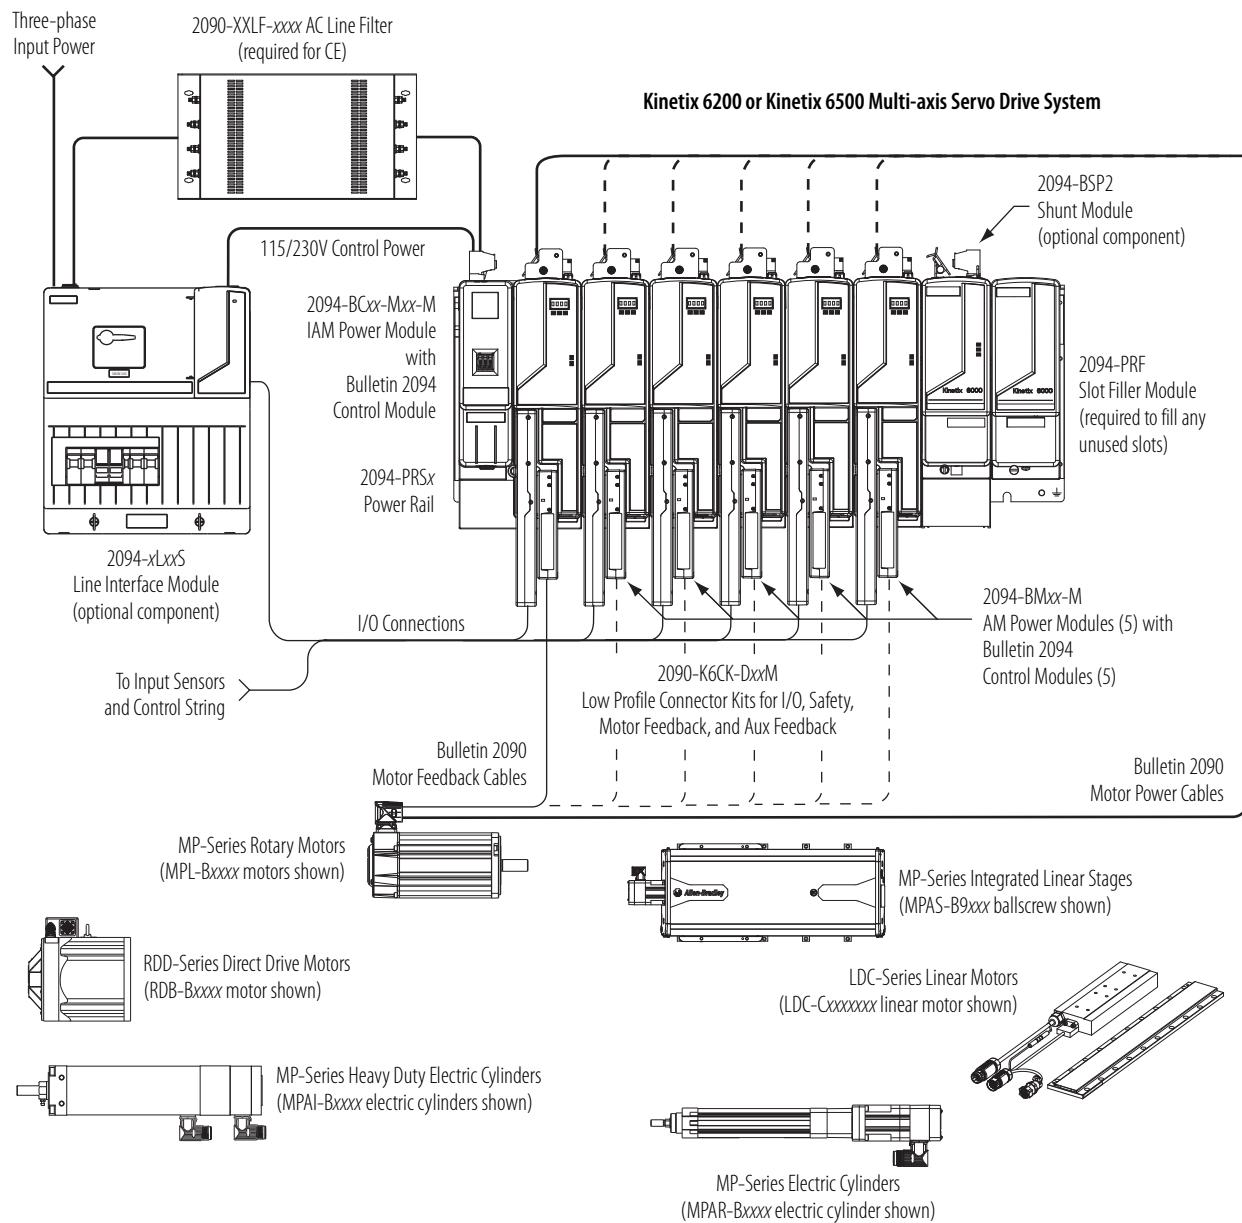

Modular Drive System (with Kinetix 6000M IDM system)

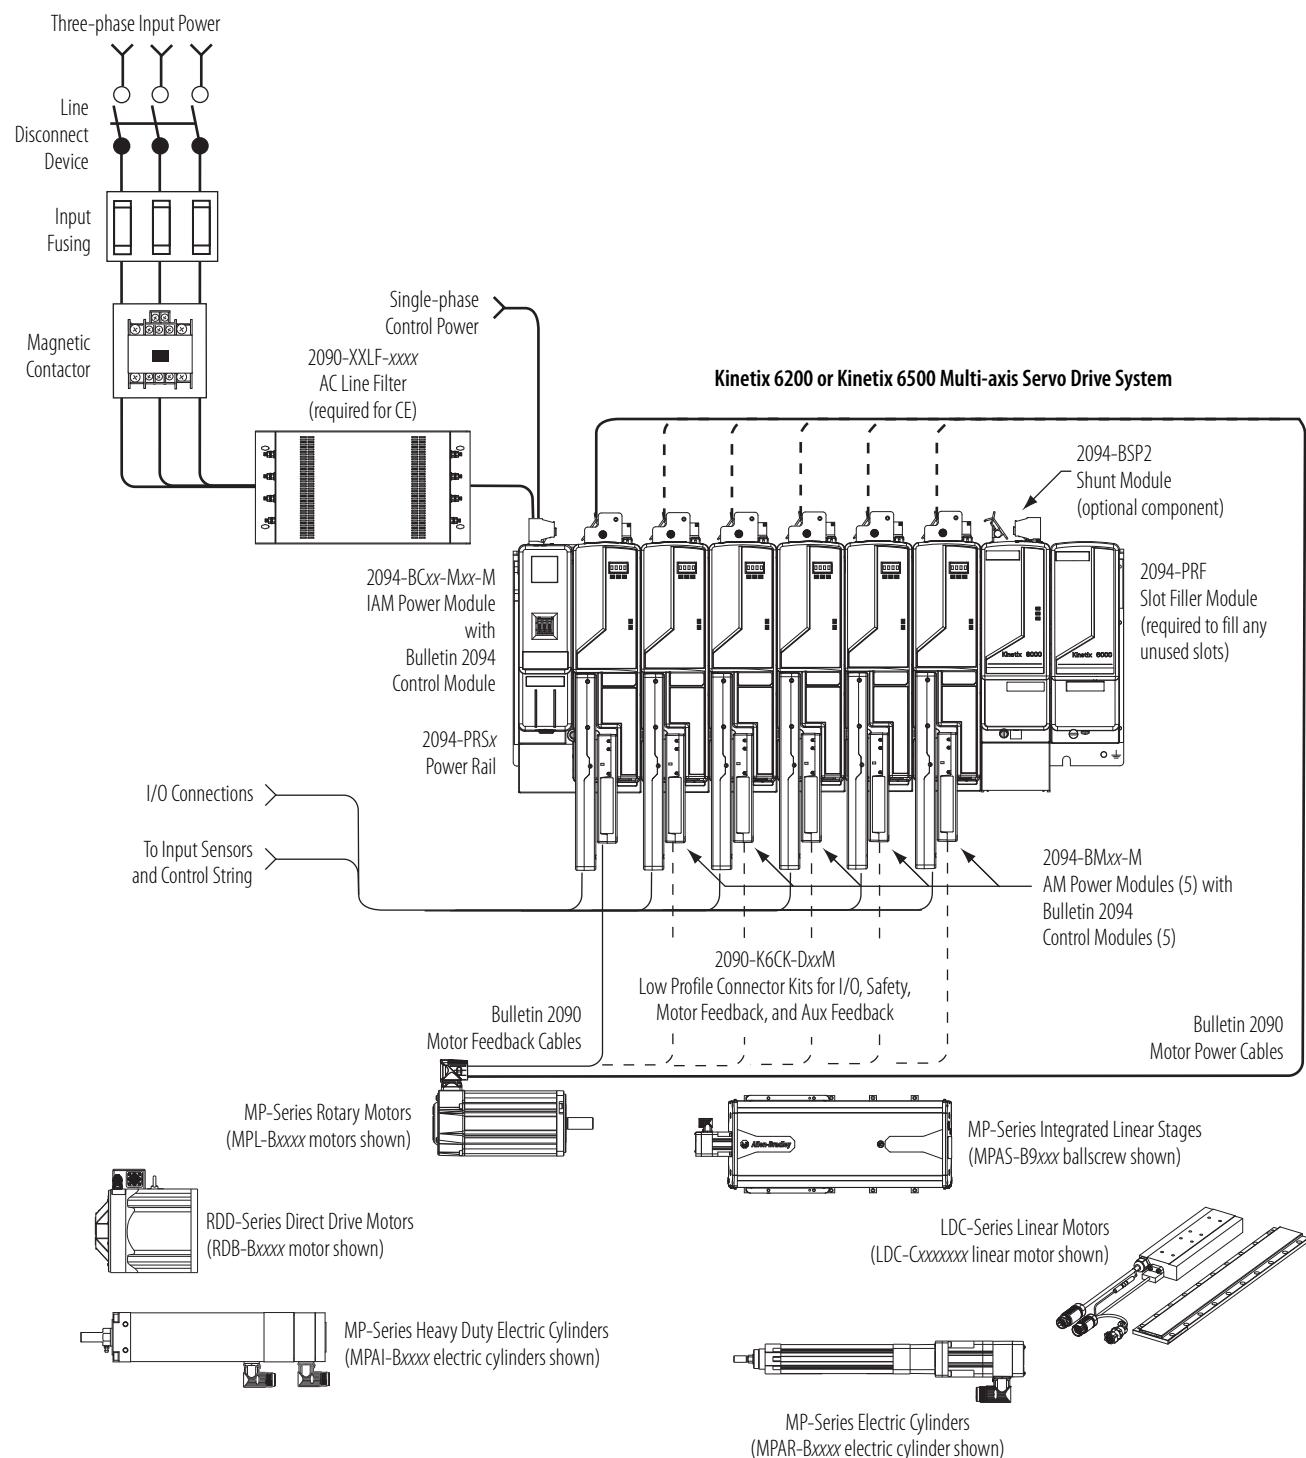

Typical Hardware Configurations

These typical hardware configurations illustrate the use of servo drives, motors, actuators, and motion accessories available for Kinetix 6200 and Kinetix 6500 modular drive systems.

Modular Drive System (with LIM module)

Modular Drive System (without LIM module)

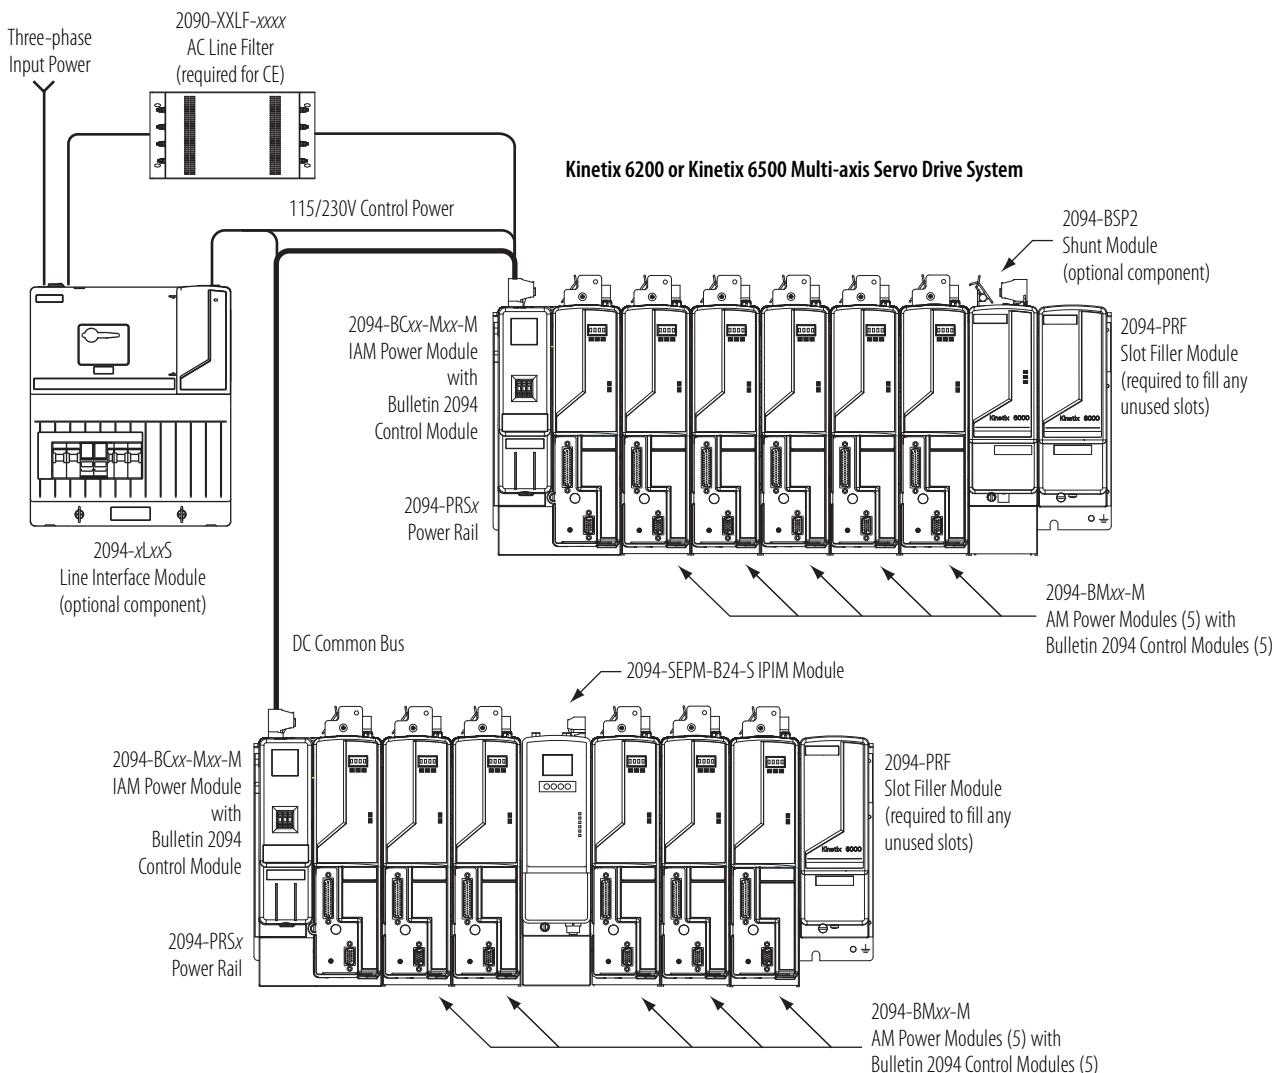

In this system configuration, the leader IAM power module is connected to the follower IAM module via the DC common bus. When planning your panel layout, you must calculate the total bus capacitance of your DC common bus system to make sure that the leader IAM power module is sized sufficiently to pre-charge the entire system. Refer to the Kinetix 6200 and Kinetix 6500 Modular Servo Drive User Manual, publication [2094-UM002](#), when making this calculation.

IMPORTANT

If total bus capacitance of your system exceeds the leader IAM power module pre-charge rating, the IAM module four-character display scrolls a power cycle user limit condition. If input power is applied, the display scrolls a power cycle fault limit condition.

To correct this condition, you must replace the leader IAM power module with a larger module or decrease the total bus capacitance by removing AM power modules.

Modular Drive System (DC Common Bus)

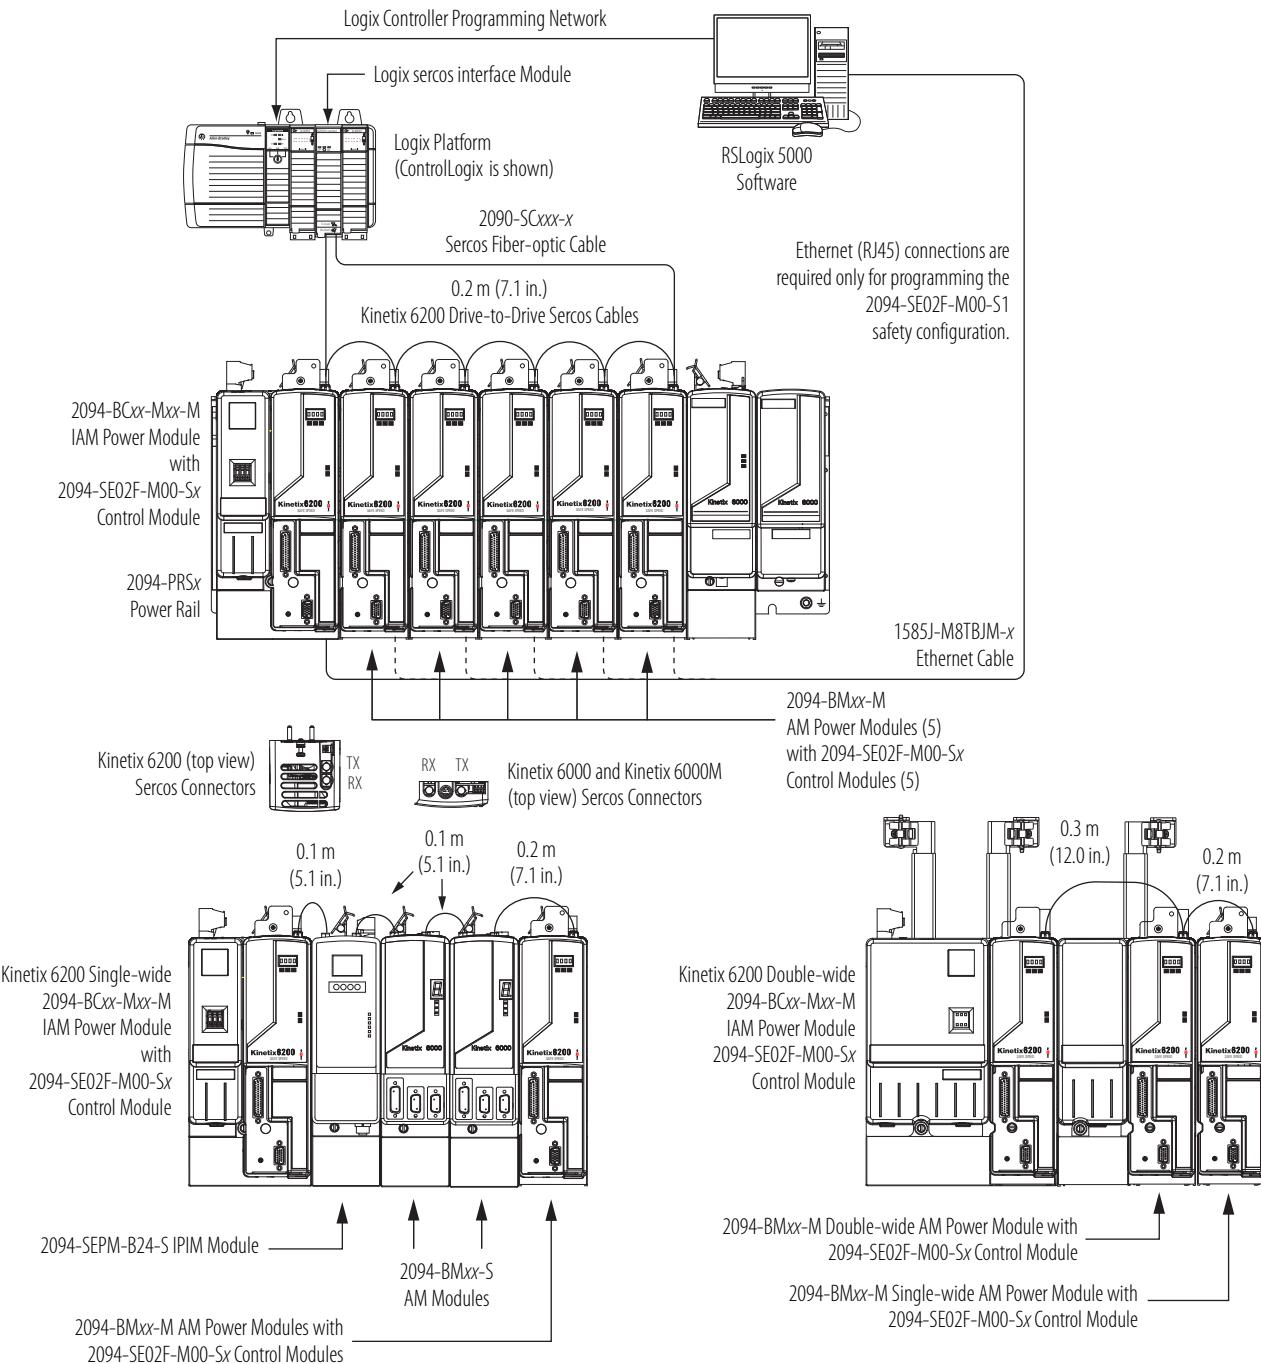

Motors and other details common to both three-phase AC and DC common-bus configurations are removed.

Typical Communication Configurations

The Kinetix 6200 control modules use sercos interface for configuring the Logix module and EtherNet/IP network for access to the safety configuration tool.

In this example, an ethernet cable is connected to each control module when programming the safety configuration. EtherNet/IP network connectivity is not required during runtime. Also shown are drive-to-drive sercos cable lengths and catalog numbers when Kinetix 6000 and Kinetix 6200 drive modules exist on the same power rail.

Kinetix 6200 Drive Communication (sercos)

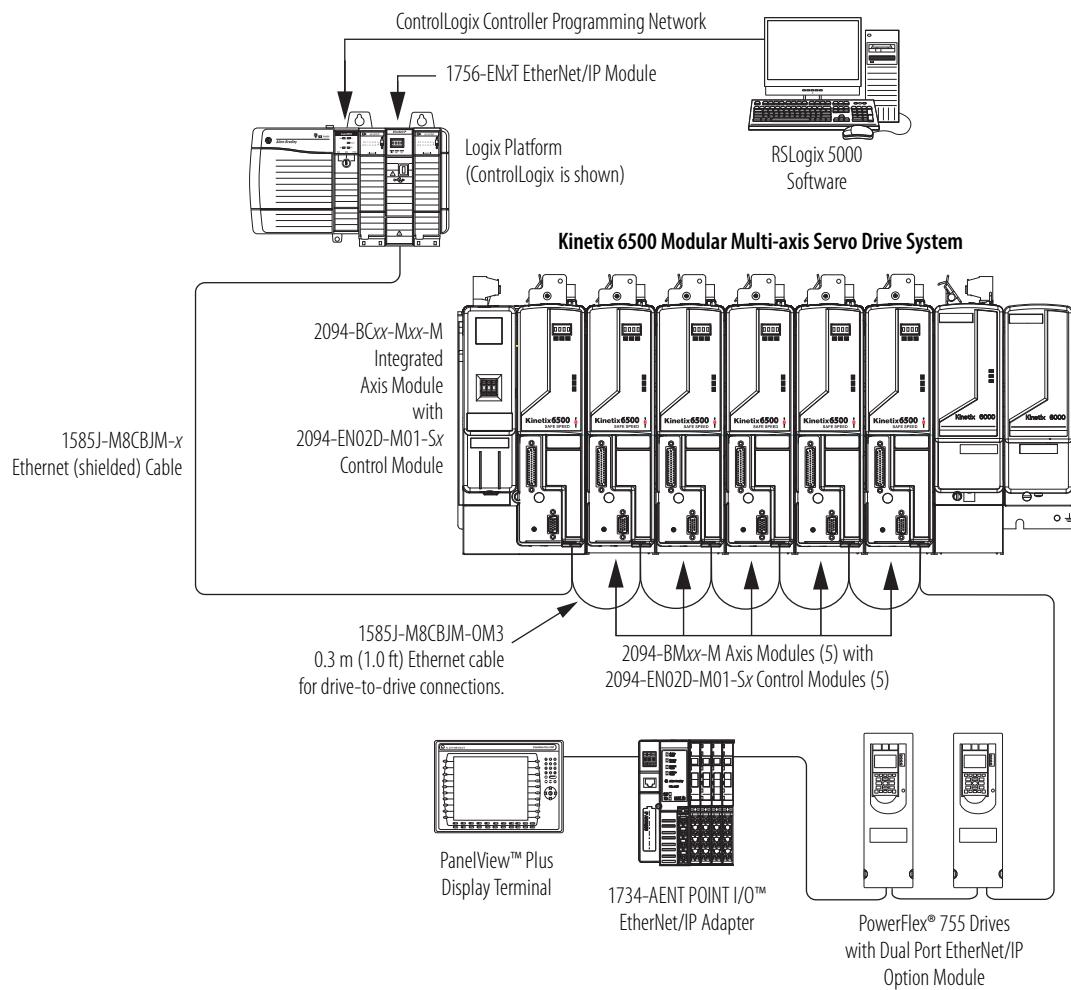

The Kinetix 6500 control modules can use any Ethernet topology including star, linear, and device-level ring (DLR). DLR is an ODVA standard and provides fault tolerant connectivity.

IMPORTANT Shielded Ethernet cable, catalog number 1585J-M8CBJM-x, is available in lengths up to 78 m (256 ft). However, the total length of Ethernet cable connecting drive-to-drive, drive-to-controller, or drive-to-switch must not exceed 100 m (328 ft).

In this example, all devices are connected in linear topology. The Kinetix 6500 control module includes dual-port connectivity. Devices without dual ports should include the 1783-ETAP module or be connected at the end of the line.

- Linear configurations support up to 64 devices.
- No redundancy. If any device becomes disconnected, all the devices downstream loose communication.

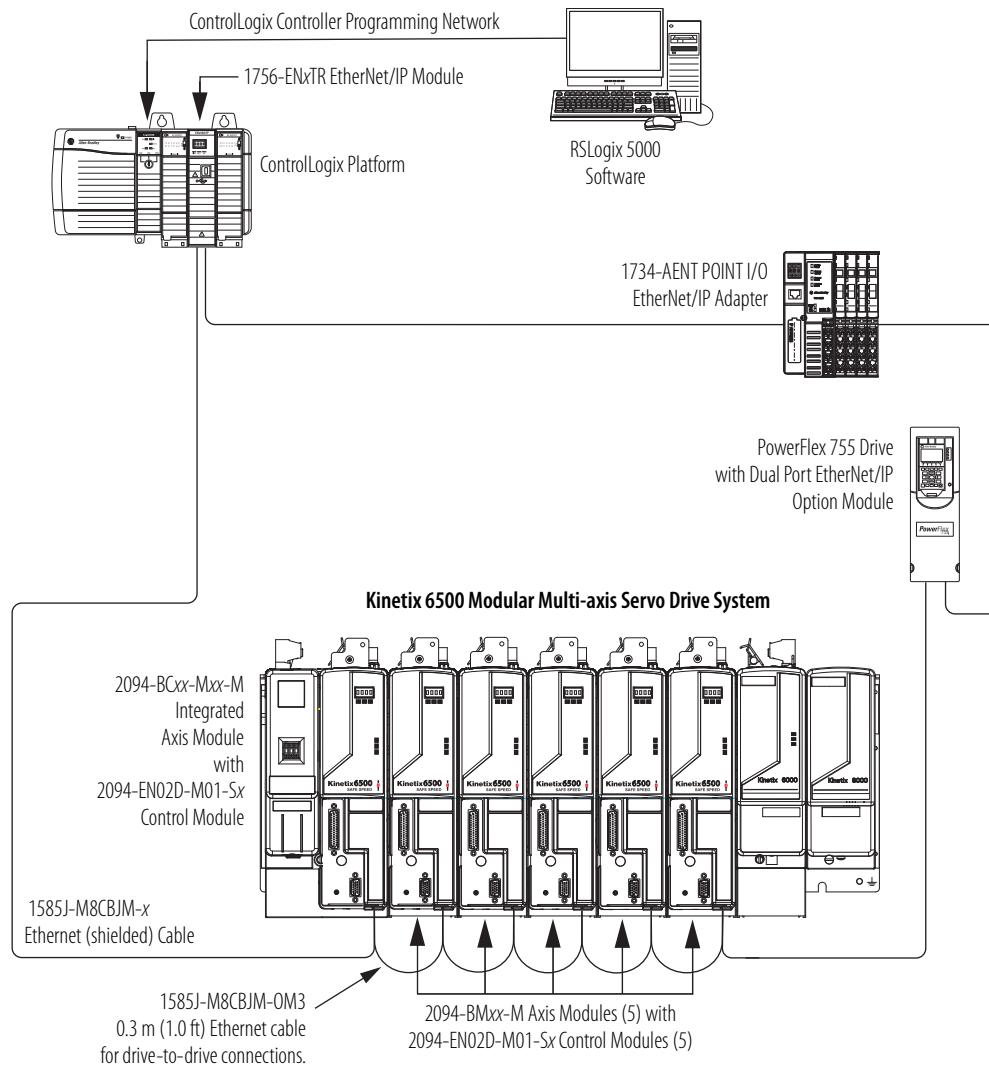

Kinetix 6500 Linear Communication (EtherNet/IP network)

In this example, devices are connected by using device-level ring (DLR) topology. DLR topology is fault tolerant. For example, if a device in the ring is disconnected, the rest of the devices in the ring continue to maintain communication.

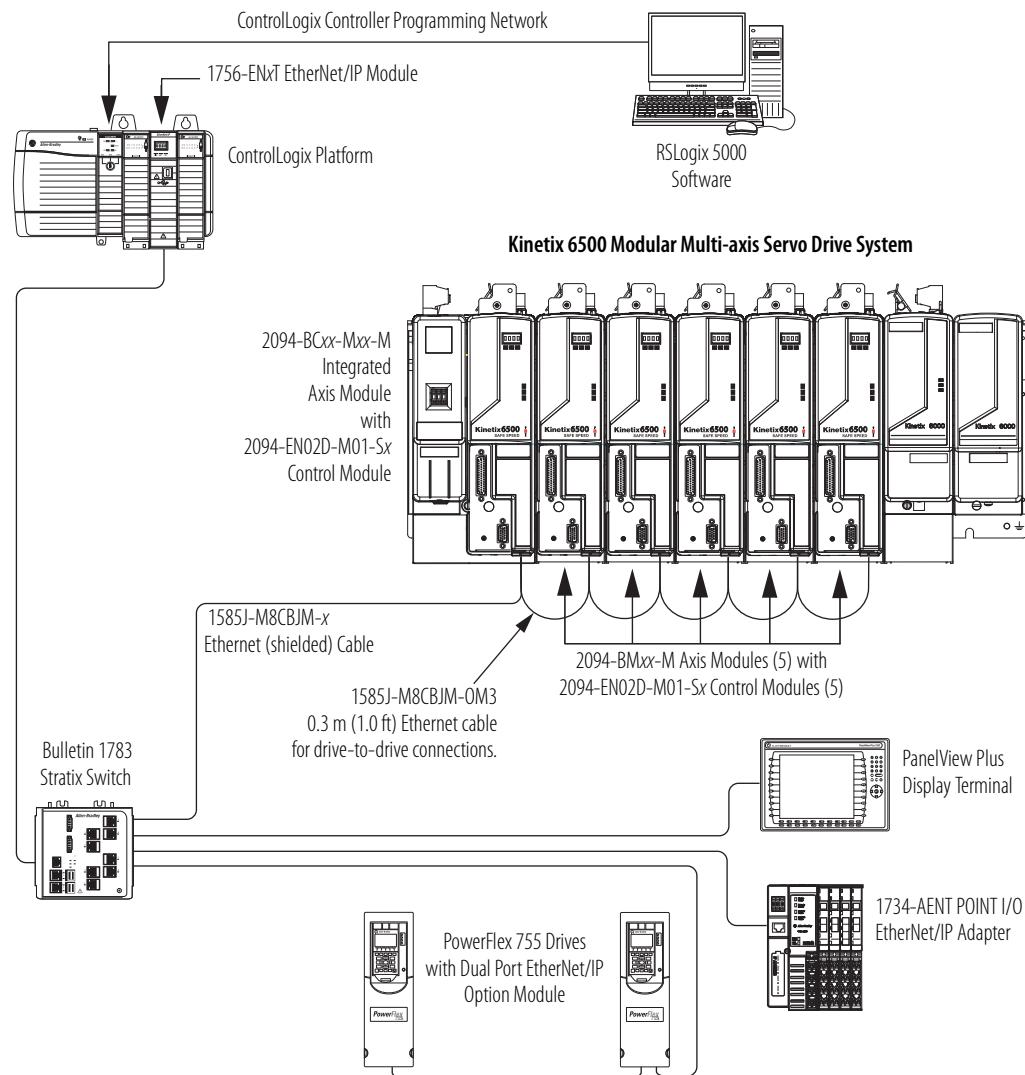

- DLR configurations support up to 64 devices.
- All devices in a DLR ring should have dual-port connectivity or be connected in the ring by using a 1783-ETAP module.

Kinetix 6500 Ring Communication (EtherNet/IP network)

In this example, devices are connected by using star topology. Each device is connected directly to the switch, making this topology fault tolerant. The 2094 power rail modules and other devices operate independently. The loss of one device does not impact the operation of the other devices.

Kinetix 6500 Star Communication (EtherNet/IP network)

Rotary Motion Performance Specifications

These rotary motor families are compatible with Kinetix 6200 and Kinetix 6500 servo drives.

Rotary Motor Family	Page
MP-Series (Bulletin MPL) low-inertia motors	37
MP-Series (Bulletin MPM) medium-inertia motors	39
MP-Series (Bulletin MPF) food-grade motors	40
Kinetix 6000M (Bulletin MDF) integrated drive-motor (food-grade) motors	40
MP-Series (Bulletin MPS) stainless-steel motors	41
MP-Series (Bulletin RDB) direct-drive motors	41

For Kinetix 6200 and Kinetix 6500 drive system combinations that include cable catalog number selection and torque/speed curves, refer to the Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication [GMC-RM003](#).

IMPORTANT These system combinations do not include all possible motor/drive combinations. Please refer to Motion Analyzer software to verify compatibility. Download is available at <http://www.ab.rockwellautomation.com/motion-control/motion-analyzer-software>.

Performance specification data and curves reflect nominal system performance of a typical system with motor at 40 °C (104 °F) and drive at 50 °C (122 °F) ambient and rated line voltage. For additional information on ambient and line conditions, refer to Motion Analyzer software.

Linear Motion Performance Specifications

These linear motion families are compatible with Kinetix 6200 and Kinetix 6500 servo drives.

Linear Motion Family	Page
MP-Series (Bulletin MPAS) integrated linear stages	42
MP-Series (Bulletin MPAR) electric cylinders	42
MP-Series (Bulletin MPAI) heavy-duty electric cylinders	43
LDC-Series iron-core linear motors	44

For Kinetix 6200 and Kinetix 6500 drive system combinations that include cable catalog number selection and force/velocity curves, refer to the Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication [GMC-RM003](#).

IMPORTANT These system combinations do not include all possible actuator/drive combinations. Please refer to Motion Analyzer software to verify compatibility. Download is available at <http://www.ab.rockwellautomation.com/motion-control/motion-analyzer-software>.

(1) Values represent the range between no cooling (low value) and water cooling (high value).

Performance specification data and curves reflect nominal system performance of a typical system with motor at 40 °C (104 °F) and drive at 50 °C (122 °F) ambient and rated line voltage. For additional information on ambient and line conditions, refer to Motion Analyzer software.

Kinetix 6000 Multi-axis Servo Drives

The Kinetix 6000 multi-axis servo drives provide powerful simplicity to handle even the most demanding applications quickly, easily, and cost-effectively. By providing advanced control capability along with innovative design and installation features, the Kinetix 6000 drives significantly improve system performance while saving time and money. The compact size, simplified wiring, and easy-to-use components make the Kinetix 6000 drives an ideal choice for both OEMs and end-users. Target applications for the Kinetix 6000 drives include packaging, material handling, converting, and assembly.

The Kinetix 6000 drive family is part of the Kinetix Integrated Motion solution.

Kinetix 6000 Multi-axis Servo Drive Features

- Multi-axis servo drive systems with Integrated Motion on sercos interface
- TÜV certified, SIL CL3, PLe, category 3 safety performance
 - Safe-off control
- 195...265V AC three-phase (200V-class) input
- 324...528V AC three-phase (400V-class) input
 - Enhanced-peak performance for up to 250% of continuous current rating
- RSLogix 5000 software for programming (ladder logic, structured text, and sequential function charts)
- Kinetix Integrated Motion with ControlLogix or CompactLogix controllers
- High-resolution absolute, multi-turn and single-turn encoder feedback; feedback-only auxiliary axis

To compare drive features across drive families, refer to Servo Drives beginning on [page 23](#).

Kinetix 6000 Servo Drive Components

Kinetix 6000 servo drive systems consist of these required components:

- One integrated axis module (IAM or leader IAM)
- Up to seven axis modules
- One power rail
- One to eight rotary motors, linear motors, or linear actuators
- One to eight motor power and feedback cables
- Low-profile connector kits (required for flying-lead feedback cables)
- Two to nine sercos fiber-optic cables

Kinetix 6000 systems may also include one or more integrated axis modules used as a follower IAM (and associated axis modules, power rails, motors, cables, and connectors as required for the application).

Kinetix 6000M integrated drive-motor (IDM) systems are an option with Kinetix 6000 servo drives

- One Kinetix 6000M IDM power interface module (IPIM) per IDM system
- As many as 4 IPIM modules on the Bulletin 2094 power rail
- As many as 16 integrated drive-motor (IDM) units connect to each IPIM module

These components are optional:

- One shunt module, 2094-BSP2 with optional Bulletin 1394 external passive shunt module
- 2094-PRF, Slot-filler modules
- Bulletin 2094 Line Interface Module (LIM)
- Bulletin 2090 Resistive Brake Module (RBM)
- Bulletin 1336 external active shunt module (dynamic brake)
- 2090-XXLF AC Line Filters (required for CE)

For detailed Kinetix 6000 drive system requirements, refer to the Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication [GMC-RM003](#).

Kinetix 6000 Servo Drive Selection

Drive Module	Drive Cat. No.	Continuous Output Ratings	
		Converter (A _{DC})	Inverter (A, 0-pk)
Integrated axis module (IAM), 200V-class	2094-AC05-MP5-S	3 kW, 10 A	1.2 kW, 5 A
	2094-AC05-M01-S	3 kW, 10 A	1.9 kW, 9 A
	2094-AC09-M02-S	6 kW, 19 A	3.4 kW, 15 A
	2094-AC16-M03-S	11.3 kW, 36 A	5.5 kW, 25 A
	2094-AC32-M05-S	22.5 kW, 71 A	11.0 kW, 49 A
Integrated axis module (IAM), 400V-class	2094-BC01-MP5-S	6 kW, 9 A	1.8 kW, 4.0 A
	2094-BC01-M01-S	6 kW, 9 A	3.9 kW, 8.6 A
	2094-BC02-M02-S	15 kW, 23 A	6.6 kW, 14.6 A
	2094-BC04-M03-S	28 kW, 42 A	13.5 kW, 30 A
	2094-BC07-M05-S	45 kW, 68 A	22.0 kW, 49 A
Axis module (AM), 200V-class	2094-AMP5-S	N/A	1.2 kW, 5 A
	2094-AM01-S		1.9 kW, 9 A
	2094-AM02-S		3.4 kW, 15 A
	2094-AM03-S		5.5 kW, 25 A
	2094-AM05-S		11.0 kW, 49 A
Axis module (AM), 400V-class	2094-BMP5-S	N/A	1.8 kW, 4.0 A
	2094-BM01-S		3.9 kW, 8.6 A
	2094-BM02-S		6.6 kW, 14.6 A
	2094-BM03-S		13.5 kW, 30 A
	2094-BM05-S		22.0 kW, 49 A
2094 power rail	2094-PRRx	Available for 1, 2, 3, 4, 5, 7, and 8-axis systems	
2094 IDM power interface module	2094-SEPM-B24-S	400V-class, 24 A rms, 15 kW, sercos, supports up to 16 integrated drive-motor units	
2094 shunt module	2094-BSP2	200/400V-class, 200 W shunt module (mounts on power rail)	
2094 slot-filler module	2094-PRF	200/400V-class, covers unused slots on power rail	

For Kinetix 6000 drive module specifications not included in this publication, refer to the Kinetix Servo Drives Technical Data, publication [GMC-TD003](#).

Kinetix 6200 Drive Component Compatibility

The 2094-BCxx-Mxx-M and 2094-BMxx-M power modules contain the same power structure as the 2094-BCxx-Mxx-S and 2094-BMxx-S drives. Because of this, the 2094-BSP2 shunt module, 2094-PRF slot-filler module, and 2094-PRSx power rails are all supported by both drive families.

In addition, 2094-BMxx-M AM power modules with sercos interface are supported on power rails with a 2094-BCxx-Mxx-S IAM module. Conversely, 2094-BMxx-S AM drives are supported on power rails with a 2094-BCxx-Mxx-M IAM power module with sercos interface.

IMPORTANT Kinetix 6500 EtherNet/IP control modules (catalog numbers 2094-EN02D-M01-Sx) are not compatible with IAM/AM modules on the same Bulletin 2094 power rail where sercos interface is used.

IAM/AM Module Compatibility

IAM Module	Control Module	2094-xMxx-S Kinetix 6000 AM Module	2094-BMxx-M AM Power Modules	
			2094-SE02F-M00-Sx Kinetix 6200 Control Module	2094-EN02D-M01-Sx Kinetix 6500 Control Module
2094-xCxx-Mxx-S	N/A			
2094-BCxx-Mxx-M (IAM power module)	2094-SE02F-M00-Sx Sercos interface	Fully compatible	Fully compatible	Not compatible
	2094-EN02D-M01-Sx EtherNet/IP network	Not compatible	Not compatible	Fully compatible

For more information on the Kinetix 6200 modular servo drives, catalog numbers 2094-BCxx-Mxx-M, 2094-BMxx-M, and 2094-SE02F-M00-Sx, refer to Kinetix 6200 and Kinetix 6500 Modular Servo Drives on [page 25](#).

Kinetix 6000M Integrated Drive-Motor System Compatibility

Bulletin 2094 power rails with Kinetix 6000 (series B) or Kinetix 6200 drives are compatible with Kinetix 6000M integrated drive-motor (IDM) systems. The integrated drive-motor power interface module (IPIM) mounts to the power rail and connects to as many as 16 IDM units.

IMPORTANT Kinetix 6500 EtherNet/IP control modules (catalog numbers 2094-EN02D-M01-Sx) are not compatible with Kinetix 6000M integrated drive-motor systems.

IAM Module Compatibility

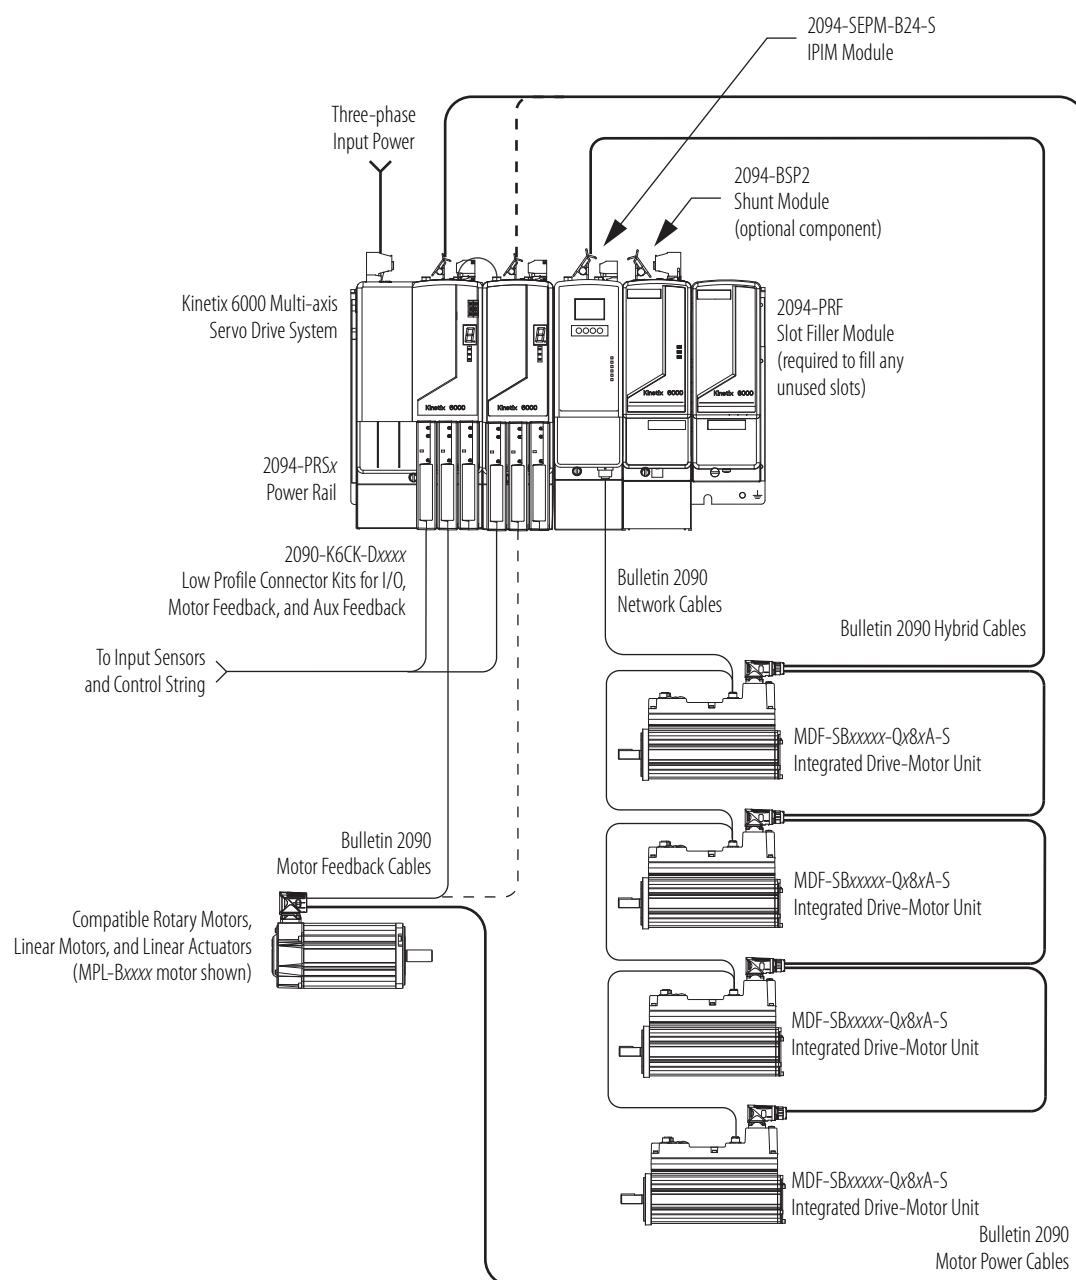

IAM Module	Control Module	2094-SEPM-B24-S IDM Power Interface Module (IPIM)
2094-BCxx-Mxx-S (series B)	N/A	
2094-BCxx-Mxx-M (IAM power module)	2094-SE02F-M00-Sx sercos interface	Fully compatible
	2094-EN02D-M01-Sx EtherNet/IP network	Not compatible

For more information on the Kinetix 6000M integrated drive-motor systems, refer to Typical Kinetix 6000M Integrated Drive-Motor Configuration on [page 49](#).

Typical Kinetix 6000M Integrated Drive-Motor Configuration

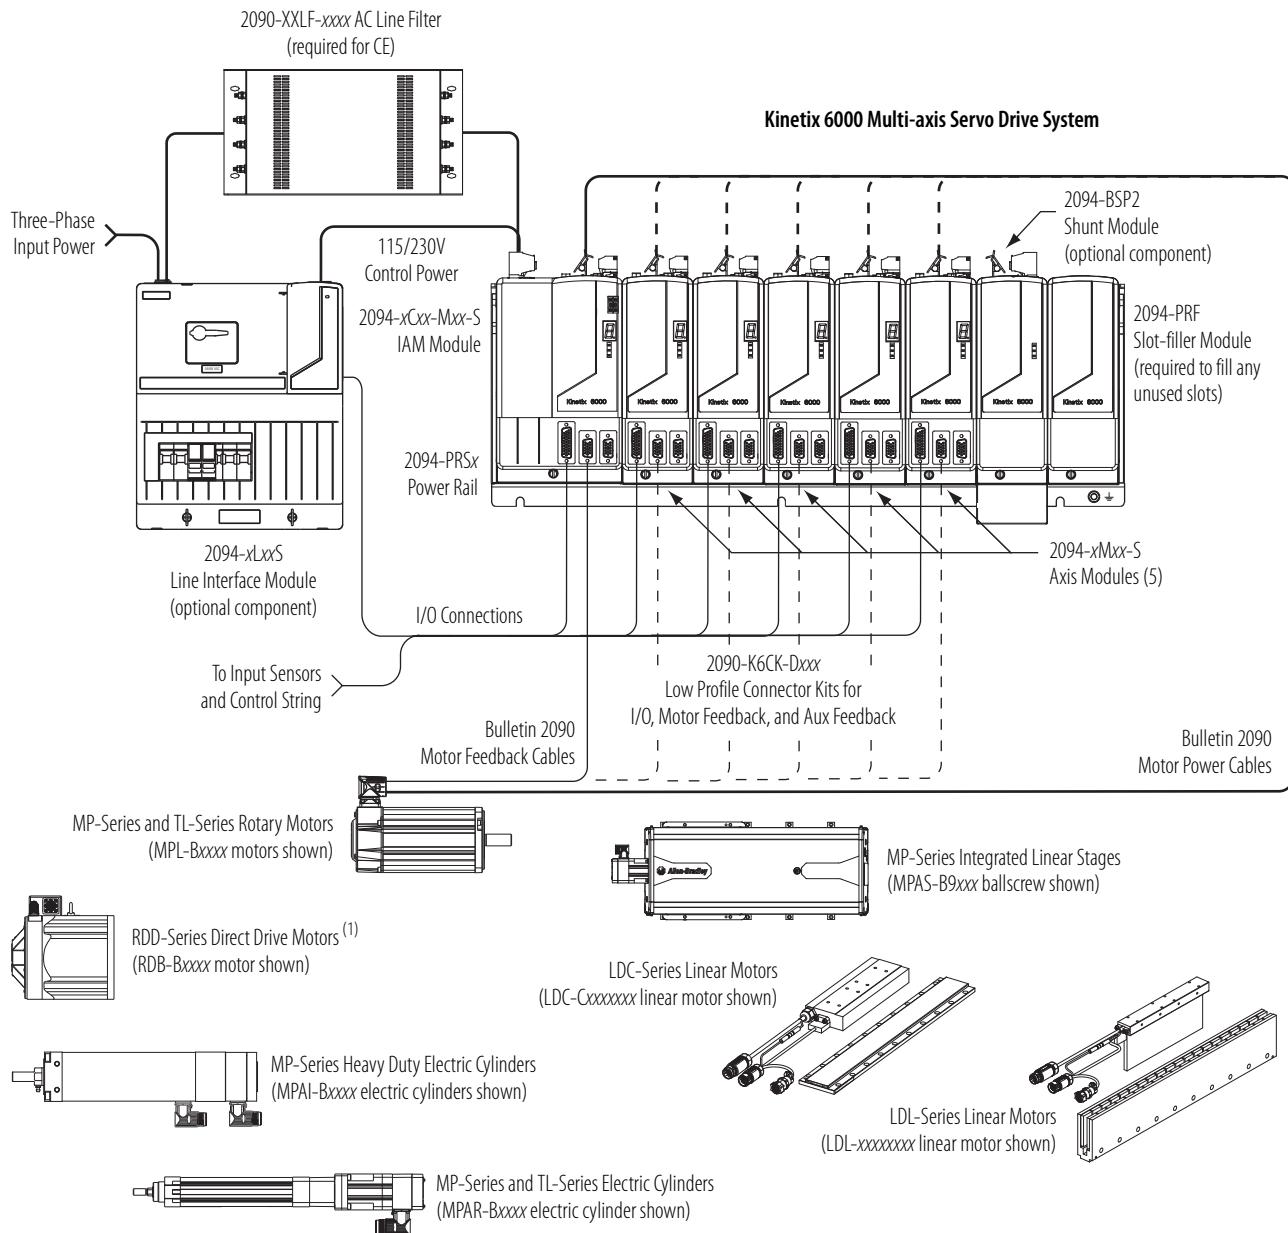

This configuration illustrates the use of Kinetix 6000 servo drives with the Kinetix 6000M integrated drive-motor (IDM) system. The IDM power interface module (IPIM) is included in the fiber-optic sercos ring configuration along with the axis modules. Refer to Typical Communication Configurations on [page 53](#) for examples.

Modular Drive System (with Kinetix 6000M IDM system)

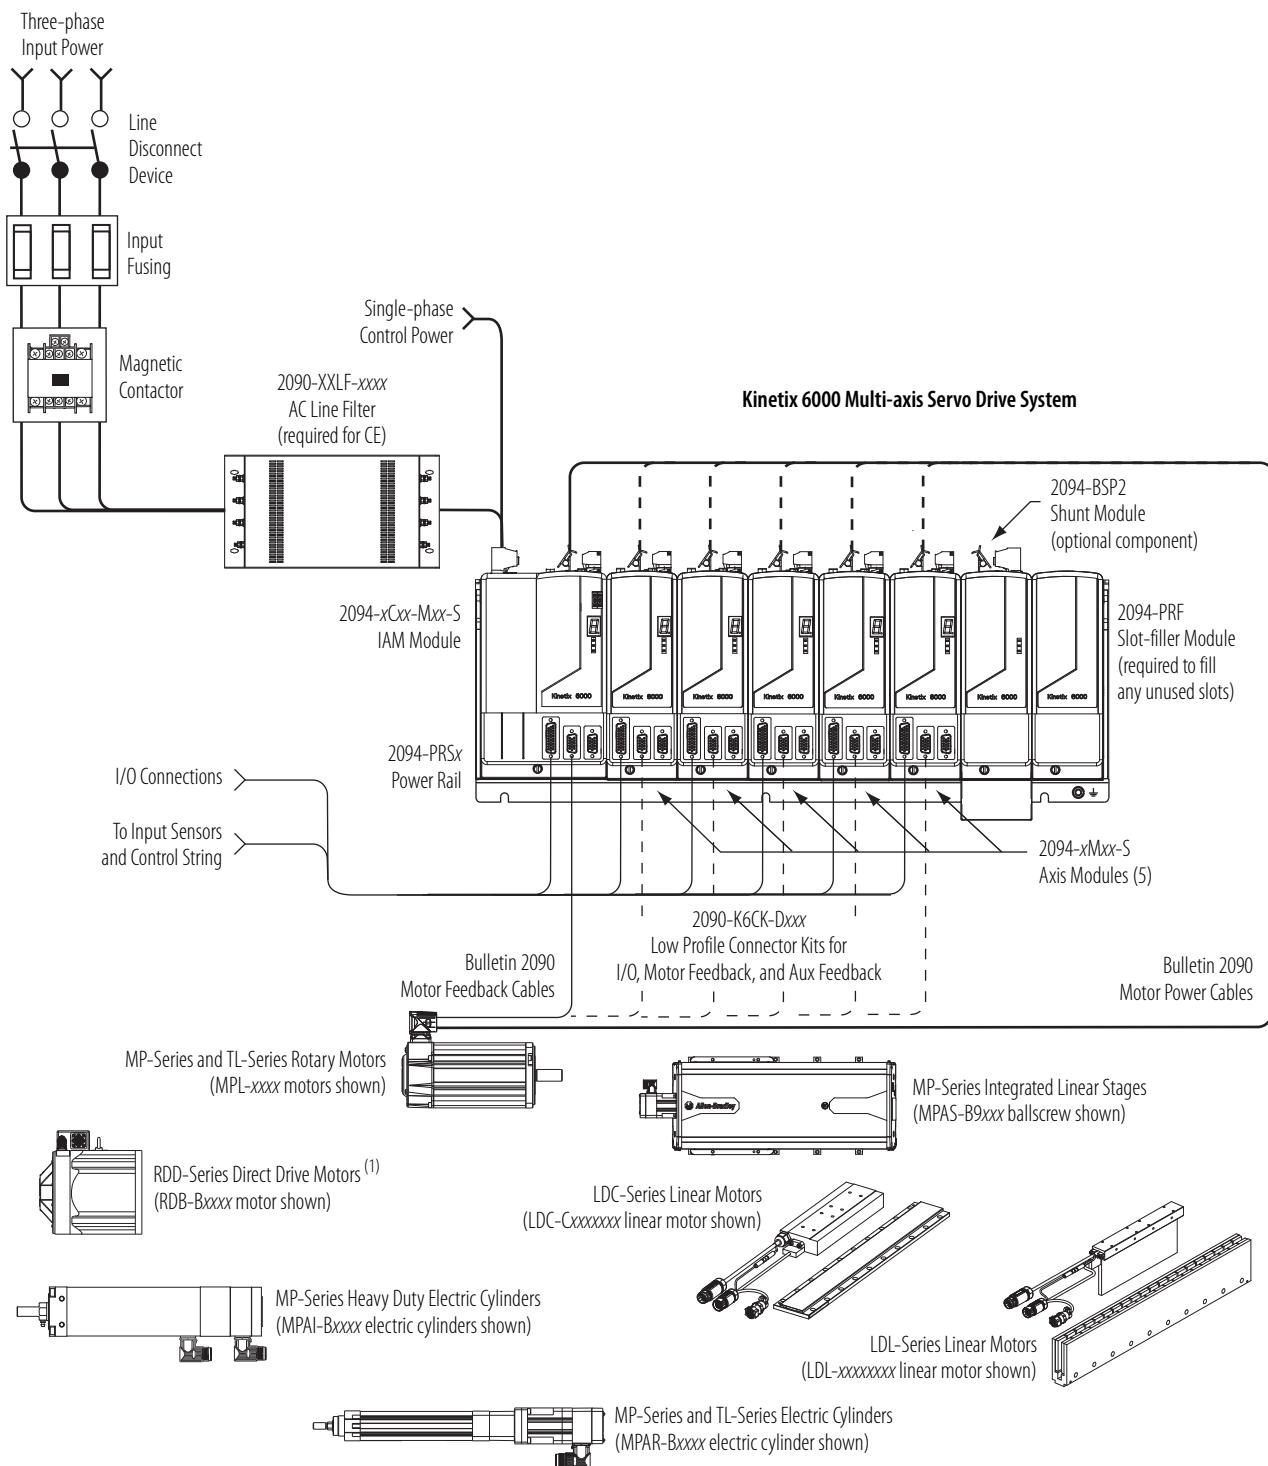

Typical Hardware Configurations

Kinetix 6000 System (with LIM module)

(1) Requires 2090-K6CK-KENDAT connector kit for motor feedback connections.

Kinetix 6000 System (without LIM module)

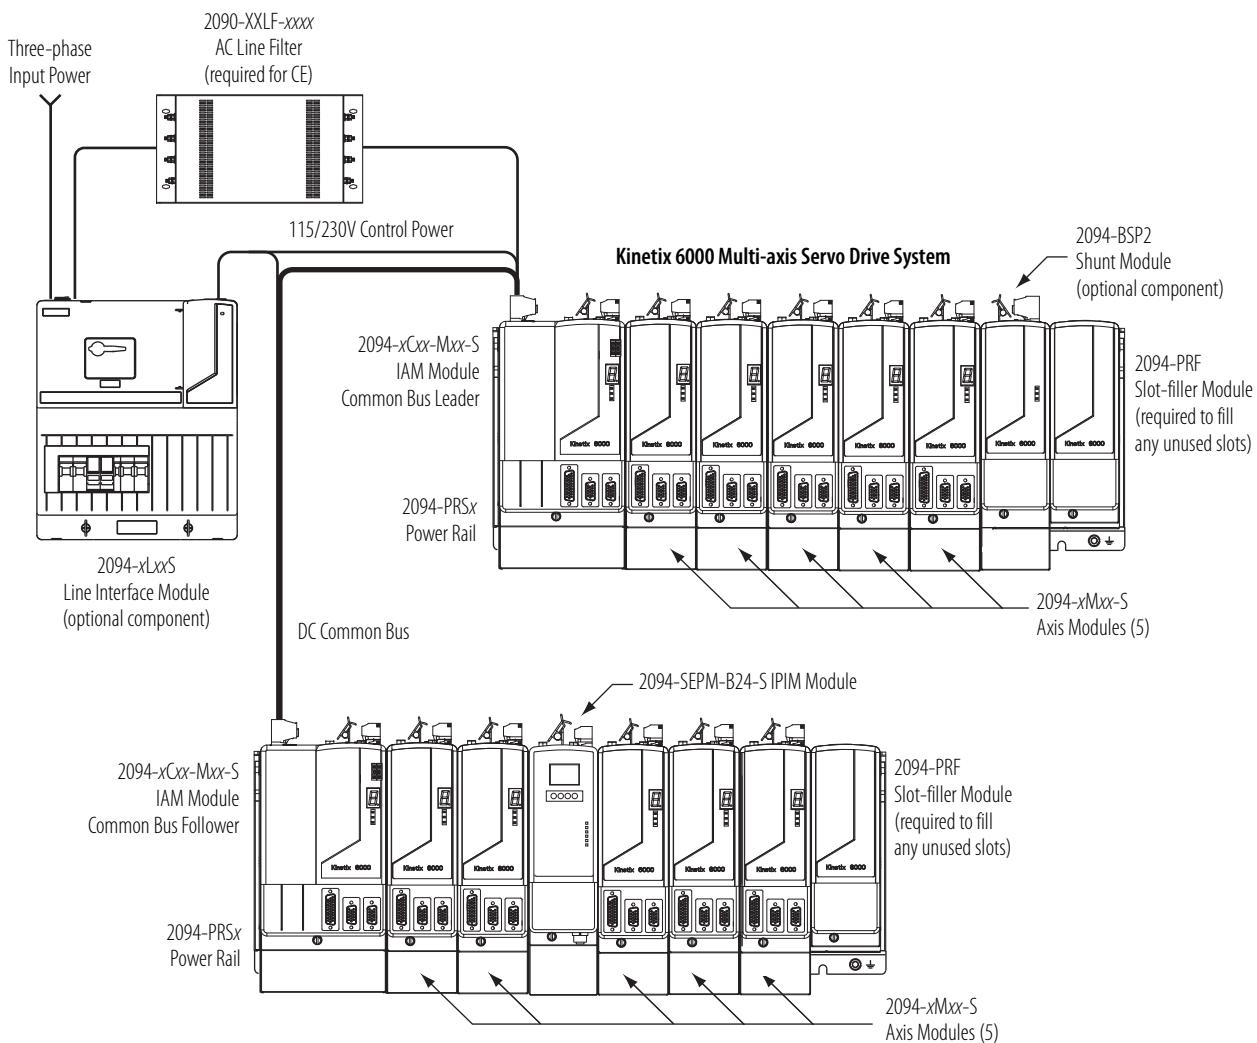

(1) Requires 2090-K6CK-KENDAT connector kit for motor feedback connections.

In this system configuration, the leader IAM module is connected to the follower IAM module via the DC common bus. When planning your panel layout, you must calculate the total bus capacitance of your DC common bus system to make sure that the leader IAM module is sized sufficiently to pre-charge the entire system. Refer to the Kinetix 6000 Servo Drive User Manual, publication [2094-UM001](#), when making this calculation.

IMPORTANT

If total bus capacitance of your system exceeds the leader IAM module pre-charge rating, the IAM module seven-segment status will display error code E90 (pre-charge timeout fault) if input power is applied.

To correct this condition, you must replace the leader IAM module with a larger module or decrease the total bus capacitance by removing axis modules.

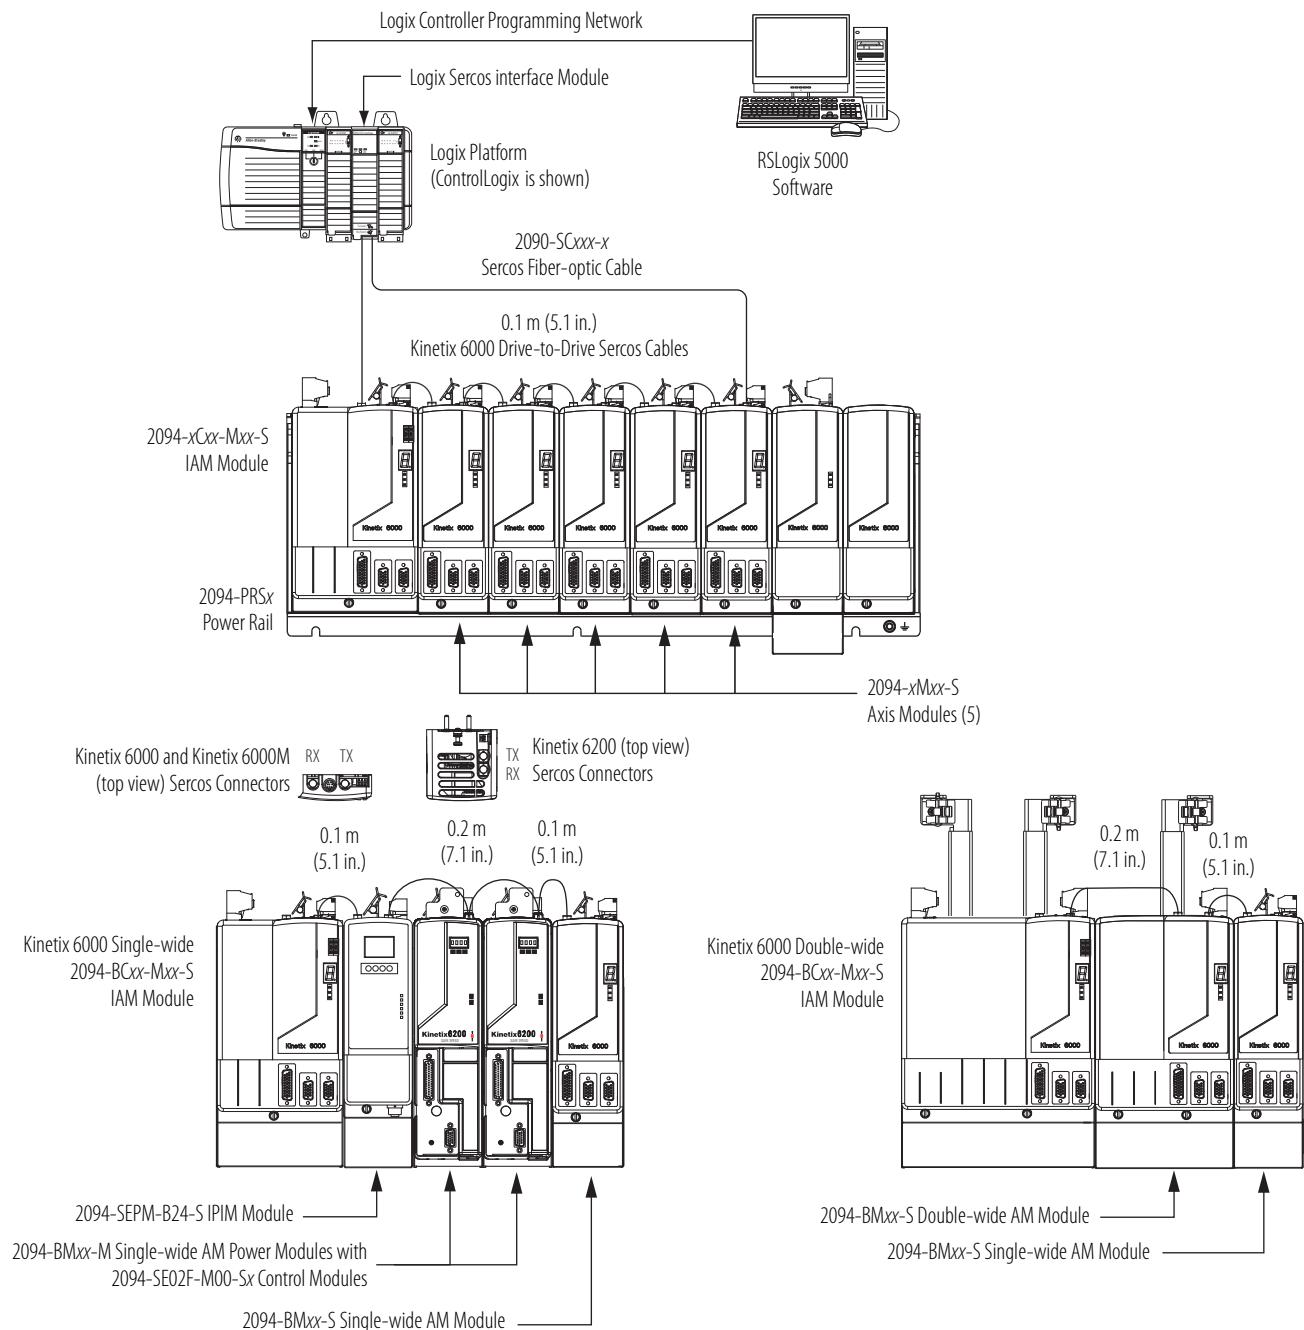

Kinetix 6000 System (DC common bus)

Motors and other details common to both three-phase AC and DC common-bus configurations are removed.

Typical Communication Configurations

In this example, drive-to-drive sercos cable lengths and catalog numbers are shown for the Kinetix 6000 drives and when Kinetix 6000 and Kinetix 6200 drive modules exist on the same power rail.

Kinetix 6000 Drive Communication (sercos)

Rotary Motion Performance Specifications

These rotary motor families are compatible with Kinetix 6000 servo drives.

Rotary Motor Family	Page
MP-Series (Bulletin MPL) low-inertia motors	54
MP-Series (Bulletin MPM) medium-inertia motors	58
MP-Series (Bulletin MPF) food-grade motors	61
Kinetix 6000M (Bulletin MDF) integrated drive-motor (food-grade) motors	62
MP-Series (Bulletin MPS) stainless-steel motors	62
MP-Series (Bulletin RDB) direct-drive motors	63
TL-Series (Bulletin TLY) low-inertia motors	64

For Kinetix 6000 drive system combinations that include cable catalog number selection and torque/speed curves, refer to the Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication [GMC-RM003](#).

IMPORTANT These system combinations do not include all possible motor/drive combinations. Please refer to Motion Analyzer software to verify compatibility. Download is available at <http://www.ab.rockwellautomation.com/motion-control/motion-analyzer-software>.

Performance specification data and curves reflect nominal system performance of a typical system with motor at 40 °C (104 °F) and drive at 50 °C (122 °F) ambient and rated line voltage. For additional information on ambient and line conditions, refer to Motion Analyzer software.

Linear Motion Performance Specifications

These linear motion families are compatible with Kinetix 6000 servo drives.

Linear Motion Family	Page
MP-Series (Bulletin MPAS) integrated linear stages	66
MP-Series (Bulletin MPAR) electric cylinders	67
MP-Series (Bulletin MPAI) heavy-duty electric cylinders	68
LDC-Series iron-core linear motors	70
LDL-Series ironless linear motors	72

For Kinetix 6000 drive system combinations that include cable catalog number selection and force/velocity curves, refer to the Kinetix 6000 and Kinetix 6200/6500 Drive Systems Design Guide, publication [GMC-RM003](#).

IMPORTANT These system combinations do not include all possible actuator/drive combinations. Please refer to Motion Analyzer software to verify compatibility. Download is available at <http://www.ab.rockwellautomation.com/motion-control/motion-analyzer-software>.

Kinetix 300 and Kinetix 350 EtherNet/IP Servo Drives

Kinetix 300
Servo Drive

The Kinetix 300 EtherNet/IP indexing drive provides a cost-effective single-axis solution for low axis-count motion control applications. The Kinetix 300 servo drive is designed to connect and operate with CompactLogix controllers supporting Integrated Architecture or MicroLogix controllers for component motion solutions. Using one standard EtherNet/IP network for an entire machine - including motion, control, I/O, and HMI simplifies wiring, reduces panel layout costs, and allows easy integration into manufacturing and enterprise systems. In addition, safe torque-off functionality helps protect personnel while increasing machine productivity.

Kinetix 350
Servo Drive

The Kinetix 350 single-axis EtherNet/IP servo drive was developed to provide scalability for your motion control system by simplifying integration of the entire control solution on one network. The Kinetix 350 servo drive is designed to connect and operate with the ControlLogix® and CompactLogix controllers supporting Integrated Motion on the EtherNet/IP network. Combined as a system, they provide a cost-effective motion solution that delivers the high performance and scalability you need to compete in today's industry. With its compact design, the Kinetix 350 requires less panel space and is easily connected. In addition, you can reduce installation and commissioning time by re-using code across integrated products throughout your entire machine portfolio.

Kinetix 300 and Kinetix 350 Servo Drive Features

- Single-axis solution for low-complexity motion applications
- Flexible control architecture for simple analog, PTO, or EtherNet/IP indexing control (Kinetix 300 drives)
- Integrated motion over EtherNet/IP networking (Kinetix 350 drives)
- Simplified integration of the entire control solution on one network, including HMI, PAC, I/O, and motion
- Memory module for Automatic Device Replacement (ADR)
- Safe Torque-off Control, ISO-13849-1 Certified, PLd, category 3
- Versatile AC input voltage range:
 - 100 and 200V-class AC, single-phase
 - 200V-class single-phase and three-phase
 - 400V-class AC, three-phase
- 2097-V31PRx (100V-class models) drive 200V-class motors at full speed
- 2097-V32PRx (200V-class models) include integrated AC (EMC) line filter
- High-resolution absolute, multi-turn and single-turn encoder feedback, auxiliary axis for Master Gearing mode

For distinguishing features for Kinetix 300 and Kinetix 350 servo drives, refer to [page 74](#).

Kinetix 300 EtherNet/IP Indexing Drive Features

- Indexing
 - Five indexing types
 - S-curve and trapezoidal moves
 - 32 index capability
- Commanded control over EtherNet/IP
 - Velocity and current
 - Absolute and incremental position with or without registration
- Electronic gearing
- Analog input control
- Step and direction control
- CompactLogix 1769-L23 or 1769-L3x Programmable Automation Controller (PAC) with RSLogix 5000 software and Add-on Profile for Integrated Architecture solution
- CompactLogix 1768-L4x or 1768-L4xS controllers with 1768-ENBT Ethernet modules
- MicroLogix 1400 Programmable Logic Controller (PLC) with built-in web server for configuration and diagnostics

Kinetix 350 Single-axis EtherNet/IP Drive Features

- EtherNet/IP network with CIP Motion technology for real-time, closed loop motion control on standard Ethernet network
- Fully compatible with linear and star configuration topology
- Achieve the benefits of Kinetix Integrated Motion with ControlLogix L6 and L7 controllers
- CompactLogix 5370 controllers that support Integrated Motion on the EtherNet/IP network and RSLogix 5000 software (version 20.00.00 or later)
- RSLogix 5000 software for programming (ladder logic, structured text, and sequential function charts)

To compare drive features across drive families, refer to Servo Drives beginning on [page 23](#).

Kinetix 300 and Kinetix 350 Servo Drive Components

Kinetix 300 and Kinetix 350 servo drive systems consist of these required components:

- One 2097-V3xxxx (Kinetix 300) drive or 2097-V3xxxx-LM (Kinetix 350) drive
- One servo motor or linear actuator
- One motor power and motor feedback cable
- One 2090-K2CK-D15M low-profile connector kit (required for flying-lead feedback cables)
- One 2097-TB1 I/O terminal expansion block
- 1585J-M8CBJM-x (shielded) Ethernet cable

Kinetix 300 and Kinetix 350 servo drive systems may also include any of these optional components:

- One 2097-Fx or 2090-XXLF-TC116 AC line filter
- One 2097-Rx shunt resistor

For detailed Kinetix 300 and 350 drive system requirements, refer to the Kinetix 300 and 350 Drive Systems Design Guide, publication [GMC-RM004](#).

Kinetix 300 and Kinetix 350 Servo Drive Selection

Kinetix 300 Drives Cat. No.	Kinetix 350 Drives Cat. No.	Input Voltage	Continuous Output Power kW	Continuous Output Current A 0-pk	Features
2097-V31PRO	2097-V31PRO-LM	120/240V AC rms, single-phase ⁽¹⁾	0.40	2.8	<ul style="list-style-type: none"> • 120V Doubler mode • Safe Torque-off
2097-V31PR2	2097-V31PR2-LM		0.80	5.7	
2097-V32PRO	2097-V32PRO-LM	240V AC rms, single-phase ⁽¹⁾	0.40	2.8	<ul style="list-style-type: none"> • Integrated AC line filter • Safe Torque-off
2097-V32PR2	2097-V32PR2-LM		0.80	5.7	
2097-V32PR4	2097-V32PR4-LM		1.70	11.3	
2097-V33PR1	2097-V33PR1-LM	120V AC rms, single-phase, 240V AC rms, single-phase ⁽¹⁾ , 240V AC rms, three-phase	0.50	2.8	Safe Torque-off
2097-V33PR3	2097-V33PR3-LM		1.00	5.7	
2097-V33PR5	2097-V33PR5-LM		2.00	11.3	
2097-V33PR6	2097-V33PR6-LM		3.00	17.0	
2097-V34PR3	2097-V34PR3-LM	480V AC rms, three-phase	1.00	2.8	
2097-V34PR5	2097-V34PR5-LM		2.00	5.7	
2097-V34PR6	2097-V34PR6-LM		3.00	8.5	

(1) Expect the same motor performance with 240V single-phase input as you can get from the 240V three-phase input (refer to the table below).

Kinetix 300 and Kinetix 350 Drive Operation with 240V Input Voltage

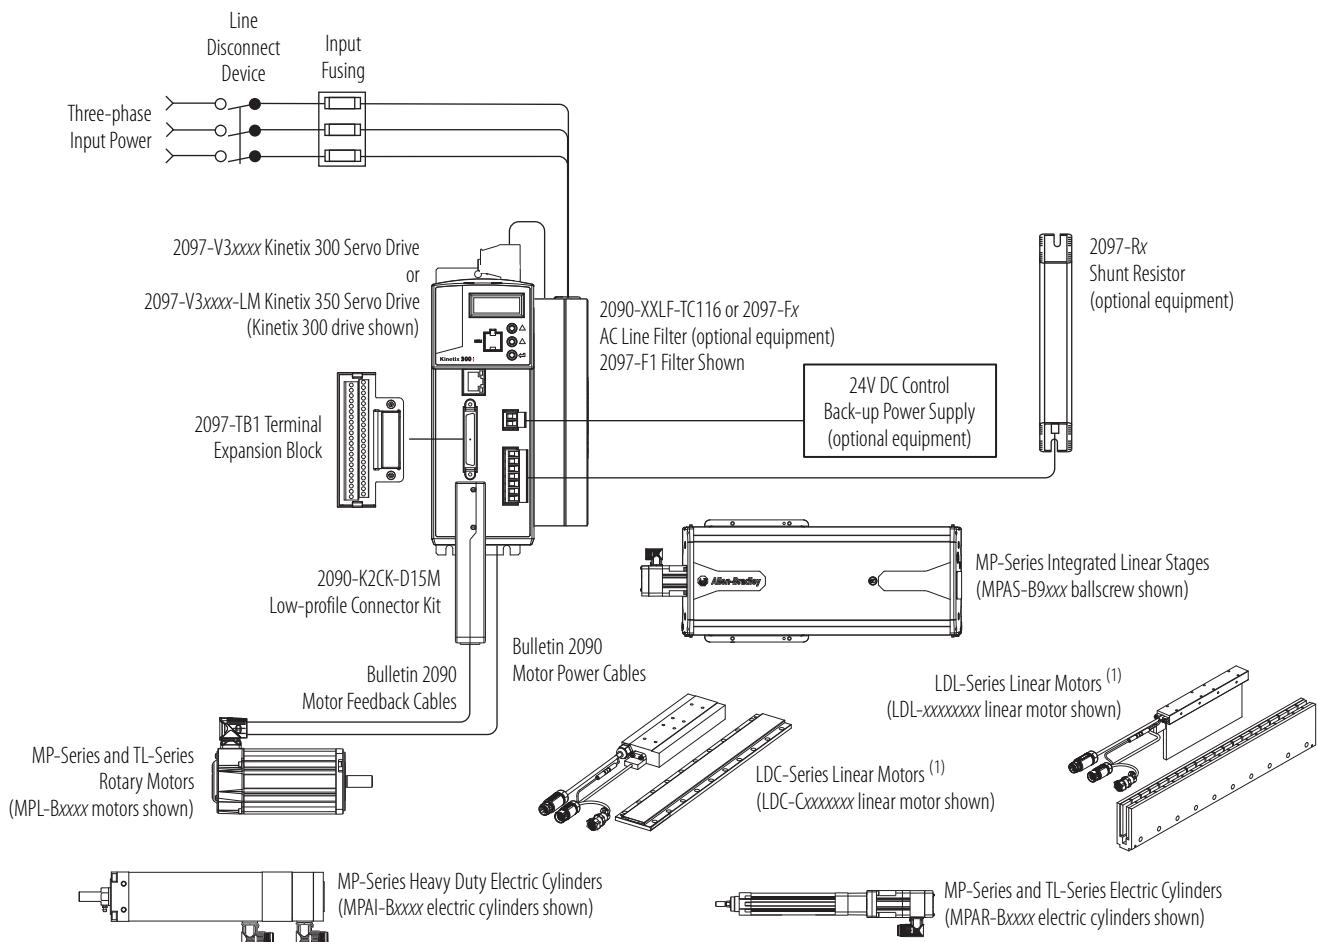

Three-phase Operation with 240V Input	Single-phase Operation with 240V Input		Continuous Output Current A 0-pk	Peak Output Current A 0-pk
2097-V33PR1-xx	2097-V32PRO-xx	2097-V31PRO-xx	2.8	8.5
2097-V33PR3-xx	2097-V32PR2-xx	2097-V31PR2-xx	5.7	17.0
2097-V33PR5-xx	2097-V32PR4-xx	N/A	11.3	33.9

For Kinetix 300 and Kinetix 350 drive module specifications not included in this publication, refer to the Kinetix Servo Drives Technical Data, publication [GMC-TD003](#).

Typical Hardware Configuration

This typical hardware configuration illustrates the use of servo drives, motors, actuators, and motion accessories available for Kinetix 300 and Kinetix 350 drive systems.

Kinetix 300/350 Drive Systems

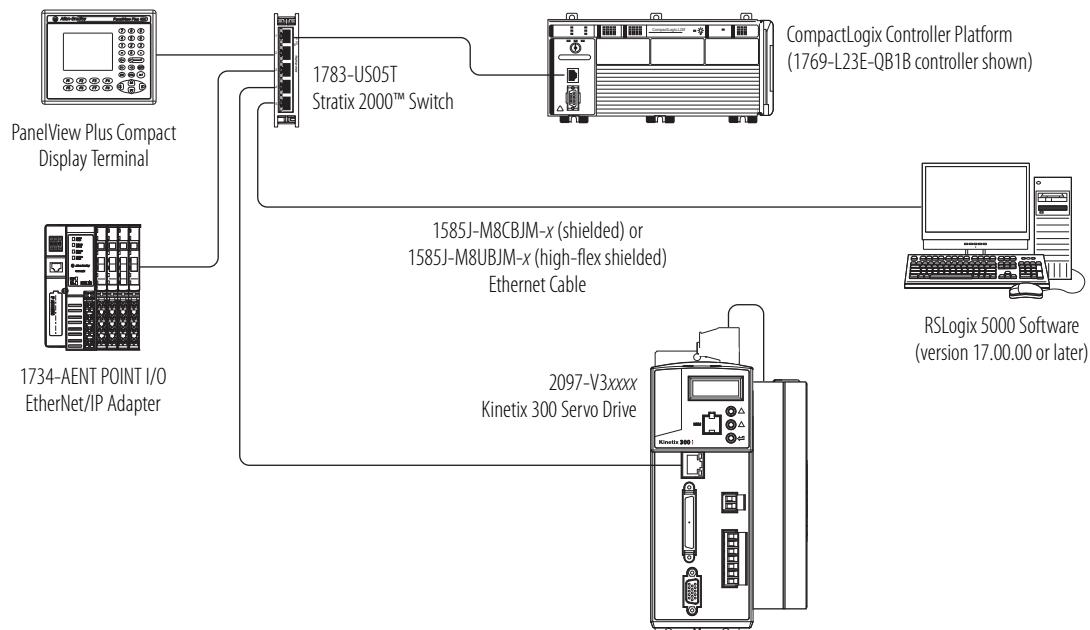

(1) LDC-Series and LDL-Series linear motors are compatible with only Kinetix 300 servo drives.

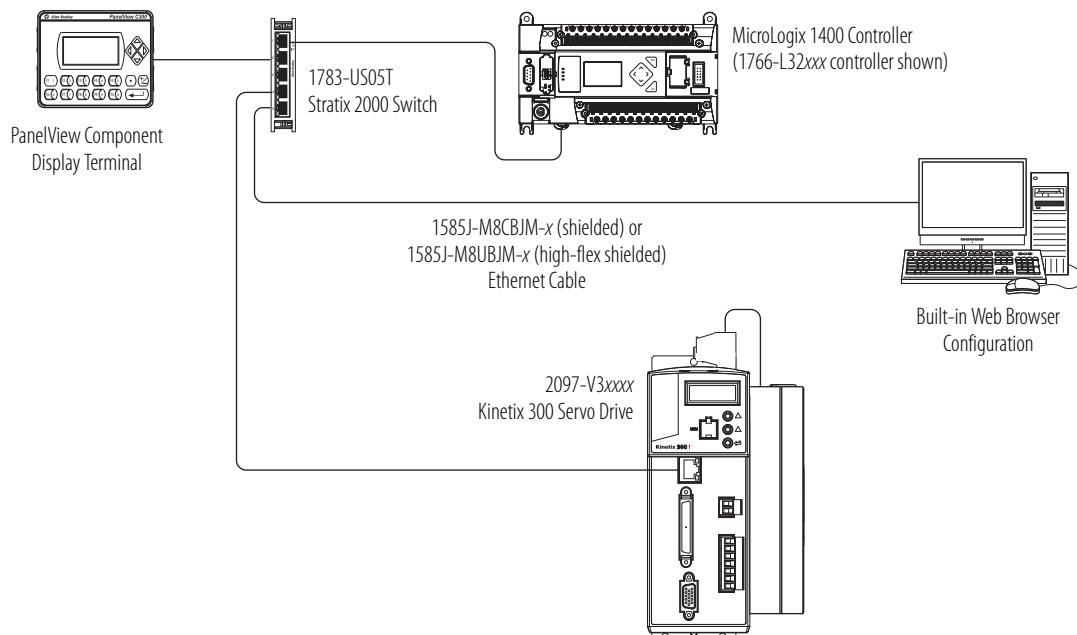

Typical Communication Configurations

The Kinetix 300 and Kinetix 350 servo drives use the EtherNet/IP network for configuring the Logix module.

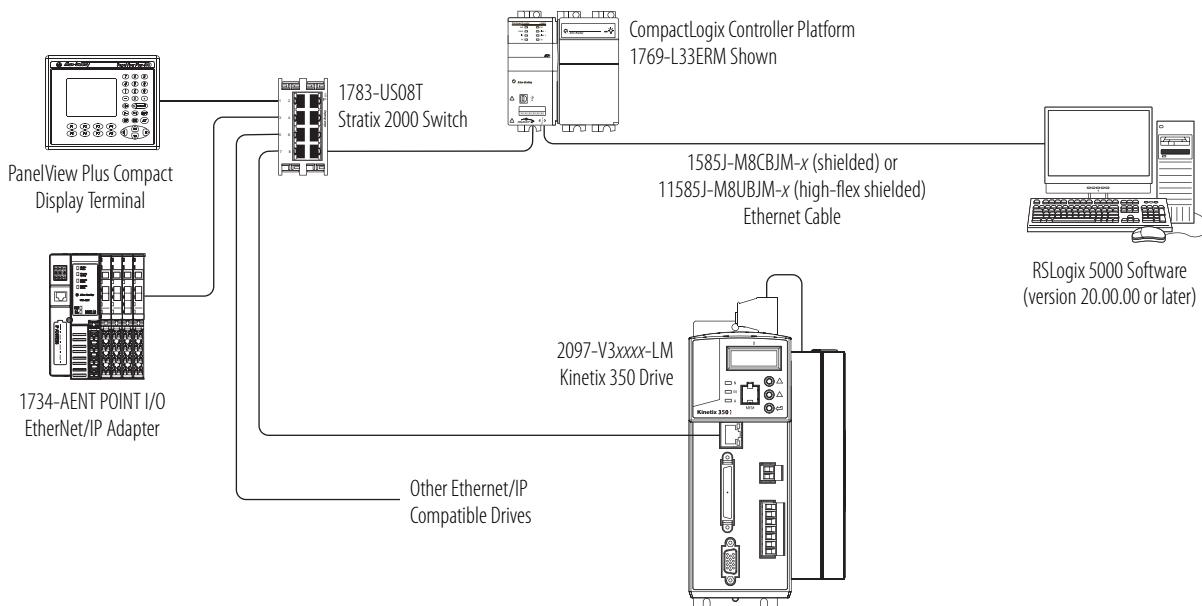

Kinetix 300 Drive System with CompactLogix (PAC) Controller

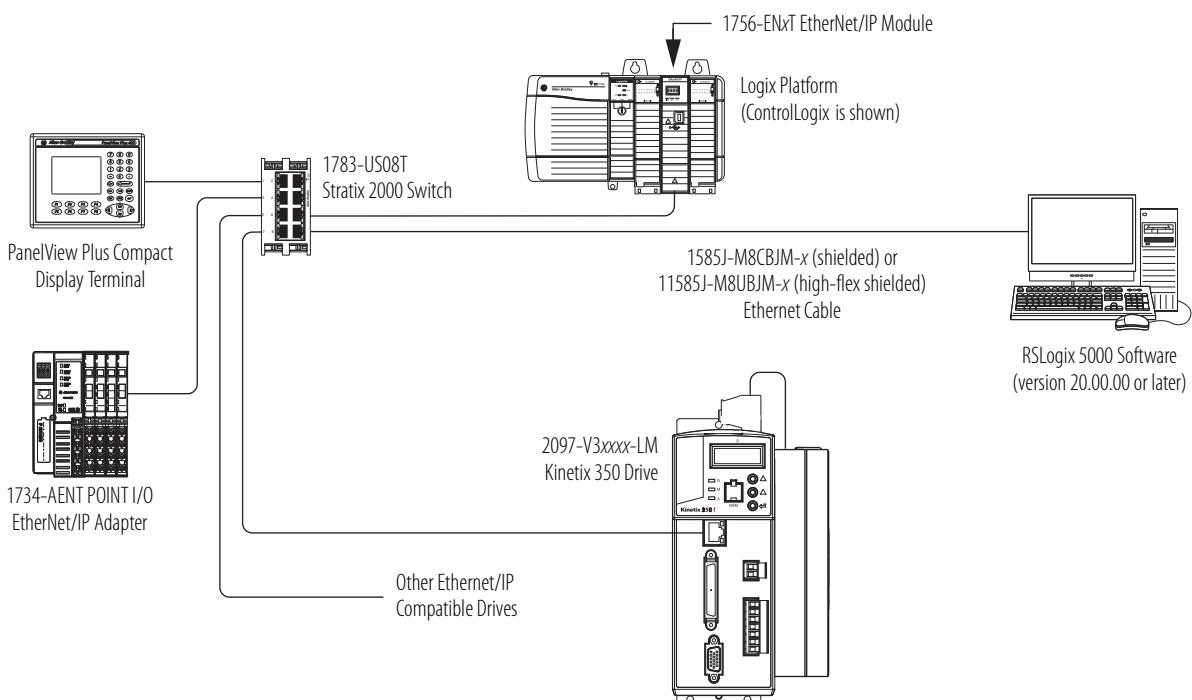

Kinetix 300 Drive System with MicroLogix (PLC) Controller

Kinetix 350 Drive System with CompactLogix (PAC) Controller

Kinetix 350 Drive System with ControlLogix (PAC) Controller

Rotary Motion Performance Specifications

These rotary motor families are compatible with Kinetix 300/350 servo drives.

Rotary Motor Family	Page
MP-Series (Bulletin MPL) low-inertia motors	79
MP-Series (Bulletin MPM) medium-inertia motors	81
MP-Series (Bulletin MPF) food-grade motors	82
MP-Series (Bulletin MPS) stainless-steel motors	81
TL-Series (Bulletin TLY) low-inertia motors	83

For Kinetix 300/350 drive system combinations that include cable catalog number selection and torque/speed curves, refer to the Kinetix 300 and Kinetix 350 Drive Systems Design Guide, publication [GMC-RM004](#).

IMPORTANT These system combinations do not include all possible motor/drive combinations. Please refer to Motion Analyzer software to verify compatibility. Download is available at <http://www.ab.rockwellautomation.com/motion-control/motion-analyzer-software>.

Linear Motion Performance Specifications

These linear motion families are compatible with Kinetix 300/350 servo drives.

Linear Motion Family	Page
MP-Series (Bulletin MPAS) integrated linear stages	85
MP-Series (Bulletin MPAR) electric cylinders	87
MP-Series (Bulletin MPAI) heavy-duty electric cylinders	88
TL-Series (Bulletin TLAR) electric cylinders	91
LDC-Series iron-core linear motors	92
LDL-Series ironless linear motors	95

For Kinetix 300/350 drive system combinations that include cable catalog number selection and force/velocity curves, refer to the Kinetix 300 and Kinetix 350 Drive Systems Design Guide, publication [GMC-RM004](#).

IMPORTANT These system combinations do not include all possible actuator/drive combinations. Please refer to Motion Analyzer software to verify compatibility. Download is available at <http://www.ab.rockwellautomation.com/motion-control/motion-analyzer-software>.

Bulletin MPAS Performance Specifications with Kinetix 300/350 Drives

IMPORTANT Kinetix 300 and Kinetix 350 drives are compatible with MPAS-Axxxx-VxxSxA (ball screw) stages. Only Kinetix 300 drives are compatible with MPAS-Axxxx-ALMx2C (direct-drive) stages.

MPAS-A9xxxK-ALMS2C		6.1	245 (55.1)	16.5	601 (135)	0.69	

(1) For 900 mm stroke length, maximum speed is 176 mm/s (6.9 in/s). For 1020 mm stroke length, maximum speed is 143 mm/s (5.6 in/s).

(2) For 780 mm stroke length, maximum speed is 889 mm/s (35.0 in/s). For 900 mm stroke length, maximum speed is 715 mm/s (28.2 in/s). For 1020 mm stroke length, maximum speed is 582 mm/s (22.9 in/s).

IMPORTANT Kinetix 300 and Kinetix 350 drives are compatible with MPAS-Bxxxxx-VxxSxA (ball screw) stages. Only Kinetix 300 drives are compatible with MPAS-Bxxxxx-ALMx2C (direct-drive) stages.

Performance specification data and curves reflect nominal system performance of a typical system with motor at 40 °C (104 °F) and drive at 40 °C (104 °F) ambient, and rated line voltage. For additional information on ambient and line conditions, refer to Motion Analyzer software.

Kinetix 3 Component Servo Drives

The Kinetix 3 component servo drive provides a cost-effective motion control solution for smaller, low-axis count applications. By providing the ability to apply the appropriate level of control for the application along with downloadable configuration software and automatic motor recognition, the Kinetix 3 servo drive delivers a motion solution that is easy to use at minimum cost. Its compact size and lower power ranges make it ideal for a variety of applications including indexing tables, medical manufacturing, laboratory automation equipment, and semiconductor processing.

Kinetix 3 Servo Drive Features

- Single-axis solution for low-complexity motion applications, with or without a PLC
- Digital I/O, analog, preset velocity, and pulse-train command interfaces
- Performs indexing on up to 64 points through serial communication or over digital I/O
- 170...264V AC, (200V-class) single-phase or three-phase
- Drive configuration via free, downloadable, Ultraware software
- Modbus-RTU control with Connected Components Building Blocks (CCBB)
- MicroLogix 1100 or 1400 Programmable Logic Controller (PLC) with RSLogix 500 software
- Micro830 Programmable Logic Controller (PLC) with Connected Components Workshop Software

Kinetix 3 Servo Drive Components

Kinetix 3 servo drive systems consist of these required components:

- One 2071-Axxxx servo drive
- One rotary motor, linear motor, or linear actuator
- One motor power and motor feedback cable
- One 2071-TBMF breakout board (required for flying-lead feedback cables)

Kinetix 3 servo drive systems may also include any of these optional components:

- One 2071-TBIO breakout board for control interface (24 pins accessible)
- One 2090-DAIO-D50xx breakout cable (50 pins accessible)
- Bulletin 2090 control and configuration serial cables
- Bulletin 2090-XXLF-TCxxx AC line filter

To compare drive features across drive families, refer to Servo Drives beginning on [page 23](#).

Kinetix 3 Servo Drive Selection

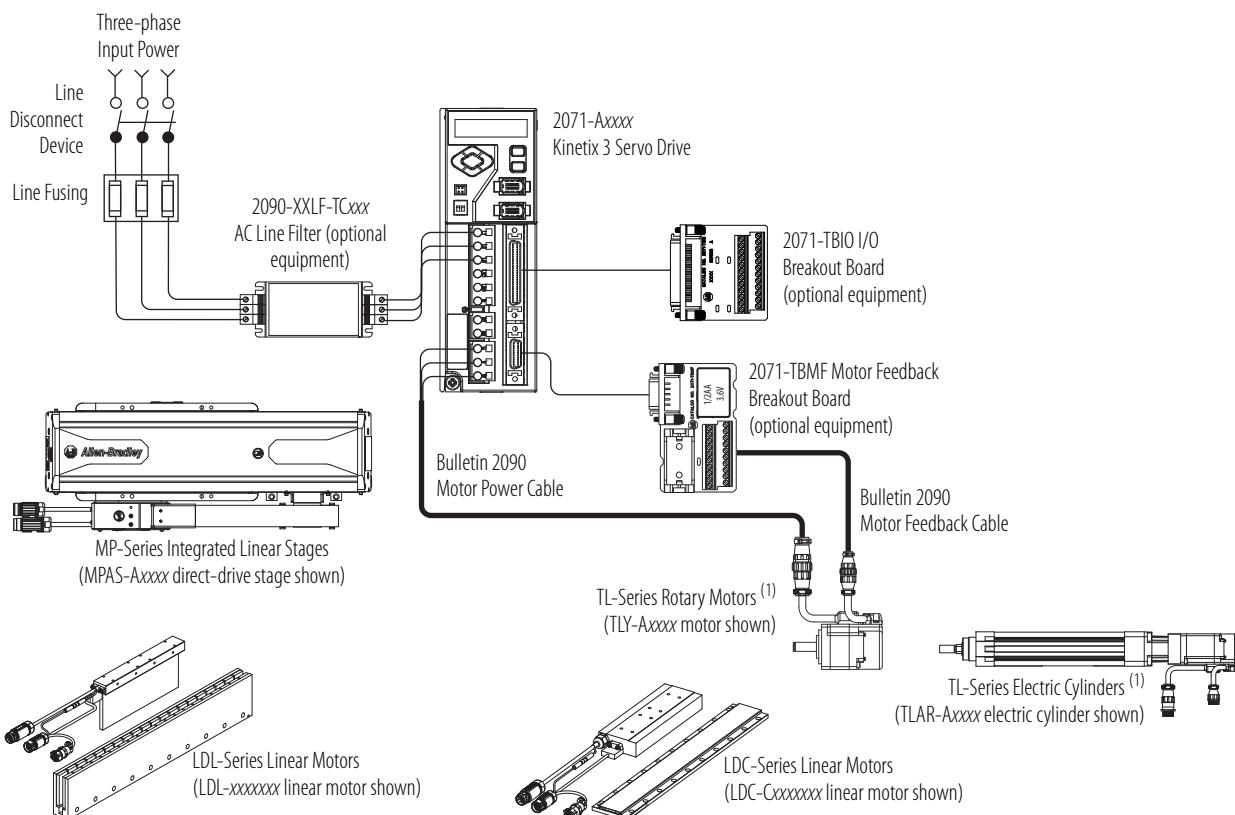

Cat. No.	Input Voltage	Continuous Output Power	Continuous Output Current A 0-pk
2071-AP0	240V AC rms, single-phase	50 W	0.85
2071-AP1		100 W	1.56
2071-AP2		200 W	2.40
2071-AP4		400 W	4.67
2071-AP8	240V AC rms, single-phase or three-phase	800 W	7.07
2071-A10	240V AC rms, three-phase	1.0 kW	9.90
2071-A15		1.5 kW	13.99

For Kinetix 3 drive module specifications not included in this publication, refer to the Kinetix Servo Drives Technical Data, publication [GMC-TD003](#).

Typical Hardware Configurations

These hardware configurations illustrate the typical use of servo drives, motors, actuators, and motion accessories available for Kinetix 3 drive systems.

Kinetix 3 Servo Drive System

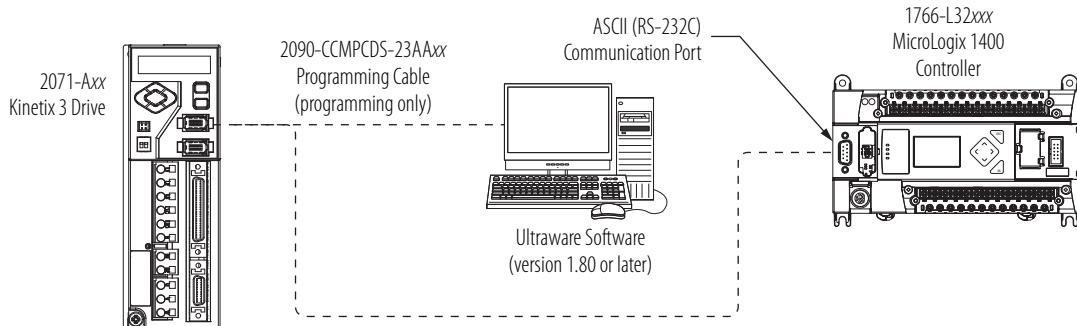

(1) TL-Series (Bulletin TL and TLY) rotary motors and Bulletin TLAR electric cylinders require the 2071-TBMF breakout board with 3.6V lithium battery (not included) to maintain absolute position reference. Other Kinetix 3 compatible motors and actuators require the breakout board for flying-lead feedback connections, but not the battery.

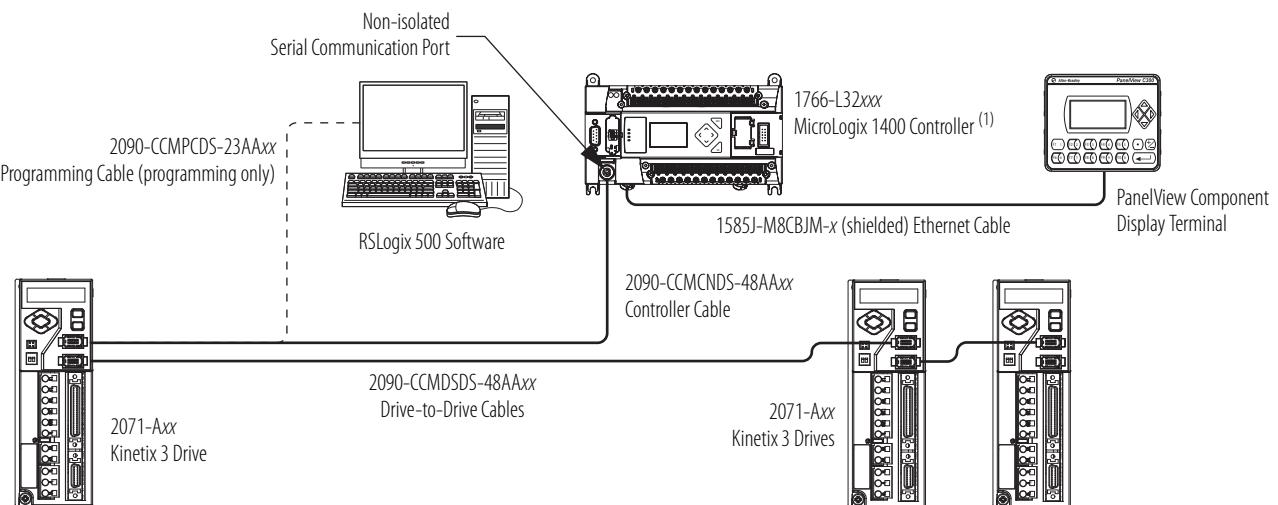

Typical Communication Configurations

Bulletin 2090 control and configuration serial cables are available for programming your drive and controller.

Kinetix 3 Configuration (ASCII control)

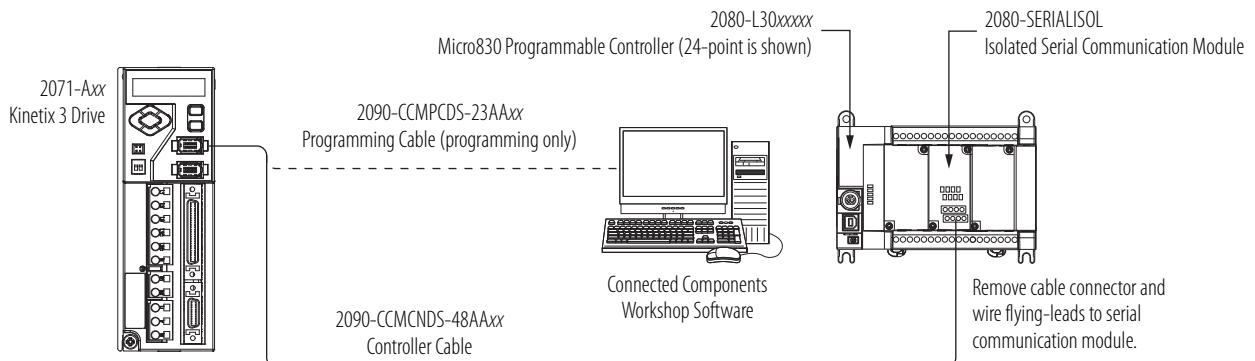

Kinetix 3 Configuration (Modbus control)

(1) Could also be MicroLogix 1100 controller (catalog number 1763-L16xxx).

Kinetix 3 Configuration (2080-SERIALISOL communication module)

Rotary Motion Performance Specifications

These rotary motor families are compatible with Kinetix 3 servo drives.

Rotary Motor Family	Page
TL-Series (Bulletin TLY) low-inertia motors	100
TL-Series (Bulletin TL) low-inertia motors	101

For Kinetix 3 drive system combinations that include cable catalog number selection and torque/speed curves, refer to the Kinetix 3 Drive Systems Design Guide, publication [GMC-RM005](#).

IMPORTANT These system combinations do not include all possible motor/drive combinations. Please refer to Motion Analyzer software to verify compatibility. Download is available at <http://www.ab.rockwellautomation.com/motion-control/motion-analyzer-software>.
