

MXP Wireless Presenter

3-in-1 control connects the audience with content

Model
177580

The ideal tool for the perfect presentation.

The MANHATTAN® MXP Wireless Presenter puts powerful presentation and mouse controls with a built-in laser pointer in the palm of the hand to easily connect with the content and audience. Its secure 2.4 GHz RF wireless connection provides easy installation and reliable connectivity for plenty of freedom from almost anywhere in the room with a range of up to 10 m (32 ft.). An onboard compartment conveniently stores the USB receiver for travel between destinations. Integrated media and slideshow buttons give presenters all-in-one control during important meetings and demonstrations. The "pre-paired" presenter and receiver include automatic preset synchronization for true Plug and Play capability without driver installations or complicated last-minute, on-site configuration. A sensitive 800 dpi mouse quickly places the cursor where and when it's needed for precise four-button operation. Its ergonomic, compact design features a simplified button layout for confident, one-touch control that's ideal for classrooms, boardrooms and other meetings.

Lifetime Warranty

Strict manufacturing standards ensure the highest quality in all MANHATTAN products. All items carry a full Lifetime Warranty — the strongest quality commitment anyone can make.

Model
177580
