3. Guidance

- **Rehearsal**
As a beginner, it's workable to lean on the wall or depend on other person's help to learn how to get balance.
- **Method one**

First, put one foot on the fore part of the flexboard and run the flexboard by pushing on the ground with the other foot. After running a while, put the other foot on the back of the FLEXboard, and then make the FLEXboard move forward following an "S" shape, swinging the waist and two thighs.
- **Method two**

Put both feet, at the same time, on the decks of the FLEXboard. Then, bend the body forward and run or slide forward by inertia. Make the board move forward following an "S" shape, swinging the waist and two thighs or stretching over the decks with left or right foot.

Please visit: www.flexboard.net for more information.
