Chapter 5: Using Internet

5.1 Connecting to Internet

This device connects to Internet via:

• Wi-Fi
• Cellular Data Networks

Wi-Fi

Turn Wi-Fi on or off

1. Tap **Application Drawer** > **Settings** > **Wireless & networks**

2. Tap to check the **Wi-Fi** function and turn Wi-Fi on or off.

Connect to a Wi-Fi network

1. Turn Wi-Fi on.

2. Tap **Wi-Fi settings**. The device scans for Wi-Fi signals.

3. Detected networks are displayed below. Tap a network connection then tap **Connect**

4. If you select an unsecured network, the connection is automatically established.
5. Otherwise, proceed to the next step.

6. When connecting to a secured network, you will be prompted for the password.
   Enter the password, then tap **Connect**.

   When Wi-Fi is connected, the 📶 connection icon is displayed on the status bar.

Add Wi-Fi network

1. Tap **Application Drawer** > **Settings** > **Wireless & networks**

2. Tap **Wi-Fi settings**.

3. In Wi-Fi networks, tap **Add Wi-Fi network** A new window is displayed.

4. Follow the on-screen instructions and enter the necessary information, then tap **Save** to save the settings.
Configure Wi-Fi settings

1. Tap **Application Drawer** > **Settings** > **Wireless & networks**

2. Tap **Wi-Fi settings** > **Menu** > **Advanced**.
   NOTE: If you use static IP, enter the IP settings as required.

3. Tap **Use static IP**

4. In IP settings, enter the IP address, gateway, netmask, and DNS. Tap **OK** to save your settings.
Cellular Data Network

Check the availability of these connections with your network service provider and obtain the following information:

- Access Point Names
- Proxy
- Port
- User name
- Password
- MMSC, MMS proxy, MMS port (for MMS only)

Set up wireless data connection

1. Tap **Application Drawer** > **Settings** > **Wireless & networks**

2. Tap **Mobile networks** > **Access Point Names**.

3. Tap **Menu** > **New APN**.

4. Tap **Name** to enter a name for the connection, then tap **OK**

5. Enter the **APN**, then tap **OK**

6. Enter the **Proxy**, **Port, Username**, and **Password** (if applicable) etc., then tap **OK**

7. Tap **menu** then tap **Save** to store your settings or tap **Discard** to exit without saving the changes.

Starting a Data Connection

Data connection is automatically activated when the device is turned on.

Manually start a data connection

1. Tap **Application Drawer** > **Settings**.

2. Tap **Wireless & networks** > **Mobile networks** > **Access Point Names**.

3. A list of connections will be displayed. Tap the connection you want to use.
Chapter 6: Using Bluetooth

Bluetooth modes

- **On:** Bluetooth is turned on. This device detects other Bluetooth devices, but this device is not visible to others.
- **Discoverable:** Bluetooth is turned on and this device is visible to other Bluetooth devices.
- **Off:** Bluetooth is turned off.

To turn Bluetooth on or off

1. Tap **Application Drawer** > **Settings** > **Wireless & networks**
2. Tap to check **Bluetooth** and activate.
3. To make your device visible to others, tap **Bluetooth settings** and check **Discoverable** to make this phone visible to other devices.

6.1   Connecting to Bluetooth Devices

A connection to a Bluetooth device is called a partnership. You need to pair and create a partnership with a Bluetooth device to exchange information.

1. Tap **Application Drawer** > **Settings** > **Wireless & networks** .
2. Tap **Bluetooth settings** to view the menu options.
3. To search for a new device, tap **Scan for devices** .
4. Tap the device to connect.
5. Enter the **PIN** to start pairing, then tap **OK**.

   NOTE: PIN of the device must be the same PIN on the other Bluetooth pairing device.

6. If you connect with an audio device which only supports HSP/HFP, "**Connected to phone audio** " will be displayed on the screen.
7. If you connect with audio device which supports HSP/HFP/A2DP, "**Connected to phone and media audio** " will be displayed on the screen.

   NOTE: Tap and hold the selected device to enter device options menu.

   NOTE: Once a partnership has been created, connecting to that device again will no longer require entering the password

Chapter 7: Multimedia Applications

7.1   Videos and Photos

This device is equipped with a 3.0 megapixels camera to take videos and photos.

Recording Video

Displays the last recorded video.

Slide to switch between video and camera mode.

Indicates recording time.

00:05

Tap to stop recording
