## Important Cautions

### Turn On / Auto Power Off

To power on the player, make sure it has enough power, press the Power On/Off button for over 3 seconds. Click it again to start play. When there is no button operation for about 3 minutes while the player is stopped, it is automatically turned of. To power off the player, press and hold the Power On/OFF button until it finishes with shutting down procedure.

### Reset Mini Player

When it is dead caused by improper operation, you have to reset your mini player. Disconnect it to a USB cable or AC Adapter, press and hold on the Enter key for over 12 seconds to reboot.

### Update Music Library

After finish copying the music, using Main Menu-Music-Update Music Library on the player before your listening music so that you can organize and assort them by artist, album or genre. Otherwise, you can only browse the new copied songs from All Songs on the player.

### Initialize OS to the Original Factory Settings

When it is not able to turn on and disable connecting the player to your PC after resets, please click and hold the Next key (▶) and Power On/OFF button for about 8 seconds to initialize the OS to the original factory settings. All data will be deleted in the player.

## Package Contents

Mini Player Main Body

Quick start

Earphones

USB Cable

Installation CD

Note: Design and specifications are subject to change without notice.

## Parts and Names

### 1. Top

HOLD

### 2. Front Side

### 3. Right Side

## Protection Film on the Player

### ■ Protection Film on the Front Panel

The surface of player is easy to be contacted with other objects during use. To protect the player from scratches, the front and rear plate surfaces of the player are attached the transparent protection films. The films are featuring high light transmittance, anti-reflection and abrasion-resistance. Please keep the film on the front panel of the player.

The surfaces of the player are attached with the protection films before leaving factory.

Please do not peel off the Mask!

## Touch Keypad

### ■ Touch Keypad

Touch keypad is an important part of the player, including sliding touch control and key operations, which used for controlling operations of all kinds of functions of the player.

#### Sliding touch keypad:

Touch keypad

Lay your finger on one end of keypad

Sliding lightly on keypad

#### Clicking Key:

Key positions

Lay your finger on key positions of keypad

Press lightly

1. While HOLD is locked, any operation will be invalid.
2. Too fast operation will be easy to cause error.
3. Slide your finger on the touch keypad up and down to reach the desired operation.
4. Click Enter key or the center keypad to enter the sub menu interface or execute an operation.
5. Clicking Menu key to go back to the previous menu interface or cancel an operation.
6. Click Next key to enter the sub menu interface.

## LCD Display

### 1. Play Music

In the playback mode, the playback progress bar shows the elapsed and remaining time of current song. Slide your finger on touch keypad up and down to adjust the volume. Click Enter key, the sliding bar will display a diamond object in the bar. It shows the current playback position. Slide your finger on touch keypad up and down to move playback position forward or backward. Click Enter key again, it shows the song's detailed information. Click the key once again, it displays dynamic frequency spectrum (it does not support for FLAC/WMA lossless/APE file). Click Enter, return to normal playback mode.

## LCD Display

### 2. Video Playback

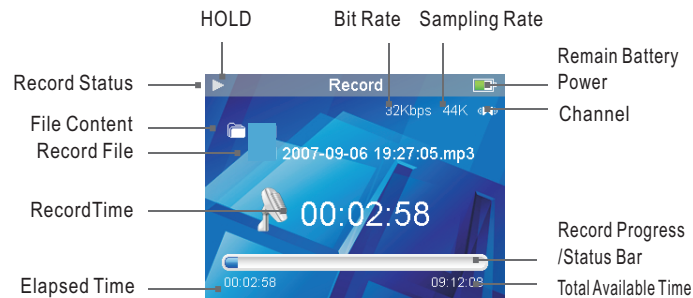

### 3. Photo View

## LCD Display

### 5. MIC Record

## Connecting Mini Player

### ■ Connecting Mini Player

#### Connecting to a Computer

Connect the small end to player, large end to PC.

#### 1. During Power Off

Connect it to the computer using the USB cable supplied in the package during the player powered off. It will be charged using the power supply from the PC.

Connecting to a computer during it power off, it will charge its built-in battery and appears as the left figure.

## Connecting MiniPlayer

### 2. During Power On

Connect it to the computer using the USB cable supplied in the package during the player powered on. It will charge its built-in battery and appears as the figure.

In the normal Windows environment, as soon as the cable or simple USB jack is connected, the message "Searching for new device" appears and USB driver is installed automatically. For Windows 98SE, put the included CD-ROM in your disk drive, then follow the instructions on your PC screen to install the USB drive.

Note: While connecting to PC, tracks and operations cannot be applied. Pulling out the PC connection cable from the player before your listening to music / viewing a picture and so on.

### ■ Charging the Battery

- \* Charging the Battery before using your player.
- \* While the player is connected to the computer via USB cable, it will charge its built-in battery. The battery is fully charged in about 3 hours.
- \* Check if the player is connected to a high-power USB2.0 port. Some low-power USB ports available in keyboards and other USB hubs may not provide enough power to charge or sync the player.
- \* If the computer is in sleep mode, the player may not be charged.

The Remaining Battery Charge icon indicates the remaining time the battery can be used. The more the battery is used, the fewer the number of segments in the icon.

## Using for the First Time

### ■ Using for the First Time

#### Handling

If you grab the player as picture, it is easier to handle them.

#### The procedures of using for the first time

1. Insert the installation CD in your computer and install applicable softwares.  
(Detail see to 21 Install CD.)
2. Click and turn on your player.
3. Connect the player to the computer using the USB cable supplied.
4. Open up the [Removable Disk](which represents the memory of this player) on My Computer.
5. Transfer the desired files from PC into your player under their specified directories.  
You can also create folder for your need, such as Ebook.
6. Safely disconnect the USB cable to the player.  
(All keys of the player can not be operated during connecting to PC.)
7. Plug the earphone to the player.
8. You can now use the player to play music, video, view your favorite photographs and a lot of other features.

## Installation CD

### ■ System Requirement

Pentium 133MHz or Higher  
32MB Main Memory or Higher  
40MB Hard Disk Space or More  
CD-ROM Drive  
USB Port (2.0)  
Windows 98SE/ ME / 2000 / XP

### ■ Install Software

Insert the installation CD into the CD-ROM drive. The following screen appears after inserting the CD.

The installation CD contains the following contents:

- Device Driver for Windows98
- Video Converter for MEIZU MiniPlayer
- Video Converting Tools

(Note: Window 98 driver is only required for OS with win 98 or lower version.

If you are using Win2000 or above, you will not need to install driver. The PC will automatically recognise the player when it is connected. The video convert tool installation is required for video conversion. When installation is automatically not started, execute the setup.exe in the installation CD, and then the Manager program is automatically setup.

## Downloading from the PC

### ■ Music files can be transferred to the player using the following steps, set MSC as USB mode.

Access from a CD or download music, video or picture files from internet and transfer to your PC hard disk, then transfer them to your player's Removable Disk. Take example for copying songs as below,

- 1 Select the desired music to download to the player from the computer.

- 2 Click the [Edit] - [Copy] Menu.

- 3 Double click [My Computer], then [Removable Disk] again.

The player is shown as the Removable Disk on your PC.

Note: you can also drag and drop the selected files from your PC into the [Removable Disk] window.

## Downloading from the PC

- 4 It appears on your PC as shown in the figure as follows (while finish formatting).

- 5 Select [Edit] - [Paste].

- 6 After finishing copying, it appears the music files on the Removable Disk. Disconnect the player to your PC, then you can start listening to the music.

When copy files, you should save the video and photo files to specified directories of the player, video files into Video directory, photo files into Pictures directory. Otherwise, they won't be identified by Mini Player.

## Saving Files & Disconnecting to Your PC

### ■ Saving Files and Disconnecting to your PC Copy the Files in the Player into your PC

1. With the USB cable, connect the USB ports of the player and your PC.  
(It should not use a USB hub. It is assumed that you connect to the USB port on the main board.)
2. Save the music files under the hard disk on your PC.
3. After saved the files, click the icon  on the screen of your PC.

4. It pops the message as above, then click it.

5. It runs 'Safely Remove Hardware'.
6. Then draw out and disconnect the USB cable.

To make sure to save the data on your player safely and fully, please follow the above steps accordingly when you disconnect the player to the PC. While disconnecting, it appears the warning, click OK and finish it.

## Using Buttons

### 1. Power On

Click the Power ON/OFF button, the power comes on and MEIZU logo appears.

## Converting Video Files

### ■ Converting Video Files

The player supports .avi format.

However, as the resolution and code vary, some .avi will not be properly displayed on the player. Therefore it is strongly recommended that user convert every video files before saving to the player.

Install the converter tool enclosed in the CD disk.

Use the program to convert your .avi and other formats of video files.

After the conversion, you can save the file into the video directory in your player disk.

#### 1. Installing Video Converter

- 1 Insert the Installation CD in the CD-ROM driver. Click [Video Converter Software] to start the installation on the displayed window.

- 2 The Installation program starts automatically. When it finishes, click Finish and exit.

It will take you some time to finish the installation. It may pop up the warning window of installing related plugin, it possibly indicates file is existing depending on the status of the Windows. Then select "Retry" or "Ignore" to continue installation.

## Converting Video Files

### 2. Using Video Converter

When the installation finishes, Start -> Programs -> Video Converter -> Video Converter is registered.

- 1 Click [Start]--[Programs]--[Video Converter]--[Video Converter].

- 2 When the program starts, click Input [Add] button and choose the file to convert.

- 3 Select the converting video file from the pop-up window, click [Open].

- 4 It appears the file name and informations on the File List.

## Converting Video Files

- 5** Click Output [Browse] and specify the path and file name.

- 6** It appears a Pop-up window, click OK and save it.

- 7** Click [Setting] and specify the preferences.

- 8** After click it, it appears the settings. Then click [OK] button and apply it.

The caption file is the format of .srt as suffix. You may ignore Step 6 to Step 9 during your converting files without caption.

## Converting Video Files

- 9** Click [Styles], you can set the styles, click [OK] and apply it.

- 10** It will take you some time to convert the file. During this process, only the [Stop] button is valid for you.

- 11** After finishing converting, click the [Close] button and finish it.

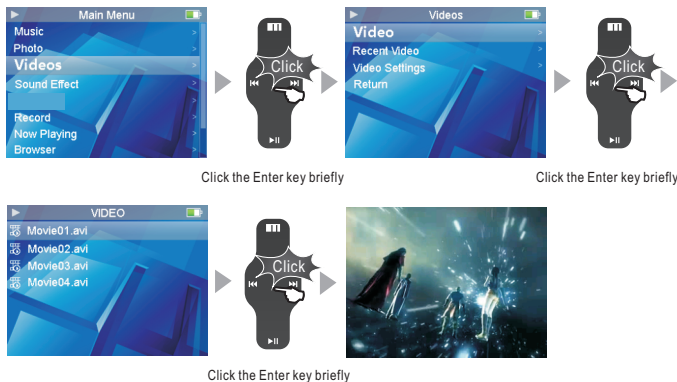

Note:

1. The converted size is 320\*240, the converting time is depended on the size of the original file. The quality is related to your setting values.
2. The BitRate of Video is 200~500, Frame is 15~20.
3. The subtitle file and video file should be saved under the same content. I.e. If a video file named Video.avi, then the subtitle should be Video.srt.
4. They can be converted that the files are in .srt, .smi, .sub, .ssa formats without subtitles.

## Play Video

### ■ Play Video

1. Function up and down to select the video to play.
2. Click the Enter key to start playback.
3. During playback, click the Menu key to increase the volume, click the Enter key to decrease the volume.
4. Click the Power ON/OFF button to pause the playback.

## Detailed Features by Menu

### ■ Settings

#### 1. About

This is feature to display the information:

##### Memory

- Information on the flash memory in the Player is displayed.
- You can check usage and remaining memory size.
- Some of the flash memory in the Player is used for system area. Therefore, when we exclude the system area essential for normal operation of the Player, the actual capacity of the flash memory is somewhat reduced.
- For example, with a 256MB product, about 243MB of memory capacity is normal.

### MTP Mode

Media Transfer Protocol (MTP) is a protocol designed for portable media devices and it has been developed by Microsoft based on Windows Media Player 10 (WMP10). It facilitates communication between devices that support WMP 10. With this protocol, it accesses the complete connecting for your Mini Player to Windows XP. Also, you may manage and transfer all datas through WMP 10.

### Use Windows Media Player 10 to manage media datas

Search Frame  
Library  
Playing List  
Detail Information  
Content  
Sync

Windows Media Player 10 Interface

## Detailed Features by Menu

Use WMP to play songs, it will add the songs to Library automatically.

You may also drag the media files on your PC to Library. It will automatically classify the songs according to the Artists, Albums after adding.

1. Add to Library: Click 'Add to Library' on the bottom left corner of the windows, you also can click the file to add it. 2. Classify files (Detail see to instruction of Media Player.)

a. On the Content section, click the desired folder.

b. On the Detail Information section, click the options (Title, Artist, Album, Rating, Genre or Leighth, etc.), It will be sorted ascendingly and in alphabetically.

c. Click the options again, it will be sorted descendingly.

### •Transfer songs to Mini Player with WMP 10

Set MTP to USB mode, connect Mini Player to your PC. It appears "MTP Media Player" on the Taskbar, select 'Using Windows Media Player' on the pop-up window. Then select 'Automatic' and follow the steps to start Sync. It appears 'Synchronization is complete' after finishing it.

Note: There are two methods for you to transfer songs to Miniplayer: Automatic and Manual. During MTP mode, you also can transfer the songs and files directly. Click My Computer, then double click Mini Player, you will find Data and Media folders. Put the desired songs to Media folder, and other files to Data. ( Pictures should be put to the folder Data - PICTURES, Video files to Data-VIDEO)

### 10. Reset All Settings

- Initialize all the settings to the original factory settings.
- Select Reset All Settings and click the Enter key, it pops up the window.
- Slide and select 'Yes' or 'Cancel', when you select 'Yes', all the settings will be initialized to the original factory ones.

## Upgrading Product Firmware

The latest software

Update

### ■ Guide to Firmware Upgrade

#### What is Firmware of the Player?

Firmware of the player is a program embedded in the hardware, which activates various features. By upgrading, you can enhance the features and eliminate the bugs.

Notice for Legal Limitations and Responsibilities Regarding Firmware

- 1/ The performance and menu of Player may change without prior notice through upgrading firmware of regular or beta versions supported by the manufacturer.
- 2/ We recommend that users should personally back up important files and data saved in the player to their PC before upgrading firmware.
- 3/ All upgrades are intended for overall enhancement of performance. The upgrades will be provided when available based on our company's judgment.
- 4/ Some beta versions of the firmware may have minor bugs that will be corrected in the official versions of the firmware. This should be noted by the users before an action.

#### Conditions for Upgrading Firmware

- 1/ Upgrading the firmware requires the basic environment where the UMS feature of the Windows OS works properly.
- 2/ You can check the player in 'My Computer' on Windows 98/ME/XP/2000/2003.
- 3/ 'Removable Disk' (which represented your player memory) must be displayed for an upgrade purpose. If it is not displayed, we recommend that you check the menu that asks whether or not to use a USB Device from the main board CMOS, or reinstall Windows, or have the USB port on the main board examined.

## Upgrading Product Firmware

### ■ Downloading and Installing Firmware

When there is a new firmware released, you can download the latest firmware from MEIZU website free of charge to enhance the features and eliminate the bugs. Please refer to the following procedure.

#### 1 Turn on the player.

Click the Power ON/OFF button to turn the player on.

#### 3 The player is shown as the Removable Disk on your PC.

In the normal Windows environment, as soon as the cable is connected, the message "Searching for new device" appears.

#### 2 Connecting the player and your PC with the provided USB cable.

#### 4 Download the firmware package from MEIZU' website.

Firmware Package

Please take attention to the model number and software version.

## Upgrading Product Firmware

#### 5 Decompress the downloaded files, drag and drop them onto the "RemovableDisk" window.

#### 6 Then it displays M6SL.EBN, resource.bin in the Removable Disk.

#### 7 Then run 'Safely Remove Hardware' and disconnect the player to your PC. The upgrading is applied, then disconnect the USB cable on the player.

Draw out the USB cable on the player.

#### 8 After finish upgrading, restart the player, then it pops up and starts running the 'Upgrading Software, Please Wait...' and shut down automatically. Turn it on again, it pops up 'Upgrading Resource, Please Wait...', then the program will be renovated automatically on the player. It will take you some time to finish the upgrading.

## Format

### ■ Formatting the Flash Memory

The flash Memory of the player can be formatted. Please use Windows format tools to format the player, and restore read & write operations of file systems.

If the flash Memory is formatted, all data stored within is lost.

Take notice of this fact, examine the following procedures.

### ■ Before formatting

Finished installation of the player manager program

Connecting the player to your PC

Backup all data stored in the player

### Operating procedures

- 1 Press the Power ON/OFF button to start the player.

- 2 Connect the player and your PC via USB connection cable.

\* Small end to player, large end to PC

## Format

- 3 Double click [My Computer] and select the [Removable Disk].

The player is shown as the Removable Disk on your computer.

- 4 Select the [Removable Disk] and right click on it, then click [Format].

- 5 Click the [Start] key.

## Format

- 6 It pops up the warning window, select [OK] to continue.

- 7 The formatting is start running.

- 8 While finishing, click [OK] to finish.

- 9 Exit the formatting, click [Close] to exit.

You should take special care when you format it since all the data in the memory will be deleted. The folders named Music, Pictures, Playlists, Record, Video in the player are system directories, they will be deleted after format. Reboot and operate the player, then the directories will be recreated automatically.

## Handling Instructions

- **Do not subject the player to severe impact or jarring.**  
Vibration experienced during walking or exercising will not affect the player. However, dropping a heavy object on the player may result in damage or sound distortion.
- **Be careful when storing the set and do not use or place it at the following places:**
  - Places with high humidity;
  - Places with strong magnetic fields;
  - Places with extreme temperatures;
  - Directly under the sunshine or near the equipment that generates heat;
  - Inside a car with closed windows especially in summer.
- **It is necessary to prevent strong shock when reading files or operating, otherwise files may be damaged or deleted.**
- **Please do not repair or disassemble this product by yourself.**
- **Please do not use this product in the place where forbid to use for electronics products.**
- **Please do not operate this product while driving.**
- **Please backup the important information on your note book, any repair result from electricity shock, static electricity, change of battery or incorrect using may cause change, damage or delete the files stored in the product.**

## Precautions for Using the Product

Do not keep it in high temperatures or in a damp place for a long time or dispo on direct sunlight.

Do not drop player or apply impact. Shock is the major cause of breakdown.

Keep away from places of dust and cigarette ash.

Make sure that the player does not get in contact with chemicals such as benzene or thinner.

Frequently back up important files. All the data stored in the product may be deleted during AS.

If you disassemble or modify the product arbitrarily, you cannot receive free services, and may be excluded from the scope of service.

Keep away from impact, do not contact with the static objects.

Please keep the SN of your player for your future's reference.

Please keep the high-performance transparent protection film on the player and do not remove it.

## Trouble Shooting

### ■ Trouble Shooting

The player does not power on.	Check whether the HOLD switch on the player is ON (Switch to OFF position) Check whether it failed upgrading the software, upgrade it again.
There is no sound.	Check that there are audio files in the memory. Check whether VOLUME is set to "0". Connect the earphones/remote plug firmly. Corrupted WMA audio files may make a static noise & the sound may cut off. Check your files on the PC to see if they are corrupted.
Characters in LCD are broken.	Check out Menu - Display - Language and confirm whether the right language has been selected.
Failed download of music audio file	Check the connection between your computer and the player to ensure that the cable is secure. Check the Manager program to make sure it is operating. Check whether the player's Memory is full.

Note: Should any problem persist after you have checked these symptoms, consult the distributors.
