

IP Security Cameras

Quick Start Guide

What is in the box

Before starting installation, check that your box has all the hardware needed for installation. Examine all the hardware items to make sure they are not damaged. The box should include one each of these:

- IP camera
- Mounting bracket and mounting hardware
- AC power adaptor
- Network cable
- Quick Installation Guide (this document)

Hardware installation

1. Connect the IP camera to the network router and start the camera.
 - A. Insert one end of the supplied network cable in the camera's network port and the other end of the cable into an available port on the network router.
 - B. Insert the tip of the supplied power adaptor into the camera's power port and insert the other end of the power cable into the electrical supply.
 - C. Check that the camera's power indicator light is lit, and the Network Indicator light is flashing. These are located near the camera's network port.

View your camera via Android mobile phone

1. Install the *Polaroid Security IP Camera* software.
 - A. Enter the URL: www.polaroidsafety.com in your camera's web browser, or scan the QR code shown here to access the web site.
 - B. Follow the instructions on the web page to install the app on your mobile phone.
 - C. The *Polaroid IP* icon will be visible on the phone's screen after successful installation.

2. Add your camera to the *Polaroid Security IP Camera* app.
 - A. Tap the *Polaroid Security IP Camera* icon to start the app, and click "Add" to add your camera.

Scan method:

Note: This method will only work when the camera is on the same local network (LAN) as the smartphone.

- Locate the QR code on the UID sticker located on the bottom of the IP camera.
- Click the "Scan" button.
- Scan the QR code on the UID sticker.
- When the UID code is scanned successfully, the phone's screen will update with the information.
- Enter the default security code: "admin."
- If desired, enter a name for the camera in the "Name" field.
- Click "OK" to complete adding the camera.

Search method:

- Click the "Search" button.
- Choose the desired camera from the list, by matching the UID shown.
- Enter the default security code: "admin."
- If desired, enter a name for the camera in the "Name" field.
- Click "OK" to complete adding the camera.

- B. When added successfully, the new camera will appear in the app's camera list.
3. Click the camera in the list to view the live video from the camera on your mobile phone.

Android WiFi setup

1. Click the icon at the right of the camera in the camera list.
2. Click "Edit Camera" from the list that appears.
3. Click "Advanced"
4. Click "Manage WIFI networks"
5. Select your router from the SSID list that appears.
6. When prompted, enter your WIFI password.
7. Click "OK"

8. Unplug the network cable from the IP camera and network router. The camera will restart and automatically reconnect to the network router via WIFI.

Note: Cameras with Pan/Tilt capability can be controlled by touching and moving the video display on the mobile phone. The display will change as the camera's position responds to the control.

View your camera via iPhone

1. Install the *Polaroid Security IP Camera* software.
