User's manual

Working temperature 40° — -5°, don't put it at the moisture place.
Don't crash or no stack on it
Don't invade it by other article
Keep it away from the chemical or the water drop
Keep it away from the direct sunlight or other heating article
Keep it away from the dust
Backup the files or important information stored in it
Don't refurbish or repair without the authorization

Traffic safety

Don't listen to the music through earphone when driving the motor, or bicycle, or you might break the law in some countries and it's dangerous especially when you set on high volume in the earphone, which cause you fail to hear outside surroundings.
Don't use it on the airplane, at the gas station or at the hospital

Protect your hearing

The study conducted by the doctor indicates that it will damage your hearing if you listen to music for continuous long time through earphone and at the high volume. When you are feeling uncomfortable, stop the music or lower the volume.

①

Battery

The below icons indicate the different power levels left in the battery

No replacement of battery without authorization, or the exploration hazard might happen.

Recharge it for at least half of hour if it has been idle for long time and fails to start itself.

Regularly recharge it at least one time monthly
40°—5° is the optimum temperature for the battery recharging or the battery performance might deteriorate slightly

Disposal

The battery might contain the polluting material, please give it to the official recycling-station before disposing the tablet pc, and don't litter.
