Introduction

Thank you for using GPS navigation software: Garmin Mobile XT for Chevrolet.

Manual Conventions

When you see text in [blue](#), tap with your finger to follow a link for more information. When you are instructed to “select” something, use the touch screen to select an item on the screen.

You will see small arrow (>) in the text. They indicate that you should select a series of items. For example, if you see

“select [Where to?](#) > [Home](#)” you should use the touch screen to select [Where to?](#), and then select [Home](#).

Tips and Shortcuts

- Select and hold the [Back](#) button to return to the main menu.
- When present, you can select [Menu](#) to return to the main menu

Getting Started

Acquiring GPS Signals

Before you can navigate to a destination, the GPS receiver must acquire satellite (GPS) signals.

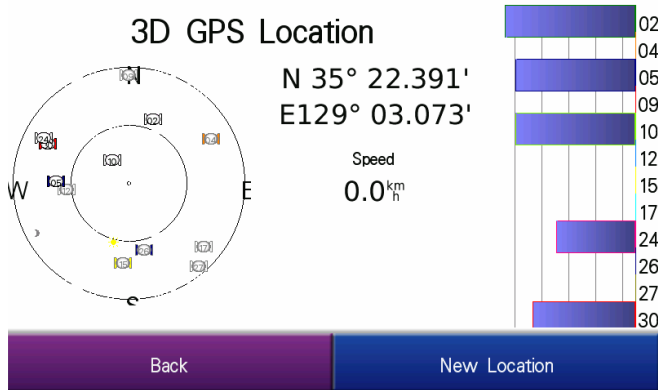

1. Turn on Garmin Mobile XT for Chevrolet program.

2. Go to an open area, out of parking garages, and away from tall buildings.

Acquiring satellite signals may take a few minutes. The bars in the upper-left corner indicate satellite strength. While the GPS receiver is acquiring satellite signals or if it loses signals, the bars are red or hollow . When the bars are green , your GPS has acquired satellite signals; you can find your destination and go to it.

To view information about the GPS receiver, select the GPS icon  .

Getting Started

The satellite page opens with information about the GPS satellites your device is receiving and their signal strength (in blue bars). It shows your position (lat/long), the GPS accuracy, and your current speed. Select [Back](#) to return to main Garmin Mobile XT page.

Setting Your Location

When you activate the GPS for the first time, or if you have traveled more than 1,000 kilometers with the GPS receiver turned off, the GPS must initialize. To shorten the initialization time, set your location on the map. Select the GPS icon  and select [New Location](#).

For more information about GPS, visit <http://www8.garmin.com/aboutGPS/>.

Using the Main Garmin Mobile XT Page

Where to? – find address, Points of Interest (restaurants, hotels, attractions), intersections, and a variety of other locations.

View map – see a map of your current location. The map moves as you move to constantly show your current location.

Tools – use tools that are useful for navigation.

Settings – adjust the settings.

Satellite Strength – select to view the GPS page.

Finding a Destination

The [Where to?](#) Menu provides several categories and sub-categories to help you find destinations. You can enter addresses, look up locations you recently found, and view locations you have saved.

1. From the main Garmin Mobile XT page, select [Where to?](#) > [Food, Hotels...](#)
2. To find a location by name, select [Spell Name](#), enter all or part of the name, and then select the location you want.
3. Or select a category, then select a sub-category or select [All Categories](#). A list of locations near your current location appears.
4. Select the location to open the information page.
5. Select [Go!](#) to create a route to this location.

Getting Started

Following the Route

After you find a location, select [Go!](#) to create a route to it.

The map automatically opens with your route indicated with

a magenta line. The  position icon shows your position on the map. Directions appear at the top of the page. Your current speed and estimated arrival time appear at the bottom of the page.

If you leave the map and want to return, select [View map](#) on the main Garmin Mobile XT page. Select [Stop](#) on the main Garmin Mobile XT page to stop the activate route.

Note: To avoid some types of road when routes are generated, select [Settings](#) > [Routing](#).

You can select [Tools](#) > [Browse Map](#) to show a different view of the map.

Getting Started

 Where Am I?	 Manage My Data

Back

Where to?

Where to?

Use the [Where to?](#) menu to find addresses, restaurants, attractions, and a variety of other locations.

Many categories in the [Where to?](#) menu require detailed map data that is preloaded on your device. You must have detailed maps in order to find locations within some of the [Where to?](#) categories, such as [Addresses](#) and [Food, Hotels....](#)

Information Page Options

After you find an item, you can select [Go!](#) to create a route to this location, or select [Map](#) to view the location on a map,

or select [Options](#) for additional options:

Au Bon Pain

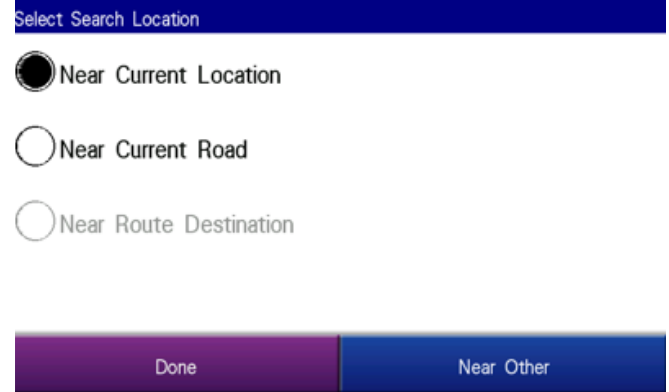

- [Save to Favorites](#) – save the location.
- [Add as via to current route](#) – adds the location to your current route.

Where to?

Finding Places Near Other Places

By default, Garmin Mobile XT finds places near your current location (the city when you turn on the GPS receiver). You can also use Garmin Mobile XT to find places near your current road or route, your route destination, or a location you select.

1. From the main Garmin Mobile XT page, select [Where to?](#) > [Near](#).

2. Select an option:
 - [Near Current Location](#) – searches for places near your current location.
 - [Near Current Road](#) – searches for places along the route you are currently navigating.
 - [Near Route Destination](#) – searches for places near your current route destination.

Where to?

- [Near Other](#) – searches for places near the city you enter or near the map item you select.
3. Select [Done](#).

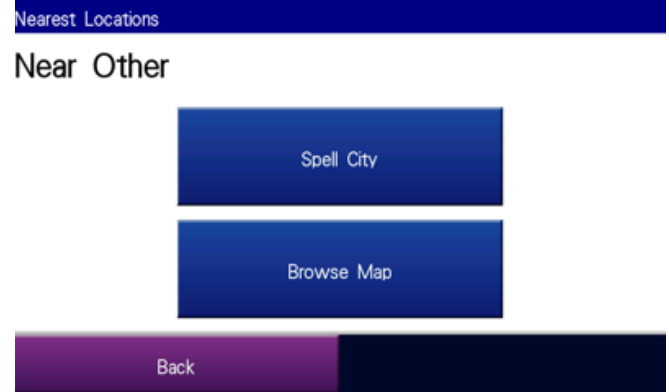

Note: Garmin Mobile XT automatically searches for places near your current location.

Finds Places Near Other City

If the places you are looking for are located on another city of the same province or other province, you must start the search by relocating your destination to that city first.

1. Select [Where to?](#) > [Near](#) > [Near Other](#).

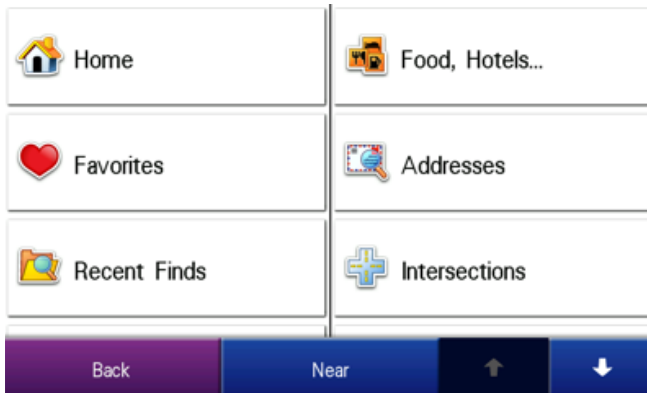

2. Select nearest locations by entering city name by [Spell City](#) or select by [Browse Map](#) on the screen.
3. If select spell city name, enter the city name either in part or in full.
4. Select city name you prefer from the list.
5. Select [Done](#).

Where to?

Going Home

You can set a home location for the place you return to most often.

1. From the main Garmin Mobile XT page, select [Where to? > Home](#).
2. Select an option to set your home location.

After you have saved your home location, you can create a route to it by selecting [Where to? > Home](#).

Changing Your Home Location

To change your home location, you must first delete it:

1. From the main Garmin Mobile XT page, select [Tools > Manage My Data > Favorites](#).
2. Select [Home > Delete > Yes](#).

After you delete your home location, select [Where to? > Home](#) to set a new home location.

Where to?

Finding Street/Soi

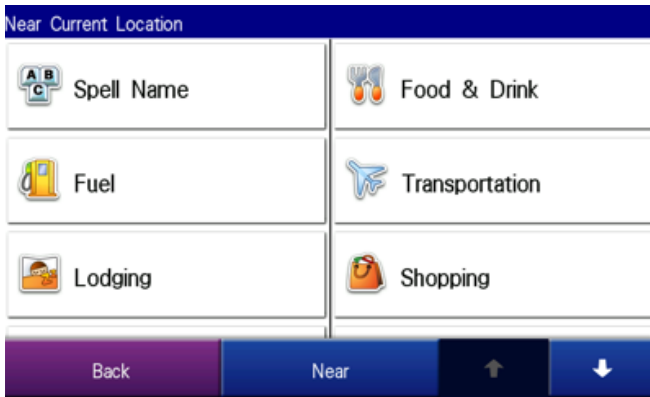

1. From the main Garmin Mobile XT page, select [Where to? > Addresses](#).
2. Bangkok is shown by default. If you want to select another province, select [Change State](#) and enter its name.
3. Then select a city. If you want to search all cities, select [Search all cities](#). You can also select [Spell City](#) by entering all or part of the name and then select the city you prefer from the list.
4. Skip the House Number by selecting [Next](#).
5. Enter all or part of the street/soi name and then select the street/soi from the search results list.
6. If many streets/sois match your search criteria, select the correct one from the list. The address information page opens.
7. Select [Go!](#) to create a route to this location or select another option.

Where to?

Finding Points of Interest

1. From the main Garmin Mobile XT page, select

[Where to?](#) > [Food, Hotels...](#)

2. Select a category and a sub-category, if necessary. (Select the arrows to see more categories.)
3. Select a point of interest.

4. Select [Go!](#) to create a route to this location or select another option.

Finding a Point of Interest by Spelling the Name

If you know the name of the location you are looking for, you can spell it using the on-screen keyboard. You can also enter letters contained in the name to narrow the search.

1. From the main Garmin Mobile XT page, select [Where to?](#) > [Food, Hotels...](#)
2. Select [Spell Name](#).
3. Using the on-screen keyboard, enter letters in the name. Select [Done](#).
4. Select the point of interest you are looking for.
5. Select [Go!](#) to create a route to this location or select another option.

Where to?

Favorites

You can save places in Favorites, so you can quickly find them and create routes to them. Your home location is also stored in Favorites.

Saving Places You Find

1. After have found a place you want to save, select [Options](#) > [Save to Favorites](#).
2. Select [OK](#). The place is saved in [Favorites](#).

Finding Saved Places

1. From the main Garmin Mobile XT page, select [Where to?](#).
2. Select [Favorites](#). Your saved locations are listed.

Where to?

Finding Recently Found Places

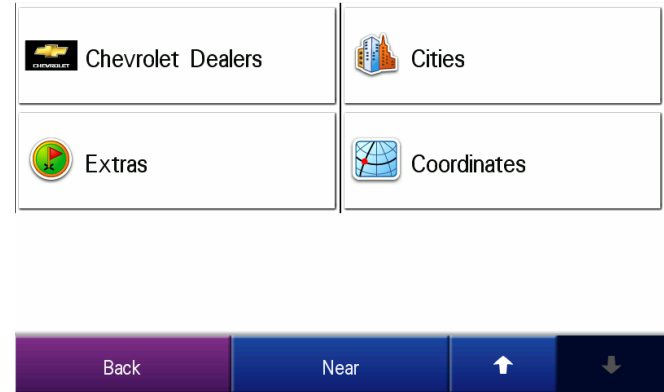

Garmin Mobile XT keeps track of the last 50 locations you have recently found so you can find them again quickly.

From the main Garmin Mobile XT page, select [Where to?](#) >

[Recent Finds](#) to view your recently found items.

Finding Extras

The [Extras](#) category in the [Where to?](#) menu provides access to the Custom POIs. This feature is an optional, free accessory at www.garmin.com/extras (but not applicable in Thailand because the data is for other countries).

Custom POIs

Custom POIs are customized points in the map. They can contain alerts that let you know if you are near a designated point or if you are traveling faster than a specified speed. You can create or download Custom POIs and install them on your device using Garmin POI Loader software available at www.garmin.com/extras. See the POI Loader Help file for more information.

Where to?

1. Use POI Loader to load Custom POIs on your device.
2. From the main Garmin Mobile XT page, select [Where to?](#) > [Extras](#) > [Custom POIs](#).
3. Select a Custom POIs.
4. Select [Go!](#) to create a route to this location or select another option.

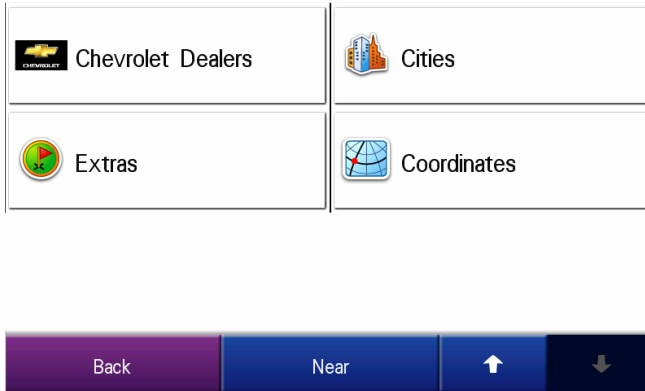

Finding Chevrolet Dealers

Select [Where to?](#) > [Chevrolet Dealers](#) to find Chevrolet dealers near your current location.

Where to?

Finding Cities

1. From the main Garmin Mobile XT page, select [Where to?](#) > [Cities](#). A list of cities near your current location appears.

2. Select a city. To search by name, select [Spell](#), enter the name, and then select the city you want.

3. Select [Gol](#) to create a route to this city or select another option.

Finding Intersections

1. From the main Garmin Mobile XT page, select [Where to?](#) > [Intersections](#).
2. Select a city in a current province. If you want to change the province, select [Change State](#) and enter the province name.

Intersection Search (1 of 4)

Select city in:

Bangkok

Where to?

3. To search all cities, select [Search All Cities](#). You can also select [Spell City](#), enter part of the name, and then select the city from the list.
4. Enter all or part of the first street name and then select the street from the list.

Note: When entering street information, you need to enter a postfix of “RD”. For the Soi, enter “SOI”.

5. Enter all or part of the second street name and then select the street from the list.

6. If many intersections match your search criteria, select the correct intersection from the list. The intersection's information page opens.
7. Select [Go!](#) to create a route to this location or select another option.

Routing

After you find a location, select **Go!** to create a route to it.

You can also create and save a new route manually.

Follow a Route

The map automatically opens with your route indicated with

a magenta line. The  position icon shows your position on the map. Directions appear at the top of the page. Your distance to destination and estimated arrival time appear at the bottom of the page.

On touch screen, touch + to zoom in and touch – to zoom out. If you leave the map page and want to return, select [View map](#) on the main Garmin Mobile XT page.

Select [Stop](#) on the main Garmin Mobile XT page to stop the active route.

Routing

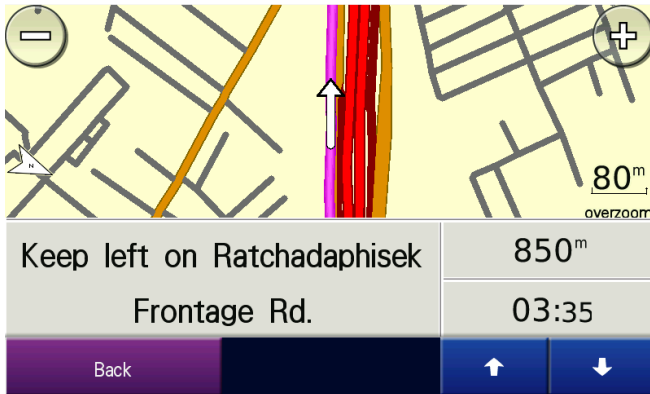

Note: to change other routing settings, select [Settings](#) > [Routing](#).

You can select [Tools](#) > [Browse Map](#) to show a different view of the map.

Routing

Viewing the Upcoming Turns

After you have created a route, you can view each of your upcoming turns on the map.

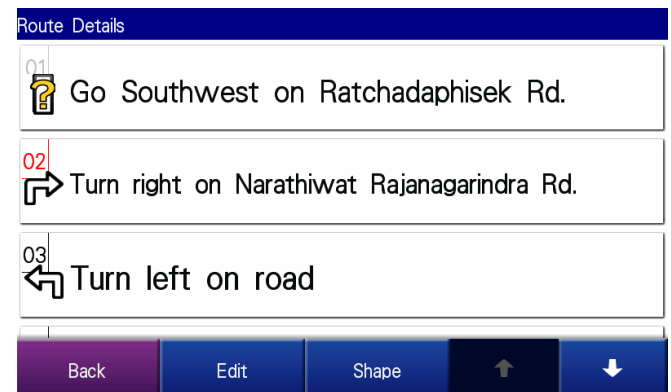

To view the upcoming turns, select the directions bar above the map. The Route Details page opens showing all the turns in your route. Select one turn and it shows turn

instructions and a distance and time to the turn. Select the Up and Down arrows to view additional turns in your route.

Viewing the Route Details

To view a list of all the turns in your route, select [Tools](#) > [Route Details](#) from the main Garmin Mobile XT page. You can also view this list by selecting the directions bar above the map.

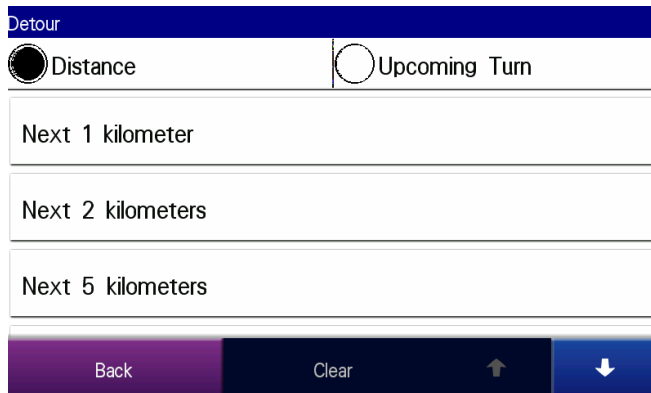

Routing

Adding a Detour to Your Route

While navigating a route, you can use detours to avoid obstacles such as traffic jams or construction zones.

1. With a route active, select [Detour](#) from the main Garmin Mobile XT page.
2. Select [Distance](#) or [Upcoming Turn](#).

3. If you selected [Distance](#), select how much of your current route you want to avoid. If you select [Upcoming Turn](#), select the turn you want to avoid.
4. Select [Yes](#). Garmin Mobile XT recalculates the route to include the detour.

Stopping Your Route

With a route active, select [Stop](#) from the main Garmin Mobile XT page.

Adding Stops to a Route

Via points are additional points or stops that you add to a route. They can be addresses, points of interest, or any other location on the map.

Routing

You can add vias to a route using the Where to? menu.

Find a location and then select [Options](#) > [Add as via to current route](#).

You can also add vias to a route using the [Route Details](#) page.

1. With an active route, select [Tools](#) > [Route Details](#) > [Edit](#).

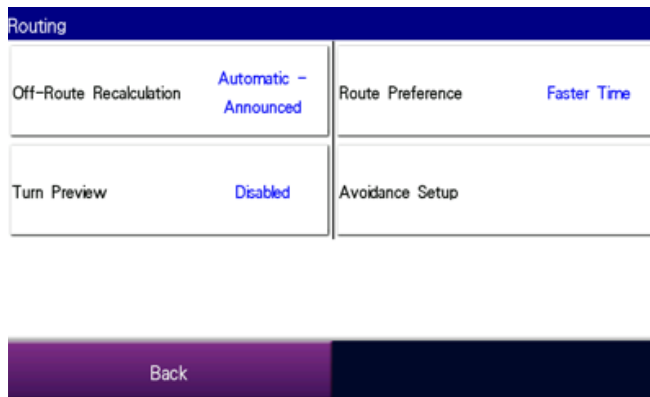

2. Select [Add Start Point](#) or [Add End Point](#).
3. Select [Find](#), [Browse Map](#), [Use Current Location](#), or [Edit Coordinates](#) to select a via or more.
4. Select [OK](#) to add the via to your route.

To change the order of the vias along the route, select [Sort](#) > [Yes](#). Then select a via in the list and select the Up or Down arrow to move it and select [Yes](#). To remove a via from the list, select [Delete](#).

Routing

Avoiding Roads and Areas

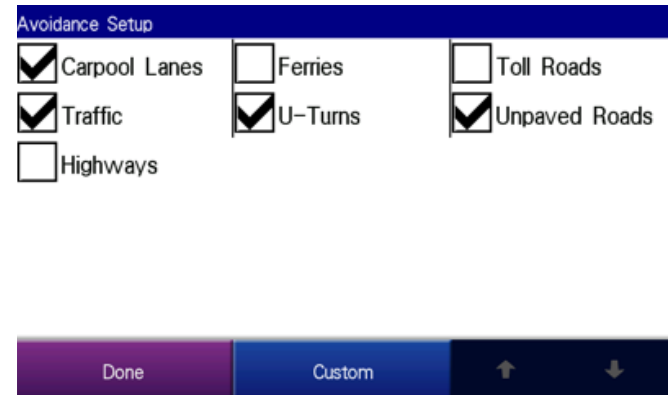

You can exclude specific roads or areas from all of your routes. Garmin Mobile XT avoids using these roads or areas in routes unless there is no alternative.

You can avoid general types of roads (such as unpaved roads and toll roads) by changing your routing settings.

Avoiding Roads

1. Select [Settings](#) > [Routing](#) > [Avoidance Setup](#) > [Custom](#) > [Add New Road](#).

2. Select the starting point of the road you want to avoid, then select [Next](#). A push pin appears on the map.

Routing

3. Select the ending point of the road you want to avoid, then select [Next](#).
4. Select [OK](#) to save the avoidance.

Avoiding Areas

1. Select [Settings](#) > [Routing](#) > [Avoidance Setup](#) > [Custom](#) > [Add New Area](#).
2. Select a corner of the area you want to avoid, then select [Next](#).
3. Select the opposite corner of the area you want to avoid. A shaded box appears. Select [Next](#).
4. Select [OK](#) to save the avoidance.

View and Edit Avoidances

1. Select [Settings](#) > [Routing](#) > [Avoidance Setup](#).

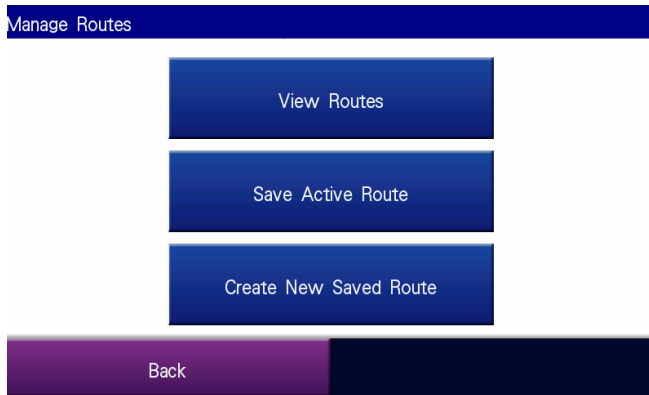

2. Select [Custom](#) > [View List](#).
3. Select the avoidance you want to edit.
4. Select [Rename](#) to rename the avoidance, [Delete](#) to delete the avoidance, or [Map](#) to view the avoidance on a map.

To deactivate an avoidance without deleting it, select [Settings](#) > [Routing](#) > [Avoidance Setup](#), then uncheck the avoidance.

Saving a Route

You can save the route you are currently navigating and use it again later.

Routing

1. Select [Tools](#) > [Manage My Data](#) > [Routes](#).
2. Select [Save Active Route](#) > [OK](#).

Planning a Route

You can plan, create, and automatically save a complex route.

1. Select [Tools](#) > [Manage My Data](#) > [Routes](#).

2. Select [Create New Saved Route](#).
3. Select your starting point.
4. Select your ending point.
5. Select intermediate (via) points as necessary, or select [None](#).
6. Select your route calculation preference.
7. Select [Go!](#) to save the route and start navigating it, or select [Save](#) to save the route for future use.

Navigating a Saved Route

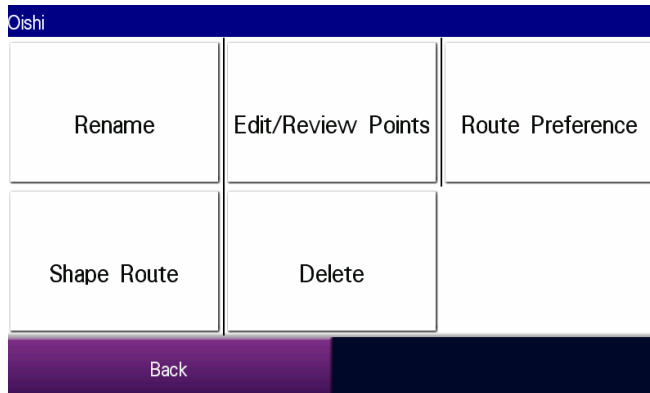

1. Select [Tools](#) > [Manage My Data](#) > [Routes](#).
2. Select [View Routes](#).
3. Select the route you want to navigate.
4. Select [Go!](#).

Routing

Editing a Saved Route

After you have saved a route, you can edit that route as needed.

1. Select [Tools](#) > [Manage My Data](#) > [Routes](#).
2. Select [View Routes](#).
3. Select a route and select [Edit](#).

4. Select an option:
 - [Rename](#) – rename the route.

- [Edit/Review Points](#) – add, delete, or rearrange the points in the route.
- [Route Preference](#) – set [Faster Time](#) or [Shorter Distance](#) as the route calculation preference.
- [Shape Route](#) – select [Add](#) to add a via, [Undo](#) to stop adding a via, [Remove All](#) to delete all vias, [Done](#) to exit this page.
- [Delete](#) – delete the route.

Favorites

Saving a Location

1. After you have found a place you want to save, select [Save](#).
2. Select [OK](#). The place is saved in [Favorites](#).

Creating a New Saved Location

1. Select [Tools](#) > [Manage My Data](#) > [Favorites](#).
2. Select [Manage](#) > [New Location](#).

Editing My Locations

You can change the name, the category, or the symbol of a saved location, move the location to a different place, or delete the location.

1. Select [Tools](#) > [Manage My Data](#) > [Favorites](#).
2. Select a location, then select an option:
 - [Change Name](#) – rename the location.
 - [Change Location](#) – give this item a new location using the [Address Search](#), [Browse Map](#), [Use Current Location](#), or by [Editing Coordinates](#).

Favorites

- [Change Categories](#) – assign this location to a category, such as Business.
- [Change Symbol](#) – change the symbol used on the map to show this location.
- [Delete](#) – delete this location from [Favorites](#).

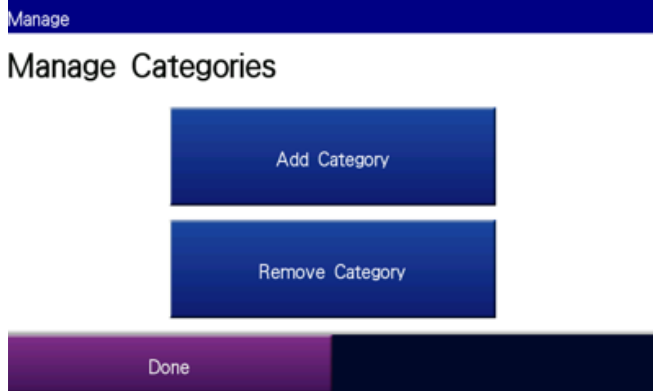

Using Location Categories

Garmin Mobile XT contains default categories to help you organize your saved locations. You can also create your own categories for your saved locations.

Create a Category

1. Select [Tools](#) > [Manage My Data](#) > [Favorites](#).
2. Select a location, then select [Change Categories](#).
3. Select [Manage](#) > [Add Category](#).

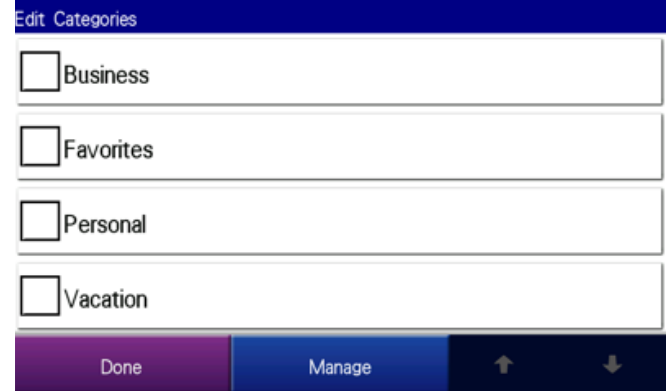

Favorites

4. Enter the category name, then select [Done](#).

Assigning a Category

1. Select [Tools](#) > [Manage My Data](#) > [Favorites](#).
2. Select the location you want to assign to a category, then select [Change Categories](#).
3. Select one or more categories, then select [Done](#).

Deleting All Saved Locations

1. Select [Tools](#) > [Manage My Data](#) > [Favorites](#).
2. Select [Manage](#) > [Delete All](#).

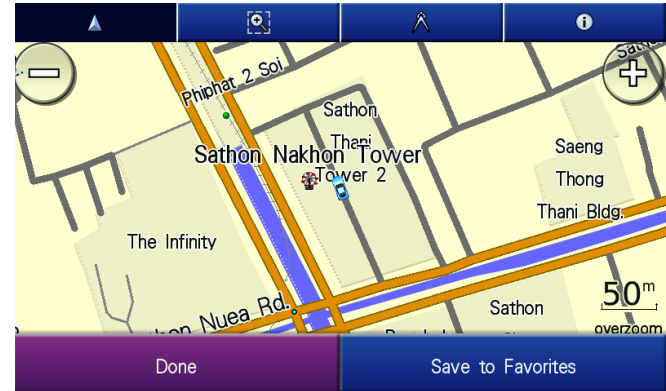

Tools

The [Tools](#) menu provides access to many helpful features of the Garmin Mobile XT application.

Browsing the Map

You can use the map to view places not near your current location. To browse the map, select [Tools](#) > [Browse Map](#).

With the map page open, you can touch the map to open the Browse Map page.

Drag your finger across the screen to move the map.

[Recenter the Map](#) – select the  position icon to re-center the map on your location.

[Zoom In](#) – select +.

[Zoom Out](#) – select –.

Tools

[Zoom Into Area](#) – select  and then draw a box on the map to zoom in on an area. Select  again to deactivate this tool.

[Zoom Into Area](#) – select  to measure distance between two points. Select the first point on the map, select , and then select the point you want to measure to.

[View Information](#) – select  to view information about the select point on the map. You can then route to that point, save it in Favorites, or add it to the active route as a via.

[Save to Favorites](#) – select [OK](#) or [Edit](#).

Where Am I?

The Where Am I? page shows your current latitude/longitude location, the nearest address, and the nearest major intersections. Additionally, you can also find

nearest hospitals, police stations, and fuel stations for emergency situations. Select [Tools](#) > [Where Am I?](#). To save your current location, select [Save](#).

Managing Data

The Manage My Data page allows you to edit favorite locations, work with saved routes and tracks, and review the Map Sets and Custom POI set loaded on your device. Select [Tools](#) > [Manage My Data](#) and then select an option.

Managing Your Map Sets

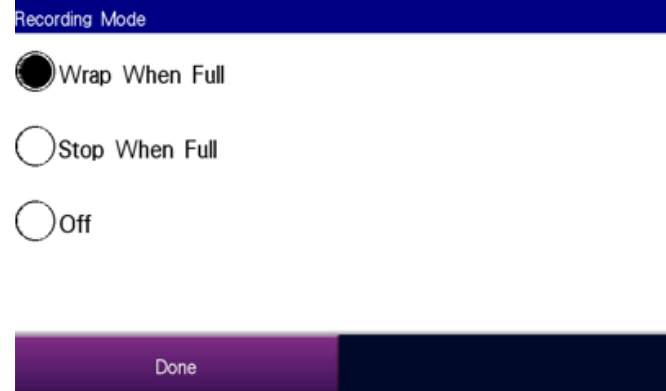

Garmin Mobile XT includes preloaded map data. To view the map sets loaded on your device, select [Tools](#) > [Manage My Data](#) > [Map Sets](#).

Managing Your Tracks

A track is the path that you have traveled. Kind of like a bread crumb trail. After you record tracks, you can save them. Saved tracks appear on the map automatically.

Recording a Track

1. Select [Tools](#) > [Manage My Data](#) > [Tracks](#).
2. Select [Options](#).
3. Select [Recording Mode](#) and select a recording option:
 - [Wrap When Full](#) – record over the beginning of the track when the track memory is full.

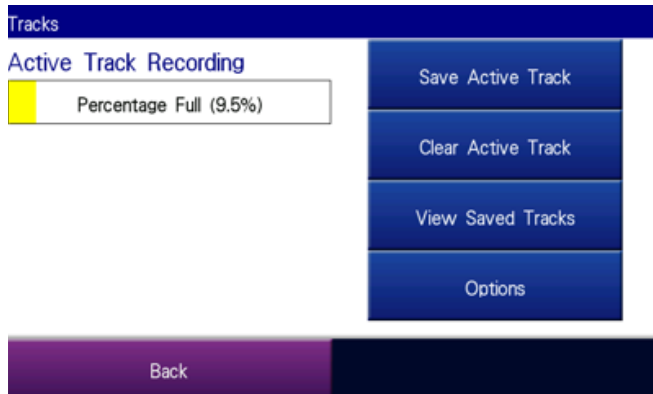

- [Stop When Full](#) – stop recording when the track memory is full.
 - [Off](#) – turn off track recording.
4. Select [Recording Interval](#) and select how often you want track points recorded. [Most](#) or [More Often](#) records more points and creates more detailed tracks, but fills up track memory more quickly.

Tools

5. Select [Show Active Track on Map](#) and select [Enabled](#) to view the active track on the map while it is being recorded.

Saving a Track

1. Select [Tools](#) > [Manage My Data](#) > [Tracks](#).
2. Select [Save Active Track](#) > [Save](#).

After you save a track, clear the track memory by selecting [Clear Active Track](#).

Viewing and Editing a Saved Track

You can rename a track, change its color, display it on the map, or delete it.

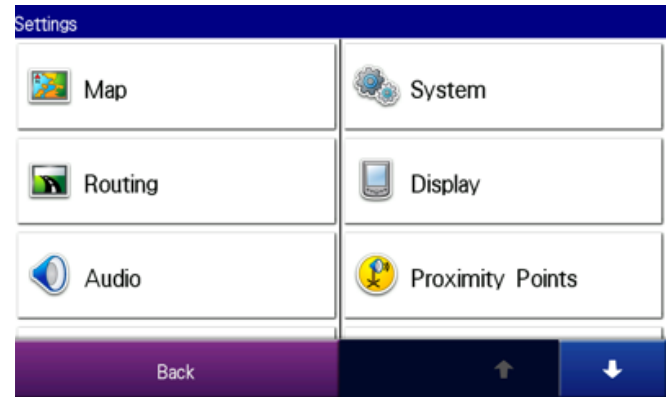

1. Select [Tools](#) > [Manage My Data](#) > [Tracks](#).
2. Select [View Saved Tracks](#).
3. Select a track and then select [Edit](#).
4. Select an option:
 - [Rename](#) – rename the track.
 - [Color](#) – select the display color for the track.
 - [Display on Map](#) – show the track on the map page.
 - [Delete](#) – delete the track.

Settings

Customize Garmin Mobile XT using the Settings.

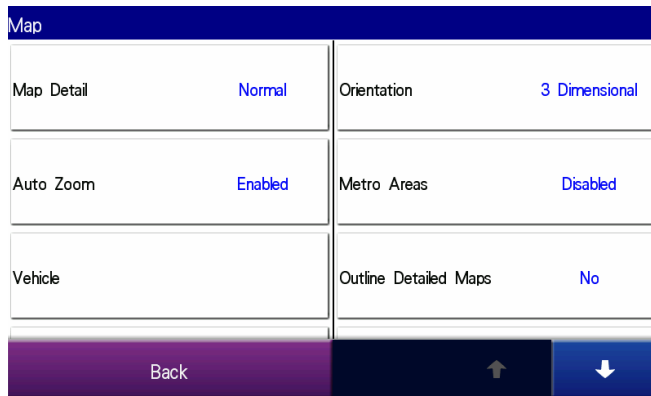

Map Settings

Map settings allow you to customize the appearance of the map, including detail, orientation, and text size. To change map settings, select [Settings](#) > [Map](#).

[Map Detail](#) – adjust the amount of detail shown on the map. Showing more detail may cause the map to redraw slower.

Settings

Orientation – change the perspective of the map.

- **3 Dimensional** – display the map in 3 dimensional (3D) with your direction of travel at the top.
- **North Up** – display the map in 2 dimensions (2D) with North at the top.
- **Track Up** – display the map in 2D with your direction of travel at the top.

Auto Zoom – select **Enabled** to have the map automatically zoom to show the next turn on the map.

Metro Areas – select **Enabled** to shade metropolitan areas of the map.

Vehicle – select to change vehicle icon on the map page.

Outline Detailed Maps – select **Yes** to display lines around detailed maps you have loaded onto your device.

Lat/Lon Grid – select **Enabled** to display the latitude/longitude grid.

Map Features – select the text size for locations that appear on the map (POIs, streets, cities) or disable text labels.

System Settings

System settings allow you to select units of measure. To change system settings, select [Settings](#) > [System](#).

System	
Distance / Speed	Metric
Direction	Cardinal Letters
Location Format	hddd°mm.mmm'
Datum	WGS 84

[Distance / Speed](#) – select the format of distance / speed.

[Direction](#) – select the format of direction.

[Location Format](#) – select a format for the latitude and longitude coordinates. Because different maps and charts use different position formats, Garmin Mobile XT allows you

to choose the correct coordinate format for the type of map you are using. If you select [User UTM Grid](#), enter the appropriate coordinate information.

[Datum](#) – select a map datum. Because different maps and charts use different map datum, Garmin Mobile XT allows you to choose the correct map datum for the map you are using. The datum is generally listed in the map's legend.

Routing Settings

Routing settings allow you to customize the way Garmin Mobile XT calculates routes. To change routing settings, select [Settings](#) > [Routing](#).

Settings

Routing	
Off-Route Recalculation	Automatic - Announced
Route Preference	Faster Time
Turn Preview	Disabled
Avoidance Setup	

Off-Route Recalculation – select **Prompted** to have Garmin Mobile XT ask before recalculating your route if you go off the route, **Automatic-Announced** to have Garmin Mobile XT announce that it is recalculating, **Automatic-Silent** to have Garmin Mobile XT recalculate the route without an announcement, or **Off** to have Garmin Mobile XT not recalculate the route if you go off route.

Route Preference – select a preference for calculating your route. Select **Faster Time** to calculate routes that are faster to drive but can be longer in distance. Select **Shorter Distance** to calculate routes that are shorter in distance but can take more time to drive. Select **Off Road** to create a direct route to the destination (the route will not follow roads).

Turn Preview – select **Enabled** to show a brief preview of upcoming turns.

Avoidance Setup – check the types of roads or areas you want to avoid when creating routes. Garmin Mobile XT avoids using these items in a route unless there is no alternative.

Settings

Display Settings

Display settings allow you to customize the backlight, software text language, and color scheme. To change display settings, select [Settings](#) > [Display](#).

[Backlight Override](#) – select when to turn on the backlight.

[Text](#) – select a language for the Garmin Mobile XT software.

This does not change the map text.

[Color Mode](#) – select [Day](#) for a light background with dark text, [Night](#) for a dark background with light text, or [Auto](#) for the background to change according to the time of day.

Audio Settings

Audio settings allow you to customize the volume, voice, voice prompt, and attention tone. To change audio settings, select [Settings](#) > [Audio](#).

Settings

Volume – select the volume level.

Voice – select a language, if you have multiple voice languages loaded on your device.

Voice Prompt – enable/disable the vocal navigation prompts.

Attention Tone – enable/disable the tone that is sounded before a navigation prompt.

Proximity Points Settings

Proximity points settings allow you to enable proximity alerts as well as adjust speed alert tones and proximity alert tones for Custom POI sets. To change proximity point settings, select [Settings](#) > [Proximity Points](#).

Custom POI Sets – enable/disable the custom POI (points of interest) sets you have loaded in Garmin Mobile XT.

Settings

About

The About page contains information about Garmin Mobile XT, including software version, unit ID, and copyright information. Select [Settings](#) > [About](#) to access the About page.

Restore Defaults

You can restore all your Garmin Mobile XT settings to the factory defaults by selecting [Settings](#) > [Restore Defaults](#). Any changes you have made to the settings are lost when you restore defaults.
