# Honeywell

HRDE4X4 Front Panel Operator Guide

1   Easily Monitoring Live Video and Audio

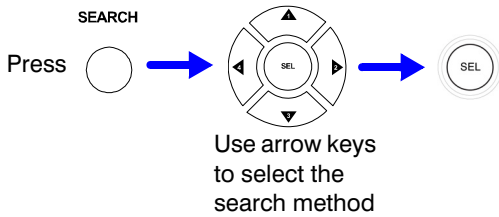

Press numbered arrow key **1 – 4** to select and display camera **1 – 4**.

In single channel view only:
Press **SEQ** to automatically cycle through each camera view.
Press **SEQ** again to stop cycling.

Only audio from the selected camera will be heard. The **Audio Out** connection on the back of the unit must be connected to an amplified speaker to hear audio.

Press **SEL** to display 4 (quad) cameras
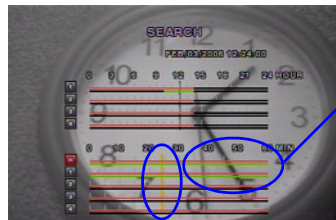

2   Quick Search to Find Incident Video

SEARCH

Press

Use arrow keys to select the search method

Timeline Search is easiest.
Use **Go To** if you know the approximate incident time.
Use **Event Search** for motion or alarm video.
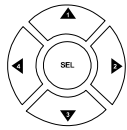

3   Using Timeline Search

To change the month, press ◀◀**REW**, **FF**▶▶. Days colored red have saved video.
Use arrow keys to select the day to play. Press **SEL**.

Use arrow keys to move the vertical yellow bar to the **Hour** and **Minute** to play back. Press **SEL**.

Red line = Video recorded
Green line = Audio recorded

4   Playback Video and Audio

▲▼◄► SEL

Select one camera to play. Audio is only heard for that camera.

SEL
Play Cameras in Quad (4). Camera displayed with yellow lettering plays audio.

6   Play and Review Evidence AVI on Microsoft® Windows XP/2000

Put the USB Stick in a Windows PC.
Double-click the AVI file to launch it.
Use Windows Media Player to play the clip.
The folder uses a YearMonthDay name
(20060203 = 2006 February 03).
The file uses a HourMinSecCamera name
(130808C1 = Starts at 13:08:08 Camera 1).
Playback using VCR-like controls.

Single images are saved in JPG format and can be viewed with Internet Explorer.

AVI files are played with Windows Media Player.
It may be necessary to install a CODEC on your PC to play clips.
See the User Manual or contact technical support for assistance installing CODECs, in North America call 1.800.796.CCTV.
