DigiPass GO-6

USER MANUAL

Code calculator DigiPass GO-6 allows customers to identify themselves in Internet bank MultiNet, to sign payments and authorize other necessary operations, using a unique digit combination.

Using DigiPass GO-6 to generate access and authorization codes provides a high level security of working with Internet bank MultiNet. The generated device values are unique and each of them can be used only for a limited period of time.

DigiPass GO-6 use:

- ✓ Press the button on the device;
- ✓ Read on the screen 6-digit authorization code;
- ✓ Enter this code in the Internet bank next to "Code of DigiPass";
- ✓ Each generated code is visible on the screen only 20 seconds and for Internet bank entering is feasible only fractional minute.

The device DigiPass GO-6 at the same time guarantees both a high level of security and convenience of remote access to the Bank.

DigiPass GO-6 is an alternative to authentication device DigiPass 260 and code card. For DigiPass GO-6 users are available higher limits on transactions than for code cards users.

In appearance the device DigiPass GO-6 is like Keychain - easy and simple to use.

Provide safety of your DigiPass device and do not allow anybody to have access to your PIN-code.

If you have lost your DigiPass or it has been stolen inform the Bank immediately.

In order to receive new Digipass device you have to visit the Bank.
