All Armi Sport replica firearms are produced in the modern factory in Azzano Mella (Brescia, Northern Italy). The most attention has been paid to the internal parts that are CNC machined from solid steel, all are interchangeable with each other, mostly interchangeable with original components. All metal parts are highly polished and hardened to allow the smoothest action. While manufacturing is carried out with cutting-edge machinery, the finish is handcrafted according to tradition.

**We thank you for choosing a Chiappa Firearms product and we are confident that it will meet your expectations.**

### **WINCHESTER 1892 SHORT HISTORY**

Designed by John M. Browning to replace the Model 1873, the 1892 Winchester rifle became one of the most popular lever actions of all time. It was based on his Model 1886, but reduced in size and chambered for the popular short cartridges used in the Winchester 1873, it was found to be mechanically stronger and cost less to produce than the '73, with a total 1,004,675 manufactured from 1892 through 1941 in both solid and takedown variations. Model 1892 is the epitome of an easy shooting lever and saddle gun. Simplification of the elevator and feeding system gave the 1892 a much smoother action than previous models. This makes 1892 replicas very popular with Cowboy competitors. Armi Sport has developed a rich range of 1892 models for the sport of Cowboy Action Shooting and offers different calibres, barrel lengths and versions.

### **WINCHESTER 1886 SHORT HISTORY**

Model 1886 was developed by John M. Browning on Winchester's request. The factory wanted a rifle for very powerful calibers. Model 1886 is one of the most robust lever action rifles ever produced by Winchester. From 1886 until 1935 about 160,000 pieces were manufactured in the versions rifle, carbine and musket. Model 1886 could chamber the most powerful black powder cartridges of its time: 45-70 Government, .45-90 and .50. At that time price was strongly influenced by the caliber, with the strongest calibers being much more expensive.

Armi Sport has developed a range of 1886 Lever Action with two calibers (45/70 and .444Marlin) and two versions (rifle and carbine) for traditional hunting. The carbine version has a 22" barrel and a full-length, 7-shot magazine, while the rifle version with octagonal 26" barrel has an 8-shot magazine capacity.

### **A NOTE ABOUT HISTORICAL FIREARM DESIGN**

Armi Sport proudly manufactures finely crafted firearms product produced to famous historical designs. These firearms are manufactured using precise modern machinery and high quality modern materials. They are faithful reproductions of firearms originally designed in the nineteenth century; however, in choosing to own or use historical firearms the user has to recognize that there have been significant advances in firearms design and safety in the hundred years or more since these firearms were designed. Armi Sport manufactures these guns not as state of the art firearms, but as historically significant firearms for the collector. It is vital that the user be familiar with his firearm and possible safety risks that may be present in the design. Most significantly, the user should realize that the designs of safeties - or even the presence of adequate safeties - vary significantly on historical designs and do not offer the protection against accidental discharge that modern firearms safeties achieve.

Similarly, any firearm that is designed to be fired using black powder (or Pyrodex) has basic risks not found in modern cartridge firearms. Black powder is a dangerous explosive and has to be used and handled with extreme caution. The slightest miscalculation or carelessness with black powder firearms can result in serious injuries to the user. The frame and barrel are not warranted for damage caused by reloaded ammunition

## **WARNINGS**

*Armi Sport/ Chiappa Firearms is not responsible for damage to objects caused by misuse of the gun or for injuries to persons or animals, or in case of death, caused voluntarily or involuntarily by the gun user.*  
*Armi Sport/ Chiappa Firearms is not responsible for injuries caused by poor maintenance, misuse of the gun, unauthorized or improper modifications.*  
*Armi Sport/ Chiappa Firearms declines responsibility for the indirect consequences of any injuries and / or death of persons or animals, damage to objects caused by use of the gun or by primer explosion, by bullet's ricochet, or unsafe loading practices and / or procedure.*

*The gun you own is an accurate 19th century replica. Consequently its safety devices are limited to the technological knowledge of the period. Therefore the risks in using a gun like this are higher compared to a modern design gun.*  
*The complete and full knowledge of your firearm may help you to avoid serious injuries due to lack of safety devices.*  
*Read the entire manual and learn the proper use of the gun without live ammunition. It is important that you understand the proper use of this product. The life of the people close to you may depend on your safety. If the manual is not clear, please contact the dealer where you bought the gun or call the distributor or the manufacturer by using the contact information provided within this manual.*

*All our guns are tested in the Armi Sport/ Chiappa Firearms facility. To guarantee the gun is safe, it is sent to the National Proof House of Gardone Val Trompia – BRESCIA – ITALY - for proof testing.*  
*The Proof House tests the firearm with heavy loads then checks the barrel, chamber and headspace to make certain the firearm is safe for use with standard factory ammunition.*  
*The National Proof House will put their markings on the gun, according to the Italian law, certifying the gun is qualified and can be sold.*

**THE COURT OF BRESCIA - ITALY, WILL SETTLE ALL DISPUTES.**

## 1892 Lever Action User's Guide

---

1. Read the instructions carefully before use.
2. Be aware that you are handling a firearm; therefore your knowledge and behaviour may affect your life and those of the people close to you.
3. Reading the manual and a careful examination of the gun are fundamental to avoid any kind of problem.
4. Guns and ammunitions must be kept in different places
5. ALWAYS keep guns and ammunitions out of reach of children.
6. Store the gun in a clean dry and airy place after use to avoid rust in mechanical parts that may cause serious problems in functioning after a period of inactivity.
7. After use it is always recommended to clean, oil and lubricate the gun with good quality oil.
8. The gun must ALWAYS be stored unloaded, ALWAYS check that the chamber is empty.
9. Being this firearm is a replica of original design, there is no modern safety. Pay great attention during transportation and use. Mechanical safety devices can fail. Developing intelligent, good safety habits is the best way to prevent accidents.
10. The only safety is the hammer half cock, read chapter on firearms use. REMEMBER: No mechanical safety device is infallible.
11. ALWAYS keep the gun unloaded when transporting it from home to the shooting areas. Carefully check that cartridge chamber is empty.
12. Keep away from open flame or heating sources.
13. Use only factory ammunition with specific loads intended for this firearm.
14. When you walk around with the gun in a shooting area, ALWAYS keep the muzzle pointed in a safe direction.
15. Never rest your finger on the trigger until the very moment you wish to shoot.
16. Never lean the weapon loaded and with a closed breech block, it could fall and cause injury and death.
17. Never shoot against a solid surface or in a pool of water, the projectiles could ricochet and shoot toward any direction.
18. Before shooting ALWAYS check to ensure that the barrel is free of obstructions.
19. After use, clean and lubricate the inside of the barrel with appropriate oil. Avoid grease or oil build up that can cause excessive pressure and result in serious personal injuries. Before using the gun again, inspect the barrel and chamber to make certain that there are no obstructions in the bore. Remove any oil residue with rod and dry patch before shooting.
20. Accumulation of rust in the barrel can cause excessive pressures resulting in serious injury and may cause the explosion of the barrel. A rusted, pitted or eroded barrel should be replaced.
21. Always wear shooting glasses when shooting to protect your eyes.
22. Use hearing protection to prevent hearing loss from repeated exposure to gunfire.
23. NEVER modify any parts of your gun. Any alteration may cause serious personal injury and voids the warranty.
24. Only a qualified gunsmith may service the gun for repair or serious maintenance.
25. Wash hands thoroughly after shooting and handling firearms to remove any unwanted residues.
26. Use exclusively factory loaded ammunition of the caliber specified on the firearm barrel. Use of different calibers may cause serious personal injuries to you and to people close to you.
27. In case of misfire, manually extract the cartridge from the chamber.
28. Do not attempt to re-use unexploded ammunitions.
29. Armi Sport/ Chiappa Firearms declines any responsibility for misuse of the firearm.
30. In case of alteration of the firearm, Armi Sport/ Chiappa Firearms declines any civil and penal responsibility and will not refund any damage.
31. The user is responsible for injuries or damages caused to him or to other persons.

## 1892 Lever Action User's Guide

32. Do not use alcohol or drugs before or during shooting session and while handling guns.
33. NEVER run with a loaded gun, don't cross any obstacle (fences or water courses, etc.) without having your firearm unloaded and in safety position.
34. Keep all bystanders behind you, standing beside a shooter is not a safe position.
35. Complete knowledge of your firearm can make the difference.

The codes for the above models are for the COLOUR CASE version; each version can be supplied with black finish with no surcharge; on request each weapon can be enriched with a beautiful engraving, selected or extra stock.

**Each firearm is duly submitted to strong testing, to grant the highest security of the product, by the Italian Proof House in Gardone Valtrompia.**

## Lever Action main parts nomenclature

## Lever Action Take Down

The 1892 and 1886 lever action models left a mark in the American history at the end of 19<sup>th</sup> century.

Armi Sport has reproduced a replica as close as possible to the original gun.

Magazine tube located below the barrel can take 7 to 14 shells according to caliber and model. (In the European version the number is limited to five due to local legislation). The safety (only half cock hammer) works the same as the original gun. Pay attention to safety. The Take Down version is extremely easy to transport thanks to the length reduction and furthermore allows the change of caliber with an interchangeable barrel (see chart).

These rifles are very well known also for the use in western movies.

## Instructions for use

Firmly shoulder your gun before firing, hold the forend, having the buttplate well against your shoulder to reduce recoil.

Chamber the cartridge swinging the lever, then close it completely.

During this action, the shell will go from the magazine tube through the receiver and up in the barrel chamber.

Take aim and when on target, squeeze the trigger.

Now to extract the empty shell from the chamber, open the lever briskly.

The extractor will eject the shell that will be thrown up and slightly on the right side.

While the shell is ejected, a new cartridge is coming into the receiver and when the lever is closed the loading cycle is completed.

During this phase strictly follow the recommendations shown in "Warning" paragraph concerning the safety aspects for you and bystanders.

### ***Loading the magazine***

First check the caliber of the ammunition to be the same as indicated on the barrel.

Failure to follow this instruction can result in severe damage to your gun and possible serious injury to yourself or others.

With the muzzle pointed in a safe direction, the lever must be completely closed to load the magazine. The hammer must not be cocked. With thumb securing hammer pull the trigger and slowly lower the hammer.

Press the loading gate inward with the tip of the first cartridge until all but the rim has entered the loading gate, then insert the next cartridge in the same manner, pushing the preceding cartridge into the magazine.

Repeat this procedure with each cartridge, but push the last cartridge past the end of the loading gate, allowing the gate to snap closed. Do not exceed the recommended capacity of the magazine.

**WARNING:** for a smooth loading, we advise to use **FLAT NOSE** cartridges. As to cartridges cal. 38 for model 1892, please make sure the minimum length is 39 mm (1,53 in).

## ***Finger position when levering***

Put the fingers (we suggest middle, ring and little fingers) in the loading lever loop.

**IMPORTANT:** the forefinger must be always kept out of the triggerguard and away from the trigger not to risk accidental discharge.

The thumb should be kept outward far from the hammer.

When the lever is completely forward you can see the shell going through the magazine to the receiver.

Close the lever also with firm and smooth action.

During this phase, the breech bolt has cocked the hammer.

an

## ***Hammer in safety position***

Hammer in safety position is strictly recommended when firing is not imminent and cartridge is chambered.

Hammer is at full cocked position when the action is cycled using the lever, now you can put in safety position. Place your thumb on the hammer and firmly hold it. While holding the hammer back, apply just enough pressure on the trigger to release it and gently lower the hammer. When the hammer is resting on the firing pin pull it slightly rearward until you hear the half cock click. This is the original safety position, if you pull the trigger, the hammer will not be released.

To start shooting you have to pull the hammer back to the full cock position.

Now you're ready to shoot.

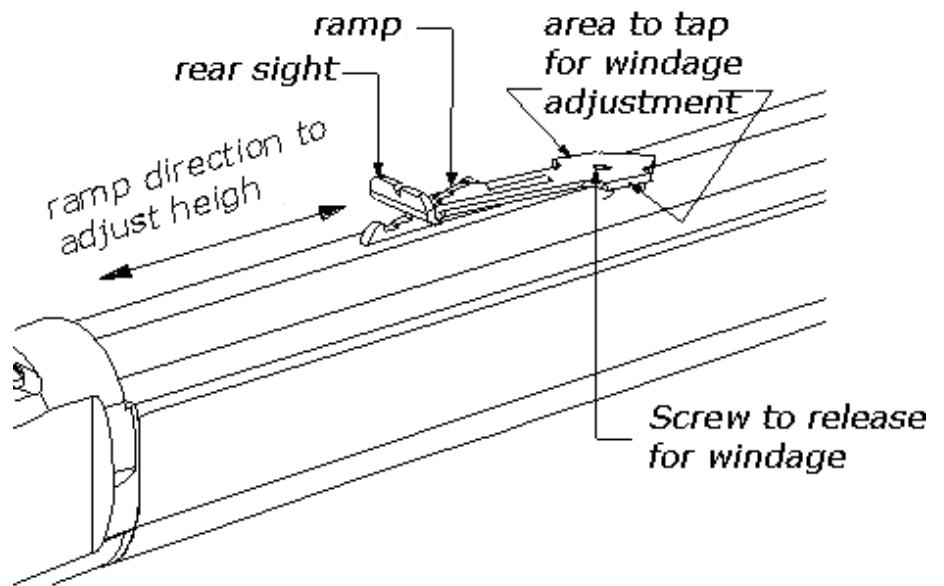

## Rear sight adjustment

The rear sight is manually adjustable to shoot higher or lower by moving the rear sight ramp by one or more notches.

This adjustment will allow the rear sight to be adjusted lower or higher.

It's possible to adjust the rear sight for windage by following these steps:

- loosen the screw on the upper front side of the sight.
- Take a non-marking brass, plastic or fiber hammer and gently tap the rear sight base to the left or to the right according to the direction you wish to move the point of aim.
- Tighten the screw again.

## Front sight adjustment

Front sight is also adjustable by loosening the specific screw.

The front sight will move left or right direction.

When placed in correct position, tighten the screw again.

## Main spring regulating screw

The power of the hammer percussion on the cartridge can be adjusted.

Use a screwdriver and work the screw shown in the drawing by tightening the screw the spring will be stronger. Loosening the screw the spring will be weaker.

## ***Area where serial number is marked under the receiver***

The serial number of the gun is visible under the receiver. It must not be removed or modified for any reason.

## ***Area marked by National Proof House***

House are lever.

Homologation marks of National Proof visible under the receiver near the

## ***Area of caliber, name of manufacturer and distributor.***

Marks of distributor and manufacturer, caliber are visible in the upper area of the barrel close to rear sight.

## Take Down version

This version, previously described, maintain same way of use of the Lever Action 1892 but with barrel interchangeable.

Here is how to change or disassemble it.

### *1<sup>st</sup> phase: magazine tube disassembly*

Open the lever under the magazine tube.  
Rotate the lever counter clockwise.  
During this operation the tube will slip off.  
When the tube is completely unscrewed,  
open the finger lever and leave it open.  
Note: light markings on the magazine tube  
resulting from disassembly are normal.

### *2<sup>nd</sup> phase: barrel rotation 90°*

Hold the stock in one hand and hold the forearm with the other.  
Twist firmly the forearm in clockwise direction so that the barrel and the forearm rotate 90°.  
Now slip off the barrel. To reassemble the rifle repeat the process in the reverse order, keeping the lever open during the operation.

### Magazine reduction removal

In Italy the Ministry of Interior has recently limited the maximum number of cartridges in the magazine for a rifle to be only five.

This rule has obliged us to use a **magazine reduction**.

**In other countries, where this limitation is not required, the device may be removed.**

Please check the drawing below carefully prior to proceeding with this operation. **WARNING: the magazine reduction cannot and must not be removed in the countries where the law require this limit.**

ARMI SPORT declines any responsibility on the violation of the device where there is such a rule, the person that will attempt with tampering will do it at his own danger and risk.

Please verify local legislation before any attempt of modification to the magazine capacity.

When the rod has been taken off, replace the plug in its seat.

In Take Down version there are two screws to disassemble.

### Ordinary and extraordinary maintenance

- Before performing any cleaning procedures, always make certain there are no cartridges in the chamber, magazine or action.
- "Ordinary maintenance" refers to actions the user should take to keep the gun in good working conditions.
- "Extraordinary maintenance" means to replace broken parts and therefore disassemble the gun. In this case only authorized personnel may or qualified gunsmith should take action.
- You should clean your Model 1892 after every day of shooting and more often if it becomes excessively dirty. Your qualified gun shop will suggest which lubricant would be better to use.
- Check the action to be smooth, in case the lever becomes hard to work, check internally for residue or fragments of leads or other debris.
- If the problem persists your gun should be taken to a qualified gunsmith to be examined carefully.
- Do not use pure silicon or lanolin.
- After extended period of heavy use or inactivity, your gun should be taken to a qualified gunsmith to have the action disassembled for professional cleaning and lubrication.
- In the following pages you will find exploded views with parts list
- When ordering parts, it's important to specify date of purchase, serial number, model, caliber and item reference of the part needed.
- If the gun has a problem that you cannot fix, DO NOT FIRE it but send it to an authorized center for a check-up
- Below are some suggestions to solve common malfunctions.

**Problems, causes, solutions**

Problems	Causes	Solutions
1-The shell does not go into the magazine tube	1- The lever is not fully closed.  -The magazine tube is already full.  -In Take Down version the magazine tube is not completely screwed in.	1-Close firmly the lever  -Screw in magazine tube
2- The shell does not go out of the magazine tube.	2- In Take Down the magazine tube is not completely screwed in.  -Magazine tube spring jamming  -Foreign body inside the tube	2-Screw in magazine tube  -Slightly hit the magazine tube to disengage it  -Disassemble the tube, clean it from residual of powder or other foreign matter.
3- The shell does not go into the chamber	3-Wrong caliber, too large  -Wrong maneuver in working the lever  - barrel entrance damaged	3- Check the caliber on the barrel and use the correct one indicated -Remove the shell in incorrect position and repeat the operation paying attention that the lever will make a complete run forward to lift up correctly the shell for chambering
4- The rifle doesn't shoot	4-Wrong caliber  -Defective primer in the cartridge  -Lever not correctly closed  -Weak hammer hit	-Remove any eventual residue or rust in the chamber  4-Check the caliber on the barrel and use the correct ammunition  -Manually remove the unexploded cartridge  -Firmly close the lever
5-The empty shell is not ejected	5-The extractor is broken  -Shell deformed and stuck	-Increase main spring tension with the regulating screw. See specific chapter.  5-Change the extractor

## WARRANTY CONDITIONS

Armi Sport guarantees that our products are scrupulously checked against defects in materials, workmanship and aesthetical and functioning problems.

In case you find a defect in one of our products, you should immediately contact the DEALER/SHOP/GUNSMITH where you have bought your gun. The seller will indicate the conditions for the repair, which will be either made directly by them or through our assistance.

**ATTENTION: end users are not allowed to ship any gun directly to Armi Sport for repair, either under guarantee or against payment. Transportation of weapons is strictly regulated and the documents which are required can solely be issued by companies with specific authorization.**

1. Armi Sport will warrant for structural or project defects without any time limit.
2. Armi Sport guarantees, for a year after the purchase date, the free substitution of parts for defects which have been found out also during use: wear of parts which shouldn't be subject to wear, or excessive wear of parts subject to wear. The customer will have to give evidence of the purchase date with a bill or other valid proof.
3. In case the defect under cover of guarantee is not repairable, Armi Sport will provide for a free substitution of the weapon.

ARMI SPORT RESERVES THE INSINDACABLE FACULTY OF DEFINING THE TYPE OF DEFECT OF THE WEAPON, AND THEREFORE TO STATE WHETHER THE DEFECT IS COVERED BY GUARANTEE –Armi Sport's decision will be fair but final.

Armi Sport will be allowed a timing of 60 days for repair under guarantee, and 90 days for free substitution.

We strongly recommend that you keep the receipt  
or proof of purchase for any Armi Sport product

**THE GUARANTEE IS VOID IN CASE:**

- Inadequate ammunition has been used (any ammunition but those commonly on sale, reloaded ammunition, different from caliber and specification indicated on the gun barrel)
- The gun failed to be provided proper maintenance and cleaning
- The gun has been modified without our prior consent
- Unauthorized, inadequate or incorrect repairs have been carried out
- Parts subject to wear and corrosion
- Damage (improper use of the gun by the user)
- Expiry of the guarantee

In the above cases the repair, if carried out, will be charged to the customer

## 1892 Lever Action User's Guide

---

The guarantee does not cover parts subject to wear and corrosion

*In case non original spare parts are used, the guarantee or any service contract with Armi Sport will be void.*

**ATTENTION:** delivery expenses to and from the service center are not covered by the guarantee and will be charged to the customer.

In case, for any valid reason, you do not have the possibility to obtain repair under guarantee at the shop where you bought the gun, you may contact us directly; we will indicate a local dealer to support you with the repair file:

e-mail: [info@armichiappa.com](mailto:info@armichiappa.com) - Phone: +39/030/9749065  
USA: e-mail: [info@chiappafirearms.com](mailto:info@chiappafirearms.com) - Phone: 937-835-5000

**Should Armi Sport become aware of a defect of the rifle during the guarantee period, the defective part will be substituted free of charge.**

**This instruction manual must always follow the firearm, also in case the owner should change**

### Procedure for the usage of the guarantee

BEFORE shipping the weapon back for repair, the customer should contact the gunshop where the product was bought. The customer should supply proper information on the defect, and the relevant file will then be started.

The gun shop will be given an "NDR" (Repair Number). The weapon will have to be shipped back to the gun shop in its original packing, with a copy of the purchase date, the Guarantee Form (attached) duly filed with indication of the NDR number, according to the instructions of the dealer.

**WARNING:** the returned gun must be protected with an adequate packaging; any damages occurred during transportation and handling will be the customer's responsibility

**Request form**

**REPAIR UNDER GUARANTEE**

NdR NDR :

**Please write in the above box  
the Repair Number you were  
given by the gun shop**
