Introduction

Thank you for choosing "KIVOS" wireless video peephole viewer. Please read this Manual carefully to fully understand its usage, perfect functions and simple operation.

The Company reserves the right to modify this Manual from time to time without prior notice.

Before using this product, please read these Attentions carefully to ensure safe and proper operation of this product.

Safety Warning & Attention

1. Attention

- Do not place this product on an uneven or unstable table-board to prevent failure or damage caused by falling.
- Only the battery and charger designated by the Company can be used on this product. Application of other products may lead to leakage, overheating, blowout and fire of the battery.
- Do not violently strike, shake or toss the wireless video door phone to prevent failure and fire caused to the wireless video door phone.
- Do not put battery, charger or wireless video door phone in the microwave oven or high-pressure device; otherwise, damage and fire of electrical circuit and other accidents may be caused.
- Do not use this product in a place with flammable and explosive gas; otherwise, amount of dust; otherwise, product failure may be caused.
- Do not place this product in a place with high temperature, high humidity or large amount of dust; otherwise, product failure may be caused.

2. Attention for operation of this product

- Do not apply force on LCD screen or knock other objects with it, otherwise, breakage and damage of LCD panel and seepage of crystalline liquid will be caused. If the crystalline liquid enters your eyes, there will be danger of amblyopia. Wash your eyes (be sure not rub your eyes) and go to see the doctor immediately.
- Do not dismantle or remodel this product, otherwise, damage, creepage and electrical fault may be caused to this product.
- Do not press the keys with a pin, stump of pen/pencil and other keen-edged objects; otherwise, damage or misoperation will be caused.
- Place tiny metal objects such as drawing pin at a place far away from the speaker. As the speaker has magnetic property while working, it will attract these tiny metal objects, which may lead to personal injuries or damage of the speaker.
- Do not project the lens at strong light source, such as the sun and so on; otherwise, damage of the image sensor may be caused.
- Do not press the terminal of lens with much force; otherwise, personal injury or damage of the device may be caused.

3. Attentions for operation of charger

- You may charge the device with a charger or through a USB data line connected to the computer.
- Charge with 100-240V alternate current; creepage, fire and damage of the mobile phone and charger may be caused if other voltage is used.
- It is forbidden to shortcircuit the charger, otherwise, electrical shock, smoke and damage of the charger will be caused.
- Do not use the charger at the time when the power cord is damaged, otherwise, fire and electrical shock will be caused.
- Clear away the dust accumulated on power outlet ASAP.
- Do not place a vessel used to retain water beside the charger to prevent overheating, creepage and failure of charger caused by spilling water.
- If the charger is in contact with water or other liquids, disconnect the power supply immediately to prevent overheating, fire, electrical shock and failure of the charger.
- Do not dismantle or remodel the charger, otherwise, personal injury, electric shock, fire and damage of charger may be caused.
- Do not use the charger in places with high humidity such as bathroom, otherwise, electric shock, fire and damage of the charger will be caused.
- Do not touch the charger, electrical line and power outlet with wet hand(s), otherwise, electric shock may be caused.

- Do not place heavy objects on the electrical line or refit the electrical line, otherwise, electric shock and fire will be caused.
- Before cleaning and maintenance, first pull the plug off the power outlet.
- Grasp the charger while pulling off the plug, as pulling the electrical line will lead to damage of electrical line, electric shock and fire.

4. Operation and maintenance

- Please keep this product dry, as rainwater, moisture, humidity and liquids or moisture content may contain mineral matters that erode the circuit.
- Do not keep this product in any place with high temperature. As high temperature may shorten the lifespan of electronic device, damage the battery and cause deformation or melting of certain plastic parts and components.
- Do not keep this product in any place with low temperature. As when being moved from a place with low temperature to a place with normal temperature, it may generate humidity inside, which may cause damage of circuit board.
- Do not attempt to dismantle this product. As improper handling by nonprofessional personnel may cause damage of the device.
- Do not toss, knock or shake this product, as tough operation mode may damage the motherboard inside the device.
- If this product is made wet by mistake, shut it down and take it out of the host machine holder, remove the battery, and restart the product after confirming it complete dry in 24 hours.
- Do not have the metal parts (specially configured interfaces of charger and data line excluded) in contact with charger interface to avoid short circuit.
- Use clean and dry soft cloth to clean the lens, infrared lamp and light sensor.

Warning: improper operation will void warranty!

Product Overview - Model: **KDB307**

Wireless Video Peephole Viewer

1. Characteristics and application

- Fashion appearance – adopt European design, full of modern science and technology feeling, suitable for houses of various decorative styles.
- Hidden antenna – adopt built-in antenna design, protect the antenna effectively.
- Extra large range of vision – an extra wide angle viewable.
- High-resolution color LCD screen – adopt 3.5-inch mainstream TFT digital LCD screen, achieve outstanding clarity.
- High-resolution digital camera – adopt 300,000 pixels digital camera, image focusing vivid and clear.
- High speed transmission – image transmission speed is 25fps, the image is clear and fluent.
- One-key display – simple and convenient to use, view the outdoor scenes and take photos just by pressing down one key.
- Charge-and-record supported – without the need to worry that the operation will be affected due to depletion of electrical quantity.
- Auto circulating memory –100 photos auto circulating stored.
- USB data charging wire – charge through the USB interface.
- Long distance transmission – communication distance can reach 150 meters in open space.
- Frequency range – adopt 2.4G ISM digital public frequency range: 2402~2483.5MHz
- Adaptive frequency hopping technique – adopt AFH (Adaptive Frequency Hopping Technique), produce communication frequency and Auto-Sync frequency randomly.
- DIY installation, its applicable to the door with peephole: fi 14~40mm, door thickness: 40~100mm.

2. Performance parameters:

Serial no.	Specifications	Technical parameters
Outdoor unit	Power	Specific lithium battery BP-6M(1100mAh)
	Consumption	160mA
	Outline dimension	26*5 mm
	Weight	300 g
	Environmental condition	Temperature: -10°C~+50°C
	Waterproof grade	IP66
	Placement	Peephole
	Surface material	Metal
	Camera	300,000 pixels
	View angle	120° wide angle
	Night vision pattern	N/A
	Working time	3 hours continuously
	Standby time	1200hours
	Charge time	3hours
	External power	DC5V 1A
Indoor monitor	Power	Specific lithium battery BP-6M(1100mAh)
	Consumption	200mA
	Outline dimension	126*84*20mm
	Weight	110g
	Environmental condition	Temperature: -0°C~+40°C
	Placement	table style (handheld)
	LCD size	3.5" TFT color screen
	Wireless communication mode	2.4GHz
	Images spread	25fps
	Working time	4 hours continuously
	Standby time	500 hours
	Charge time	3 hours
	External power	DC5V 1A
	Application distance	About 150m in open space

Product Diagram

Outdoor Unit & Emitter

Indoor monitor

Key introduction:

A. Handset Keys (4pcs Key):

1. ("ON/OFF"key: as a power "ON/OFF" key, code match when short press it.
2. ( Function key): as a photo-taking key, and a delete setting key when long press it
3. ( Preview key): as a preview key when short press it.
4. ("OK"View key): work as monitor key for standby mode

B. Outdoor unit keys

1. Reset: match the communication code with the handset

Installation Guide

Outdoor unit shall be installed at 1.4~1.7 meter above the floor, and the camera shall avoid facing the sunlight directly.

Wireless peephole viewer includes "outdoor unit", "launcher", "handset" and "Table type charging station". Outdoor unit and launcher are fixed on the peephole of security door with screws. The product is applicable to the door hole: fi 14~40mm, door thickness:40~100mm. The general assembly drawing is shown in Diagram 1.

Warm warning: flexible connection wire is a kind of delicate goods, be sure to install it carefully. Do not pull it with force to avoid being injured by sharp metal parts

Installation Steps

Diagram 1

Diagram 2

1. Thread the outdoor unit (with flexible connection wire) through the peephole of security door, and also the flexible connection. Put the outdoor unit in a correct place with keystrokes at downside and camera hole at upside. Peel off the bottom side of the double-side adhesive tape, and stick it on the door lightly in the way as shown in Diagram 2.

Diagram 3

Diagram 4

2. Connect the flexible connection with the connection base of launcher in the way as shown in Diagram 3.

- Open the black cover of emitter.
- Insert the metal side of flexible connection interface into the connection base downward.
- Depress the black cover, you can hear a clicking sound.

Attention: the direction of metal surface in Step 2 is downward, misconnection would cause the doorbell unusable.

3. Move the screw hole on launcher to a corresponding position on outdoor unit, if the flexible connection is slightly long, push the central part of the connection line back into the door hole to make the naked part firmly stuck into the trunking of launcher, peel off the body paper of the double faced adhesive tape, thread M4 screw bolt through the launcher to the outdoor unit, tighten the screw bolt, and then install the screw cover as shown in Diagram 4.

Attentions during Installation

1. The outdoor photosensitive sensor should not be hidden or blocked by other objects.
2. Do not face outdoor unit to sunlight directly.
3. Install the connection line correctly, otherwise, normal use shall be failure .

Battery Installation

1. Parallel move the battery cover downward, and take it off.
2. Insert the lithium battery along the battery jar and set it level, mind the front and reverse side of the battery.
3. Fit on the battery cover.

Functions and Applications

1. Outdoor Unit Starting Up

Connect to external power to start up. The power source is only battery, main MCU is woken about every one second. Sleep mode is in saving power mode, red lamp flashes once every four seconds; when battery is in low power, red lamp flashes every one second to remind you to charge.

2. Starting Up & shutting down

Install battery to handset, long press "ON/OFF key" about 3 seconds to start up (about 1 second after shutdown), logo shall be displayed on screen with a sound of "Beep". Turn into standby mode.

- Display: standby picture, signal sign, power sign, time & date
- In this mode, the screen gets dark after several seconds and turn into power saving mode, the red LED flashes every 4 seconds. The screen would be lighted if press again.
- When battery is in low power (≤ 1 bar), red LED flashes every one second. It remains you to charge it.
- In standby mode, long press "Switch key" about 3 seconds to shut down.

3. Monitoring

In standby mode, press "OK" monitor key on handset to monitor call. If outdoor unit receives signal in 5 seconds, then it connects with outdoor unit, handset turns into normal monitor mode and shows image of outside. It will be in monitoring. If the handset doesn't receive signal in 5 seconds, it turns back to standby mode automatically.

4. Photo-taking

Photo: in monitor mode: if you press photo-taking "📷" you make one press one photo.

End: in monitor mode if you press "OK" monitor key - end monitor and turn back to standby mode.

5. Photo Preview

When the screen lights up

Preview: long press "▶️" preview key", display the latest pictures which are ranked by time, the latest one is on the top list.

Check: press "▶️" key", check previous photo

Exit: finish the operation, press "📷" key to exit photo preview.

6. Delete

Delete: Long press "📷" information "Erase" will be displayed on screen, you can delete: all photos

Note: All photos will be deleted!

7. Match code setting

When the screen lights up:

- short press the "ON/OFF" key-»the screen will display "Pairing start";
- Meanwhile, use a paperclip to press "Reset" key of the launcher-»red lamp flashes and then match the code.
- If there is image on handset, code match succeeded; otherwise, match the code again.

Battery and Charge

- Be sure the activity of the battery, please fully charged the new battery.
- When the outdoor unit is at low power, the lamp of launcher would flash. It remains you to charge.
- The battery of outdoor launcher can be changed or charged by USB. The red light keeps bright.
- When the Indoor monitor is at low power (≤ 1 bar), the red indicator lamp will flash every second, please charge immediately
- The Indoor monitor can be charged by the table type holder or by USB, green light keeps bright.
- Charge-and-work supported. When the battery is charged fully, it auto stops charging.
- Battery type: high-quality lithium battery, please use the BP-6M model battery if it needs replacement
- Charging and battery attentions, please reference the chapter "Warms and attentions" in this manual

Notice: Under the low power, display, photo-taking functions can't work normally.

Configuration

User Manual	1piece
Warranty Card	1 piece
Outdoor unit	1piece
Indoor monitor	1 piece
Charger (DC5V)	1piece
USB data Line	1 piece
Lithium battery (BP-6M)	2 pieces
Screw M4	1piece

Statement

This product maximum supports 1outdoor units to 3 Indoor monitor .The door phone has finished code match and can be used directly.

If you need more pieces of indoor monitors or outdoor units, please contact your local distributors .

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
