# Hovo 510 Series Quick Start Guide

**\*\*\*The product is not intended to replace traditional AC power vacuum cleaner.\*\*\***

**Step 1. Unit And Accessories Check**
Refer to Package Contents (Page 2 of User Manual)
**Hovo 510 model has normal filters. Hovo 510 Plus model has HEPA filters.**

**Step 2. Install Battery**
Battery is pre-installed inside battery compartment. Refer to page 3 of User Manual for battery compartment location.
Please remove battery if you will not use unit for long period of time.
If unit encounters any unknown error, you can reset system by removing battery out for 10 minutes.

**Step 3. Charge Battery**
Recharge battery manually for 4 hours before your first time usage.
Refer to Manual Charging & Auto Charging Section of User Manual (page 7).
**Reminde**r – power switch must be turned on before battery can be recharged properly.

**Step 4. Start Cleaning**
Refer to Cleaner Operation Section of User Manual (page 6).

**Reminder**:
- Do not put virtual block next to charging station; otherwise, unit can not do docking correctly.
- If unit can not do docking to charging station, try to do Code Check, refer to page 11 of User Manual. Push Code Check button and red light should be off and then power on unit.
- Clean hairs from main brush, rubber brush and side brush if they are not spinning freely.
- Always turn power switch off if unit is not on charging station or unit finishes cleaning or transport unit to preserve battery power.
